LOICZ Outreach

LOICZ research is being communicated and taught through workshops which result in the publication of the Reports and Studies Series.

Developments within LOICZ are published in a Newsletter and regular (multi annual) reports for general reference to activities, accomplishments and progress.

Scientists involved in LOICZ also publish their results in a wide range of scientific journals, conference proceedings and manuals.

The LOICZ IPO provides and maintains an interactive database and search engine for affiliated projects which enables world wide exposure and promotion of individual projects and scientific activities
