

Data needs working group

Key guiding questions

1. What do we need the data for?
2. What types of data is needed to support country needs?
3. What are key data issues in the country?
 - data availability & gaps (availability, adequate data?)
 - data storage, access& use
 - capacity to use to support country needs (analysis, application of data) (for what needs?).
 - reporting against national goals, regional and international obligations
4. What is the way forward:
 - minimum data system/ sets required?
 - addressing data gaps
 - addressing access & use issues
 - reporting challenges
