

Name \_\_\_\_\_

**Exercise 1**  
**Monday, 24 March 2008**

Among the four components of coastal habitats (wetland, seagrass, coral reef, and mangroves), please select only one component you are most familiar with.

- (1) Identify its functions and provide examples of main uses (goods and services) associated with them
- (2) For each use, identify type of benefits contributed to the society (i.e., whether the “use or non-use values”, just check ✓ in the appropriate box)

Selected coastal habitat: .....

<i>Ecosystem function</i>	<i>Description of function</i>	<i>Examples of uses</i>	<i>Use value</i>		<i>Non-use value</i>
			<i>Direct use</i>	<i>Indirect use</i>
