

Annex

Inventory of domestic and international legal documents of the People's Republic of China and the Republic of Korea related to marine environmental protection

As of October 2019

Table of Contents

Preface.....	1
Inventory of domestic legal sources related to marine pollution of the People's Republic of China and the Republic of Korea	2
Part I Chinese Legal Sources on Marine Pollution	2
Chapter I Overview.....	2
Chapter II Authorities Arranged Based on the Domestic Legal System.....	2
Chapter III Full Texts of Laws Relevant to Marine Pollution	5
Chapter IV Full Texts of Regulations Relevant to Marine Pollution	451
Chapter V Full Texts of Measures Relevant to Marine Pollution	543
Chapter VI Full Texts of Judicial Interpretations Relevant to Marine Pollution.....	590
Chapter VII Full Texts of Important National Policies Relevant to Marine Pollution.....	611
Part II Legal Sources on Marine Pollution of the Republic of Korea.....	633
Chapter I Overview.....	633
Chapter II Legal Sources Relevant to Marine Pollution.....	633
Inventory of international authorities related to marine pollution effective for the People's Republic of China and the Republic of Korea	1586
Part I Multilateral Agreements	1586
Part II Policy Documents	1588
Part III Bilateral Agreements.....	1593

Preface

The Yellow Sea plays critical roles for the overall environment, economy and society of the three neighbouring countries. However, the semi-closed nature of the Yellow Sea and the rapid development of the surrounding area have rendered an increasingly polluted and over-exploited area. This large marine ecosystem faces major transboundary problems, inter alia, pollution and contaminants, eutrophication, plankton community changes, habitat loss and degradation, climate change related issues.

UNDP/GEF YSLME Phase II Project is built upon four years' regional cooperation for the sustainable use of the Yellow Sea Large Marine Ecosystem put in place by China and the Republic of Korea, supported by the DPRK, the Yellow Sea Partnership and the GEF. The initial project completed a regional Transboundary Diagnostic Analysis and finalized a regional Strategic Action Programme (SAP).

Component 3 of the Strategy aims at improving ecosystem carrying capacity with respect to regulating and cultural services. Output 3.3.1 of Component 3 is specifically entitled with "Strengthened legal and regulatory processes to control pollution", though marine pollution control could be related to all ecological services. The charge thus can be divided into two Activities, the first from legal perspective and the second technological, according to the agreed Project Document.

Activity One as the main task for the present consultancy project may be further broken into three sub-activities which are as follows: 1) review of policies and regulations in China and RO Korea dealing with pollution control, 2) assess compliance with UNCLOs, the Future We Want, multi-lateral environmental agreements and programmes ratified by China and RO Korea, and 3) prioritize legal and regulatory reforms at domestic level.

Review of current policies and regulations on pollution control can lead to not only a library for policy-makers for informed decisions but also to precisely find their inherent inconsistencies and gaps including those as described in SAP for YSLME and propose targeted solutions. Compliance assessment with applicable agreements establishes a two-way channel by which domestic regulations and policies can be analyzed and improved to be compliant with international or regional standards, and best domestic practices may be identified and populated into related agreements in future.

For the purpose of satisfactory implementation of Activity One of Output 3.3.1 of Component 3, the first step is apparently to compile two inventories as described in the TOR, i.e. *Inventory of domestic legal sources on marine pollution of the People's Republic of China and the Republic of Korea* and *Inventory of transnational authorities on marine pollution effective both for the People's Republic of China and the Republic of Korea*. The interim report hereby submitted has largely finished the compilation of the inventories, which will be used as a starting point for the following stages of systematic review, compliance assessment, and improvement recommendation.

Inventory of domestic legal sources related to marine pollution of the People's Republic of China and the Republic of Korea

Part I Chinese Legal Sources on Marine Pollution

Chapter I Overview

The domestic legal sources of China on marine pollution heavily rely on its administrative laws and regulations while some other important provisions are reflected in its civil law, criminal law, procedural law and their judicial interpretations. Policies in particular formulated by the Central Committee of CPC or the State Council despite of their non-legally binding nature may play critical role for marine environmental stake-holders as well, which should not be underestimated. Domestic authorities in this report are arranged mainly based on Chinese legal system, i.e. (1) Laws enacted by the National People's Congress (NPC) or its Standing Committee, (2) Regulations formulated by the State Council, (3) Measures formed by the administrative departments of the State Council or (4) the local governments, (5) Regulations adopted by the Local People's Congress, and (6) Judicial Interpretations promulgated by the Supreme People's Court, besides with (7) National Policies with significant values.

Chapter II Authorities Arranged Based on the Domestic Legal System

1. Laws

- (1) Environmental Protection Law of the People's Republic of China
- (2) Marine Environmental Protection Law of the People's Republic of China
- (3) Law of the People's Republic of China on Environmental Impact Assessment
- (4) Law of the People's Republic of China on the Administration of Sea Areas
- (5) Water Pollution Prevention and Control Law of the People's Republic of China
- (6) Law of the People's Republic of China on the Prevention and Control of Environment Pollution Caused by Solid Wastes
- (7) Law of the People's Republic of China on Prevention and Control of Radioactive Pollution
- (8) Fisheries Law of the People's Republic of China
- (9) Law of the People's Republic of China on Ports
- (10) Atmospheric Pollution Prevention and Control Law of the People's Republic of China
- (11) Maritime Law of the People's Republic of China
- (12) Wild Animal Conservation Law of the People's Republic of China
- (13) Environmental Protection Tax Law of the People's Republic of China

- (14) Emergency Response Law of the People's Republic of China
- (15) Tort Law of the People's Republic of China
- (16) Public Security Administration Punishments Law of the People's Republic of China
- (17) Criminal Law of the People's Republic of China
- (18) Civil Procedure Law of the People's Republic of China
- (19) Administrative Litigation Law of the People's Republic of China
- (20) Special Maritime Procedure Law of the People's Republic of China
- (21) Resolution of the Standing Committee of the National People's Congress on Comprehensively Tightening Ecological and Environmental Protection and Lawfully Promoting Triumph in the Uphill Battle for Prevention and Control of Pollution

2. Regulations (by the State Council)

- (1) Regulations of the People's Republic of China on Nature Reserves
- (2) Regulation on Environmental Impact Assessment of Planning
- (3) Regulations on the Administration of Construction Project Environmental Protection
- (4) Administrative Regulation on the Prevention and Treatment of the Pollution and Damage to the Marine Environment by Marine Engineering
- (5) Regulations of the People's Republic of China Concerning Environmental Protection in Offshore Oil Exploration and Exploitation
- (6) Administrative Regulation on the Prevention and Control of Pollution Damages to the Marine Environment by Coastal Engineering Construction Projects of the People's Republic of China
- (7) Regulations of the People's Republic of China on the Dumping of Wastes at Sea
- (8) Regulation on the Prevention and Control of Vessel-induced Pollution to the Marine Environment
- (9) Regulations on the prevention of environmental pollution by ship recycling
- (10) Regulations of the People's Republic of China Governing Survey of Ships and Offshore Installations
- (11) Regulations on the prevention and control of marine pollution caused by land-based sources
- (12) Regulation on the Safety Management of Radioactive Waste
- (13) Regulations of the People's Republic of China on the Protection of Aquatic Wild Animals
- (14) Detailed Rules for the Implementation of Fisheries Law of the People's Republic of China
- (15) Regulation on the Implementation of the Environmental Protection Tax Law of the People's Republic of China

3. Measures (by the administrative departments of the State Council)

- (1) Measures for the Implementation of the Regulation of the People's Republic of China on the Administration of Environmental Protection for Offshore Oil Exploration and Exploitation
- (2) Interim Provisions on Administration over the Abandonment and Disposal of Offshore Oil and Gas Production Facilities
- (3) Measures for the Implementation of the Regulations of the People's Republic of China on the Dumping of Wastes at Sea
- (4) Administrative Provisions of the People's Republic of China on the Prevention and Control of Marine Environmental Pollution by Vessels and Their Operations
- (5) Provisions on Safety Production and Environmental Protection for Ship Recycling
- (6) Rules on Supervision and Administration of Ship Recycling
- (7) Measures for the Implementation by Competent Environmental Protection Departments of Consecutive Daily Penalties
- (8) Measures for Pollutant Discharge Permitting Administration
- (9) Directory of National Hazardous Wastes

4. Regulations (by the Local People's Congress)

- (1) Regulations on Marine Environmental Protection of Jiangsu Province
- (2) Regulations on Administration of Sea Areas of Jiangsu Province
- (3) Regulations on Marine Environmental Protection of Shandong Province
- (4) Regulations on Environmental Protection of Dalian Municipality
- (5) Regulations on Administration of Sea Ranches of Lianyungang Municipality
- (6) Regulations on Protection of Coastal Zones of Weihai Municipality

5. Measures (by the local governments)

- (1) Measures on Protection of Fishery Resources of Shandong Province
- (2) Measures on Marine Environmental Protection of Liaoning Province
- (3) Provisions of Marine Environmental Protection of Qingdao Municipality

6. Judicial Interpretations

- (1) Provisions of the Supreme People's Court on Several Issues Concerning the Trial of Cases of Disputes over Compensation for Vessel-induced Oil Pollution Damage
- (2) Provisions of the Supreme People's Court on Several Issues Concerning the Trial of Marine Natural Resources and Ecological and Environmental Damage Compensation Disputes

- (3) Provisions of the Supreme People's Court on Several Issues Concerning the Application of Law in the Trial of Disputes over Liability for Environmental Torts
- (4) Provisions of the Supreme People's Court on Several Issues Concerning the Application of Law in the Conduct of Environmental Civil Public Interest Litigations
- (5) Provisions of the Supreme People's Court and the Supreme People's Procuratorate on Several Issues concerning the Application of Law in the Handling of Criminal Cases of Environmental Pollution

7. National Policies (by the Central Committee of CPC and/or the State Council)

- (1) The CPC Central Committee's Decision on Some Major Issues of Comprehensive Reform
- (2) Opinions of the CPC Central Committee and the State Council on Accelerating the Ecological Civilization Construction
- (3) Integrated Reform Plan for Promoting Ecological Progress
- (4) Opinions of the Central Committee of CPC and the State Council on Comprehensively Tightening Ecological and Environmental Protection and Firmly Fight in the Uphill Battle for Prevention and Control of Pollution
- (5) National Major Marine Functional Zoning Plan
- (6) Outline of National Land Planning (2016-2030)
- (7) The 13th Five-Year Plan for the Protection of Ecology and Environment
- (8) Several Opinions of the State Council on Promoting the Sustainable and Healthy Development of Marine Fishery
- (9) Action Plan for Prevention and Control of Water Pollution
- (10) Outline of the 13th Five-Year Plan for the National Economic and Social Development of the People's Republic of China
- (11) Opinions of the General Office of the State Council on Improving the Compensation Mechanism for Ecological Protection
- (12) Wetland Protection and Restoration Program
- (13) Several Opinions on the Delineation and Observance of the Red Line of Ecological Protection

Chapter III Full Texts of Laws Relevant to Marine Pollution

1. Environmental Protection Law of the People's Republic of China

(Adopted at the 11th session of the Standing Committee of the Seventh National People's Congress on December 26, 1989, and revised at the 8th session of the Standing Committee of the Twelfth National People's Congress on April 24, 2014)

Chapter I General Provisions

Article 1 This Law is developed for the purposes of protecting and improving environment, preventing and controlling pollution and other public nuisances, safeguarding public health, promoting ecological civilization, and enhancing sustainable economic and social development.

Article 2 For the purposes of this Law, “environment” means the entirety of all natural elements and artificially transformed natural elements that affect the survival and development of human beings, including but not limited to air, water, seas, land, minerals, forests, grasslands, wetland, wildlife, natural and cultural relics, nature reserves, scenic spots, historical sites, and urban and rural areas.

Article 3 This Law shall apply to the territory of the People's Republic of China, and other sea areas under the jurisdiction of the People's Republic of China.

Article 4 Protecting environment is a fundamental national policy of the state.

The state shall adopt economic and technological policies and measures conducive to economically and cyclically utilizing resources, protecting and improving environment and enhancing the harmony between mankind and nature to coordinate economic and social development with environmental protection.

Article 5 Environmental protection shall adhere to the principles of giving priority to protection, focusing on prevention, conducting comprehensive treatment, engaging the general public, and enforcing accountability for damage.

Article 6 All entities and individuals shall have the obligation to protect environment.

The local people's governments at all levels shall be responsible for the environmental quality within their respective administrative regions.

Enterprises, public institutions, and other businesses shall prevent and reduce environmental pollution and ecological disruption, and assume liabilities for damage caused by them.

Citizens shall raise their awareness of environmental protection, adopt low-carbon and economical lifestyles, and conscientiously fulfill their obligation to protect environment.

Article 7 The state shall support scientific and technological research, development, and application for environmental protection, encourage the development of environmental protection industries, promote the information technology development for environmental protection, and increase the scientific and technological level of environmental protection.

Article 8 The people's governments at all levels shall provide more financial input in the protection and improvement of environment and the prevention and control of pollution and other public nuisances, and increase the utilization efficiency of financial funds.

Article 9 The people's governments at all levels shall strengthen the publicity and dissemination of information on environmental protection, encourage basic-level self-governing organizations of the masses, social organizations, and environmental protection volunteers to conduct publicity of environmental protection laws and regulations and environmental protection knowledge, and create a favorable atmosphere for environmental

protection.

Education administrative departments and schools shall include environmental protection knowledge in school education to cultivate students' awareness of environmental protection. News media shall publicize environmental protection laws and regulations and environmental protection knowledge, and oversee environment-related illegal acts.

Article 10 The environmental protection administrative department of the State Council shall generally supervise and administer the national environmental protection work, while the environmental protection administrative departments of the local people's governments at and above the county level shall generally supervise and administer the environmental protection work within their respective administrative regions.

The relevant departments of the people's governments at and above the county level and the environmental protection departments of the armed forces shall supervise and administer resource protection, pollution prevention and control, and other environmental protection work in accordance with the provisions of relevant laws.

Article 11 The people's governments shall reward outstanding entities and individuals in protecting and improving environment.

Article 12 Environment Day is celebrated on June 5 every year.

Chapter II Supervision and Administration

Article 13 The people's governments at and above the county level shall include the environmental protection work in their plans on national economic and social development. The environmental protection administrative department of the State Council shall, in conjunction with the relevant departments, develop a plan on national environmental protection in accordance with the plan on national economic and social development, and submit it to the State Council for approval, publication, and implementation.

The environmental protection administrative departments of the local people's governments at and above the county level shall, in conjunction with the relevant departments, develop the plans on environmental protection for their respective administrative regions in accordance with the requirements of the plan on national environmental protection, and submit them to the people's governments at the same level for approval, publication, and implementation.

A plan on environmental protection shall include the objectives and tasks of and safeguards for ecological protection and pollution prevention and control, and be connected with the major function zoning plan, comprehensive plan on land use, and urban and rural development plan, among others.

Article 14 In organizing the development of economic and technological policies, the relevant departments of the State Council and the people's governments of all provinces, autonomous regions, and municipalities directly under the Central Government shall fully consider the environmental impact thereof, and hear the opinions of the relevant parties and experts.

Article 15 The environmental protection administrative department of the State Council shall

develop the national environmental quality standards.

For matters not included in the national environmental quality standards, the people's governments of provinces, autonomous regions, and municipalities directly under the Central Government may develop local environmental quality standards; and for matters included in the national environmental quality standards, they may develop local environmental quality standards higher than the national standards. Local environmental quality standards shall be submitted to the environmental protection administrative department of the State Council for recordation.

The state shall encourage research on environmental criteria.

Article 16 The environmental protection administrative department of the State Council shall develop the national pollutant discharge standards in accordance with the national environmental quality standards and the national economic and technological conditions.

For matters not included in the national pollutant discharge standards, the people's governments of provinces, autonomous regions, and municipalities directly under the Central Government may develop local pollutant discharge standards; and for matters included in the national pollutant discharge standards, they may develop local pollutant discharge standards higher than the national standards. Local pollutant discharge standards shall be submitted to the environmental protection administrative department of the State Council for recordation.

Article 17 The state shall establish and improve environmental monitoring rules. The environmental protection administrative department of the State Council shall develop monitoring norms, organize a monitoring network in conjunction with the relevant departments, develop a general plan on the distribution of national environmental quality monitoring stations (points), establish a monitoring data sharing mechanism, and strengthen the administration of environmental monitoring.

The distribution of various types of environmental quality monitoring stations (points) for the relevant industries or specialties shall comply with the requirements of laws and regulations and the monitoring norms.

Monitoring institutions shall use monitoring equipment up to the national standards, and comply with the monitoring norms. Monitoring institutions and the persons in charge thereof shall be responsible for the truth and accuracy of monitoring data.

Article 18 The people's governments at and above the provincial level shall organize the relevant departments or commission specialized institutions to survey and assess the environmental condition, and establish an environmental and resource carrying capacity monitoring and early warning mechanism.

Article 19 An environmental impact assessment shall be conducted as legally required in the preparation of a relevant development and utilization plan or the construction of a project impacting the environment.

A development and utilization plan that has not undergone environmental impact assessment as legally required may not be implemented. The construction of a construction

project that has not undergone environmental impact assessment as legally required may not be commenced.

Article 20 The state shall establish a coordination mechanism across administrative regions for the joint prevention and control of environmental pollution and ecological disruption in key regions and valley areas, and apply a uniform plan, uniform standards, uniform monitoring, and uniform prevention and control measures.

The prevention and control of environmental pollution and ecological disruption across administrative regions other than that in the preceding paragraph shall be coordinated by the people's governments at higher levels, or resolved through consultations by the relevant local people's governments.

Article 21 The state shall adopt policies and measures in finance, taxation, price, and government procurement, among others, to encourage and support the development of environmental protection industries such as technological equipment for environmental protection, comprehensive utilization of resources, and environmental services.

Article 22 The people's governments shall adopt policies and measures in finance, taxation, price, and government procurement, among others, to encourage and support the further pollutant discharge reduction by enterprises, public institutions, and other businesses after meeting the statutory requirements for the discharge of pollutants.

Article 23 The people's governments shall support the production changes, relocation, or closedown of enterprises, public institutions, and other businesses for the purpose of improving environment in accordance with the relevant provisions.

Article 24 The environmental protection administrative departments of the people's governments at and above the county level, the environmental supervision institutions authorized by them, and other departments with environmental protection supervision and administration functions shall have the authority to conduct the on-site inspection of enterprises, public institutions, and other businesses that discharge pollutants. Those under inspection shall honestly provide relevant information and necessary materials. The departments or institutions conducting such inspection and the employees thereof shall keep the trade secrets of those under inspection.

Article 25 Where the discharge of pollutants by enterprises, public institutions, and other businesses in violation of laws and regulations has caused or may cause any serious pollution, the environmental protection administrative departments of the people's governments at and above the county level and other departments with environmental protection supervision and administration functions may seize or impound the facilities or equipment causing the discharge of pollutants.

Article 26 The state shall apply an objectives responsibility system and an evaluation and review system to environmental protection. The people's governments at and above the county level shall include the achievement of environmental protection objectives in the evaluation of their respective departments with environmental protection supervision and administration functions and the persons in charge thereof as well as the people's

governments at lower levels and the persons in charge thereof, as an important basis for the evaluation and review of them. The evaluation results shall be made available to the public.

Article 27 The people's governments at and above the county level shall report annually the environmental condition and the achievement of environmental protection objectives to the people's congresses at the same level or the standing committees thereof, and report in a timely manner the major environmental events to the standing committees of the people's congresses at the same level, to receive supervision according to the law.

Chapter III Environmental Protection and Improvement

Article 28 The local people's governments at all levels shall, according to environmental protection objectives and pollution control tasks, adopt effective measures to improve environmental quality.

The relevant local people's governments in key regions and valley areas that fail to reach the national environmental quality standards shall develop plans on reaching such standards during a specified period, and adopt measures to reach such standards as scheduled.

Article 29 The state shall draw ecological red lines in key ecological function zones, ecological sensitive areas and fragile areas, and other areas to apply strict protection.

The people's governments at all levels shall adopt measures to protect and prohibit any damage to the regions with various types of typical natural ecosystems, regions with a natural distribution of rare or endangered wild animals or plants, regions where major sources of water are conserved, natural relics such as geological structures of great scientific and cultural values, famous regions where karst caves or fossil deposits are distributed, glaciers, volcanoes, and hot springs, cultural relics, and ancient and precious trees.

Article 30 In the development and utilization of natural resources, the development shall be rational to protect biological diversity and ecological safety, and the relevant ecological protection and rehabilitation management plans shall be developed and implemented according to the law.

In the introduction of alien species and the research, development, and utilization of biotechnologies, measures shall be adopted to prevent any damage to biodiversity.

Article 31 The state shall establish and improve an ecological compensation mechanism.

The state shall increase financial transfer payments to ecological protection areas. The relevant local people's governments shall oversee the use of ecological compensation funds to ensure that such funds are used for ecological compensation purposes.

The state shall guide the people's governments of ecologically benefited areas and ecological protection areas in making ecological compensation through consultations or under the market rules.

Article 32 The state shall strengthen the protection of air, water, and soil, among others, and establish and improve the corresponding survey, monitoring, assessment, and remediation rules.

Article 33 The people's governments at all levels shall strengthen the protection of agricultural environment, promote the application of new technologies for protecting agricultural environment, strengthen the monitoring and early warning of agricultural pollution sources, and coordinate the relevant departments in adopting measures to prevent and control soil pollution, the desertification, alkalization, impoverishment and rocky desertification of land, land subsidence, vegetation deterioration, water loss and soil erosion, eutrophication of water bodies, exhaustion of water sources, extinction of species, and other ecological disturbances and promote the comprehensive prevention and control of plant diseases and insect pests.

The people's governments at the county and village levels shall improve the public service level for environmental protection in rural areas, and promote the comprehensive control and management of environment in rural areas.

Article 34 The State Council and the local people's governments at all levels in coastal areas shall strengthen the protection of marine environment. The discharge of pollutants and the dumping of wastes into the sea or the construction of coastal or marine engineering projects shall comply with laws and regulations and the relevant standards, and pollution and damage to the marine environment shall be prevented or reduced.

Article 35 In urban and rural construction, the characteristics of the local natural environment shall be considered, vegetation, waters and natural landscapes shall be protected, and the construction and management of gardens, green land, and scenic spots and historic sites in urban areas shall be strengthened.

Article 36 The state shall encourage and direct citizens, legal persons, and other organizations to use products and recycled products conducive to protecting environment to reduce wastes.

Government agencies and other organizations using fiscal funds shall, when purchasing and using products, equipment and facilities, give priority to those that are energy-saving, water-saving, material-saving or otherwise conducive to protecting environment.

Article 37 The local people's governments at all levels shall take measures to organize the sorting and recycling of domestic wastes.

Article 38 Citizens shall abide by environmental protection laws and regulations, cooperate in the implementation of environmental protection measures, and drop domestic wastes in waste separation bins as required to reduce damage to environment in daily lives.

Article 39 The state shall establish and improve the environment and health monitoring, survey and risk assessment rules, encourage and organize research on the impact of environmental quality on public health, and adopt measures to prevent and control diseases related to environmental pollution.

Chapter IV Prevention and Control of Pollution and Other Public Nuisances

Article 40 The state shall promote cleaner production and resource recycling.

The relevant departments of the State Council and the local people's governments at all levels shall adopt measures to promote the production and use of clean energy.

Enterprises shall give priority to the use of clean energy, and adopt techniques and equipment with higher resource utilization ratios and less pollutant discharges, technologies for the comprehensive utilization of wastes, and technologies for the decontamination of pollutants to reduce pollutants.

Article 41 The pollution prevention and control installations included in a construction project shall be designed, constructed and put to use simultaneously with the body of the construction project. Such installations shall satisfy the requirements of the approved environmental impact assessment document, and may not be dismantled or left unused without permission.

Article 42 Enterprises, public institutions, and other businesses that discharge pollutants shall adopt measures to prevent and control pollution and damage to environment caused by waste gas, waste water, waste residue, medical wastes, dust, malodorous gases, radioactive substances, noise, vibration, optical radiation, electromagnetic radiation, and other substances generated in their production, construction, and other activities.

Enterprises and public institutions that discharge pollutants shall establish accountability rules for environmental protection to specify the duties and responsibilities of persons in charge of them and other relevant persons.

Pollutant discharging entities under intensified supervision shall install and use monitoring equipment in accordance with the relevant provisions of the state and the monitoring norms, ensure the normal functioning of monitoring equipment, and preserve the original monitoring records.

It shall be prohibited to illegally discharge pollutants by installing underground pipelines, using seepage wells or pits, conducting perfusion, or altering or forging monitoring data, through the abnormal operation of pollution prevention and control installations, or by other means to avoid supervision.

Article 43 Enterprises, public institutions, and other businesses that discharge pollutants shall pay pollutant discharge fees in accordance with the relevant provisions of the state. Pollutant discharge fees shall be all used for the prevention and control of environmental pollution. No entity or individual may withhold such funds or use such funds for similar or other purposes.

No pollutant discharge fees shall be levied if environmental pollution tax has been levied according to the law.

Article 44 The state shall apply a total discharge volume control system to key pollutants. The State Council shall assign the total discharge volume control indicators of key pollutants to the people's governments of provinces, autonomous regions, and municipalities directly under the Central Government for further breakdown and implementation. When implementing the national and local pollutant discharge standards, enterprises and public institutions shall comply with the total discharge volume control indicators of key pollutants further assigned to them.

For areas which exceed the state's total discharge volume control indicators of key pollutants

or fail to achieve the environmental quality objectives determined by the state, the environmental protection administrative departments of the people's governments at and above the provincial level shall suspend the procedures for approving the environmental impact assessment documents on construction projects in such areas that will increase the total discharge volume of key pollutants.

Article 45 The state shall, according to the law, apply a licensing system to the discharge of pollutants.

Enterprises, public institutions, and other businesses subject to pollutant discharge licensing management shall discharge pollutants according to the requirements of their respective pollutant discharge licenses; and those without a pollutant discharge license may not discharge pollutants.

Article 46 The state shall apply an elimination system to techniques, equipment, and products that cause serious environmental pollution. No entity or individual may produce, sell, transfer, or use techniques, equipment, or products that cause serious environmental pollution.

It shall be prohibited to introduce any technology, equipment, material, or product that fails to comply with the environmental protection provisions of China.

Article 47 The people's governments at all levels, the relevant departments thereof, enterprises, and public institutions shall effectively conduct the risk control, preparedness, response, rehabilitation, and other work on environmental emergencies, in accordance with the Emergency Response Law of the People's Republic of China.

The people's governments at and above the county level shall establish public monitoring and early warning mechanisms for environmental pollution, organize the development of early warning plans, and, when any environmental pollution may endanger public health and environmental safety, release early warning information and activate emergency response measures in a timely manner according to the law.

Enterprises and public institutions shall prepare emergency response plans for environmental emergencies in accordance with the relevant provisions of the state, and submit them to the environmental protection administrative departments and other relevant departments for recordation. Where any environment emergency occurs or may occur, an enterprise or public institution shall immediately take response measures, notify in a timely manner the entities and citizens to which any harm may be caused, and report to the environmental protection administrative department and other relevant departments.

After the end of the emergency response to an environmental emergency, the relevant people's government shall immediately organize an assessment on the environmental impact of and the losses caused by the event, and disclose the assessment results to the public in a timely manner.

Article 48 The production, storage, transportation, sale, use, and disposal of chemicals and materials containing radioactive substances must comply with the relevant provisions of the state to prevent environmental pollution.

Article 49 The people's governments at all levels and the agricultural and other relevant departments and institutions thereof shall guide agricultural businesses in plant and animal farming in a scientific manner, apply pesticides, chemical fertilizers and other agricultural inputs in a rational and scientific manner, and dispose of agricultural films, agricultural straws and other agricultural wastes in a scientific manner to prevent agricultural non-point source pollution.

It shall be prohibited to apply any solid wastes or waste water in noncompliance with agricultural standards or environmental protection standards to farmland. In the application of pesticides, chemical fertilizers, and other agricultural inputs or irrigation, measures shall be taken to prevent environmental pollution caused by heavy metals and other toxic and harmful substances.

The site selection, construction, and management of farms, breeding areas, and designated slaughter enterprises of livestock and poultry shall comply with the provisions of relevant laws and regulations. Entities and individuals engaging in livestock and poultry breeding or slaughter shall take measures to dispose of livestock and poultry manure and corpses, sewage, and other wastes in a scientific manner to prevent environmental pollution.

The people's governments at the county level shall be responsible for organizing the disposal of domestic wastes in rural areas.

Article 50 The people's governments at all levels shall arrange funds in their fiscal budgets for supporting the protection of drinking water sources, the treatment of domestic sewage and other wastes, the prevention and control of pollution from livestock and poultry breeding and slaughter, the prevention and control of soil pollution, the control of pollution from industrial and mining activities, and other environmental protection work in rural areas.

Article 51 The people's governments at all levels shall make overall plans on the construction of sewage treatment facilities and related pipeline networks, environmental sanitation facilities for the collection, transportation, and disposal, among others, of solid wastes, facilities and sites for the centralized disposal of dangerous wastes, and other public facilities for environmental protection in urban and rural areas, and ensure their normal functioning.

Article 52 The state shall encourage the purchase of environmental pollution liability insurance.

Chapter V Information Disclosure and Public Engagement

Article 53 Citizens, legal persons, and other organizations shall, according to the law, have the rights to obtain environmental information and participate in and oversee environmental protection.

The environmental protection administrative departments and other departments with environmental protection supervision and administration functions of the people's governments at all levels shall, according to the law, disclose environmental information, and improve the procedures for public engagement, to facilitate the participation in and oversight of environmental protection by citizens, legal persons, and other organizations.

Article 54 The environmental protection administrative department of the State Council shall

release information on environmental quality and the monitoring of key pollution sources and other significant environmental information of the state in a unified way. The environmental protection administrative departments of the people's governments at and above the provincial level shall periodically release reports on the state of environment.

The environmental protection administrative departments and other departments with environmental protection supervision and administration functions of the people's governments at and above the county level shall, according to the law, disclose information on environmental quality, environmental monitoring, environmental emergencies, environmental administrative licensing, environmental administrative punishment, and collection and use of pollutant discharge fees, among others.

The environmental protection administrative departments and other departments with environmental protection supervision and administration functions of the local people's governments at and above the county level shall record the environmental violations of law by enterprises, public institutions, and other businesses in their social integrity files, and disclose the names of violators to the public in a timely manner.

Article 55 Pollutant discharging entities under intensified supervision shall honestly disclose to the public the names of their major pollutants, the discharge methods, the concentration and total volume of pollutants discharged, any discharge beyond the approved quota, and the construction and operation of pollution prevention and control installations to receive supervision from the general public.

Article 56 For a construction project for which an environmental impact report is required by the law, when preparing such a report, the construction employer shall provide an explanation to the public that may be affected, and fully solicit their opinions.

After receiving the environmental impact report for a construction project, the department approving the environmental impact assessment documents for construction projects shall disclose the full text of the report, except the part involving any state secret or trade secret; and if it discovers that public opinions have not been fully solicited regarding the project, the department shall order the construction employer to solicit public opinions.

Article 57 Citizens, legal persons, and other organizations that discover any environmental pollution or ecological damage caused by any entity or individual shall have the right to report to environmental protection administrative departments or other departments with environmental protection supervision and administration functions.

Citizens, legal persons, and other organizations that discover any failure of the local people's governments at any level or the environmental protection administrative departments or other departments with environmental protection supervision and administration functions of the people's governments at and above the county level to legally perform their duties shall have the right to report to the authorities at higher levels or the supervisory authorities.

The authorities receiving such reports shall keep confidential the relevant information on whistleblowers, and protect the lawful rights and interests of whistleblowers.

Article 58 For an act polluting environment or causing ecological damage in violation of

public interest, a social organization which satisfies the following conditions may institute an action in a people's court:

(1) It has been legally registered with the civil affairs department of the people's government at or above the level of a districted city.

(2) It has specially engaged in environmental protection for the public good for five consecutive years or more without any recorded violation of law.

A people's court shall, according to the law, accept an action instituted by a social organization that satisfies the provision of the preceding paragraph.

A social organization may not seek any economic benefit from an action instituted by it.

Chapter VI Legal Liability

Article 59 Where any enterprise, public institution, or other business is fined and ordered to make correction for illegally discharging pollutants but refuses to make correction, the administrative agency legally making the punishment decision may impose continuous fines on it in the amount of the original fine for each day from the next day after it is ordered to make correction.

The fine punishment as mentioned in the preceding paragraph shall be determined on the basis of factors such as the operation costs of pollution prevention and control installations, the direct losses caused by the illegal act and the illegal income as provided for by the relevant laws and regulations.

Based on the actual needs for environmental protection, the types of illegal acts subject to continuous daily fines as mentioned in the first paragraph hereof may be increased in local regulations.

Article 60 Where any enterprise, public institution, or other business discharges pollutants beyond the pollutant discharge standards or the total discharge volume control indicators of key pollutants, the environmental protection administrative department of the local people's government at or above the county level may order it to adopt measures such as restricting production or suspending business for rectification; and if the circumstances are serious, order it to terminate business or close down with the approval of the people's government with such approval power.

Article 61 Where any construction employer fails to submit the environmental impact assessment documents for its construction project according to the law or commences construction without permission before the environmental impact assessment documents are approved, the department with environmental protection supervision and administration functions shall order it to cease construction, and impose a fine on it, and may order restoration to the original state.

Article 62 Where, in violation of this Law, any pollutant discharging entity under intensified supervision fails to disclose or honestly disclose environmental information, the environmental protection administrative department of the local people's government at or above the county level shall order it to disclose the information, impose a fine on it, and issue a public announcement of the punishment.

Article 63 Where any enterprise, public institution, or other business commits any of the following acts, if no crime is constituted, in addition to imposing punishment in accordance with the provisions of relevant laws and regulations, the environmental protection administrative department or any other relevant department of the people's government at or above the county level shall transfer the case to the public security authority, which shall detain the directly liable person in charge and other directly liable persons for not less than 10 days but not more than 15 days; or, if the circumstances are relatively minor, for not less than 5 days but not more than 10 days:

(1) It refuses to comply with an order requiring it to cease construction of a construction project which has not undergone environmental impact assessment as legally required.

(2) It refuses to comply with an order requiring it to cease discharge of pollutants for its illegal discharge of pollutants without a pollutant discharge license.

(3) It illegally discharges pollutants by installing underground pipelines, using seepage wells or pits, conducting perfusion, or altering or forging monitoring data, through the abnormal operation of pollution prevention and control installations, or by other means to avoid supervision.

(4) It refuses to comply with an order requiring it to make correction for its production or use of pesticides which have been expressly prohibited by the state from production or use.

Article 64 Where any damage is caused by environmental pollution or ecological disruption, the tortfeasor shall assume tort liability in accordance with the relevant provisions of the Tort Law of the People's Republic of China.

Article 65 Where any environmental impact assessment institution, environmental monitoring institution, or institution engaging in the maintenance or operation of environmental monitoring equipment and pollution prevention and control installations makes falsification in the provision of relevant environmental services and is liable for the environmental pollution or ecological disruption caused, it shall assume joint and several liability with other parties liable for the environmental pollution or ecological disruption, in addition to punishment in accordance with the provisions of relevant laws and regulations.

Article 66 The time limitation for instituting an environmental action for damages shall be three years, starting from the time when a party knows or should have known the harm caused to the party.

Article 67 The people's governments at higher levels and the environmental protection administrative departments thereof shall strengthen supervision over the environmental protection work of the people's governments at lower levels and the relevant departments thereof, and, if they discover that any employees have committed any illegal acts for which disciplinary actions shall be taken according to the law, recommend disciplinary actions to the appointment and removal authorities or supervisory authorities for such employees.

Where the relevant environmental protection administrative department fails to impose administrative punishment as otherwise legally required, the environmental protection administrative department of the people's government at a higher level may directly make a

decision to impose administrative punishment.

Article 68 Where a local people's government at any level or the environmental protection administrative department or any other department with environmental protection supervision and administration functions of a people's government at or above the county level commits any of the following acts, the directly liable person in charge and other directly liable persons shall be subject to a demerit, a major demerit, or demotion; and if the consequences are serious, they shall be removed from office or expelled, and the primary person in charge thereof shall resign to assume the responsibility for the act:

(1) Granting any administrative license despite that the conditions for granting the administrative license are not satisfied.

(2) Harboring any environment-related illegal acts.

(3) Failing to make a decision to order cessation of business or closedown as otherwise legally required.

(4) Failing to investigate any discharge of pollutants beyond the prescribed standards, discharge of pollutants by means to avoid supervision, environmental accident, or ecological disruption caused by a failure to implement ecological protection measures and impose punishment in a timely manner, after discovering or receiving a report on it.

(5) Seizing or impounding any facility or equipment of any enterprise, public institution, or other business in violation of this Law.

(6) Altering or forging monitoring data or instigating others to do so.

(7) Failing to disclose environmental information as otherwise legally required.

(8) Withholding or using for similar or other purposes the pollutant discharge fees collected.

(9) Other illegal acts as specified by laws and regulations.

Article 69 Whoever is suspected of a crime for violating this Law shall be subject to criminal liability according to the law.

Chapter VII Supplementary Provisions

Article 70 This Law shall come into force on January 1, 2015.

2. Marine Environmental Protection Law of the People's Republic of China

(Adopted at the 24th Session of the Standing Committee of the Fifth National People's Congress on August 23, 1982; revised at the 13th Session of the Standing Committee of the Ninth National People's Congress on December 25, 1999; amended in accordance with the Decision on Amending Seven Laws Including the Marine Environment Protection Law of the People's Republic of China at the Sixth Session of the Standing Committee of the Twentieth National People's Congress on December 28, 2013; and amended for the second time in accordance with the Decision of the Standing Committee of the National People's Congress on Amending the Marine Environment Protection Law of the People's Republic of China adopted at the 24th Session of the Standing Committee of the Twelfth National People's Congress on November. 7, 2016; amended for the third time in accordance with

the Decision of the Standing Committee of the National People's Congress on Amending Eleven Laws including the Accounting Law of the People's Republic of China, as adopted at the 30th Session of the Standing Committee of the Twelfth National People's Congress of the People's Republic of China on November 4, 2017.)

Chapter I General Provisions

Article 1 This Law is enacted to protect and improve the marine environment, conserve marine resources, prevent pollution damages, maintain ecological balance, safeguard human health and promote sustainable economic and social development.

Article 2 This Law shall apply to the internal waters, territorial seas, contiguous zones, exclusive economic zones and continental shelves of the People's Republic of China and all other sea areas under the jurisdiction of the People's Republic of China.

All entities and individuals engaged in navigation, exploration, exploitation, production, tourism, scientific research or other operations in the sea areas under the jurisdiction of the People's Republic of China, or engaged in operations in the coastal land areas which have impact on the marine environment shall comply with this Law.

This Law shall also apply to pollution to the sea areas under the jurisdiction of the People's Republic of China originating from areas beyond the sea areas under the jurisdiction of the People's Republic of China.

Article 3 The State shall delineate the red lines of ecological protection in key marine ecological function zones, ecological sensitive areas and fragile areas, and other sea areas to conduct strict protection.

The State shall establish and put into practice a system of controlling the total sea-disposal pollution discharge for the key sea areas, determine the standards for controlling the total sea-disposed main pollutants discharge and shall assign controlled pollution discharges to key pollution sources. The specific measures therefor shall be formulated by the State Council.

Article 4 All entities and individuals shall have the obligation to protect the marine environment and have the right to supervise and expose the act of any entity or individual that causes pollution damage to the marine environment, as well as the act of any functionary engaged in marine environment supervision and control that constitutes a neglect of duty in violation of the law.

Article 5 The administrative department in charge of environment protection under the State Council, as the department to exercise unified supervision and control over the nation-wide environment protection work, shall guide, co-ordinate and supervise the nation-wide marine environment protection work and be responsible for preventing and controlling marine pollution damages caused by land-based pollutants and coastal construction projects.

The State oceanic administrative department shall be responsible for the supervision and control over the marine environment, organize survey, surveillance, supervision, assessment and scientific research of the marine environment and be responsible for the nation-wide environment protection work in preventing and controlling marine pollution

damages caused by marine construction projects and dumping of wastes in the sea.

The State administrative department in charge of maritime affairs shall be responsible for the supervision and control over marine environment pollution caused by non-military vessels inside the port waters under its jurisdiction and non-fishery vessels and non-military vessels outside the said port waters, and be responsible for the investigation and treatment of the pollution accidents. In the event of a pollution accident caused by a foreign vessel navigating, berthing or operating in the sea under the jurisdiction of the People's Republic of China, inspection and treatment shall be conducted on board the vessel in question. Where the pollution accident caused by a vessel results in fishery damages, the competent fishery administrative department shall be invited to take part in the investigation and treatment.

The State fishery administrative department shall be responsible for the supervision and control over the marine environment pollution caused by non-military vessels inside the fishing port waters and that caused by fishing vessels outside the fishing port waters, be responsible for the protection of ecological environment in the fishing zones, and shall investigate and handle the fishery pollution accidents other than those specified in the preceding paragraph.

The environment protection department of the armed forces shall be responsible for the supervision and control over the marine pollution caused by military vessels and for the investigation and handling of the pollution accidents caused by military vessels.

The functions and responsibilities of the departments empowered to conduct marine environment supervision and control under the coastal local people's governments at or above the county level shall be determined by the people's governments of the provinces, autonomous regions or municipalities directly under the Central Government in accordance with this Law and the relevant regulations of the State Council.

Article 6 The administrative department in charge of environment protection, oceanic administrative departments and other departments empowered to conduct marine environment supervision and control shall publicly disclose the relevant information on marine environment in accordance with the law according to the division of functions and powers; and relevant pollutant discharging entities shall publicly disclose the pollutant discharge information in accordance with the law.

Chapter II Supervision and Control over the Marine Environment

Article 7 The State oceanic administrative department shall, in conjunction with the relevant departments of the State Council and the people's governments of the coastal provinces, autonomous regions and municipalities directly under the Central Government, work out a national marine functional zonation scheme according to the national major marine functional zoning plan, and submit it to the State Council for approval.

The coastal local people's governments at all levels shall, according to the national and local marine functional zonation schemes, protect and use sea areas in a scientific and rational manner.

Article 8 The State shall draw up, in accordance with the marine functional zonation scheme, national marine environment protection plan and regional marine environment protection plans in key sea areas.

The relevant people's government of the coastal provinces, autonomous regions and municipalities directly under the Central Government adjacent to key sea areas and the departments empowered to conduct marine environment supervision and control may set up regional co-operation organizations for marine environment protection which shall be responsible for the implementation of regional marine environment protection plans in key sea areas as well as for the prevention and control of marine environment pollution and the marine ecological conservation work.

Article 9 Trans-regional marine environment protection problems shall be solved through consultations by the relevant coastal local people's governments or be solved through coordination by the people's government at the higher level.

Major trans-department marine environment protection work shall be coordinated by the administrative department in charge of environment protection under the State Council. The problems that fail to be settled through coordination shall be submitted to the State Council for decision.

Article 10 The State shall work out the national marine environment quality standards in accordance with the marine environment quality conditions and the economic and technological level of the country.

The people's governments of the coastal provinces, autonomous regions and municipalities directly under the Central Government may work out the local marine environment quality standards for those items not specified in the national marine environment quality standards. The coastal local people's governments at various levels shall, in accordance with the stipulations laid down in the national and local marine environment quality standards and the coastal sea area environment quality conditions in their respective administrative areas, work out their marine environment protection targets and tasks, incorporate them into their respective government work plans and exercise control thereover in accordance with the corresponding marine environment quality standards.

Article 11 In working out the national and local water pollutant discharge standards, the national and local marine environment quality standards shall be taken as one important basis. For the key sea areas where the State has established and put into practice the system of controlling the total volume of pollutants discharged, the indicators for the control of the total volume of key pollutants discharged into the sea shall also be taken as an important basis in determining the water pollutant discharge standards.

When implementing the national and local water pollutant discharge standards, pollutant discharging entities shall comply with the indicators for the control of the total volume of key pollutants discharged into the sea assigned to them.

In key sea areas where the indicators for the control of the total volume of key pollutants discharged into the sea are exceeded and sea areas where the objectives and tasks of

marine environment protection fail to be completed, the environment protection administrative departments of the people's governments at or above the provincial level and the oceanic administrative departments shall, according to the division of functions, suspend the approval of the environmental impact reports (forms) for the construction projects which would newly increase the total volume of corresponding types of pollutants discharged into the sea.

Article 12 All entities and individuals directly discharging pollutants into the sea must pay pollutant discharge fees in accordance with the provisions of the State. Whoever has paid environmental pollution tax in accordance with the legal provisions is no longer required to pay pollutant discharge fees.

Whoever dumps wastes in the sea must pay dumping fees in accordance with the State regulations.

Pollutant discharge fees and dumping fees levied in accordance with the provisions of this Law must be used for the prevention and control of marine environment pollution and may not be appropriated for any other purposes. Specific measures shall be formulated by the State Council.

Article 13 The State shall strengthen the research and development of science and technology in the field of prevention and control of marine environment pollution damages and shall put into practice an elimination system with regard to any out-of-date production techniques and equipment that cause serious marine environment pollution damages.

Enterprises shall give priority to the introduction of clean energies and clean production technology with higher resources utilization ratio and less pollutant discharges, so as to prevent pollution to the marine environment.

Article 14 The State administrative department in charge of maritime affairs shall manage in accordance with the State environmental monitoring and supervisory norms and standards the investigation, monitoring and supervision of the nation-wide marine environment and work out specific measures of implementation, and shall organize, in conjunction with the relevant departments, nation-wide marine environment monitoring and supervision network, conduct regular assessment of marine environment quality and release regular sea cruise supervision dispatches.

Departments empowered by this Law to conduct marine environment supervision and control shall be responsible for the monitoring and supervision of the water areas under their respective jurisdiction.

Other relevant departments shall, in accordance with the division of work under the nation-wide marine environment monitoring network, be respectively responsible for the mouths of rivers that empty into the sea and the main pollutant discharge outlets.

Article 15 Relevant departments of the State Council shall provide the administrative department in charge of environment protection under the State Council with the marine environment monitoring data necessary for the compilation of national environment quality bulletins.

The administrative department in charge of environment protection shall provide relevant departments with data relating to marine environment supervision and administration.

Article 16 The State administrative department in charge of maritime affairs shall, in accordance with the environment monitoring and supervision information management system formulated by the State, be responsible for the management of the comprehensive marine information system and render services to the supervision and control over the marine environment protection.

Article 17 Any entity or individual that has caused or may possibly cause marine environment pollution because of an accident or any other contingency must immediately adopt effective measures, promptly inform all parties that are potentially endangered, report to the department empowered by this Law to conduct marine environment supervision and control and accept investigation and treatment.

Coastal local people's government at or above the county level must, whenever the offshore environment within their administration is seriously polluted, adopt effective measures to relieve or mitigate the pollution damage.

Article 18 The State shall, in accordance with the necessity to prevent marine environment pollution, draw up State contingency schemes to cope with major marine pollution accidents. The State oceanic administrative department shall be responsible for drawing up a State contingency scheme to cope with any major oil spill accidents on the sea caused by offshore oil exploration and exploitation and report to the administrative department in charge of environment protection under the State Council for the record.

The State administrative department in charge of maritime affairs shall be responsible for drawing up a contingency scheme to cope with any nation-wide major vessel oil spill accidents on the sea and report to the administrative department in charge of environment protection under the State Council for the record.

All entities in the coastal areas where marine environment pollution accidents may happen shall draw up in accordance with the State regulations contingency schemes to cope with pollution accidents and report to the local administrative departments respectively in charge of environment protection and maritime affairs for the record.

The coastal people's governments at or above county level and the relevant departments thereunder shall relieve or mitigate damages in accordance with the contingency schemes in case of any major marine pollution accidents.

Article 19 Departments empowered by this Law to conduct marine environment supervision and control may conduct joint law enforcement operations on the sea. In their monitoring cruise, whenever any marine pollution accident or act of violation of the provisions of this Law is discovered, they shall check it, conduct on-the-spot investigation, collect evidence, and if necessary, have the power to adopt effective measures to prevent the spread of pollution, and in the meantime report the case to the relevant competent department for the treatment.

Departments empowered by this Law to conduct marine environment supervision and

control have the right to conduct on-the-spot inspections of the entities and individuals discharging pollutants within the sphere of their jurisdiction. Those under inspection shall report the situation faithfully and provide necessary data.

Inspection departments shall keep the technical and business knowhow of the inspected secret.

Chapter III Marine Ecological Protection

Article 20 The State Council and the coastal local people's governments shall adopt effective measures to protect typical and representative marine ecosystems such as mangroves, coral reefs, coastal wetlands, islands, bays, estuaries and important fishery waters, protect sea areas where rare and dying out marine organisms are naturally and densely scattered, protect habitats of marine organisms having important economic value, and protect marine natural historic relics and natural landscapes having great scientific and cultural significance. Efforts shall be made to renovate and restore damaged marine ecosystems having important economic and social values.

Article 21 The relevant departments of the State Council and the coastal people's governments at provincial level shall, in accordance with the need for marine ecosystem conservation, delimit and establish marine nature reserves.

The establishment of marine nature reserves at state level shall be subject to approval by the State Council.

Article 22 A marine nature reserve shall be established where one of the following situations exists:

(1)being a typical marine physiographic area as well as a representative natural ecosystem area, or an area where the natural ecosystem has been damaged to some extent, but may be recovered through efforts of conservation;

(2)being an area with higher marine biodiversity, or an area where rare and dying out marine species are naturally and densely scattered;

(3)being a sea area, seashore, island, coastal wetland, estuary, bay or the like with special conservation;

(4)being an area where marine natural remains of great scientific and cultural values are located; or

(5)any other area calling for special conservation.

Article 23 For any area having special geographic conditions, ecosystem, living or non-living resources and where the marine development and exploitation have special needs, a marine special reserve may be established, so that a special management may be ensured by adopting effective conservation measures and scientific development modes.

Article 24 The State shall establish and improve the system of marine ecological protection compensation.

The development and exploitation of the marine resources shall be rationally distributed in accordance with the marine functional zonation scheme, strictly comply with the red lines of ecological protection, and shall not bring about damages to marine ecological environment.

Article 25 Any introduction of marine animal or plant species shall be subjected to scientific assessment so as to avoid damages to marine ecosystems.

Article 26 In exploiting resources of an island and its surrounding sea area, strict ecological protection measures shall be adopted, and no damage shall be brought to the island topography, beach, vegetation and the ecological environment of the surrounding sea area.

Article 27 Coastal local people's governments at all levels shall, in accordance with the characteristics of the respective local natural environment, construct shore protection installations, coastal shelter belts, as well as gardens and greenlands in the coastal cities and towns, and undertake comprehensive treatment in the areas affiliated with shore erosion and saline water intrusion.

Destruction of shore protection installations, coastal shelter belts and gardens or greenlands in the coastal cities and towns is forbidden.

Article 28 The State shall encourage the development of ecological fishery, popularize multiform ecological fishery production methods and improve marine ecological conditions. Environmental impact assessment shall be conducted while establishing a new marine culture, renovating or extending an existing marine culture.

In marine culture, breeding density shall be scientifically determined, bait and manure be rationally spread, medicines be accurately applied, and pollution to the marine environment be prevented.

Chapter IV Prevention and Control of Pollution Damage to the Marine Environment by Land-Based Pollutants

Article 29 The discharge of land-based pollutants into the sea shall strictly comply with the State or local standards and relevant stipulations.

Article 30 Any sea-disposed pollutant discharging outlet shall be sited in accordance with marine functional zonation scheme, marine dynamic conditions and relevant regulations, and shall, after scientific assessment, be reported to the administrative department in charge of environment protection under a people's government at or above the level of a districted city for recordation.

The administrative department in charge of environment protection shall, within 15 working days after completing recordation, notify the information on the setup of the outlets to the oceanic, maritime affairs and fishery administrative departments and the environment protection department of armed forces.

It is not allowed to site any new pollutant discharging outlets within marine nature reserves, important fishery waters, coastal historic sites and scenic spots, and areas which call for special protection.

In areas with conditions, pollution discharging outlets shall be built in the deep sea and offshore discharging shall be practised. The installation of land-based pollutant discharging outlets in deep offshore waters shall be determined in accordance with marine functional zonation scheme, marine dynamic conditions and seabed conditions for engineering facilities. Specific measures shall be formulated by the State Council.

Article 31 The administrative departments in charge of environment protection and the administrative departments in charge of water under the people's governments of the provinces, autonomous regions and municipalities directly under the Central Government shall, in accordance with relevant laws on the prevention and control of water pollution, strengthen their control over the rivers that empty into the sea, prevent and control their pollution so as to ensure that the water quality at the river mouths be in good state.

Article 32 Entities discharging land-based pollutants shall report to the interested administrative department in charge of environment protection their land-based pollutant discharging facilities and treatment facilities, the kinds, quantities and density of the discharged land-based pollutants under normal operation conditions, and shall provide relevant techniques and data related to the prevention and control of marine environment pollution.

Any major changes in the kinds, quantities and density of the discharged land-based pollutants must be reported in a timely manner.

Article 33 It is prohibited to discharge into the sea such wastes as oils, acid liquids, alkaline liquids, hypertoxic waste liquids and waste water with high or medium radioactivity.

The discharge of waste water with low radioactivity into the sea shall be strictly controlled; where the discharge is necessary, the State regulations concerning radiation prevention must be strictly complied with.

The discharge of waste water containing persistent organic matters and waste water containing heavy metals shall be strictly controlled.

Article 34 Medical sewage, domestic sewage and industrial waste water carrying pathogens can only be discharged into sea areas after they have undergone necessary treatment and reached the relevant discharge standards of the State.

Article 35 The discharge of industrial waste water and domestic sewage containing organic and nutrient matters into bays, semi-closed seas and other sea areas with low self-purification capacity shall be strictly controlled.

Article 36 In discharging thermal waste water into sea areas, effective measures shall be taken to ensure the conformity of the water temperature in the adjacent fishing areas with the marine environment quality standards of the State and the avoidance of any damage to aquatic resources by thermal pollution.

Article 37 The use of chemical pesticides in coastal farmlands and forest farms must comply with the State provisions and standards governing the safe use of pesticides.

Coastal farmlands and forest farms shall use chemical fertilizers and plant growth regulators in a rational way.

Article 38 The discharging, piling up and disposal of mining tailings, waste ores, cinders, garbage and other solid wastes on shores or beaches shall be conducted in accordance with the relevant provisions of the "Law of the People's Republic of China on the Prevention and Control of Environment Pollution Caused by Solid Wastes.

Article 39 It is prohibited to shift dangerous wastes through internal waters or territorial seas

of the People's Republic of China.

Prior written consent must be obtained from the administrative department in charge of environment protection under the State Council for shifting any dangerous wastes through the other sea areas under the jurisdiction of the People's Republic of China.

Article 40 The people's governments of the coastal cities shall build and perfect the urban drain pipes net and construct urban sewage treatment plants or other sewage concentrated treatment facilities in a planned way and strengthen comprehensive control and management of urban sewage.

The construction of any sewage sea-disposed project must comply with the relevant regulations of the State.

Article 41 The State shall adopt necessary measures to prevent, reduce and control marine environment pollution damage arising from or through the atmosphere.

Chapter V Prevention and Control of Pollution Damage to the Marine Environment by Coastal Construction Projects

Article 42 Construction of new coastal projects, renovation or extension of existing coastal projects must be conducted in compliance with relevant State regulations governing environment protection in construction projects and shall channel the capital needed for the prevention and control of pollution into construction project investment plan.

Within the lawfully delimited marine nature reserves, coastal historic sites and scenic spots, important fishery waters and other areas which call for special protection, no coastal construction project or any other operation that may cause pollution to environment or damage to landscape shall be undertaken.

Article 43 Any entity undertaking a coastal construction project must conduct a scientific survey of the marine environment, rationally select a site based on the natural and social conditions, and prepare an environmental impact report (form). The environmental impact report (form) shall be submitted to the administrative department in charge of environment protection for examination and approval before the start of the construction project.

The administrative department in charge of environment protection must, before approving the environmental impact report (form), solicit opinions of the oceanic, maritime affairs, and fishery administrative departments as well as the environment protection department of the armed forces.

Article 44 The environment protection installations for a coastal construction project must be designed, built and put into use simultaneously with the construction project itself. The environment protection installations must comply with the requirements of the environmental impact [assessment] report (form) as approved.

Article 45 It is prohibited to construct in coastal land areas any new industrial projects that do not possess effective pollution treatment measures, such as chemical pulp and paper mill, chemical plant, dye printing mill, tannery, electroplating mill, brewery, oil refinery, beach ship-dismembering and other projects which cause serious marine environment pollution.

Article 46 In building coastal construction projects, effective measures must be taken to

protect wild animals and plants and their living environment as well as marine aquatic resources under State and local particular protection.

It is strictly prohibited to mine sand and gravel along the shore. In conducting coastal open air placer mining or shore-based well drilling to exploit seabed mineral resources, effective measures must be taken to prevent pollution to the marine environment.

Chapter VI Prevention and Control of Pollution Damage to the Marine Environment by Marine Construction Projects

Article 47 In carrying out any marine construction project, national major marine functional zoning plan, marine functional zonation scheme, marine environment protection plan and relevant State environment protection standards must be complied with. Any entity undertaking a marine construction project must conduct a scientific survey of the marine environment and prepare a marine environmental impact report (form). The marine environmental impact report (form) shall be submitted to the oceanic administrative department for examination and approval before the start of the construction project.

The oceanic administrative department must, before approving the marine environmental impact report (form), solicit opinions of the maritime affairs and fishery administrative departments as well as the environment protection department of the armed forces.

Article 48 The environment protection installations for a marine construction project must be designed, built and put into use simultaneously with the construction project itself. The construction project may not be put into production or use if the environment protection installations are not yet checked and accepted by the oceanic administrative department or are found not up to the standard for acceptance after the check.

Prior consent must be obtained from the interested oceanic administrative department if the environment protection installations are to be dismantled or laid idle.

Article 49 Materials containing radioactivity in excess of standards or materials containing toxic and harmful substance easy to dissolve in the water may not be used in a marine construction project.

Article 50 Where a marine construction project needs explosive operations, effective measures must be taken to protect marine resources.

In the course of offshore petroleum exploration and exploitation as well as oil transportation, effective measures must be taken to avoid occurrence of oil spill.

Article 51 Oily waste water and oily mixtures from offshore oil rigs, drilling platforms and oil extraction platforms must be properly treated and reach discharge standards before their discharge into the sea. Residual and waste oil must be recovered and may not be discharged into the sea. In discharging any recovered residual or waste oil that has undergone treatment, the oil content thereof may not exceed the standards laid down by the State.

Oil-based mud and toxic compound mud used in drilling may not be discharged into the sea. The discharge of any water-based mud, non-toxic compound mud or drilling breaks into the sea must comply with the relevant provisions of the State.

Article 52 Offshore oil rigs, drilling platforms, oil extraction platforms and their ancillary installations on the sea shall not dispose oil-containing industrial garbage in the sea. The disposal of other industrial garbage must not cause pollution to the marine environment.

Article 53 In any offshore well testing, it shall be ensured that the oil and gas be thoroughly burned, and that no oil and oily mixtures be discharged into the sea.

Article 54 For the exploration and development of offshore oil, an oil spill contingency plan must be prepared as legally required and submitted to the local sea area office of the state oceanic administrative department for recordation.

Chapter VII Prevention and Control of Pollution Damage to the Marine Environment caused by Dumping of Wastes

Article 55 Without approval of the State oceanic administrative department, no entity may dump any wastes into the sea areas under the jurisdiction of the People's Republic of China. Any entity that needs to dump wastes in the sea must submit a written application to the State oceanic administrative department, and may dump its wastes only after the State oceanic administrative department has examined and approved the application and a permit is granted.

It is prohibited to dump any wastes originating from outside the territory of the People's Republic of China into the sea areas under the jurisdiction of the People's Republic of China.

Article 56 The State oceanic administrative department shall work out assessing procedures and standards for wastes dumping into the sea according to the toxicity and poisonous substance content of the wastes and their impact degree to the marine environment.

Dumping wastes into the sea shall follow a graded management based on the categories and quantities of the wastes.

The State oceanic administrative department shall work out a catalogue of the wastes permitted to be dumped into the sea, which shall be submitted to the administrative department in charge of environment protection under the State Council for deliberation and commenting, and then submitted to the State Council for approval.

Article 57 The State oceanic administrative department shall, in the light of the principle of being scientific, rational, economic and safe, select and delimit the sea dumping sites which shall be submitted to the administrative department in charge of environment protection under the State Council for deliberation and commenting, and then submitted to the State Council for approval.

Temporary sea dumping sites shall be approved by the State oceanic administrative department and be reported to the administrative department in charge of environment protection under the State Council for the record.

The State oceanic administrative department must solicit opinions from the State administrative departments respectively in charge of maritime affairs and fishery before delimiting any sea dumping sites approving any temporary sea dumping sites.

Article 58 The State oceanic administrative department shall exercise supervision and control over the use of the sea dumping sites and organize the environmental monitoring

thereof. Where a dumping site proves no longer suitable for use, the State oceanic administrative department shall close it down after verification, terminate all dumping activities conducted there and report thereon to the State Council for the record.

Article 59 Any entity with a permit to dump wastes must act in accordance with the time limit and conditions set down on the permit and carry out dumping in the designated site. After the wastes have been loaded for dumping, the approval department shall check for verification.

Article 60 The entity with a permit to dump wastes shall record down the details of dumping and submit a written report to the approval department after dumping. The vessels engaged in the waste dumping must report to the administrative department in charge of maritime affairs of the departure port.

Article 61 Incineration of wastes on the sea is forbidden.

Disposal of wastes with radioactivity and other radioactive substances on the sea is forbidden. The exemptible radioactive content in the wastes shall be determined by the State Council.

Chapter VIII Prevention and Control of Pollution Damage to the Marine Environment Caused by Vessels and Their Related Operations

Article 62 No vessels and their related operations may discharge in the sea areas under the jurisdiction of the People's Republic of China any pollutants, wastes, ballast water, vessel garbage or other harmful substances into the sea in violation of the provisions of this Law. Those engaged in collecting pollutants, wastes and garbage from vessels or in clearing and washing vessel cabins must possess corresponding collection and treatment capacities.

Article 63 All vessels must, in accordance with relevant regulations, possess certificates and documents for the prevention of pollution to marine environment and make factual records whenever conducting pollutant discharge or any other operations involving pollutants.

Article 64 All vessels must be equipped with adequate pollution prevention facilities and equipment.

For a vessel engaged in transporting cargo apt to cause pollution damage, its structure and equipment shall be capable of preventing or reducing the pollution that the loaded cargo may cause to the marine environment.

Article 65 All vessels shall observe the stipulations of the marine traffic safety laws and regulations and prevent marine environment pollution caused by such sea accidents as collision, running on rocks, stranding, fire and explosion.

Article 66 The State shall perfect and put into practice the civil liability system of compensation for vessel-induced oil pollution, and shall establish a fund system for vessel-induced oil pollution insurance and oil pollution compensation based on the principle of the vessel owner jointly undertaking the risks of any vessel-induced oil pollution compensation liability.

Specific measures for the implementation of the vessel-induced oil pollution insurance and oil pollution compensation fund system shall be formulated by the State Council.

Article 67 For a vessel that sails into or out of a port and engages in transporting cargo apt to cause pollution damage, the carrier and the owner of the cargo or his agent must declare in advance to the interested administrative department in charge of maritime affairs. The vessel may sail into or out of the port, make a transit stop or conduct loading and unloading handling in the port only after approval.

Article 68 While any cargo apt to cause pollution damage is delivered to a vessel for shipping, its vouchers, packages, marks and quantity limitations must be in conformity with the relevant regulations governing the cargo in question.

In case it is necessary for a vessel to transport any cargo with uncertainty whether apt to cause pollution damage, an assessment shall be made beforehand in accordance with the relevant regulations.

In undertaking loading and unloading operation of any oil or toxic and harmful cargo, the vessel and the port shall both comply with the relevant operation rules and regulations to ensure safety and pollution prevention.

Article 69 Ports, docks, loading and unloading spots and shipyards must, be equipped with proper facilities to collect and treat vessel-induced pollutants and wastes in accordance with the relevant regulations, and shall keep these facilities in good conditions.

Ports, docks, loading and unloading spots and shipyards must draw up oil spill pollution contingency scheme and shall be equipped with corresponding contingency equipment and devices.

Article 70 Relevant laws, regulations and standards must be complied with and effective measures shall be adopted to prevent marine environment pollution from vessel and its related operations. The administrative departments in charge of maritime affairs and other related departments should strengthen supervision and control upon vessels and their related operations.

The operation of ship-to-ship transfer of bulk liquid cargo apt to cause pollution damage shall, in accordance with relevant regulations, be reported to the administrative department in charge of maritime affairs for approval beforehand.

Article 71 In case of the sea accident of a vessel that has caused or may cause major pollution damage to the marine environment, the State administrative department in charge of maritime affairs is entitled to adopt enforcement measures to avoid or reduce the pollution damage.

In case of any sea accident taken place on the high sea that has resulted in major pollution damage to a sea area under the jurisdiction of the People's Republic of China or in case of any vessel or facilities on the sea that threaten to pollute such sea area, the State administrative department in charge of maritime affairs is entitled to adopt necessary measures sufficient to cope with the pollution that has actually taken place or may possibly take place.

Article 72 All vessels have the obligation to supervise pollution on the sea and, whenever discovering any pollution accident on the sea or any act that violates the provisions of this

Law, they must immediately report to the nearest department empowered by this Law to conduct marine environment supervision and control.

Whenever a civil aircraft discovers any pollutant discharge or any pollution accident on the sea, it must immediately report to the nearest civil aviation air traffic control entity. The entity that has received such report shall immediately notify the department empowered by this Law to conduct marine environment supervision and control.

Chapter IX Legal Liabilities

Article 73 In case of any of the following acts, in violation of the provisions of this Law, the department empowered by this Law to conduct marine environment supervision and control shall order to suspend illegal activities and correct before required limit of time, or order to take such measures as restricting production and suspending production for renovation, and fine; if the order to correct is refused, the competent department issuing punishment decision may, as of the following date after the order to correct, impose continuous punishment by day based on the original fine; if the circumstance is serious, a cessation and shut-down order may be issued after report to and approval by the competent people's government:

- (1) discharging into the sea any pollutants or any other substances the discharge of which is prohibited by this Law;
- (2) discharging pollutants into the sea in a way inconsistent with the provisions of this Law, or discharging pollutants in excess of standards or the control indicators of the total volume;
- (3) dumping wastes in the sea without obtaining a permit for dumping; and
- (4) failing to take prompt measures for a treatment in the event of an accident or any other contingency that has caused pollution to the marine environment.

For any violation as mentioned in (1) and (3) of the preceding paragraph, a fine of not less than RMB 30,000 yuan but not more than 200,000 yuan shall be imposed; for any violation as mentioned in (2) and (4) of the preceding paragraph, a fine not less than 20,000 yuan but not more than 100,000 yuan shall be imposed.

Article 74 In case of any of the following acts in violation of the provisions of this Law, the department empowered by this Law to conduct marine environment supervision and control shall give a warning or impose a fine in accordance with the provisions of this Law:

- (1) failing to declare or even refusing to declare matters involving the discharge of pollutants in accordance with the relevant provisions, or resorting to falsification in declaring;
- (2) failing to report in accordance with the relevant provisions in the event of an accident or any other contingency;
- (3) failing to make records of a dumping in accordance with the relevant provisions or failing to submit the dumping report in accordance with the relevant provisions; and
- (4) refusing to declare or declaring untruthfully matters involving the transportation of any cargo apt to cause pollution damage by a vessel.

For any violation as mentioned in (1) and (3) of the preceding paragraph, a fine not more than 20,000 yuan shall be imposed; for any violation as mentioned in (2) and (4) of the preceding paragraph, a fine not more than 50,000 yuan shall be imposed.

Article 75 In case of a violation of the provisions of the second paragraph of Article 19 of this Law by refusing an on-the-spot inspection or resorting to falsification during the inspection, the department empowered to conduct marine environment supervision and control shall give a warning and impose a fine not more than 20,000 yuan in accordance with the provisions of this Law.

Article 76 In case of a violation of the provisions of this Law that results in damage to marine ecosystems of coral reefs and mangroves, to marine aquatic resources or to marine protected areas, the department empowered to conduct marine environment supervision and control shall order a correction and adoption of remedial measures within a prescribed time limit in accordance with the provisions of this Law and impose a fine not less than 10,000 yuan but not more than 100,000; where there are any illegal gains, the illegal gains shall be confiscated.

Article 77 In case of the installation of any pollutant discharge outlet into the sea in violation of the provisions of the first and third paragraphs of Article 30 of this Law, the department in charge of environment protection under the relevant local people's government at or above the county level shall order its closing down and impose a fine not less than 20,000 yuan but not more than 100,000 yuan.

Where the oceanic, maritime affairs or fishery administrative department or the environment protection department of armed forces finds that the setup of an outlet violates the provisions of the first or the third paragraph of Article 30 of this Law, it shall notify the administrative department in charge of environment protection to punish the violator in accordance with the provisions of the preceding paragraph.

Article 78 In case of the shift of any dangerous wastes through the sea areas under the jurisdiction of the People's Republic of China in violation of the provisions of the second paragraph of Article 39 of this Law, the State administrative department in charge of maritime affairs shall order the vessel illegally shifting the dangerous wastes to withdraw from the sea areas under the jurisdiction of the People's Republic of China, and impose a fine of not less than 50,000 yuan but not more than 500,000 yuan.

Article 79 If a coastal construction project has not undergone environmental impact assessment in accordance with law, Law of the People's Republic of China on Environmental Impact Assessment shall apply.

Article 80 In case of putting into production or use of any coastal construction project without completing the construction of environment protection installations or with environment protection installations failing to meet prescribed requirements, thus in violation of Article 44 of this Law, the interested administrative department in charge of environment protection shall order suspension of the production or use of the project and impose a fine not less than 20,000 yuan but not more than 100,000 yuan.

Article 81 In case of building any new industrial construction project causing serious pollution to the marine environment in violation of the provisions of Article 45 of this Law, the relevant people's government at or above the county level shall order its closing down in accordance

with the scope of authority in administration.

Article 82 In case of building any marine construction project in violation of the provisions of the first paragraph of Article 47 of this Law, the oceanic administrative department shall order suspension of the construction and based on the circumstances of illegal activities and harmful consequences impose a fine no less than one percent but no more than five percent of the total investment of the construction project, and may order to restore to the original conditions.

In case of putting any marine construction project into production or use without completing the construction of environment protection installations or with environment protection installations failing to meet the prescribed requirements in violation of Article 48 of this Law, the oceanic administrative department shall order suspension of production or use of the project, and impose a fine not less than 50,000 yuan but not more than 200,000 yuan.

Article 83 In case of the use of any material containing radioactive substance in excess of standards or toxic and harmful substances easy to dissolve in the water in violation of the provisions of Article 49 of this Law, the interested oceanic administrative department shall order suspension of the operation of the construction project in question till the relief of the pollution damage, and impose a fine not more than 50,000 yuan.

Article 84 In case of the conduct of any offshore oil exploration and exploitation in violation of the provisions of this Law, thus causing pollution damage to the marine environment, the State oceanic administrative department shall give a warning and impose a fine not less than 20,000 yuan but not more than 200,000 yuan.

Article 85 In case of a violation of the provisions of this law by dumping wastes not in compliance with requirements as specified on the permit, or by dumping wastes in the dumping zone already closed down, the interested oceanic administrative department shall give a warning and impose a fine not less than 30,000 yuan but not more than 200,000 yuan; where the case is serious, the permit may be temporarily detained or revoked.

Article 86 In case of a violation of the provisions of the third paragraph of Article 55 of this Law by transporting wastes from the outside of the People's Republic of China and dumping them in the sea areas under the jurisdiction of the People's Republic of China, the State oceanic administrative department shall give a warning and shall, in accordance with the consequences of the damage that has been caused or may possibly be caused, impose a fine not less than 100,000 yuan but not more than 1,000,000 yuan.

Article 87 In case of a violation of the provisions of this Law by committing any of the following acts, the interested department empowered to conduct marine environment supervision and control shall give a warning or impose a fine in accordance with the provisions of this Law:

- (1) failing to equip with pollution prevention facilities and devices for ports, docks, loading and unloading spots or vessels;
- (2) failing to possess pollution prevention certificate or pollution prevention document for vessels, or failing to take records of pollutant discharge in accordance with the relevant

provisions;

(3) engaging in such operations as surface and port water area ship dismantling, old vessel refitting, salvaging and other surface and underwater operations that cause pollution damage to the marine environment; and

(4) transportation by vessels such cargoes that do not meet the pollution prevention and transportation requirements.

For any act as mentioned in (1) and (4) of the preceding paragraph, a fine not less than 20,000 yuan but not more than 100,000 yuan shall be imposed; for any act as mentioned in (2) of the preceding paragraph, a fine not more than 20,000 yuan shall be imposed; and for any act as mentioned in (3) of the preceding paragraph, a fine not less than 50,000 yuan but not more than 100,000 yuan shall be imposed.

Article 88 In case of a violation of the provisions of this Law by failing to work out oil spill contingency scheme for vessels, oil platforms or ports, docks, loading and unloading spots engaged in oil handling the interested department empowered to conduct marine environment supervision and control shall give a warning in accordance with the provisions of this Law, or shall order a correction within a time limit.

Article 89 Any party that is directly responsible for a pollution damage to the marine environment shall relieve the damage and compensate for the losses; in case the pollution damage to the marine environment is entirely caused by an intentional act or a fault of a third party, that third party shall relieve the damage and be liable for the compensation.

For any damages caused to marine ecosystems, marine aquatic resources or marine protected areas that result in heavy losses to the State, the interested department empowered by the provisions of this Law to conduct marine environment supervision and control shall, on behalf of the State, claim compensation to those held responsible for the damages.

Article 90 Any entity that violates the provisions of this Law and causes marine environment pollution accident shall compensate in accordance with law and be fined by the interested department empowered by the provisions of this Law to conduct marine environment supervision and control according to the second paragraph of this Article; the persons in charge directly responsible for the accident and the other directly responsible persons may be imposed upon a fine no more than fifty percent of his last year's income from such entity; where the persons in charge directly responsible for the accident and the other directly responsible persons are State functionaries, they shall receive administrative sanctions pursuant to law.

The amount of fine mentioned in the preceding paragraph shall be so calculated that it amounts to 20 percent of the direct losses for general or large accidents, and 30 percent for major or extraordinary accidents.

For any accident that severely pollutes marine environment and damages marine ecology, criminal responsibility shall be investigated according to law.

Article 91 Where damage to the marine environment caused by a pollution can not be

avoided despite prompt and reasonable adoption of measures, and where the pollution is entirely attributable to any of the following circumstances, the parties concerned held responsible shall be exempt from liability:

- (1)war;
- (2)irresistible natural calamities; or
- (3)negligence or other wrongful acts in the performance of a department responsible for the maintenance of beacons or other navigation aids.

Article 92 Administrative penalties for any violations of the provisions of Article 12 of this Law concerning the payment of pollutant discharge fees and dumping fees shall be prescribed by the State Council.

Article 93 Where a functionary engage in marine environment supervision and control abuses his power, neglects his duty or perpetrates malpractice for personal gains, thus causing pollution damage to the marine environment, administrative sanction shall be given pursuant to law; if the case constitutes a crime, criminal responsibility shall be investigated according to law.

Chapter X Supplementary Provisions

Article 94 For the purpose of this Law, the following expressions shall have the meanings hereunder assigned to them:

- (1)"Pollution damage to the marine environment" means any direct or indirect introduction of substances or energy into the marine environment which results in deleterious effects such as harm to marine living resources, hazards to human health, hindrance to fishing and other legitimate operations at sea, impairment of the utilization quality of sea water and degradation of environment quality.
- (2)"Internal waters" means all sea areas on the land-ward side of the baseline of the China's territorial sea.
- (3)"Coastal wetland" means water areas where the depth of water is less than 6 metres at low tides and its coastal flooded and wet areas, including the permanent water areas, the intertidal zones and other coastal low lands (or flooded areas) where the depth of water is less than 6 metres.
- (4)"Marine functional zonation scheme" means delimitation of dominant functions and scope in marine utilization in the light of marine natural attributes and social attributes as well as natural resources and specified environment conditions.
- (5)"Fishing areas" means spawning grounds, feeding grounds, wintering grounds and migration channels of fishes and shrimps ,and the mariculture waters of fishes, shrimps shellfishes and algae.
- (6)"Oils" means any kind of oil and its refined products.
- (7)"Oily mixtures" means any mixtures containing oil.
- (8)"Discharge" means acts to drain pollutants into the sea, where by pumping, spilling, releasing, gushing or pouring.
- (9)"Land-based pollution sources" refers to the sites or facilities that discharge from the land

into the sea pollutants which cause or may cause marine environment pollution.

(10)"Land-based pollutant " means pollutant discharged from land-based sources.

(11)"Dumping" means to dispose of wastes or other harmful substances in the sea from vessels, aircraft, platforms or other means of transport, including the abandonment of vessels, aircraft, platforms and other floating apparatus.

(12)"Coastal land areas" means areas connected with the coast or areas where pollutants are directly or indirectly discharged into the sea through pipelines, channels and facilities installations, and where related operations are conducted.

(13)"Incineration on the sea" means intentional act of burning wastes or other substances by burning devices on the sea aiming at destruction by heat; however, such acts that occur accidentally during normal operation of vessels, platforms or other man-made structures shall be excluded.

Article 95 Where specific divisions of functions and powers for the relevant departments involved in marine environment supervision and control are not defined in this Law, the State Council shall define them.

Article 96 Where an international treaty regarding marine environment protection concluded or acceded to by the People's Republic of China contains provisions differing from those contained in this Law, the provisions of the international treaty shall apply; however the provisions about which the People's Republic of China has declared reservations shall be excepted.

Article 97 This Law shall come into force as of April 1, 2000.

3. Law of the People's Republic of China on Environmental Impact Assessment

(Adopted at the 30th session of the Standing Committee of the Ninth National People's Congress on October 28, 2002, and amended in accordance with the Decision of the Standing Committee of the National People's Congress on Amending Six Laws including the Energy Conservation Law of the People's Republic of China at the 21st Session of the Standing Committee of the Twelfth National People's Congress on July 2, 2016)

Chapter I General Provisions

Article 1 The present Law has been enacted for the purpose of carrying out the strategy of sustainable development, prevent the unfavorable impacts of programs and constructions projects upon the environment after they are carried out, and promote the concerted development of the economy, society and environment.

Article 2 The term "appraising environmental impacts" as mentioned in the present Law refers to the methods and institutions for analyzing, predicting and appraising the impacts of programs and construction projects that might incur after they are carried out so as to propose countermeasures for preventing or mitigating the unfavorable impacts and make follow-up monitoring.

Article 3 To work out any of the programs as described in Article 9 of the present Law or to build any project within the territory of the People's Republic of China or within other seas subject to the jurisdiction of the People's Republic of China, appraisals shall be conducted about the environmental impacts according to the present Law.

Article 4 The appraisals of the environmental impacts shall be objective, open and impartial, and shall take the impacts imposed upon the various environmental factors and the corresponding ecosystem by the programs or construction project after they are carried out so as to provide a scientific basis for decision-making.

Article 5 The state encourages relevant entities, experts and the general public to participate in the appraisal of the environmental impacts in appropriate ways.

Article 6 The state shall strengthen the construction of the basic databases for the appraisal of environmental impacts and the system of indicators for appraisal, encourage and support the scientific research of the methods and technical specifications for appraising environmental impacts, and build a system for sharing the information about environmental impacts so as to make the environmental impact appraisals more scientific.

The administrative department in charge of the environmental protection under the State Council shall, in collaboration with other relevant departments under the State Council, organize, establish and improve the basic databases for appraising environmental impacts and the system of appraisal indicators.

Chapter II Appraisal of the Environmental Impacts of Programs

Article 7 The relevant departments of the State Council and the local people's governments at(above) the level of the cities with districts as well as the relevant departments thereof shall, in the process of working out the relevant programs concerning the use of land and the programs for constructing, developing and utilizing the areas, drainage areas or sea areas, conduct environmental impact appraisals, draft chapters or explanations concerning environmental impacts.

In the chapters or explanations of the programs concerning environmental impacts, an analysis, prediction and appraisal of the environment impacts of the program after it is implemented shall be made, and countermeasures shall be put forward for preventing or mitigating the unfavorable environmental impacts. Such chapters or explanations shall form a part of the draft of the programs and shall be reported to the organ in charge of the examination and approval of the programs.

The examination and approval organ may not approve any draft of program which does not have a chapter or explanation of the environmental impacts.

Article 8 With regard to the relevant special programs of industry, agriculture, animal husbandry, forestry, energy, water conservancy, communications, municipal construction, tourism, and natural resources development (hereafter "special programs"), the relevant departments of the State Council and the local people's government of the cities with districts as well as the relevant departments thereof shall, prior to reporting the draft of the special program for examination and approval, organize appraisals of environmental impacts, and

submit a report of environmental impacts to the organ in charge of the examination and approval of the special program.

For the directive program for the special programs as mentioned in the preceding paragraph, an appraisal shall be made about the environmental impacts according to the provisions of Article 7 of the present Law.

Article 9 The specific scope of programs for which environmental impact appraisals shall be made according to the provisions of Articles 7 and 8 of the present Law shall be prescribed by the administrative department under the State Council in charge of environmental protection jointly with other relevant departments of the State Council and be submitted to the State Council for ratification.

Article 10 The report of the environmental impacts of special program shall include the following elements:

- a. An analysis, prediction and appraisal of the environmental impacts that might occur if the program is implemented;
- b. The countermeasures for predicting or mitigating the unfavorable environmental impacts;
- c. The conclusion of the appraisal upon the environment.

Article 11 In case a program may cause unfavorable environmental impacts or directly involve the environmental interests of the general public, the organ that works out the special programs shall, prior to submitting the draft of the programs for examination and approval, seek the opinions of the relevant entities, experts and the general public about the draft of the report about the environmental impacts by holding demonstration meetings or hearings or by any other means, except it is provided by the state that it shall be kept confidential.

The drafting organ shall take the opinions of the relevant entities, experts and the general public about the draft report of environmental impacts into careful consideration, and shall attach a remark whether the opinions are adopted or refused to the report of environmental impacts to be submitted for examination and approval.

Article 12 The organ that works out a special program shall, when reporting the draft of the program for examination and approval, submit the report about the environmental impacts at the same time. In case it fails to submit the report about the environmental impacts, the examination and approval organ may not grant approval.

Article 13 When the people's government at (above) the level of the cities with districts examines the draft of a special program and before making the decision, the administrative department in charge of environmental protection designated by the people's government or other relevant departments shall summon the representatives of relevant departments and experts to form an examination and approval group so as to examine the report of environmental impacts. The examination and approval group shall submit their opinions in written form.

The experts of the examination and approval group as described in the preceding paragraph shall be determined randomly from the list of experts within the relevant majors of the databases of experts established by the administrative departments of the State Council in

charge environmental protection.

The measures for the examination of the special programs subject to the examination and approval of the relevant departments of the people's government on the provincial level and above shall be formulated by the administrative department of the State Council in charge of environmental protection jointly together with other relevant departments of the State Council.

Article 14 Where the examination team offers an amendment opinion, the authority that makes the special plan shall, according to the conclusion of the environmental impact report and examination opinion, amend and improve the draft plan, and give an explanation on the adoption of the conclusion of the environmental impact report and the examination opinion; and give the reason if it does not adopt the conclusion or the opinion.

When examining and approving the draft of a special program, the people's government at(above)the level of the cities with districts and on higher levels or the relevant departments of the people's government shall take the conclusion of the report of environmental impacts and the opinions of examination as an important basis for their decision-making.

In case the conclusion of the report about the environmental impacts or any of the examination opinions is not accepted in the examination and approval, an explanation shall be made and shall be kept in archivist files for further reference.

Article 15 After a program which has significant environmental impacts is carried out, the drafting organ shall organize follow-up appraisals about the environmental impacts in good time, and report the results of appraisal to the organ of examination and approval. If it finds that there are obviously unfavorable environment impacts, it shall propose improvement measures in good time.

Chapter III Appraisal of the Environmental Impacts of Construction Projects

Article 16 The state practices classified management over the appraisals of the environmental impacts of construction projects according to the seriousness of the impacts. The construction entities shall work out the report of environmental impacts, the report form of environmental impacts or the registration form of environmental impacts (hereafter “environmental impact appraisal documents”) according to the following principles:

- a. If the environmental impacts may be significant, it shall work out a report of environmental impacts so as to include an all-round appraisal of the environmental impacts;
- b. If the environment impacts may be gentle, it shall work out a report form of environmental impacts so as to include an analysis or special appraisal of the environmental impacts;
- c. If environment impacts may be very small so that it is not necessary to conduct an appraisal of the environmental impacts, it shall fill in a registration form of the environmental impacts.

The names of the construction projects subject to classified management of appraisal of environmental impacts shall be determined and published by the administrative department of the State Council in charge of environmental protection.

Article 17 The report of the environmental impacts of a construction project shall include the

following elements:

- a. An introduction of the construction project;
- b. The surrounding environment of the construction project;
- c. An analysis, prediction and appraisal of the environmental impacts that may be caused by the construction project;
- d. The measures for protecting the environment of the construction project as well as a technical and economical demonstration;
- e. An analysis of the economic gains and losses of the environmental impacts that may be caused by the construction project;
- f. Suggestions for carrying out environmental monitoring over the construction project;
- g. Conclusion of appraisal of the environmental impacts.

For a construction project which involves water conservancy, there shall be a plan of water conservancy which has been examined and approved by the administrative department of water.

Article 18 The appraisal of the environmental impacts of a construction project shall not be a repetition of the appraisal of the environmental impacts of the program.

As the program of an integrated construction project, the appraisal of the environmental impacts shall be conducted on the basis of the construction project rather than of the program.

Where a specific construction project is covered in a plan on which environmental impact assessment has been conducted, the conclusion of environmental impact assessment of the plan shall be taken as an important basis of environmental impact assessment of the construction project, and the content of environmental impact assessment of the construction project shall be simplified according to the examination opinion of environmental impact assessment of the plan.

Article 19 The institution that provides technical services, upon entrustment, to the appraisal of the environmental impacts of a construction project shall be subject to the examination and inspection of the administrative department of the State Council in charge of environmental protection. If it passes the examination and inspection and is granted a certificate of qualifications, it shall provide services of appraisal of the impacts according to the grade as prescribed in the certificate and the scope of appraisal, and shall be responsible for the conclusion of appraisal. The requirements of qualifications and the measures of administration of the institutions that provide technical services to the appraisal of the environmental impacts of construction projects shall be formulated by the administrative department of the State Council in charge of environmental protection.

The administrative department of the State Council in charge of environmental protection shall publish the names of institutions that have obtained a certificate of qualifications for providing technical services to the appraisal of the environmental impacts of construction projects.

There shall not exist any relationship of interest between the institutions that provide

technical services to the appraisal of the environmental impacts of construction projects and the administrative department in charge of environmental protection and any other department of examination and approval.

Article 20 The report of environmental impacts or the report form of environmental impacts as included in the environmental impact appraisal documents shall be formulated by the institutions that have corresponding qualifications for making appraisals of the environmental impacts.

No entity or individual may designate for any construction entity any institution to make appraisals of the environmental impacts of any construction project.

Article 21 Unless it is provided by the state that it is necessary to keep confidential, for the construction projects which may impose significant environmental impacts and for which it is necessary to work out a report of environmental impacts, the construction entity shall, before submitting the construction project for examination and approval, seek the opinions of relevant entities, experts and the general public by holding demonstration meetings, hearings or by any other means.

The report of environmental impacts submitted by the construction entity for examination and approval shall include an explanation of why the opinions of relevant entities, experts and the general public is accepted or rejected.

Article 22 The environmental impact report and report form of a construction project shall be submitted by the construction entity to the environmental protection administrative department with the approval authority for approval in accordance with the provisions of the State Council.

The approval of marine environmental impact report on a marine construction project shall be governed by the provisions of the Marine Environment Protection Law of the People's Republic of China.

The approval department shall make an approval or disapproval decision and notify the construction entity in writing respectively within 60 days of receipt of the environmental impact report and within 30 days of receipt of the environmental impact report form.

The state shall conduct recordation administration of the environmental impact registration form.

No fees may be charged for the examination and approval of the environmental impact report and report form of a construction project and for the recordation of the environmental impact registration form.

Article 23 The administrative department of the State Council in charge of environmental protection shall be responsible for examining and approving the environmental impact appraisal documents of the following construction projects:

- a. Special construction projects including nuclear facilities and top secret projects;
- b. Construction projects that include different provinces, autonomous regions or municipalities directly under the Central Government;
- c. Construction projects subject to the examination and approval of the State Council or the

relevant departments authorized by the State Council.

The power to examine and approve the environmental impact appraisal documents of any construction project not mentioned in the preceding paragraph shall be subject to the prescription of the people's government of the provinces, autonomous regions and municipalities directly under the Central Government.

In case a construction project may cause unfavorable environmental impacts covering more than one administrative region or if the relevant administrative departments of environmental protection have disputes over the appraisal conclusion of the impacts imposed by the project concerned upon the environment, the environmental impact appraisal documents shall be subject to the examination and approval of the administrative department of environmental protection that is the superior of all the administrative departments concerned.

Article 24 If, after the environmental impact appraisal document of a construction project has been approved, either the nature or scale or venue or the production techniques employed or the measures for preventing pollution and preventing ecological damage has undergone substantial changes, the construction entity shall submit anew the environmental impact appraisal documents of the construction project for examination and approval.

In case five years has passed after the environmental impact document of a construction project is approved when it is decided to start the construction of the project, the environmental impact appraisal document thereof shall be submitted to the original examination and approval department for examination and approval anew. The original examination approval department shall, within 10 days after receiving the environmental impact appraisal document of the construction project, inform the construction entity of the opinions of examination in written form.

Article 25 Where the environmental impact assessment document of a construction project fails to undergo the examination of the approval department in accordance with the law or is disapproved after examination, the construction entity shall not commence construction.

Article 26 In the process of constructing a project, the construction entity shall carry out the countermeasures for environmental protection as proposed in the comments of the examination and approval department of the environmental impact report, the report form of environmental impacts and environmental impact appraisal documents.

Article 27 If, in the process of building or operating a project, any circumstance that is inconsistent with the approved environmental impact appraisal document occurs, the construction entity shall organize a post-appraisal of the environmental impacts, take measures for improvement and report to the original examination and approval department of the environmental impact appraisal documents and the examination and approval department of the construction project for archivist purposes. The original examination and approval department of the environmental impact appraisal document may order the construction entity to conduct the post-appraisal of the environmental impacts and take measures for improvement.

Article 28 The administrative department of environmental protection shall make follow-up

inspections to the environmental impacts incurred after the construction project is put into production or use, and shall find out the causes of and those responsible for any serious environmental pollution or ecological damages. If it is caused by the untruthful environmental impact appraisal document worked out by the institution that provides technical services to the environmental impact appraisal of the construction project, the institution shall be subject to assuming legal liabilities as provided in Article 33 of the present Law. If it is caused by the negligence of duties or malfeasance of any of the staff of the examination and approval department who has granted approval to the environmental impact appraisal document that should not have been approved, the person concerned shall be subject to assuming the legal liabilities as provided in Article 35 of the present Law.

Chapter IV Legal Liabilities

Article 29 Where any authority that makes a plan fails to organize environmental impact assessment in violation of the provisions of this Law, or practices fraud or neglects duty when organizing environmental impact assessment, which causes that the environment impact assessment is significantly inconsistent with the facts, the superior authority or the supervisory authority shall, in accordance with law, take disciplinary actions against its directly responsible person in charge and other directly liable persons.

Article 30 Where any program examination and approval organ unlawfully approves any program draft for which a chapter or explanation of the environmental impacts should have been drafted or any special program draft to which an environmental impact report should have been attached, the person in-charge or other personnel who are held to be directly responsible shall be given an administrative punishment by the superior organ or the government supervision organ.

Article 31 Where a construction entity unlawfully commences the construction of a project without submitting for approval its environmental impact report or report form in accordance with the law, or without reporting for approval anew or requesting the re-examination of the environmental impact report or report form in accordance with the provision of Article 24 of this Law, the environmental protection administrative department at or above the county level shall order it to cease construction, and according to the circumstances of violation of law and damage, impose a fine of not less than 1% but not more than 5% of the total investment of the construction project on it, and order it to restore to the original state; and in accordance with the law, take disciplinary actions against the directly responsible person in charge and other directly liable persons of the construction entity.

Where the construction entity unlawfully commences construction of a project without obtaining the approval of its environmental impact report or report form or without obtaining new approval of the original approval department upon examination, it shall be punished or given disciplinary action in accordance with the provisions of the preceding paragraph.

Where the construction entity fails to undergo recordation formalities for the environmental impact registration form of a construction project in accordance with the law, the environmental protection administrative department at or above the county level shall order

it to undergo recordation, and impose a fine of not more than 50,000 yuan on it.

The construction entity of any marine construction project that commits any violation of law as set forth in this Article shall be punished in accordance with the provisions of the Marine Environment Protection Law of the People's Republic of China.

Article 32 Where any institution that provides, upon entrustment, technical services in making environmental impact appraisals for construction projects is remiss or practices fraud in the appraisal work so that the appraisal documents are inconsistent with the facts, it shall be degraded or the qualification certificate thereof shall be canceled by the administrative department of environmental protection that has granted to it the qualifications for environmental impact appraisals, and be fined up to three times the commissions charged. If any crime has been constituted, it shall be subject to criminal liabilities.

Article 33 Where the department responsible for the examination, approval and recordation of environmental impact assessment documents of construction projects charges fees in examination and recordation, its superior authority or supervisory authority shall order it to return the fees; and if the circumstances are serious, take disciplinary actions against its directly responsible person in charge and other directly liable persons in accordance with the law.

Article 34 In case any of the staff of the administrative department of environmental protection or any other department seeks private gains by illegal means or abuses its power or neglects its duties or unlawfully grants approval to any environmental impact appraisal document of any construction project, he shall be given an administrative punishment. If any crime has been constituted, he shall be subject to criminal liabilities.

Chapter V Supplementary Provisions

Article 35 The people's government of the provinces, autonomous regions and municipalities directly under the Central Government may, according to the practical situation of the local places, demand that environmental impact appraisals be conducted for the programs worked out by the county-level people's government within their respective jurisdictions. The specific measures shall be formulated by the provinces, autonomous regions and municipalities directly under the Central Government according to the provisions of Chapter II of the present Law.

Article 36 The measures for conducting environmental impact appraisals to the construction projects of military facilities shall be formulated by the Central Military Committee according to the present Law.

Article 37 The present Law shall become effective on September 1, 2003.

4. Law of the People's Republic of China on the Administration of Sea Areas

(Adopted at the 24th meeting of the Standing Committee of the Ninth National people's Congress on October 27, 2001)

Chapter I General Principles

Article 1 This law has been enacted for the purpose of strengthening the administration of using sea areas, safeguarding the ownership of the state to the sea areas and the lawful rights and interests of the holders of the right to use sea areas and promoting the reasonable development and sustainable utilization of the sea areas.

Article 2 The term “sea area” as mentioned in this law shall refer to the interior waters, the surface, body, seabed and bottom soil of the territorial seas.

The term “interior waters” as mentioned in this law shall refer to the sea area of the people's Republic of China stretching from the base line on side of the land of the territorial seas to the coastline.

This law shall be applicable to any exclusive continuous use of the seas within specific sea areas of the interior waters or territorial seas for three months or longer.

Article 3 The sea areas shall belong to the state, and the State Council shall exercise ownership over the sea areas on behalf of the state. No entity or individual may usurp on, buy or sell or by any other means transfer sea areas.

The right to use sea areas shall be lawfully obtained for the use of sea areas by any entity or individual.

Article 4 The state practices the system of functional division of the sea. The use of sea areas shall be in conformity with the functional divisions of the sea.

The state shall rigidly administer the use of seas that changes the natural quality of sea areas such as filling up the sea or encircling the sea.

Article 5 The state shall establish a system of information for administering the use of sea areas and shall watch out and monitor the use of sea areas.

Article 6 The state shall establish a system of registering the right to use sea areas. The lawfully registered rights to use sea areas shall be protected by law.

The state shall establish a statistical system for the use of sea areas, and shall disseminate statistical materials concerning the use of sea areas.

Article 7 The maritime administrative department of the State Council shall be responsible for the supervision and administration of the use of sea areas within the whole country. The maritime administrative departments of the local people's government on the county level and above within the coastal regions shall, on the basis of authorization, be responsible for the supervision and administration of the use of adjacent sea areas within their respective administrative divisions.

The fishery administrative departments shall, in accordance with the Fishery Law of the people's Republic of China, exercise supervision and administration over the fishing activities on the sea.

The maritime affairs administrations shall, according to the Law of the people's Republic of China on the Security of Maritime Traffic, be responsible for exercising supervision and administration of the security of the maritime traffic.

Article 8 All entities and individual persons shall bear the obligation of observing the laws and regulations regarding the use of sea areas, and shall be entitled to report and prosecute

violations of the laws or regulations regarding the use of sea areas.

Article 9 Any entity or individual that have made remarkable achievements in the protection or rational use of sea areas or in relevant scientific research shall be granted awards by the people's governments.

Chapter II Functional Divisions of the Sea

Article 10 The maritime administrative department of the State Council shall, jointly with other relevant departments of the State Council and the people's governments of the provinces, autonomous regions and municipalities directly under the Central Government, work out the functional divisions of the seas of the whole country.

The maritime administrative department of the local people's governments on the county level and above within the coastal regions shall, jointly with other relevant departments of the people's governments on the same level, work out the local functional divisions of the seas on the basis of the functional divisions of the seas worked out by the next high authorities.

Article 11 The functional divisions of the sea shall be worked out under the following principles:

1. Scientifically defining the functions of sea areas according to the natural qualities including the location, natural resources and natural environment, etc;
2. Planning the use of the seas by various trades as whole in accordance with the demand of economic and social development;
3. Protecting and improving the ecological environment, ensuring the sustained utilization of sea areas and promoting the development of the maritime economy;
4. safeguarding the security of maritime traffic;
5. safeguarding the security of national defense, ensuring the use of sea for military purposes.

Article 12 The functional divisions of the sea shall be subject to the hierarchical examination and approval.

The functional divisions of the seas within the whole country shall be subject to the approval of the State Council.

The functional divisions of the seas under the jurisdictions of the provinces, autonomous regions and municipalities directly under the Central Government within the coastal regions shall be subject to the approval of the State Council after obtaining the consent of the people's government of the respective province, autonomous region or municipality directly under the Central Government.

The functional divisions of the seas of the counties and cities within the coastal regions shall be subject to the approval of the people's government of their respective province, autonomous region or municipality directly under the Central Government after obtaining the consent of the people's government of the county or city and be submitted to the maritime administrative department of the State Council for archival purposes.

Article 13 In terms of the revision of the functional divisions of the sea, the original organ

that worked out functional divisions shall, jointly with other relevant departments, propose suggestions of revision and submit to the original approving authority for approval. If the revisions are not approved, the functions of the sea areas defined by the functional divisions of the seas shall not be changed.

Where it is necessary to change the functional divisions of the seas for public interests, national defense or large-scale infrastructure construction including energy, traffic, etc., the functional divisions of the seas may be revised upon the approval of the State Council and in accordance with the approving documents of the State Council.

Article 14 The functional divisions of the seas shall, after being approved, be publicized to the general public, with the exception of those that relate to the secrets of the state.

Article 15 The use of sea areas by the trades like aquatics breeding, salt, traffic and tourism based on their industrial plans shall be in conformity with the functional divisions of the seas.

The overall plans, municipal plans and port plans for utilizing coastal land but including the use of sea areas shall be in conformity with the functional divisions of the seas.

Chapter III Application and Approval for the Use of Sea Areas

Article 16 The entities and individuals may apply to the maritime administrative department of the people's government on the county level or above for using the sea areas.

When applying for using the sea areas, the applicant shall submit the following written materials:

1. an application for using sea areas;
2. materials justifying the use of sea areas;
3. relevant certification materials of credit standing;

4. other written materials as provided by law or regulations.

Article 17 The maritime administrative department of the people's governments on the county level and above shall, according to the functional divisions of the seas, be responsible for the examination of applications for using sea areas and shall, pursuant to this Law and the provisions of the people's government of the provinces, autonomous regions and municipalities directly under the Central Government, submit the application to the competent people's government for approval.

In the examination of the applications for using sea areas, the maritime administrative departments shall solicit the advice of other relevant departments on the same level.

Article 18 The use of sea for the purposes as mentioned below shall be subject to the approval of the State Council:

1. the use of sea for projects of filling up the sea up to 50 hectares or more;
2. the use of sea for projects of encircling the sea up to 100 hectares or more;
3. the use of sea for projects of using the sea up to 700 hectares or more without changing the natural qualities of the sea areas;
4. the use of the sea for key state construction projects;
5. the use of the sea for other projects as provided by the State Council.

The power to examine and approve the use of the sea for purposes not mentioned in the preceding paragraph shall be provided by the people's government of the provinces, autonomous regions and municipalities directly under the Central Government under the authorization of the State Council.

Chapter IV The Right to Use Sea Areas

Article 19 After an application for using sea areas is lawfully approved and if the State Council approves the use of the sea, the maritime administrative department of the State Council shall register it in detail lists, and issue a certificate to the applicant indicating the right to use sea areas. If the application for using sea areas is approved by the local people's government, the local people's government shall register it in detailed lists, and issue a certificate to the applicant indicating the right to use sea areas. The applicant for using sea areas shall obtain the right to use sea areas on the day when he obtains the certificate of using sea areas.

Article 20 The right to use sea areas may not only be obtained in the way as mentioned in Article 19 of this Law, it may also be obtained by way of tenders or auctions. The plans of tenders and auctions shall be formulated by the maritime administrative departments and shall be submitted to the competent people's government for approval and implementation. The maritime administrative departments shall, when working out plans for tenders or auctions, solicit the advice of other relevant departments on the same level.

When the tender or auction finishes, the bid-winner or auction winner shall be issued a certificate of right to use sea areas. The bid winner or auction winner shall obtain the right to use sea areas on the day when he obtains the certificate.

Article 21 Any certificate of rights to use sea areas granted shall be publicized to the general public.

No fees other than the royalty for using sea areas may be lawfully charged for the granting of certificates of right to use sea areas.

The measures for the issuance and administration of certificates of right to use sea areas shall be formulated by the State Council.

Article 22 If any sea area has already used for aquatic breeding under the management and administration of rural collective economic organizations or villagers' committee prior to the implementation of this Law, and if it is in conformity with the functional divisions of the sea and approval of the local people's government on the county level has been obtained, the right to use sea areas may remain with the rural collective economic organization or villagers' committee so that the sea areas may be contracted by the members of the collective economic organizations for aquatic breeding.

Article 23 The right of holder of the right to lawfully use sea areas and obtain proceeds shall be protected by law, and may not be infringed upon by any entity or individual.

The holder of the right to use sea areas shall bear the obligation of protecting and rationally using sea areas; the holder of the right to use sea areas may not hinder the non-exclusive use of the sea so that it does not hamper its use of the sea areas.

Article 24 The holder of the right to use sea areas may not, during the term of using the sea areas, engage in the basic mapping of the sea without being approved by law.

If the holder of the right to use the natural resources or the natural conditions of the sea areas under his use are undergoing remarkable changes, he shall report to the maritime administrative department in a timely way.

Article 25 The maximum term for using sea areas shall be defined according to the following purposes:

1. 15 years for aquatic breeding;
2. 20 years for shipbreaking;
3. 25 years for tourism and entertainment;
4. 30 years for salt production and mineral exploitation;
5. 40 years for public interests;
6. 50 years for construction projects including ports, shipbuilding factories, etc.

Article 26 When the term for using the sea area expires, the right holder may, if he needs to continue the use of the sea area, apply to the people's government that approved the use of the sea for renewal no later than 2 months prior to the expiration. Unless for public interest or the security of the state which necessitates the withdrawal of the right to use the sea areas, the people's government that made the approval shall approve the renewal. Where renewal is approved, the holder of the right to use the sea areas shall pay, as pursuant to the provisions of law, corresponding royalties for the renewed use of the sea areas.

Article 27 If it is necessary to alter the holder of the right to use sea areas due to corporate merger, separation or setting up equity joint ventures or cooperative enterprises, approval of the people's government that made the approval shall be obtained.

The right to use sea areas may be lawfully transferred. The specific measures for the transfer of the right to use sea areas shall be formulated by the State Council.

The right to use the sea areas may be inherited.

Article 28 The holder of the right to use the sea areas shall not change the approved uses of the sea areas without authorization. Where it is necessary to change, the change shall be in conformity with the functional divisions of the sea and approval of the people's government that made the approval shall be obtained.

Article 29 Where the right to use sea areas expires and no application for renewal is made or the application for renew is not approved, the right to use sea areas shall be terminated. After the termination of the right to use sea areas, the original right holder shall dismantle all facilities and buildings for the use of the sea that may cause environmental pollution or affect the use of the sea in other projects.

Article 30 For the purpose of public interest or the security of the state, the people's government shall made the approval may lawfully take back the right to use sea areas.

If the right to use sea areas is withdrawn pursuant to the provisions of the preceding paragraph prior to the expiration of the term of use, appropriate compensations shall be made to the right holder.

Article 31 Any dispute arising from the use of sea areas that could not be settled through negotiations shall be settled through mediation by the maritime administrative department of the people's government on the county level or above. The parties to the dispute may also institute directly a suit at the people's court.

Before the dispute over the use of sea areas is settled, no party may change the status quo of using the sea areas.

Article 32 The land emerged after the project of filling up the sea finishes shall belong to the state.

The holder of the right to use sea areas shall, within three months after the completion of the project of filling up the sea, apply, by presenting the certificate of the right to use the sea areas, to the land administrative department of the people's government on the county level or above for registration. The people's government on the county level or above shall register the land in detailed lists, reissue a certificate of the right to use state-owned land and confirm the right to use the land.

Chapter V Royalties for Using Sea Areas

Article 33 The state practices the system of using sea areas on the paid basis.

Any entity or individual that uses a sea area shall pay royalties for the use according to the rates as provided by the State Council. The royalties for using sea areas shall, pursuant to the provisions of the State Council, be turned over to the state treasury.

The concrete steps and measures for charging royalties for the use of sea areas by fishermen for breeding aquatics shall be separately formulated by the State Council.

Article 34 The royalties for using sea areas may, according to the nature or circumstance of using the sea, be paid once for all or be paid on the yearly basis as pursuant to relevant provisions.

Article 35 The use of the sea for the following purposes shall be exempted from paying royalties:

1. military purposes;
2. quays specifically used by official vessels;
3. traffic infrastructure facilities such as non-commercial sea routes and anchorage ground;
4. non-business use of the sea for public interests including teaching, research, prevention and relief of disasters, search and salvage of shipwreck, etc.

Article 36 The royalties for the use of the sea for the following purposes may, pursuant to the provisions of the public fiscal department of the State Council and the maritime administrative department of the State Council, and upon the approval of the public fiscal department and the maritime administrative department of competent people's governments, be paid at reduced rates or be exempted:

1. for public facilities;
2. for key construction projects of the state;
3. for aquatic breeding.

Chapter VI Supervision and Inspection

Article 37 The maritime administrative department of the people's government on the county level and above shall strengthen the supervision and inspection of the use of sea areas.

The public fiscal department of the people's government on the county level and above shall strengthen the supervision and inspection of the payment of royalties for using sea areas.

Article 38 The maritime administrative department shall lay emphasis on building a good team and raise the political and professional qualities of the people responsible for supervising and inspecting the use of sea areas. The people responsible for supervising and inspecting the use of sea areas shall be impartial, devoted, upright and clean in the enforcement of laws, show good manners in providing services, and shall accept the lawful supervision of other people.

The maritime administrative department and the staff members thereof shall not engage in the production or management relating to the use of sea areas.

Article 39 The maritime administrative department of the people's government on the county level and above shall be entitled to take the following measures when discharging their duties of supervision and inspection:

1. requesting the entity or individual subject to inspection to submit relevant documents and materials to justify the use of sea areas;
2. requesting the entity or individual subject to inspection to make statements about relevant issues with regard to the use of sea areas;
3. entering the sea area under the use of an entity or individual subject to inspection for perambulation;
4. ordering the parties concerned to stop the lawbreaking acts in process.

Article 40 The persons responsible for supervising and inspecting the use of sea areas shall, in discharging their supervision and inspection duties, show valid certificates of law enforcement.

The relevant entities and individuals shall facilitate the supervision and inspection of the maritime administrative departments, and shall not refuse or hinder the law enforcement of the supervising and inspecting people.

Article 41 The competent departments that exercises the power of supervision and inspection as pursuant to the provisions of law shall, in their enforcement on the sea, cooperate closely with each other and give mutual support so as to jointly safeguard the ownership of the state and lawful rights and interests of the right holders.

Chapter VII Legal Liabilities

Article 42 Any one who illegally occupies any sea areas without approval or with fraudulently obtained approval shall be ordered to return the illegally occupied sea areas, recover them to their original state with the illegal gains be confiscated and shall be imposed upon a fine of not less than 5 times but not more than 15 times the amount of royalties that should have been paid according to the size of the sea areas during the illegal occupation. Any one who encircles or fills up any part of the sea without approval or with fraudulently obtained approval shall be imposed upon a fine of not less than 10 times but not more than 20 times

the amount of royalties that should have been paid according to the size of the sea areas during the illegal use.

Article 43 If any entity that is not entitled to approve the use of sea areas illegally approves the use of sea areas or approves the use of sea areas beyond its power or fails to approve the use of sea areas according to the functional divisions of the sea, the approving documents shall be invalid, and the sea areas under illegal use shall be taken back. The person-in-charge who is directly responsible for the approval and other persons who are held to be directly responsible shall be given an administrative punishment.

Article 44 If any one violates the provisions of Article 23 of this Law by hampering or disturbing the right holder to use sea areas, the right holder may plead the maritime administrative department to remove the hindrance, or institute a suit at the people's court. If any losses have resulted, he may also plead for damages.

Article 45 Any one who violates the provisions of Article 26 of this Law by continuing the use of sea areas after the expiration of his right without going through relevant procedures shall be ordered to go through the procedures within a stipulated time limit and be fined not less than 10,000 yuan. If he refuses to go through the procedures, he shall be held to be illegally using the sea areas.

Article 46 Any one who violates the provisions of Article 28 of this Law by changing the uses of the sea areas shall be ordered to make corrections within a stipulated time limit with the illegal gains be confiscated and shall be imposed upon a fine of not less than 5 times but more than 15 times the amount of the royalties that should have been paid according to the size of sea areas for the illegal change of the uses of the sea areas. If he refuses to make corrections, the people's government that granted the certificate of right to use sea areas shall write off the certificate and rescind right to use the sea areas.

Article 47 If the original right holder violates the provisions of Article 29 of this Law by failing to dismantle the facilities or buildings within the stipulated time limit after the termination of the right to use sea areas, he shall be ordered to dismantle within a stipulated time limit. If he refuses to dismantle after the expiration of the time limit, he shall be fined an amount of not more than 50,000 yuan and the maritime administrative department of the people's government on the county level or above may entrust relevant entity to dismantle with the expenses therefor be borne by the original right holder.

Article 48 Any one who should, pursuant to the provisions of this Law, pay the royalties on the yearly basis but fails to make the payment in good time shall be ordered to make the payment within a time limit. If he still refuses to make the payment within the time limit, the people's government that granted the certificate of right to use sea areas shall write off the certificate and rescind the right to use the sea areas.

Article 49 Any one who refuses to accept the supervision or inspection or fails to provide truthful information or other relevant materials as against the provisions of this Law shall be ordered to make corrections within a stipulated time limit, be given a warning and be fined an amount of not more than 20,000 yuan.

Article 50 The administrative punishments as mentioned in this Law shall be decided by the maritime administrative department of the people's government on the county level or above within their respective functions with the exception of those for which this Law has provided the organ to give punishments.

Article 51 If the maritime administrative department of the State Council and that of the people's government on the county level or above grants any certificate of right to use sea areas as against the provisions of this Law or fails to discharge its duty of supervision or administration after granting the certificate or fails to make investigations of and punishes illegal acts, the person-in-charge who is directly responsible and other persons who are held to be directly responsible shall be given an administrative punishment; any staff member who is guilty of malpractice for private gains, misuses power or neglects his duties and a criminal offence has been constituted, criminal liabilities shall be investigated.

Chapter VIII Supplementary Provisions

Article 52 If any exclusive use of any specific part of the sea within the interior waters or territorial seas for not more than three months may have great effect on the national defense, maritime traffic or other use of the sea, a provisional certificate of right to use sea areas shall be obtained as pursuant to the provisions of this Law.

Article 53 The measures for the use of the sea for military purposes shall be formulated by the State council and the Central Military Committee in accordance with this Law.

Article 54 This Law shall become effective as of January 1, 2002.

5. Water Pollution Prevention and Control Law of the People's Republic of China

(Adopted at the fifth session of the Standing Committee of the sixth National People's Congress on May 11th, 1984; revised for the first time according to the Decision on Revising the Water Pollution Prevention and Control Law of the People's Republic of China which was adopted at the 19th session of the Standing Committee of the eighth National People's Congress on May 15th, 1996, and revised at the 32nd session of the Standing Committee of the 10th National People's Congress on February 28th, 2008; revised as at the 32nd Session of the Standing Committee of the Tenth National People's Congress on Feb. 28, 2008; and amended for the second time according to the Decision on Amending the Water Pollution Prevention and Control Law of the People's Republic of China as adopted at the 28th Session of the Standing Committee of the Twelfth National People's Congress on June 27, 2017)

Chapter I General Provisions

Article 1 This Law is developed for the purposes of protecting and improving the environment, preventing and controlling water pollution, protecting water ecology, guaranteeing the safety of drinking water, protecting the health of the public, promoting the construction of ecological civilization, and promoting the sustainable economic and social development.

Article 2 This Law applies to the prevention and control of pollution of rivers, lakes, canals,

irrigation channels, reservoirs and other surface waters and ground waters within the territory of the People's Republic of China.

The prevention and control of marine pollution shall be governed by the Marine Environmental Protection Law of the People's Republic of China.

Article 3 In the prevention and control of water pollution, we shall follow the principles of giving priority to prevention, combining prevention with control and preventing and controlling in an all-round way, protect drinking water sources first, rigorously control industrial pollution and urban domestic pollution, prevent and control agricultural non-point pollution, vigorously promote the construction of ecological management projects, and prevent, control and reduce water pollution and ecological damage.

Article 4 The people's governments at or above the county level shall bring the protection of water environment into the national economic and social development planning.

Local people's governments at all levels shall be responsible for the water environment quality of their respective administrative regions, and take measures in a timely manner to prevent and control water pollution.

Article 5 A province, city, county or township shall establish a river chief system, and organize and lead such work as the water resource protection of rivers and lakes, administration of waters and bank lines, prevention and control of water pollution, and governance of water environment within its administrative region by degree and section.

Article 6 The state practices the objective responsibility system and the evaluation system for the protection of water environment, and takes the accomplishment of the protection objectives of water environment as a content for evaluating and assessing the local people's governments and persons in charge of them.

Article 7 The state encourages and supports the scientific and technological research on the prevention and control of water pollution, the application and promotion of advanced technologies as well as the publicity and education of water environment protection.

Article 8 The state shall, in the mode of financial transfer payment or other, establish a compensation mechanism for the ecological protection of the water environment in drinking water source reserve areas and upper reaches of rivers, lakes and reservoirs.

Article 9 The administrative departments of environmental protection under the people's governments at or above the county level shall exercise unified supervision and administration over the prevention and control of water pollution.

The maritime administrative body under the administrative department of traffic shall exercise supervision and administration over the prevention and control of water pollution from vessels.

The departments in charge of water administration, state land and resources, health, construction, agriculture and fishery under the people's governments at or above the county level as well as institutions in charge of protecting water resources in important rivers and lakes shall, within their respective scope of duties and functions, exercise supervision and administration over the prevention and control of water pollution.

Article 10 Discharge of water pollutants shall be within the state or local standards for the discharge of water pollutants and indicators for the total discharge control of major water pollutants.

Article 11 All entities and individuals have the obligation to protect water environment, and have the right to report to authorities acts polluting or damaging water environment.

The people's governments at or above the county level and the relevant administrative departments thereunder shall honor and reward entities and individuals that have made great contributions to the prevention and control of water pollution.

Chapter II Standards and Planning for the Prevention and Control of Water Pollution

Article 12 The power to formulate the state quality standards of water environment shall remain with the administrative department of environmental protection under the State Council.

The people's government of any province, autonomous region or municipality directly under the Central Government may, for issues not provided in the state quality standards of water environment, work out local standards and file such standards with the administrative department of environmental protection under the State Council for archival purpose.

Article 13 The administrative department of environmental protection under the State Council may, together with the competent department of water administration under the State Council and the people's governments of the related provinces, autonomous regions or municipalities directly under the Central Government, in accordance with the use functions of the waters of important rivers and lakes as determined by the state as well as the relevant local conditions on economy and technology, determine the quality standards of water environment applicable to the waters of these important rivers and lakes at provincial boundary areas, and implement such standards after filing them with the State Council and obtaining the approval thereof.

Article 14 The administrative department of environmental protection under the State Council shall formulate the state standards for the discharge of water pollutants in accordance with the state quality standards of water environment and the national economic and technological conditions.

For issues not provided in the state standards for the discharge of water pollutants, the people's government of any province, autonomous region or municipality directly under the Central Government may work out local standards for the discharge of water pollutants; for issues provided in the state standards for the discharge of water pollutants, it may also work out local standards stricter than the state standards. Such local standards must be filed with the administrative department of environmental protection under the State Council for archival purpose.

Discharge of pollutants to waters under the governance of certain local standards for the discharge of water pollutants must strictly abide by the said local standards.

Article 15 The administrative department of environmental protection under the State Council and the people's governments of provinces, autonomous regions and municipalities

directly under the Central Government shall, in light of the requirements of water pollution prevention and control as well as the state or local economic and technological conditions, amend the quality standards of water environment and the standards for the discharge of water pollutants at time appropriate.

Article 16 The prevention and control of water pollution must be under unified planning by drainage area or region. The planning for the prevention and control of water pollution of an important river or lake determined by the state must be prepared by the administrative department of environmental protection and departments of macroeconomic control and water administration under the State Council together with the people's government of the related province, autonomous region or municipality directly under the Central Government, and be submitted to the State Council for approval.

The planning for the prevention and control of water pollution of a river or lake across more than one province, autonomous region or municipality directly under the Central Government, other than one prescribed in the preceding paragraph, shall be prepared by the administrative departments of environmental protection under the people's governments of the related provinces, autonomous regions or municipalities directly under the Central Government together with the competent departments of water administration at the same level and the related municipal or county people's governments in accordance with the planning for the prevention and control of water pollution of important rivers and lakes determined by the state and in light of the local situation, and be submitted to the State Council for approval after it is examined and approved by the people's governments of the related provinces, autonomous regions or municipalities directly under the Central Government.

The planning for the prevention and control of water pollution of a river or lake across more than one county in a province, autonomous region or municipality directly under the Central Government shall be prepared by the administrative department of environmental protection under the people's government of the province, autonomous region or municipality directly under the Central Government together with the competent department of water administration at the same level in accordance with the planning for the prevention and control of water pollution of important rivers and lakes determined by the state and in light of the local situation, be submitted to the people's government of the province, autonomous region or municipality directly under the Central Government for approval and be filed with the State Council for archival purpose.

The approved planning for the prevention and control of water pollution is the fundamental basis for the prevention and control of water pollution, and the amendments to such planning must be under the approval of the organ approving the planning.

The local people's government at or above the county level shall organize the preparation of the planning for the prevention and control of water pollution in this administrative region in accordance with the legally approved planning for the prevention and control of water pollution of rivers and lakes.

Article 17 The relevant city or county people's government shall, according to the requirements of the objective of improving water environment quality as determined in accordance with the plan for the prevention and control of water pollution, make a plan for reaching the objective within a prescribed time limit, and take measures to reach the objective on schedule.

The relevant city or county people's government shall report the plan on reaching the objective within the prescribed time limit to the people's government at the next higher level for recordation, and release it to the public.

Article 18 The city or county people's government shall, when reporting environmental conditions and the completion of the environmental protection objective to the people's congress at the same level or its standing committee each year, report the implementation of the plan for reaching the objective on water environment quality, and release it to the public.

Chapter III Supervision and Administration of the Prevention and Control of Water Pollution

Article 19 The building, renovation and enlargement of construction projects directly or indirectly discharging pollutants to waters and other water establishments shall be subject to environmental impact assessment.

Before building, renovating or enlarging the outfall to a river or lake, the construction entity shall obtain the consent of the competent department of water administration or the governing authority of the drainage area concerned; where it involves water area for navigation or fishery, the administrative department of environmental protection shall, when examining and approving the environmental impact assessment document, ask for the opinion of the competent department of traffic and that of fishery.

The facilities for the prevention and control of water pollution in a construction project shall be designed, constructed and put into use with the principal part of the project at the same time. The facilities for the prevention and control of water pollution shall comply with the requirements of the environmental impact assessment documents granted approval or recordation.

Article 20 The state shall implement the rules for the control of total discharge of major water pollutants.

The administrative department for environmental protection of the State Council shall, after soliciting the opinions of the relevant departments of the State Council and the people's governments of all provinces, autonomous regions and municipalities directly under the Central Government, report the indicators for controlling the total discharge of major water pollutants jointly with the economic comprehensive macro-control department of the State Council to the State Council for approval and assign the indicators for implementation.

The people's government of a province, autonomous region, or municipality directly under the Central Government shall, in accordance with the provisions of the State Council, reduce and control the total discharge of major water pollutants of its administrative region. The

specific measures shall be prescribed by the administrative department of environmental protection of the State Council jointly with other relevant departments of the State Council. The people's government of the province, autonomous region, or municipality directly under the Central Government may, in light of the water environment quality of its administrative region and the requirements for the prevention and control of water pollution, control the total discharge of the water pollutants other than the major water pollutants of the state.

In the areas where the indicators for the control of total discharge of major water pollutants are exceeded or the objective for the improvement of water environment quality is not completed, the administrative department for environmental protection of the people's government at or above the provincial level shall, jointly with other relevant departments, hold an interview with the principal person in charge of the people's government of the region, suspend the approval of environmental impact assessment documents of construction projects of total discharge of new major water pollutants. The interview shall be released to the public.

Article 21 An enterprise or public institution which directly or indirectly discharges industrial waste water or medical sewage to waters or waste water or sewage that may be discharged after a pollutant discharge license is obtained as required shall obtain a pollutant discharge license. An entity operating facilities for the centralized treatment of urban sewage shall also obtain a pollutant discharge license. The pollutant discharge license shall specify the types, concentration, total discharge and discharge direction of water pollutants, etc. The specific measures for the pollutant discharge license shall be prescribed by the State Council.

All enterprises and public institutions and other producers and dealers are prohibited from discharging the waste water and sewage as prescribed in the preceding paragraph to waters without a pollutant discharge license or in violation of the provisions of the pollutant discharge license.

Article 22 Enterprises, public institutions and individual industrial and commercial households which discharge water pollutants to waters shall set up pollutant discharge outlets in accordance with the laws, administrative regulations and the provisions of the administrative department for environmental protection of the State Council; if such outlets lead to rivers or lakes, they shall also abide by the provisions of the water administrative department of the State Council.

Article 23 An enterprise or public institution that conducts licensed management of pollutant discharge or any other producer or dealer shall, according to the relevant provisions and monitoring rules of the state, monitor the discharged water pollutants, and retain original monitoring records. Major pollutant discharge entities shall also install equipment for the automatic monitoring of discharge of water pollutants, link to the monitoring equipment of the administrative department for environmental protection, and guarantee the normal operation of monitoring equipment. The specific measures shall be prescribed by the administrative department for environmental protection of the State Council.

The list of major pollutant-discharging entities required to install automatic monitoring

equipment on the discharge of water pollutants shall be determined by the administrative department of environmental protection of the local people's government at the level of municipality divided into districts or above by consulting with the related departments at the same level in light of the environmental capacity of the administrative region, the requirements of the indicators on total discharge control of important water pollutants as well as the category, quantity and concentration of water pollutants discharged by pollutant-discharging entities.

Article 24 Enterprises and public institutions that conduct licensed management of pollutant discharge and other producers and dealers shall be responsible for the truthfulness and accuracy of the monitoring data.

Where the administrative department for environmental protection finds that any major pollutant discharge entity's equipment for the automatic monitoring of discharge of water pollutants has abnormal data transmission, it shall conduct an investigation in a timely manner.

Article 25 The state shall establish rules for the monitoring of water environment quality and monitoring of water pollutant discharge. The administrative department of environmental protection of the State Council shall be responsible for working out water environment monitoring standards, releasing the state's water environment situation in a uniform manner and organizing a monitoring network with the water administrative department and other departments of the State Council, make uniform planning on the setup of stations (outlets) for the monitoring of water quality environment of the state, establish a monitoring data sharing mechanism, and strengthen the administration of water environment monitoring.

Article 26 The work institutions of protection of water resources of important rivers and lakes determined by the state shall be in charge of monitoring the water environment quality of provincial boundary waters where they are located, report the monitoring results to the administrative department of environmental protection and the competent department of water administration under the State Council; and report the monitoring results to the leading institution of protection of water resources of drainage areas established upon the approval of the State Council, if any.

Article 27 When developing, utilizing, adjusting or transferring water resources, the relevant departments of the State Council and local people's governments at or above the county level shall make overall plans, maintain the rational water flow of rivers and the water level of lakes, reservoirs and groundwater at a reasonable place, guarantee the basic water use for ecological purpose, and protect the ecological functions of waters.

Article 28 The administrative department for environmental protection of the State Council shall, jointly with the water administrative and other departments of the State Council and people's governments of relevant provinces, autonomous regions and municipalities directly under the Central Government, establish a mechanism for the joint coordination of water environmental protection of valleys of important rivers and lakes, and make uniform planning, adopt uniform standards, conduct uniform monitoring, and take uniform prevention and

control measures.

Article 29 The administrative department for environmental protection of the State Council and the administrative department for environmental protection of the people's government of a province, autonomous region or municipality directly under the Central Government shall, jointly with the relevant department at the same level, specify the requirements for the protection of ecological environment in valleys, organize the monitoring and evaluation of tolerance of environmental resources in valleys, and give early warnings on the tolerance of environmental resources in valleys according to the requirements for ecological environment functions of valleys.

The local people's government at or above the county level shall, according to the requirements for the ecological environment functions of valleys, organize the protection and recovery of lakes, rivers and wet land, construct ecological environment treatment and protection projects such as artificial wetland, water source cultivation forest, buffer belts and isolation belts of plants along rivers and lakes, rectify black and smelly waters according to the actual local circumstances, and enhance the bearing capacity of environmental resources in valleys.

In development and construction activities, effective measures shall be taken to maintain the ecological environment functions of valleys, and strictly guard the bottom line of ecological protection.

Article 30 The administrative department of environmental protection and other departments exercising the right of supervision and administration according to this Law have the right to make spot inspection on pollutant discharging entities within their jurisdiction, and the said entities shall truthfully report the relevant information and provide necessary material. The inspecting authority has the obligation to keep the trade secrets of the said entities known in the process of inspection.

Article 31 Any dispute over water pollution which involves more than one administrative region shall be settled upon the negotiations of the related local people's governments, or upon the coordination of their common higher people's government.

Chapter IV Measures for the Prevention and Control of Water Pollution

Section 1 General Rules

Article 32 The administrative department of environmental protection of the State Council shall, jointly with the competent health department of the State Council, and according to the hazardousness and degree of impact on the health of the public and ecological environment, release a list of poisonous and hazardous water pollutants, and conduct risk management.

Any enterprise or public institution or any other producer or dealer that discharges poisonous and hazardous water pollutants as listed in the catalogue prescribed in the preceding paragraph shall monitor pollutant discharge outlets and the surrounding environment, assess environmental risks, screen potential environmental safety hazards, release the information on poisonous and hazardous pollutants, and take effective measures to prevent

environmental risks.

Article 33 It is prohibited to discharge oil, acid, alkaline or highly toxic waste liquids to waters. It is prohibited to clean in waters the vehicles and containers which have carried or stored oil or pathogenic pollutants.

Article 34 It is prohibited to discharge or dump radioactive solid waste or waste water containing highly and medium radioactive substances to waters.

Waste water containing low radioactive substances may only be discharged to waters in accordance with the state provisions on and standards for the prevention and control of radioactive pollution.

Article 35 For discharging heated waste water to waters, corresponding measures shall be taken to guarantee that the temperature of waters is in line with the water environment quality standards.

Article 36 Waste water containing pathogen may be discharged only after it is sterilized in accordance with the relevant state standards.

Article 37 It is prohibited to discharge or dump industrial solid waste, urban refuse and other castoffs to waters.

It is prohibited to discharge or dump soluble highly toxic waste residues containing mercury, cadmium, arsenic, chromium, lead, cyanide or yellow phosphorus to waters, or directly bury them underground.

For places storing soluble highly toxic waste residues, corresponding waterproof, anti-leakage and anti-loss measures must be taken.

Article 38 It is prohibited to stockpile or store solid wastes and other pollutants at bench land and bank slopes below the highest water level of rivers, lakes, canals, channels and reservoirs.

Article 39 It privately sets underground pipelines through seepage wells, seepage pits, crevices, or karst caves, to falsify or forge any monitoring data, or discharges any water pollutants by evading supervision such as the irregular operation of facilities for the prevention and control of water pollution.

Article 40 A chemical production enterprise or an entity that operates or manages industrial clusters, a mine exploration area, tailings pond, hazardous waste disposal field, or landfill, etc., shall take anti-leakage or other measures, build underground water quality monitoring sites to monitor water quality, and prevent underground water pollution.

The underground oil tanks of oil stations shall use double-layer tanks or other effective measures, such as building anti-leakage pools, shall be taken to monitor anti-leakage and prevent underground water pollution.

It is prohibited to use any ditch, pit or pool which has not been dealt with anti-leakage measures to transmit or store waste water containing pathogenic pollutants, sewage containing pathogen and other castoffs

Article 41 For multi-layer ground water, layered exploitation shall be resorted to if the water quality differs greatly from one aquifer to another. No combined exploitation of phreatic water

and confined water already polluted may be permitted.

Article 42 When constructing underground engineering facilities or conducting underground exploitation or mining activities, preventive measures must be taken to prevent groundwater pollution.

Where a waste mine, drilling well or water intake well, etc., is discarded as useless, the well shall be sealed up or refilled.

Article 43 Artificial recharge for ground water may not deteriorate the quality of groundwater.

Section 2 Prevention and Control of Industrial Water Pollution

Article 44 The relevant departments under the State Council and the local people's governments at or above the county level shall reasonably plan the distribution of industry, require enterprises causing water pollution to make technical innovation and take comprehensive prevention and control measures to improve the repeating utilization factor of water and reduce the discharge of waste water and pollutants.

Article 45 An enterprise that discharges industrial waste water shall take effective measures to collect and process all generated waste water, and prevent environmental pollution. If the industrial waste water contains any poisonous and hazardous water pollutants, the enterprise shall conduct categorized collection and treatment instead of discharging them after dilution.

The industrial cluster shall build supporting centralized sewage treatment facilities, install automatic monitoring equipment, link to the monitoring equipment of the administrative department of environmental protection, and guarantee the normal operation of the monitoring equipment.

Where industrial waste water is discharged to centralized sewage treatment facilities, they shall be processed in advance in accordance with the relevant provisions of the state, and may be discharged after the requirements for the treatment techniques of centralized treatment facilities are satisfied.

Article 46 The state applies the washing-out system to backward techniques and equipment that seriously pollute water environment.

The department of macro-economic control under the State Council shall, together with the relevant departments of the State Council, publish the catalogue of techniques which seriously pollute water environment and are to be eliminated within a certain time limit and the catalogue of equipment which seriously pollutes water environment and is prohibited to be produced, sold, imported and used.

Producers, sellers, importers or users shall, within the prescribed time limit, stop producing, selling, importing or using any equipment listed into the aforesaid catalogue of equipment to be eliminated. Entities and individuals adopting any technique listed into the aforesaid catalogue of technique to be eliminated shall stop using it within the prescribed time limit.

Equipment to be eliminated pursuant to the preceding two paragraphs of this Article may not be transferred to others to use.

Article 47 The state prohibits the building of small-scale production projects of paper making,

leather making, printing and dyeing, dyestuff, coking, sulfur refining, arsenic refining, mercury refining, oil refining, electroplating, pesticides, asbestos, cement, glass, steel, thermal power etc. that seriously pollute water environment and do not conform with the state industrial policies.

Article 48 Enterprises shall adopt clean technique that utilizes raw materials at a higher efficiency and discharges fewer pollutants, and strengthen administration to reduce the generation of water pollutants.

Section 3 Prevention and Control of Water Pollution in Urban Areas

Article 49 Urban sewage shall be treated in a concentrated way.

The local people's government at or above the county level shall raise funds through fiscal budget and other channels, and make unified planning and overall arrangement for the construction of facilities for the concentrated treatment of urban sewage as well as the supporting pipe network so as to improve the collection rate and treatment rate of urban sewage of the administrative region.

The administrative department of construction under the State Council shall, together with the administrative department of macro-economic control and the administrative department of environmental protection under the State Council, in accordance with the urban and rural planning and water pollution prevention and control planning, organize the establishment of the national planning for construction of urban sewage treatment facilities. The local people's government at or above the county level shall organize the departments in charge of construction, macro economic control, environmental protection and water administration to establish the planning for construction of urban sewage treatment facilities of the administrative region. The administrative department of construction under the local people's government at or above the county level shall, in accordance with the planning for construction of urban sewage treatment facilities, organize the construction of facilities for the concentrated treatment of urban sewage as well as the supporting pipe network, and strengthen supervision and administration over the operation of such facilities.

An entity that operates the facilities for the centralized treatment of urban sewage shall provide paid services of sewage treatment to the entities discharging pollutants in accordance with the relevant provisions of the state, charge sewage treatment fees, and guarantee the normal operation of such facilities. Sewage treatment fees collected shall be used for the construction and operation of facilities for the centralized treatment of urban sewage and sludge treatment and disposal, and shall not be misappropriated for any other purpose.

The specific measures governing the charge for sewage treatment with urban sewage concentrated treatment facilities as well as the administration and use of such facilities shall be determined by the State Council.

Article 50 Discharge of water pollutants to urban sewage concentrated treatment facilities shall be in line with the state or local standards for the discharge of water pollutants.

Entities operating urban sewage concentrated treatment facilities shall be responsible for

the quality of the water discharged from such facilities after treatment.

The administrative department of environmental protection shall supervise and inspect the quality and quantity of the water discharged from urban sewage concentrated treatment facilities after treatment.

Article 51 An entity that operates facilities for the centralized treatment of urban sewage or a sludge treatment and disposal entity shall conduct sludge treatment and disposal in a safe manner, guarantee that the sludge after treatment and disposal complies with national standards, and record the direction of sludge.

Section 4 Prevention and Control of Water Pollution in Agriculture and Rural Areas

Article 52 The state shall support the construction of rural sewage and garbage treatment facilities, and promote the centralized treatment of rural sewage and garbage.

Local people's governments at all levels shall make overall planning to build rural sewage and garbage treatment facilities and guarantee their normal operation.

Article 53 The determined quality standards and use standards for fertilizers and pesticides shall satisfy the requirements for water environment protection.

Article 54 Use of pesticides must be in line with the state provisions and norms on safe use of pesticides.

Transportation and storage of pesticides as well as disposal of out-of-date pesticides require more efforts in administration to prevent water pollution.

Article 55 The competent agriculture department of the local people's government at or above the county level and other relevant departments shall take measures to direct agricultural producers to use fertilizers and pesticides in a scientific and rational manner, popularize soil testing formulas and fertilizing technologies, use efficient, low-toxic and low-residue pesticides, control the excessive use of fertilizers and pesticides, and prevent water pollution.

Article 56 The state supports livestock and poultry breeding plants or communities to construct facilities for the comprehensive utilization or harmless treatment of livestock and poultry stool and waste water.

These plants or communities shall guarantee the normal operation of such facilities and make sure that the discharge of sewage reaches corresponding standards so as to prevent water environment from being polluted.

The county or township people's government at the place where the scattered or centralized breeding area of livestock and poultry is located shall organize the separate collection and centralized treatment and utilization of livestock and poultry sewage.

Article 57 Those engaging in aquaculture are required to protect the ecological environment of waters, scientifically determine the breeding density and reasonably cast baits and use drugs so as to prevent water environment from being polluted.

Article 58 The water used for farmland irrigation shall comply with the corresponding water quality standards, and pollution to soil, underground water and agricultural products shall be prevented.

The discharge of industrial waste water or medical sewage to farmland irrigation canals shall be prohibited. If urban sewage or livestock and poultry breeding waste water and processing waste water of agricultural products that has not been subject to comprehensive utilization is discharged to farmland irrigation canals, the water quality of the nearest place supplying water for irrigation at lower reaches shall comply with the water quality standards for farmland irrigation.

Section 5 Prevention and Control of Water Pollution from Vessels

Article 59 Vessels shall discharge oil-polluted water or domestic sewage in accordance with the standards for the discharge of pollutants by vessels. Maritime navigation vessels must abide by the standards of inland rivers for the discharge of pollutants by vessels as long as they enter inland rivers or ports.

Residual oil and waste oil of vessels shall be recycled, and it is prohibited to discharge them to waters.

It is prohibited to dump vessel refuse to waters.

Vessels conveying oil or poisonous cargos must take anti-overflow and anti-leakage measures to prevent water pollution resulting from the drop of such cargos into water.

Where a vessel sailing on international navigation lines in inland waters of the People's Republic of China discharges ballasting water, it shall adopt ballasting water processing equipment or take other equivalent measures to sterilize the ballasting water or conduct other treatment. The discharge of vessel ballasting water in non-compliance with the relevant provisions shall be prohibited.

Article 60 Vessels shall equip themselves with corresponding antifouling equipment and apparatus in accordance with the relevant state provisions, and hold the legal and valid certificates and documents on preventing water environment from being polluted.

Any vessel operation involving the discharge of pollutants must be conducted in strict accordance with the operating procedure, and the relevant information shall be truthfully recorded on the corresponding book of records.

Article 61 The city or county people's government at the place where the port, wharf, loading and unloading station or shipyard is located shall make overall planning to build facilities for the receipt, transfer, treatment and disposal of vessel pollutants and wastes.

Ports, docks, loading and unloading stations as well as dockyards must equip themselves with enough facilities for taking over vessel pollutants and castoffs. Entities engaging in taking over vessel pollutants and castoffs or cleaning the cabin of vessels carrying oil or cargos with the hazard of pollution shall have the taking-over and processing capacity suitable for its operation scale.

Article 62 A vessel or the relevant operator that conducts any operation with pollution risks shall, in accordance with the relevant laws, regulations and standards, take effective measures to prevent water pollution. The maritime safety administration and the competent fishery department shall strengthen the supervision and administration of vessels and the relevant operations.

Where a vessel plans to conduct the operation of lightering bulk liquid cargo with the hazardous pollution, it shall prepare an operation plan, take effective safety and pollution prevention and control measures, and report the plan to the maritime safety administration at the place of operation for approval.

Vessel dismantling on the beach shall be prohibited.

Chapter V Protection of Drinking Water Sources and Other Special Waters

Article 63 The state has established the drinking water source reserve system. Drinking water source reserves are classified into Grade I and Grade II. It is allowed to delimit a certain area at the periphery of a drinking water source reserve as a quasi reserve.

For the determination of a drinking water source reserve, the related municipal or county people's government shall propose a plan and submit the plan to the people's government of the concerned province, autonomous region or municipality directly under the Central Government for approval. For the determination of a reserve involving more than one municipality or county, the people's governments of the related municipalities and counties shall propose a plan upon negotiations and submit the plan to the people's government of the concerned province, autonomous region or municipality directly under the Central Government for approval; in case they can't reach an agreement upon negotiations, the plan shall be proposed by the administrative department of environmental protection under the people's government of the concerned province, autonomous region or municipality directly under the Central Government together with the departments in charge of water administration, state land and resources, health and construction at the same level, and be submitted to the people's government of the concerned province, autonomous region or municipality directly under the Central Government for approval after getting the opinions of the related departments at the same level.

A drinking water source reserve involving more than one province, autonomous region, or municipality directly under the Central Government shall be determined by the people's government of the concerned province, autonomous region or municipality directly under the Central Government with the governing authority of the related drainage area upon negotiations; in case they can't reach an agreement upon negotiations, the plan shall be proposed by the administrative department of environmental protection under the State Council together with the departments in charge of water administration, state land and resources, health and construction at the same level, and be submitted to the State Council for approval after getting the opinions of the related departments of the State Council.

The State Council and the people's government of any province, autonomous region or municipality directly under the Central Government may, in light of the actual needs for protecting drinking water sources, adjust the scope of a drinking water reserve so as to ensure the safety of drinking water. The related local people's governments shall set up clear geographical landmark and warning sign at the boundary of each drinking water source reserve.

Article 64 No outfall may be set up in drinking water source reserves.

Article 65 It is prohibited to build, renovate or enlarge in a Grade I drinking water source reserve any construction projects irrelevant to water supply facilities and the work of water source protection; for those already accomplished, the people's government at or above the county level shall order their demolition or closure.

It is prohibited to breed in cages, travel, swim, go angling or conduct any other activities that may pollute drinking waters in any Grade I drinking water source reserves.

Article 66 It is prohibited to build, renovate or enlarge in a Grade II drinking water source reserve any construction projects discharging pollutants; for those already accomplished, the people's government at or above the county level shall order their demolition or closure. When conducting cage breeding, traveling or other activities in a Grade II drinking water source reserve, corresponding measures must be taken in accordance with the relevant provisions to keep drinking waters from being polluted.

Article 67 It is prohibited to build or enlarge in a quasi drinking water source reserve any construction projects seriously polluting waters, but rebuilding is allowed under the premise of not increasing the discharge volume.

Article 68 The people's government at or above the county level shall, in light of the actual needs of the protection of drinking water sources, take engineering measures or such ecological protection measures as building wetland or water conservation forests in quasi reserves to prevent water pollutants from being directly discharged into drinking waters so as to ensure the safety of drinking water.

Article 69 The local people's government at or above the county level shall organize environmental protection and other departments to investigate and appraise the environmental situation and pollution risks of the drinking water resource protection areas, recharge areas of underground drinking water resources, and the surrounding areas of water suppliers, screen the possible pollution risk factors, and take corresponding risk prevention measures.

Where drinking water sources are polluted, which may pose a threat to the safety of water supply, the administrative department of environmental protection shall order the relevant entity, public institution or any other producer or dealer to take such measures as ceasing the discharge of water pollutants, and notify the drinking water supplier and water supply, health and water administrative departments, etc., and if different administrative regions are involved, the relevant local people's government shall also be notified.

Article 70 The people's government of a city whose water is supplied by a single water source shall build emergency water sources or backup water sources, and regional networking water supply may be conducted in the regions where possible.

The local people's government at or above the county level shall make rational arrangements and layout on agricultural drinking water sources, and in the regions where possible, urban water supply pipelines may be extended, or cross-village or county centralized water supply projects and other forms may be taken to develop large-scale centralized water supply.

Article 71 The drinking water supplier shall effectively monitor the water quality of water intake and outlets. If the entity finds that the water quality of any water intake fails to comply with the standards for the water quality of drinking water sources or water quality of water outlets fails to comply with drinking water health standards, it shall take corresponding measures in a timely manner, and report it to the competent water supply department of the local city or county people's government. The competent water supply department shall, after receiving the report, notify the environmental protection, health, water administrative departments, etc.

The drinking water supplier shall be responsible for the quality of the water it supplies, ensure the safe and reliable operation of water supply facilities, and ensure that the quality of the water it supplies complies with the relevant national standards.

Article 72 The local people's government at or above the county level shall organize the relevant departments to monitor and appraise the safety of drinking water of drinking water resources, the water supplied by suppliers and the water from taps of users within its administrative region.

“The relevant department of the local people's government at or above the county level shall, at least on a quarterly basis, release to the public the information on the safety of drinking water.

Article 73 The State Council and the people's government of any province, autonomous region or municipality directly under the Central Government may, in light of the needs for protecting water environment, prohibit or restrict the use of detergent, fertilizer and pesticide containing phosphor or restrict planting or breeding, etc. within a drinking water source reserve.

Article 74 The people's government at or above the county level may delimit reserves for waters at famous scenic sites, important fishery waters and other waters with special economic and cultural values, and take steps to guarantee that the water quality of such reserves conforms to the water environment quality standards for the prescribed purposes.

Article 75 No outfalls may be set up in reserves for waters at famous scenic sites, important fishery waters and other waters with special economic and cultural values, but building outfalls in vicinity of such reserves is allowed only under the premise of not polluting the waters of such reserves.

Chapter VI Management of Water Pollution Accidents

Article 76 The people's governments at all levels, the related departments thereof as well as enterprises and public institutions with potential risk of occurrence of water pollution accidents shall, pursuant to the provisions of the Law of the People's Republic of China on Response to Emergencies, do a good job in making good preparations for water pollution emergencies, dealing with such emergencies and carrying out the recovery work after the event.

Article 77 Enterprises and public institutions with potential risk of occurrence of water pollution accidents shall work out an emergency plan for dealing with water pollution

accidents, make good preparations for emergencies and rehearsal such plan on a regular basis.

Enterprises and public institutions manufacturing or storing hazardous chemicals shall take steps to prevent the fire-fighting waste water or waste liquid which is generated in dealing with production accidents and are capable of seriously polluting waters from being directly discharged to waters.

Article 78 Where any incident or other emergency occurs to an enterprise or public institution, which has caused or may cause any water pollution incident, the enterprise or public institution shall initiate its emergency response plan immediately, take emergency response measures such as isolation, prevent the entry of water pollutants to waters, and report the incident to the people's government at or above the county level or the administrative department of environmental protection at the place where the incident occurs. The administrative department of environmental protection shall, after receiving the report, forward it to the people's government at the same level in a timely manner, and send a copy to the relevant department.

Any entity, after causing a fishery pollution accident or a water pollution accident with fishery vessel, shall submit a report thereon to the administrative department of fishery of the place of occurrence of such accident, and accept corresponding investigation and punishment. For a water pollution accident caused by a vessel other than a fishery vessel, the report shall be submitted to the maritime governing authority of the place of occurrence of such accident, and the party concerned shall accept corresponding investigation and punishment. If any damage has been caused to the fishery industry, the maritime governing authority shall notify the administrative department of fishery to participate in the investigation and punishment process.

Article 79 The city or county people's government shall organize the preparation of plans for responding to drinking water safety emergencies.

A drinking water supplier shall, according to the local plan for responding to drinking water safety emergencies, make the corresponding emergency response plan, report it to the local city or county people's government for recordation, and conduct rehearsals on a periodical basis.

Where any water pollution incident occurs to drinking water sources, or any other emergency which may affect drinking water safety, occurs, the drinking water supplier shall take emergency response measures, report it to the local city or county people's government, and release it to the public. The relevant people's government shall, according to the actual circumstances, initiate the response plan in a timely manner, and take effective measures to guarantee the safety of water supply.

Chapter VII Legal Liability

Article 80 If the administrative department of environmental protection or other department exercising the power of supervision and administration in accordance with this Law fails to legally give administrative license or issue approval document, fails to investigate the illegal

acts found out or the tip-off or commits any other act in failure to perform its duties prescribed by this Law, punishments shall be imposed on its directly liable person in-charge and other directly liable persons according to law.

Article 81 Whoever, by such means as delaying, besieging and withholding law enforcement officials, refuses to accept or obstructs the supervision and inspection conducted by the administrative department of environmental protection or any other department that exercises supervision and administrative power in accordance with the provisions of this Law, or practices fraud when accepting supervision and inspection, the administrative department of environmental protection of the people's government at or above the county level or any other department that exercises the supervision and administration power in accordance with the provisions of this Law shall be ordered to take corrective actions, and be fined not less than 20,000 yuan but not more than 200,000 yuan.

Article 82 Where any entity commits any of the following conducts as in violation of this Law, the administrative department of environmental protection of the people's government at or above the county level shall order it to take corrective actions within a prescribed time limit and impose a fine of not less than 20,000 yuan but not more than 200,000 yuan on it, and if it fails to do so, shall order it to suspend production for rectifications.

(1) Failing to monitor the discharged of water pollutants as required or retain original monitoring records.

(2) Failing to install equipment for the automatic monitoring of discharge of water pollutants, or failing to link such equipment to the monitoring equipment of the administrative department of environmental protection as required, or failing to guarantee the normal operation of the monitoring equipment.

(3) Failing to monitor the pollutant discharge outlets and the surrounding environment of poisonous and hazardous water pollutants as required, or failing to disclose the information on poisonous and hazardous water pollutants.

Article 83 Where any entity commits any of the following conduct as in violation of this Law, the administrative department of environmental protection of the people's government at or above the county level shall order it to take corrective actions or order it to restrict production or suspend production for rectifications, and impose a fine of not less than 100,000 yuan but not more than one million yuan on it; and if the circumstances are serious, order it to suspend its business operations or close down with the approval of the people's government with the approval authority.

(1) It discharges water pollutants without obtaining a pollutant discharge license in accordance with the law.

(2) It discharges water pollutants exceeding the standards for the discharge of water pollutants or the indicators for the control of total discharge of major water pollutants.

(3) It privately sets underground pipelines through seepage wells, seepage pits, crevices, or karst caves, to falsify or forge monitoring data, or discharges water pollutants by evading supervision, such as the irregular operation of facilities for the prevention and control of

water pollution.

(4) It fails to conduct advance treatment as required, and discharges industrial waste water in non-compliance with the requirements of treatment techniques to the facilities for the centralized treatment of sewage.

Article 84 Where any entity sets up a pollutant discharge outlet in a drinking water source protection area, the local people's government at or above the county level shall order the entity to dismantle it within a prescribed time limit and impose a fine of not less than 100,000 yuan but not more than 500,000 yuan on the entity. If the entity fails to dismantle the outlet within the prescribed time limit, the people's government may order a mandatory dismantling with the required expenses to be borne by the violator, impose a fine of not less than 500,000 yuan but not more than one million yuan on it, and may order it to suspend production for rectifications.

Notwithstanding the preceding paragraph, if any entity illegally sets up any pollutant discharge outlet in violation of any law, administrative regulation or the provisions of the administrative department of environmental protection of the State Council, the administrative department of environmental protection of the local people's government at or above the county level shall order it to dismantle the outlet within a prescribed time limit, and impose a fine of not less than 20,000 yuan but not more than 100,000 yuan. If it fails to dismantle the outlet within the prescribed time limit, the department may order a mandatory dismantling with the required expenses borne by the violator, impose a fine of not less than 100,000 yuan but not more than 500,000 yuan on it, and may, if the circumstances are serious, order it to suspend production for rectifications.

Where any entity builds, renovates or enlarges an outfall at a river or lake without the consent of the competent department of water administration or the governing authority of the related drainage area, the competent department of water administration under the people's government at or above the county level or the governing authority of the drainage area shall, according to its power, take steps and give punishments in accordance with the provisions of the preceding paragraphs.

Article 85 Where any entity commits any of the following conducts, the administrative department of environmental protection of the local people's government at or above the county level shall order it to stop the violation of law and take treatment measures within a prescribed time limit to eliminate pollution, and impose a fine on it. If it fails to take treatment measures within the prescribed time limit, the administrative department of environmental protection may designate an entity capable of such treatment to do so with the required expenses borne by the violator:

- (1) Discharging oil, acid liquids or lye to waters.
- (2) Discharging highly toxic waste liquid to waters, or discharging or dumping soluble highly toxic waste residues containing mercury, cadmium, arsenic, chrome, lead, cyanide or yellow phosphorus, among others, to waters or directly burying them underground.
- (3) Cleaning at waters the vehicles or containers which have carried or stored oil or

poisonous pollutants.

(4) Discharging or dumping to waters industrial waste residues, urban refuse or other wastes, or stockpiling or storing solid wastes or other pollutants at beach land and bank slopes below the highest water level of rivers, lakes, canals, channels and reservoirs.

(5) Discharging or dumping radioactive solid waste or waste water containing highly and medium radioactive substances to waters.

(6) Discharging waste water or hot waste water containing low radioactive substances or sewage containing pathogen to waters in violation of the relevant provisions or standards of the state.

(7) Failing to take anti-leakage and other measures, or failing to establish underground water quality monitoring points to conduct monitoring.

(8) Failing to use double-layer tanks for the underground oil tanks of oil stations, or take other effective measures such as building anti-leakage pools, or failing to conduct anti-leakage monitoring.

(9) Failing to take preventive measures as required, or using any ditch, pit or pool, etc., without taking anti-leakage measures to transmit or store waste water containing pathogenic pollutants, sewage containing pathogen or other wastes.

Whoever commits any conduct as prescribed in paragraph 3, 4, 6, 7 or 8 of the preceding paragraph shall be fined not less than 20,000 yuan but not more than 200,000 yuan. Whoever commits any conduct prescribed in paragraph 1, 2, 5 or 9 of the preceding paragraph shall be fined not less than 100,000 yuan but not more than one million yuan. If the circumstances are serious, it may be ordered to suspend its business operations or close down with the approval of the people's government with approval authority.

Article 86 Where any entity, in violation of this Law, produces, sells, imports or uses any equipment listed into the catalogue of equipment which seriously pollutes water environment and is prohibited to be produced, sold, imported and used or adopts any technique listed into the catalogue of techniques which seriously pollute water environment and are prohibited to be adopted, the administrative department of macro economic control under the people's government at or above the county level shall order it to correct, impose upon it a fine of not less than 50,000 yuan but not more than 200,000 yuan, and, if the circumstances are serious, propose a suggestion and submit it to the people's government at the same level requesting to order the entity to stop business or close.

Article 87 Where any entity, in violation of this Law, builds any production projects of paper making, leather making, printing and dyeing, dyestuff, coking, sulfur refining, arsenic refining, mercury refining, oil refining, electroplating, pesticides, asbestos, cement, glass, steel, thermal power etc. that seriously pollute water environment and do not conform with the state industrial policies, the municipal or county people's government of the place of locality of the entity shall order it to close.

Article 88 Where the sludge processed and disposed of by any entity operating facilities for the centralized treatment of urban sewage or a sludge treatment and disposal entity fails to

comply with the national standards, or the said entity fails to record the whereabouts of the sludge, the competent urban drainage department shall order the entity to take treatment measures within a prescribed time limit, and give it a warning. If any serious consequence is caused, the entity shall be fined not less than 100,000 yuan but not more than 200,000 yuan. If the entity fails to take treatment measures within the prescribed time limit, the competent urban drainage department may designate an entity capable of treatment to do it with the required expenses to be borne by the violator.

Article 89 Where any vessel fails to equip itself with corresponding antifouling equipment and apparatus in accordance with the relevant state provisions, or fails to hold legal and valid certificates and documents on preventing water environment from being polluted, the maritime governing authority and the administrative department of fishery shall, according to their powers, order it to correct within a certain time limit, impose upon it a fine of not less than 2,000 yuan but not more than 20,000 yuan, and, if it fails to correct within the prescribed time limit, shall order it to suspend voyage temporarily.

Where any vessel, in conducting any operation involving the discharge of pollutants, fails to strictly follow the operating procedure or record the relevant information on the corresponding book of records, the maritime governing authority and the administrative department of fishery shall, according to their powers, order it to correct within a certain time limit and impose upon it a fine of not less than 2,000 yuan but not more than 20,000 yuan.

Article 90 Where any vessel, as in violation of this Law, commits any of the following conducts, the maritime safety administration or the competent fishery department shall, according to its own functions, order the violator to stop the violation, and impose a fine of not less than 10,000 yuan but not more than 100,000 yuan on the violator. If any water pollution is caused, the violator shall be ordered to take treatment measures within a prescribed time limit to eliminate the pollution, and be fined not less than 20,000 yuan but not more than 200,000 yuan. If the violator fails to take treatment measures within the prescribed time limit, the maritime safety administration or the competent fishery department may, according to its own functions, designate an entity capable of treatment to do it with the required expenses to be borne by the vessel.

- (1) Dumping vessel refuse or discharging the residual oil or waste oil of the vessel to waters.
- (2) Conducting, without the approval of the maritime safety administration at the place of operation, the operation of lightering bulk liquid cargo with the hazard of pollution.
- (3) Operating any vessel or carrying out any other operations with pollution risks, and failing to take measures to prevent and control pollution as required.
- (4) Dismantling the vessel on the beach.
- (5) Sailing any vessel on international navigation lines in inland rivers of the People's Republic of China which discharges any vessel ballast water in non-compliance with the relevant provisions.

Article 91 Where any entity commits any of the following acts, the administrative department of environmental protection under the people's government at or above the county level shall

order it to stop the illegal act, impose a fine of not less than 100,000 yuan but not more than 500,000 yuan, and, upon the approval of the people's government with the right to approve, shall order its dismantling or closure:

1. building, renovating or enlarging in a Grade I drinking water source reserve any construction project irrelevant to water supply facilities and the work of water source protection;
2. building, renovating or enlarging in a Grade II drinking water source reserve any construction project discharging pollutants; or
3. building or enlarging in a quasi drinking water source reserve any construction project seriously polluting waters, or rebuilding any construction project increasing the discharge of pollutants.

Where any entity engages in cage breeding or organizes traveling, going angling or any other activities that may pollute drinking waters in a Grade I drinking water source reserve, the administrative department of environmental protection under the local people's government at or above the county level shall order it to stop the illegal act and impose upon it a fine of not less than 20,000 yuan but not more than 100,000 yuan. For any individual doing such illegal act, the administrative department of environmental protection under the local people's government at or above the county level shall order it to stop the illegal act and may impose upon him a fine of not more than 500 yuan.

Article 92 Where the quality of water supplied by a drinking water supplier fails to comply with the prescribed standards of the state, the competent water supply department of the city or county people's government at the place where the entity is located shall order the supplier to take corrective actions, and impose a fine of not less than 20,000 but not more than 200,000 yuan on it; if the circumstances are serious, it may order the supplier to suspend its business operations for rectifications after reporting to and obtaining the approval of the people's government with approval authority, and take disciplinary actions against the directly responsible person in charge and other directly liable persons in accordance with the law.

Article 93 Where any enterprise or public institution commits any of the following acts, the administrative department of environmental protection under the people's government at or above the county level shall order it to correct, and, if the circumstances are serious, shall impose upon it a fine of not less than 20,000 yuan but not more than 100,000 yuan:

1. failing to work out any emergency plan for water pollution accidents as required; or
2. failing to initiate such a plan or take corresponding emergency measures in a timely manner after a water pollution accident occurs.

Article 94 Where any enterprise or public institution violates this Law and causes a water pollution incident, the violator shall not only assume compensatory liability in accordance with the law, the administrative department of environmental protection of the people's government at or above the county level may also impose a fine on it in accordance with paragraph 2 of this Article, and order it to take treatment measures within a prescribed time

limit to eliminate the pollution. If the enterprise or public institution refuses to take treatment measures as required or is not capable of doing so, the administrative department of environmental protection shall designate a capable entity to do it on behalf of the enterprise or public institution, and the required expenses shall be borne by the violator. If any serious or extraordinary serious incident is caused, the administrative department of environmental protection may, upon the approval of the people's government with approval authority, order it to close, and impose on the directly responsible person in charge and other directly liable persons a fine of not more than 50% of the income obtained from the enterprise or public institution in the previous year. If the violator illegally discharges water pollutants or commits any other conduct as prescribed in Article 63 of the Environmental Protection Law of the People's Republic of China, which does not constitute a crime, the public security authority shall detain the directly responsible person in charge and other directly liable persons for not less than ten days but not more than 15 days; or detain them for not less than five days but not more than 10 days if the circumstances are relatively minor.

If the accident is ordinary or relatively serious, the fine shall be calculated on the basis of 20% of the direct losses caused by the accident; if the accident is serious or extraordinarily serious, the fine shall be calculated on the basis of 30% of the direct losses caused by the accident.

If the accident is a fishery one or one caused by a fishery vessel, the power to punish shall remain with the administrative department of fishery; if the accident is caused by a non-fishery vessel, the power to punish shall remain with the maritime governing authority.

Article 95 Where any enterprise, public institution or any other producer or dealer discharges water pollutants in violation of any law, and is fined and ordered to take corrective actions, the administrative authority that makes the punishment decision in accordance with the law shall organize a review. If it finds that the violator continues to discharge water pollutants in violation of any law or refuses to accept or obstructs the review, the violator shall be imposed on continuous fines on a daily basis in accordance with the provisions of the Environment Protection Law of the People's Republic of China.

Article 96 The party whose rights and interests are damaged by a water pollution accident is entitled to ask the party discharging pollutants to eliminate the damage and make compensation for their losses.

If the damage is caused by force majeure, the party discharging pollutants bears no liability for compensation, unless it is otherwise prescribed by law.

If the damage is caused by the victim on purpose, the party discharging pollutants bears no liability for compensation. If the damage is caused by the gross negligence of the victim, the liability for compensation of the party discharging pollutants may be mitigated.

If the damage is caused by a third party, the party discharging pollutants has the right to, after making compensation according to law, recover the compensation from the third party.

Article 97 For a dispute over liability for damage or amount of compensation in a water pollution accident, the administrative department of environmental protection, the maritime

governing authority or the administrative department of fishery may, according to the division of functions and duties among them and in light of the request of the parties concerned, settle it through mediation; if no agreement can be reached upon mediation, the parties concerned may file a lawsuit with the people's court. The parties concerned may also file a lawsuit with the people's court directly without going through the mediation procedure.

Article 98 For an action of damage due to a water pollution accident, the party discharging pollutants shall assume the burden of proof for legally prescribed exemptions and the nonexistence of relation of cause and effect between its act and the harmful consequences thereof.

Article 99 If the number of parties whose legitimate rights and interests are damaged in a water pollution accident is relatively huge, these parties may select a representative to file a joint action.

The administrative department of environmental protection and the related social groups may legally support the parties whose legitimate rights and interests are damaged in a water pollution accident to file a lawsuit with the people's court.

The state encourages law offices and lawyers to provide legal assistance for victims of lawsuits on damage of water pollution accidents.

Article 100 For any dispute over liability for damage or amount of compensation in water pollution, the parties concerned may entrust the environmental monitoring institution to provide the related monitoring data, and the institution shall accept such entrustment and truthfully provide the required monitoring data.

Article 101 Where any violation of this Law constitutes a crime, the violator shall be subject to criminal liability in accordance with the law.

Chapter VIII Supplementary Provisions

Article 102 The interpretation of terms mentioned in this Law is as follows:

1. water pollution means that, due to the intervention of certain substances, the chemical, physical, biological or radioactive character of waters is changed, which affects the effective utilization of such water, causes harm to people's health or damages the ecological environment and causes the deterioration of water quality.
2. Water pollutants refer to substances which are directly or indirectly discharged to waters and may cause pollution to waters.
3. Pathogenic pollutants refer to pollutants which are capable of, after being directly or indirectly absorbed by organism, causing the organism or its descendants to become sick, act abnormally, vary genetically, physiologically function abnormally, become deformed or die.
4. Sludge' means semi-solid or solid substances generated in the treatment of sewage.
5. fishery waters refer to waters designated as places for fish and shrimps to lay eggs, search baits, live in winter and migrate as well the aquatic plants of fish, shrimps, shellfish and alga.

Article 103 This Law shall come into force as of June 1st, 2008.

6. Law of the People's Republic of China on the Prevention and Control of Environment Pollution Caused by Solid Wastes

(Adopted at the 16th Session of the Standing Committee of the Eighth National People's Congress on October 30, 1995; revised at the 13th Session of the Standing Committee of the Tenth National People's Congress of the People's Republic of China on December 29, 2004; amended for the first time in accordance with the Decision of Standing Committee of the National People's Congress on Amending the Cultural Relics Protection Law of the People's Republic of China and Other Eleven Laws as adopted at the 3rd Session of the Standing Committee of the Twelfth National People's Congress on June 29, 2013; amended for the second time in accordance with the Decision on Amending the Seven Laws Including the Law of the People's Republic of China on Ports as adopted at the 14th Session of the Twelfth National People's Congress on April 24, 2015; and amended for the third time in accordance with the Decision of Amending Twelve Laws including the Foreign Trade Law of the People's Republic of China as adopted at the 24th Session of the Standing Committee of the Twelfth National People's Congress on Nov. 7, 2016)

Chapter I General Provisions

Article 1 This Law is enacted for the purpose of preventing and controlling environmental pollution by solid wastes, safeguarding human health, maintaining the ecological safety and promoting the sustainable development of economy and society.

Article 2 This Law shall be applicable to the prevention and control of environmental pollution by solid wastes within the territory of the People's Republic of China.

This Law shall not be applicable to the prevention and control of marine environmental pollution by solid wastes or of environmental pollution by radioactive solid wastes.

Article 3 The State shall, in preventing and controlling environmental pollution by solid wastes, implement the principles of reducing the discharge and harm of solid wastes, fully and rationally utilizing solid wastes and making them harmless through treatment so as to promote cleaner production and the development of recycling economy.

The State shall adopt economic and technical policies and measures in favor of the comprehensive use of solid wastes, and fully recover and rationally utilize solid wastes.

The State shall encourage and support the adoption of beneficial measures of centralized treatment of solid wastes to the environmental protection and promote the industrial development of prevention and control of environmental pollution by solid wastes.

Article 4 The people's governments at or above the county level shall incorporate the prevention and control of environmental pollution by solid wastes into their environmental protection programs and adopt economic and technical policies and measures to facilitate the prevention and control of environmental pollution by solid wastes.

When relevant departments of the State Council, the people's governments at or above the county level and the relevant departments thereof formulate plans regarding urban-rural construction, land use, regional development and industrial development, they shall wholly take such factors into account as the reduction of discharge and harm of solid wastes and

the promotion of comprehensive use and harmless treatment of solid wastes.

Article 5 For the prevention and control of environmental pollution by solid wastes, the State implements the principle that any entity or individual causing the pollution shall be responsible for it in accordance with law.

The manufacturers, sellers, importers and users shall be responsible for the prevention and control of solid wastes pollution produced thereby.

Article 6 The State shall encourage and support scientific research, technological development and the dissemination of advanced prevention and control technologies as well as of scientific knowledge in the field of prevention and control of environmental pollution by solid wastes.

The people's governments at all levels shall strength the publicity and education on the prevention and control of environmental pollution by solid wastes and advocate favorable production methods and living styles to the environmental protection.

Article 7 The State shall encourage the entities and individuals to purchase and use renewable products and reusable products.

Article 8 The people's governments at all levels shall give awards to the entities and individuals that have achieved outstanding successes in the prevention and control of environmental pollution by solid wastes and in relevant activities of comprehensive use.

Article 9 Any and all entities and individuals shall have the obligation to protect the environment and shall have the right to report or file charges against those entities or individuals that cause environmental pollution by solid wastes.

Article 10 The environmental protection administrative department of the State Council shall conduct unified supervision and management of the prevention and control of environmental pollution by solid wastes throughout the country. The relevant departments of the State Council shall be responsible for supervising and managing the prevention and control of environmental pollution by solid wastes within their respective functions.

The environmental protection administrative departments of the local people's governments at or above the county level shall conduct unified supervision and management of the prevention and control of environmental pollution by solid wastes within their own administrative areas. The relevant departments of local people's governments at or above the county level shall be responsible for supervision and management of the prevention and control of environmental pollution by solid wastes within their respective functions.

The construction administrative department of the State Council and the environmental sanitation administrative departments of the local people's governments at or above the county level shall be responsible for supervising and administering the cleaning, collection, storage, transportation and disposal of urban consumer wastes.

Chapter II Supervision and Administration of the Prevention and Control of Environmental Pollution by Solid Wastes

Article 11 The environmental protection administrative department of the State Council shall, pursuant to state environmental quality standards and state economic and technical

conditions, formulate state technical standards on the prevention and control of environmental pollution by solid wastes in collaboration with the relevant administrative departments of the State Council.

Article 12 The environmental protection administrative department of the State Council shall establish a system for monitoring environmental pollution by solid wastes, formulate unified monitoring standards and, in conjunction with relevant departments, set up a monitoring network.

The environmental protection administrative departments of large and medium-sized cities shall regularly issue the types, discharging amount, disposal conditions and other information regarding the solid wastes.

Article 13 The construction of projects which discharge solid wastes and the construction of projects for storage, use and treatment of solid wastes shall be carried out upon the appraisal regarding their effects on environment and in compliance with the relevant state regulations concerning the management of environmental protection in respect of construction projects.

Article 14 The necessary supporting facilities for the prevention and control of environmental pollution by solid wastes as specified in the statement of the effect of the construction project shall be designed, built and put into operation simultaneously with the main part of the project. The construction project may be put into production or use, only after the facilities for the prevention and control of environmental pollution by solid wastes are found upon examination to meet the standards by the environmental protection administrative department that has originally examined and approved the statements about the effects on environment. The facilities for the prevention and control of environmental pollution by solid wastes shall be checked and accepted at the same time as the main part of the project is checked and accepted.

Article 15 The environmental protection administrative department of the people's government at or above the county level and other supervisory and administrative departments for the prevention and control of environmental pollution by solid wastes shall, in accordance with their respective functions, have the right to conduct on-site inspection of the entities within their jurisdictions that have something to do with the prevention and control of environmental pollution by solid wastes. The entities under inspection shall faithfully report the situation and provide necessary materials. The inspection authorities shall keep confidential the know-how and business secrets of the entities inspected.

When conducting on-site inspections, the inspection organ may adopt such measures as monitoring on the spot, collecting samples and consulting or printing materials relating to the prevention and control of environmental pollution by solid wastes.

Chapter III Prevention and Control of Environmental Pollution by Solid Wastes

Section I General Provisions

Article 16 Entities and individuals that discharge solid wastes shall adopt measures to prevent or reduce the environmental pollution by solid wastes.

Article 17 Entities and individuals that collect, store, transport, utilize or dispose of solid wastes shall take measures to prevent the scattering, run-off and leakage of solid wastes, as well as other measures against environmental pollution.

No entity or individual may dump solid wastes into or pile them up at rivers, lakes, ditches, reservoirs, bottomlands, banks or slopes under the highest waterline or other places where the waste isn't allowed to be dumped or piled up according to laws and regulations.

Article 18 Any entity shall abide by state rules about the cleaner production for designing and manufacturing products and packages. The standardization administrative department of the State Council shall, pursuant to state economic and technical conditions, prevention and control situation of environmental pollution by solid wastes and technical requirements of products, formulate relevant standards to prevent environmental pollution by over-package.

The enterprises producing, selling or importing products and packages that have been listed in the catalogue subject to mandatory recycling shall reclaim the said products and packages according to state provisions.

Article 19 The State encourages scientific research and production institutions to do research on and manufacture plastic-sheet covering and packages of commodities that are easy to be recycled or treated, or easy to be degraded in the environment.

Entities and individuals that use agricultural films shall take measures like the recycling for utilization so as to prevent or reduce the environmental pollution by agricultural films.

Article 20 The engagement in the scale breeding of livestock and birds shall, according to relevant rules of the State, collect, store, utilize and dispose dung of livestock and birds produced in the breeding so as to prevent environmental pollution.

No straw or stalk may be burnt in the open air of population-centralized districts, surroundings of airports, neighboring districts of main communication arteries and districts as prescribed by the local people's governments.

Article 21 Management and maintenance of facilities, equipments and places for collecting, storing, transporting and treating solid wastes shall be improved so as to ensure their normal operation and function.

Article 22 No installation or site for centralized storage and treatment of industrial solid wastes or landfill of consumer wastes may be built in the nature reserves, scenic resorts, conservation areas of drinking water and basic farmlands and other areas requiring special protection that are prescribed by the State Council, relevant administrative departments of the State Council and the provinces, autonomous regions and municipalities directly under the Central Government.

Article 23 To transport any solid waste out of the administrative region of a province, autonomous region or municipality directly under the Central Government for storage or treatment, one shall apply to the environmental protection administrative department of the people's government of the province, autonomous region or municipality directly under the Central Government where the solid waste is to be moved out for approval, which shall grant

its approval after consulting with and obtaining permission from the province, autonomous region or municipality directly under the Central Government where the solid waste is to be accepted. No transfer may be carried out without approval.

Article 24 It is forbidden to dump, pile up or treat any solid waste from abroad within the territory of China.

Article 25 The State forbids the import of solid wastes that cannot be used as raw material and those that can't be utilized through harmless treatment, and restricts the import of the solid wastes that can be used as raw materials and implements the classification management of non-restricted import thereto.

The environmental protection administrative department of the State Council shall, in conjunction with the foreign trade administrative department and the economic comprehensive macro-control department of the State Council, the General Administration of Customs and the quality supervision, inspection and quarantine department of the State Council, formulate, adjust and publish solid waste catalogues of import-forbidden, import-restricted and non-restricted import.

The import of solid wastes as listed in the catalogue of import-forbidden shall be forbidden. The import of solid wastes as listed in the catalogue of import-restricted shall be examined and approved by the environmental protection administrative department of the State Council in collaboration with the foreign trade administrative department of the State Council. The imported solid wastes shall comply with state environmental protection standards and be inspected to be qualified by the quality supervision, inspection and quarantine department. The specific measures for the administration of the import of solid wastes shall be formulated by the environmental protection administrative department of the State Council in collaboration with the foreign trade administrative department of the State Council, the economic comprehensive macro-control department of the State Council, the General Administration of Customs and the quality supervision, inspection and quarantine department of the State Council.

Article 26 Any importer that holds objections to the incorporation of his imported wastes into the administrative scope of solid wastes by the customs may file an administrative reconsideration according to law or lodge an administrative suit to a people's court.

Section II Prevention and Control of Environmental Pollution by Industrial Solid Wastes

Article 27 The environmental protection administrative department of the State Council shall, jointly with the economic comprehensive macro-control department of the State Council and other relevant departments, define the environmental pollution by industrial solid wastes, work out technical policies regarding the prevention and control thereof, and organize the dissemination of advanced production techniques and equipments for the prevention and control of environmental pollution by industrial solid wastes.

Article 28 The economic comprehensive macro-control department of the State Council shall, jointly with other relevant departments of the State Council, organize the research,

development and promotion of the production techniques and equipments that will reduce the discharge and harm of industrial solid wastes, and promulgate the list of backward production techniques and equipments that cause severe environmental pollution by industrial solid wastes and thus should be eliminated within the time limit.

Producers, sellers, importers or users shall stop producing, selling, importing or using those equipments as included in the list stipulated in the preceding paragraph within the time limit which are specified by the economic comprehensive macro-control department of the State Council together with other relevant departments of the State Council. The users of such production techniques shall stop using such techniques as included in the list stipulated in the preceding paragraph within the time limit as specified by the economic comprehensive macro-control department of the State Council jointly with other relevant departments of the State Council.

Eliminated equipments included in the catalogue of equipments to be eliminated within a set time shall not be transferred to any other for use.

Article 29 The relevant departments of the people's governments at or above the county level shall formulate a program for the prevention and control of environmental pollution by industrial solid wastes, popularize the advanced production techniques and equipments which can reduce the discharge and harm of industrial solid wastes and promote the prevention and control of environmental pollution by industrial solid wastes.

Article 30 Entities discharging industrial solid wastes shall establish and improve the responsibility system for the prevention and control of environmental pollution and adopt measures for the prevention and control of environmental pollution by industrial solid wastes.

Article 31 Enterprises and public institutions shall rationally select and use raw materials, energies and other resources, and adopt advanced production techniques and equipments, so as to reduce the discharge and harm of industrial solid wastes.

Article 32 The State institutes a system of declaration and registration for industrial solid wastes.

The entities discharging industrial solid wastes shall, in accordance with the regulations enacted by the environmental protection administrative department of the State Council, provide information about the categories, discharging amount, flow direction, storage, treatment and other materials concerning industrial solid wastes to the environmental protection administrative department of the local people's government at or above the county level where such entities are located.

Any significant modification of the declaration matters as prescribed in the preceding paragraph shall be declared in a timely manner.

Article 33 Enterprises and public institutions shall make use of industrial solid wastes produced thereby pursuant to economic and technical conditions; for those industrial solid wastes that will not or can't be utilized temporarily, enterprises and public institutions shall, in accordance with the regulations of the environmental protection administrative department of the State Council, build facilities and sites for their safe and classified storage

or carry out the harmless treatment for them.

The construction of facilities and sites for storing and treating industrial solid wastes shall comply with state standards on environmental protection.

Article 34 It is forbidden to close down, leave idle or dismantle, without approval, facilities or places for the prevention and control of environmental pollution by industrial solid wastes. Where it is necessary to do so, prior verification and approval shall be obtained from the environmental protection administrative department of the local people's government at or above the county level, and measures shall be taken to prevent environmental pollution.

Article 35 Where it is necessary for the entities discharging industrial solid wastes to be terminated, measures for preventing and controlling pollution shall be taken in advance to the facilities and sites for storing and treating industrial solid wastes, and the untreated industrial solid wastes shall be disposed properly to prevent environmental pollution.

If an entity discharging industrial solid wastes has been altered, the altered entity shall, pursuant to state provisions about the environmental protection, carry out the safety treatment or take measures for untreated industrial solid wastes and the storage and treatment facilities and sites thereof so as to ensure the safe function of such facilities and sites. Where the parties concerned have, prior to the alteration, otherwise stipulated the assumption of responsibilities for preventing and controlling pollution by industrial solid wastes and the facilities and sites for storage and treatment, such stipulations shall prevail. However, the responsibilities of the parties concerned to prevent and control pollution shall not be exempted.

The expenses, incurred from the safety treatment of untreated industrial solid wastes and the storage and treatment facilities and sites of the entities that have been terminated prior to the implementation of the present Law, shall be borne by the relevant people's governments, however if the land use right of the said entity has been transferred according to law, the transferee thereof shall undertake the expenses for the treatment. Where the parties concerned have other stipulations, such stipulations shall prevail. However, the responsibilities of the parties concerned to prevent and control pollution shall not be exempted.

Article 36 A mining enterprise shall adopt scientific mining methods and techniques for mineral separation so as to reduce the production and storage of gangues, waste rocks, mullocks and other mining solid wastes.

After the facilities for storing gangues, waste rocks, mullocks and other mining solid wastes aren't used any more, a mining enterprise shall, according to state provisions on environmental protection, close the fields to prevent environmental pollution and ecological destroy.

Article 37 When dismantling, utilizing or disposing abandoned electronic appliances and motor vehicles and vessels, measures shall be taken to prevent environmental pollution according to relevant laws and regulations.

Section III Prevention and Control of Environmental Pollution by Consumer Wastes

Article 38 The people's governments at or above the county level shall plan, as a whole, to build facilities for collecting, transporting and treating urban-rural consumer wastes, improve the ratio of utilization and harmless treatment of consumer wastes, promote industrial development of collecting and treating consumer wastes, and progressively establish and perfect social service system for preventing and controlling environmental pollution by consumer wastes.

Article 39 The environmental protection administrative departments of the people's governments at or above the county level shall organize to clear, collect, transport and treat urban consumer wastes and may, by the way of bidding, choose qualified entities to engage in the clearing, collection, transport and treatment of urban consumer wastes.

Article 40 Urban consumer wastes shall be placed at designated sites according to provisions as prescribed by the environmental protection administrative departments, and shall not be dumped, cast or piled up at discretion.

Article 41 The clearing, collection, transportation and treatment of urban consumer wastes shall be conducted according to state provisions about the environmental protection and environmental sanitation to prevent environmental protection.

Article 42 Urban consumer wastes shall be timely cleared and transported, progressively be collected and transported by different types, and be reasonably utilized and be effected with harmless treatment.

Article 43 Urban people's governments shall, in a planned way, improve the composition of fuel, and develop coal gas, natural gas, liquefied gas and other clean energy sources for use in urban areas.

Relevant departments of an urban people's government shall arrange for the supply of clean vegetables to cities and towns so as to reduce urban consumer wastes.

Relevant departments of an urban people's government shall make an overall plan, rationally arrange for collecting and purchasing networks, so as to promote the recycling of consumer wastes.

Article 44 The construction of facilities and sites for disposing consumer wastes shall comply with the standards on environmental protection and environmental sanitation as prescribed by the environmental protection administrative department of the State Council and the construction administrative department of the State Council.

It is forbidden to close down, leave idle or dismantle facilities and sites for disposing of domestic wastes without approval. If it is truly necessary to close down, leave idle or dismantle such facilities or sites, it shall be subject to the approval by the local environmental sanitation administrative department of the people's government at the city or county level after consulting with and obtaining consent from the local environmental protection administrative department, and measures shall be taken to prevent environmental pollution.

Article 45 The recycled substances from the consumer wastes shall be utilized pursuant to the uses and standards as set by the State, and shall not be used to produce products that may do harm to human health.

Article 46 Entities undertaking constructions shall promptly clear and transport the solid wastes produced in the course of construction, and utilize or dispose them pursuant to the provisions of the environmental sanitation administrative departments.

Article 47 An entity engaged in public transportation shall, pursuant to state regulations, clear up and collect the consumer wastes produced in the course of transportation.

Article 48 Entities engaged in the development of new urban areas, the reconstruction of old areas and construction of residential quarters, and operational and management entities located at airports, docks, stations, parks, stores and other public facilities and sites shall build supporting equipments for collecting consumer wastes according to state regulations on environmental sanitation.

Article 49 The specific measures for the prevention and control of rural consumer wastes shall be prescribed by local regulations.

Chapter IV Special Provisions on the Prevention and Control of Environmental Pollution by Hazardous Wastes

Article 50 The provisions of this Chapter shall be applicable to the prevention and control of environmental pollution by hazardous wastes. Where it is not covered by this Chapter, other relevant provisions of this Law shall be applicable.

Article 51 The environmental protection administrative department of the State Council shall, jointly with other relevant departments of the State Council, formulate a national catalog of hazardous wastes, lay down unified criteria and methods for identifying and distinguishing hazardous wastes.

Article 52 A distinguishing mark of hazardous wastes shall be put on the containers and packages of hazardous wastes as well as on the facilities and sites for collection, storage, transportation and treatment of hazardous wastes.

Article 53 An entity discharging hazardous wastes shall, pursuant to state provisions, work out a plan for managing hazardous wastes, and declare the types, production quantity, flow direction, storage, treatment and other relevant materials to the environmental protection departments of the local people's governments at or above the county level.

The plan for managing hazardous wastes as mentioned in the preceding paragraph shall contain measures for reducing the discharge and harm of hazardous wastes and for storing, utilizing and treating hazardous wastes. The said plan shall report to the environmental protection department of the local people's government at or above the county level for archival filing.

Any significant modification of declaration matters as prescribed by this Article or the plan for managing hazardous wastes shall be declared in a timely manner.

Article 54 The environmental protection administrative department of the State Council shall, jointly with the economic comprehensive macro-control department of the State Council, formulate the plan for constructing facilities and sites for centralized treatment of hazardous wastes, which shall be implemented after being reported to the State Council for approval. The people's governments at or above the county level shall organize to build facilities and

sites for centralized treatment of hazardous wastes on the strength of the plans thereon.

Article 55 An entity that discharges hazardous wastes shall dispose hazardous wastes according to relevant provisions of the State, and shall not dump or pile up them without approval; those that don't treat hazardous wastes shall be ordered to get right within the time limit by the environmental protection administrative departments of the people's governments at or above the county level; if an entity fails to treat within the time limit or in accordance with relevant provisions of the State, another entity shall be commissioned to carry out the treatment by the environmental protection administrative departments of the people's governments at or above the county level, and the expenses incurred therefrom shall be undertaken by the entity that discharges hazardous wastes.

Article 56 Where the treatment of hazardous wastes by the way of landfill doesn't comply with the provisions as set by the environmental protection administrative department of the State Council, it shall pay discharging fees for hazardous wastes. The specific measures for levying upon discharging fees of hazardous wastes shall be formulated by the State Council. The discharging fees for hazardous wastes shall be used for the prevention and control of environmental pollution and shall not be appropriated.

Article 57 Entities engaged in the collection, storage and treatment of hazardous wastes shall apply to the environmental protection administrative department of the people's government at or above the county level for business licenses. Entities engaged in businesses of utilizing hazardous wastes shall apply to the environmental protection administrative department of the State Council or the environmental protection administrative department of the people's government of a province, autonomous region and municipality directly under the Central Government for business licenses. Specific measures for the administration thereof shall be prescribed by the State Council.

It is forbidden to collect, store, utilize or treat hazardous wastes without a business license or against the provisions of the business license.

It is forbidden to supply or entrust hazardous wastes to entities that do not have business licenses for the collection, storage, utilization and treatment.

Article 58 Hazardous wastes shall be collected and stored separately according to their different characteristics. It is forbidden to collect, store, transport and treat hazardous wastes of incompatible natures and of not being undergone safety treatment.

The protective measures complying with state standards about the environmental protection shall be adopted for the storage of hazardous wastes, and which shall not be kept for more than one year; where it is necessary to extent the said time limit, it shall submit and secure permission from the original environmental protection administrative department that approved business license, unless it is otherwise prescribed by laws and administrative regulations.

It is forbidden to mix hazardous wastes with non-hazardous wastes in storage.

Article 59 Whoever is to transfer hazardous wastes shall complete the duplicate forms for transferring hazardous wastes according to the relevant provisions of the state. Where

hazardous wastes are to be transferred to another province, autonomous region, or municipality directly under the Central Government, an application shall be filed with the environmental protection administrative department of the people's government of the province, autonomous region, or municipality directly under the Central Government where hazardous wastes are to be transferred out, which may not approve the transfer of such hazardous wastes until it has consulted with and obtained consent from the environmental protection administrative department of the people's government of the province, autonomous region, or municipality directly under the Central Government where such hazardous wastes are to be received. No transfer may be conducted without approval.

Where it is necessary to transfer hazardous wastes by way of administrative areas other than the areas where the hazardous waste is to be moved out or in, the environmental protection administrative departments of the local people's governments at or above the level of city divided into districts where the hazardous waste is to be moved out shall timely notify the environmental protection administrative departments of the local people's governments at or above the level of city divided into districts where the hazardous waste is to pass through.

Article 60 Whoever transports hazardous wastes shall adopt measures for the prevention and control of environmental pollution and observe state regulations on the control of transportation of hazardous goods.

It is forbidden to carry hazardous wastes and passengers in the same transport vehicle.

Article 61 When sites, facilities, equipments as well as containers, packages and other articles for the collection, storage, transportation and treatment of hazardous wastes are to be used for other purposes, they shall be put to use only after they have been treated to eliminate pollution.

Article 62 The entities discharging, collecting, storing, transporting, using or treating hazardous wastes shall work out measures for keeping away and prepared counter plans against accidents, report them to the environmental protection administrative department of the local people's government at or above the county level for archival filing; and the environmental protection administrative department shall carry out the inspection on it.

Article 63 The entities that have caused severe environmental pollution by hazardous wastes due to accidents or other unexpected events shall immediately take measures to eliminate or reduce the danger and damage of environmental pollution, promptly inform the entities and residents that may be harmed by the pollution, and in the meantime, report to the environmental protection administrative department of the local people's government at or above the county level and other relevant departments, and shall be subject to the investigation and settlement.

Article 64 When severe environmental pollution by hazardous wastes has happened or may happen as proved by evidences, thus threatening the safety of the lives and properties of residents, the environmental protection administrative department of the local people's government at or above the county level or other supervisory and administrative

departments of the prevention and control of environmental pollution by solid wastes shall immediately report to relevant administrative departments of the people's governments at the corresponding level and the next higher level. The people's government shall take effective measures to eliminate or reduce the danger and damage. Relevant people's governments, where necessary, may order to stop operations that cause or may cause accidents of environmental pollution.

Article 65 Ex-service expenses used for the facilities and sites for the centralized treatment of important hazardous wastes shall be drawn in advance and incorporated into the investment budgetary estimate or operational costs. Specific measures for the drawing and administration thereof shall be enacted by the financial department, the price administrative department of the State Council in collaboration with the environmental protection administrative department of the State Council.

Article 66 It is forbidden to transfer hazardous wastes overseas via the territory of the People's Republic of China.

Chapter V Legal Liabilities

Article 67 If an environmental protection administrative department of the local people's government at or above the county level or any other supervisory and administrative department of the prevention and control of environmental pollution by solid wastes violates the present Law and has any of the following acts, it shall be ordered to get right by the relevant administrative department of the people's governments at the corresponding level or the next higher level, the principle and other persons hold to be responsible shall be given administrative sanctions, if the crimes are constituted, the offenders shall be subject to criminal liabilities:

- (1) failure to make administrative license or handle approval documents according to law;
- (2) failure to investigate any found illegal act or any report of illegal act; or
- (3) any other failure in performing supervisory and administrative liabilities in accordance with the law.

Article 68 If anyone, in violation of the provisions of this Law, commits any of the following acts, the environmental protection administrative department of the people's government at or above the county level shall order him to make corrections within the time limit and impose a fine on him:

- (1) failing to declare and register industrial solid wastes pursuant to state regulations, or resorting to deception in declaring and registering;
- (2) failing to build facilities and sites for separately storing industrial solid wastes that aren't or can't be utilized temporarily by different types or failing to adopt measures of harmless treatment;
- (3) transferring eliminated equipments included in the list of equipments to be eliminated within the time limit to another for use;
- (4) closing, leaving idle or dismantling facilities or sites for the prevention and control of environmental pollution by solid wastes without approval;

- (5) constructing facilities or sites for centralized storage or treatment of industrial solid wastes or landfills for consumer wastes in nature reserves, scenic spots or historical sites, areas of source of drinking water or other zones that need special protection;
- (6) transferring solid wastes out of the administrative area of a province, autonomous region or municipality directly under the Central Government for storage and treatment without approval;
- (7) failing to take corresponding precaution measures and resulting in scattering, run-off, leakage or other environmental pollution by industrial solid wastes; or
- (8) casting away or leaving behind industrial solid wastes in the course of transportation.

Any entity that commits the act as specified in item (1) or (8) of the preceding paragraph shall be imposed upon a fine of 5,000 up to 50,000 yuan; any entity that commits any of the acts as specified in item (2), (3), (4), (5), (6) or (7) of the preceding paragraph shall be imposed with a fine of 10,000 up to 100,000 yuan.

Article 69 Where the construction of supporting facilities is necessary for the facilities for preventing and controlling environmental pollution by solid wastes, any entity violates this Law and puts the main part of a project into production or use when such facilities haven't been built, checked or accepted, or checked or accepted up to standards, such entity shall be ordered to stop manufacturing or using and may be imposed with a fine of less than 100,000 in addition by the environmental protection administrative department that has approved the evaluation documents regarding the said project's compacts on environment.

Article 70 Any entity that violates this Law and refuses the on-the-spot inspection carried out by the environmental protection administrative department of the local people's government at or above the county level or any other supervisory and administrative department shall be ordered to correct within the time limit by the department that carried out the on-the-spot inspection; if it refuses to correct or resorts to deception at the time of inspection, it shall be imposed with a fine of 2,000 to 20,000.

Article 71 Any entity that engages in the scale breeding of livestock and birds fails to collect, store or dispose dung of livestock and birds and thus causes environmental pollution, it shall be ordered to correct within the time limit by the environmental protection administrative department of the local people's government at or above the county level and be imposed with a fine of less than 50,000.

Article 72 If anyone, in violation of the provisions of this Law, produces, sells, imports or uses eliminated equipments or employs eliminated production techniques, the economic comprehensive macro-control department of the people's government at or above the county level shall order him to make corrections; where the circumstance is serious, the economic comprehensive macro-control department of the people's government at or above the county level shall put forward suggestions and submit them to the people's government at the corresponding level, which shall, in accordance with the limits of authority as prescribed by the State Council, order him to suspend business or close down.

Article 73 After the facilities for storing gangues, waste rocks, mullocks and other mining

solid wastes aren't used any more, a mining enterprise that fails to close the fields according to state provisions on environmental protection, it shall be ordered to correct within the time limit by the environmental protection administrative department of the local people's government at or above the county level and may be imposed with a fine of 50,000 up to 200,000.

Article 74 Any entity that violates the provisions of this Law on the prevention and control of environmental pollution by urban consumer wastes and commits any of the following acts shall be ordered to stop its illegal act and be ordered to correct within the time limit and be fined by the environmental protection administrative department of the local people's government at or above the county level:

- (1) dumping, scattering or piling up consumer wastes at random;
- (2) closing down, leaving idle or dismantling facilities or sites for treating consumer wastes without approval;
- (3) the entity undertaking the construction fails to timely clear or transport solid wastes produced in the course of construction and therefore causes environmental pollution;
- (4) the entity undertaking the construction fails to utilize or dispose solid wastes produced in the course of construction in accordance with the provisions as prescribed by the environmental sanitation administrative department; or
- (5) casting off or leaving behind consumer wastes in the course of transportation.

Any entity that commits the act specified in item (1) (3) or (5) of the preceding paragraph shall be imposed with a fine of 5,000 up to 50,000 yuan; any entity who commits the act specified in item (2) or (4) of the preceding paragraph shall be imposed with a fine of 10,000 up to 100,000 yuan. Any individual that commits the act specified in item (1) or (5) shall be imposed with a fine of less than 200 yuan.

Article 75 If any entity, in violation of the provisions of this Law on the prevention and control of environmental pollution by hazardous wastes, commits any of the following acts, it shall be ordered by the environmental protection administrative department of the people's government at or above the county level to stop the illegal act, to correct it within the time limit and also be fined:

- (1) failing to install identifying marks of hazardous wastes;
- (2) failing to declare or register hazardous wastes in accordance with state provisions or practicing fraud at the time of declaration and registration;
- (3) closing down, leaving idle or dismantling facilities or sites for centralized treatment of hazardous wastes without approval;
- (4) failing to pay discharging fees for hazardous wastes in accordance with state regulations;
- (5) supplying or entrusting hazardous wastes to an entity that does not have a business license for his businesses;
- (6) failing to fill in duplicate forms for transferring hazardous wastes according to relevant state regulations, or failing to report to the competent department when transferring hazardous wastes;

- (7) mixing hazardous wastes with non-hazardous wastes for storage;
- (8) collecting, storing, transporting and treating mixed hazardous wastes of incompatible nature without safety treatment;
- (9) carrying hazardous wastes and passengers in a same transport vehicle;
- (10) using, without the treatment to eliminate pollution, sites, facilities, equipments or containers, packages or other articles for collecting, storing, transporting or disposing hazardous wastes for other purposes;
- (11) failing to adopt corresponding precaution measures and causing the scattering, loss, leakage or other environmental pollution by hazardous wastes;
- (12) in the course of transportation, casting off or leaving behind hazardous wastes on the way; or
- (13) failing to work out measures for keeping away and prepared counter plans against accidents of hazardous wastes.

Any entity that commits the act specified in item (1), (2), (7), (8), (9), (10), (11), (12) or (13) of the preceding paragraph shall be imposed with a fine of 10,000 up to 100,000 yuan; any entity who commits the act specified in item (3), (5) or (6) of the preceding paragraph shall be imposed with a fine of 20,000 up to 200,000 yuan; any entity who commits the act specified in item (4) of the preceding paragraph shall be ordered to pay within the time limit, if it fails to do so, it shall be imposed with a fine of one up to three times of the discharging fees for hazardous wastes.

Article 76 Any entity that violates this Law and fails to treat hazardous wastes discharged thereby or fails to bear the waste treatment fees that should be borne according to law shall be ordered to get right within the time limit by the environmental protection administrative department of the people's government at or above the county level, and also be imposed with a fine of one up to three times of such treatment fees.

Article 77 Any entity that is engaged in collecting, storing, utilizing and treating hazardous wastes without a business license or against the provisions of the business license shall be ordered by the environmental protection administrative department of the local people's government at or above the county level to stop the illegal act. Its illegal gains shall be confiscated, and it may also be imposed upon a fine of less than three times of the illegal gains.

If any entity engages, against the provision of business license, in activities specified in the preceding paragraph, its business license may also be revoked by the license-issuing department

Article 78 Whoever, in violation of this Law, dumps, piles up, or treats solid wastes from abroad within the territory of China, or imports any import-forbidden or import-restricted solid wastes as raw material without permission, it shall be ordered by the customs to transport such solid waste back to where it is dispatched and may also be imposed upon a fine of not less than 100,000 yuan but not more than 1,000,000 yuan. If it constitutes crimes, it shall be subject to criminal liabilities. If the importer is unclear, the carrier shall be responsible for

transporting such solid waste back or undertake the fees incurred from treating such solid waste.

Whoever tries to avoid the supervision and control of the Customs shall, if his act constitutes a crime, be subject to criminal liabilities.

Article 79 Whoever, in violation of this Law, transfers hazardous wastes via the territory of the People's Republic of China shall be ordered by the Customs to transport the hazardous wastes back to the original place and may also be imposed upon a fine of not less than 50,000 yuan but not more than 500,000 yuan.

Article 80 With regard to illegally imported solid wastes, the environmental protection administrative department of the people's government at or above the provincial level shall put forward suggestions to the Customs regarding its disposition, the Customs shall make a decision on punishment in accordance with the provisions of Article 78 of this Law. If such importation has caused environmental pollution, the environmental protection administrative department of the people's government at or above the provincial level shall order the importer to eliminate the pollution.

Article 81 Any entity that violates this Law and causes serious environmental pollution by solid wastes shall be treated within the time limit by the environmental protection administrative department of the people's government at or above the county level on the strength of their functions specified by the State Council; if it fails to accomplish the treatment task within the time limit, its business shall be suspended or the entity shall be closed down by the people's government of the same level.

Article 82 Whoever, in violation of this Law, has caused an accident of environmental pollution by solid wastes shall be fined 20,000 up to 200,000 yuan by the environmental protection administrative department of the people's government at or above the county level; in the case of severe damages, the fine shall be 30% of the direct loss, but not exceeding 1,000,000 yuan, and the principle and other persons hold to directly responsible shall be subject to administrative sanctions; if a major accident of environment pollution by solid wastes is caused, its business shall be suspended or the entity shall be closed down by the people's government at or above the county level upon the strength of the functions as prescribed by the State Council.

Article 83 Any entity that collects, stores, utilizes and treats hazardous wastes against the provisions of this Law and has caused a serious environmental pollution accident and therefore constitutes a crime shall be subject to criminal liabilities.

Article 84 Entities and individuals that have suffered damages caused by solid waste pollution shall have the right to claim compensation according to law.

A dispute over the liabilities for damages or compensations may, at the request of the parties concerned, be mediated and settled by the environmental protection administrative department of or other supervisory and administrative department of the prevention and control of environmental pollution by solid wastes; if the mediation fails, the parties concerned may bring a suit to a people's court. The parties concerned may also directly

bring a suit to a people's court.

The State shall encourage a legal service agency to offer legal aids to the victims of suits of environmental pollution by solid wastes.

Article 85 It is necessary to get rid of dangers, compensate losses according to law and take measures to reconstitute to the previous environmental condition if any environmental pollution by solid wastes is caused.

Article 86 For a damage suit arising from the environmental pollution by solid wastes, the inflicter shall assume the burden of proof for the statutory causes for exemption and the nonexistence of causation between its act and harmful consequences.

Article 87 For any dispute over damages and compensations due to the environmental pollution by solid wastes, any party concerned may entrust an environmental monitoring institution to offer monitoring data. The environmental monitoring institution shall accept the trust and faithfully provide monitoring data.

Chapter VI Supplementary Provisions

Article 88 For the purposes of this Law, the following terms mean:

(1) "Solid waste" means articles and substances in solid, semi-solid state or gaseity in containers that are produced in the production, living and other activities and have lost their original use values or are discarded or abandoned though haven't yet lost use values, and articles and substances that are included into the management of solid wastes upon the strength of administrative regulations.

(2) "Industrial solid" waste means solid waste discharged in industrial production activities.

(3) "Consumer waste" means solid waste discharged from everyday life or from services provided to everyday life as well as the solid waste that is regarded as consumer waste under laws and administrative regulations.

(4) "Hazardous waste" means solid waste that is included in the national list of hazardous waste or identified to be dangerous according to the identification criteria and methods of hazardous waste as prescribed by the State.

(5) "Storage" refers to an activity that temporarily places solid waste into specific facilities or sites.

(6) "Treatment" means activities conducted to reduce the quantity or volume of the discharged solid wastes, reduce or eliminate their dangerous composition through incineration or other methods that can change the physical, chemical or biological characteristics of the solid waste, or activities conducted ultimately to put solid wastes in landfills that meet the requirements of environmental protection, from which the solid waste shall never be taken back again.

(7) Utilization refers to an activity that distills substances as raw materials or fuels from solid waste.

Article 89 This Law shall apply to the prevention and control of pollution by liquid wastes. However, the prevention and control of pollution by waste water discharged into a water body shall be governed by relevant laws other than this Law.

Article 90 If an international treaty regarding the prevention and control of environmental pollution by solid wastes concluded or acceded to by the People's Republic of China contains provisions differing from those contained in this Law, the provisions of the international treaty shall prevail, with the exception of the provisions that the People's Republic of China has announced reservation.

Article 91 This Law shall enter into force as of April 1, 2005.

7. Law of the People's Republic of China on Prevention and Control of Radioactive Pollution

(Adopted at the Third Session of the Standing Committee of the Tenth National People's Congress of the People's Republic of China on June 28, 2003)

Contents

Chapter I General Provisions

Article 1 The present Law is enacted in order to prevent and control radioactive pollution, protect the environment, guarantee the health of human bodies, promote the development and peaceful utilization of nuclear energy and nuclear technology.

Article 2 The present Law shall apply to the activities of prevention and control of radioactive pollution that occurs in the process of the site selection, construction, operation and retirement of nuclear facilities as well as the development and utilization of nuclear technologies, uranium (thorium) mines and associated radioactive mines within the territory of the People's Republic of China and other sea areas under the jurisdiction of the People's Republic of China.

Article 3 The State practices the guideline of mainly stressing prevention, combining prevention and control, administering strictly and putting safety first towards the prevention and control of radioactive pollution.

Article 4 The State encourages and supports the scientific research and the technical development and utilization for the prevention and control of radioactive pollution, and extends advanced technologies for the prevention and control of radioactive pollution.

The State supports the carrying-out of international exchanges and cooperation for the prevention and control of radioactive pollution.

Article 5 The people's government at the county level or above shall include the prevention and control of radioactive pollution into the planning on environmental protection.

The people's government at the county level or above shall arrange for and carry out the pertinent publicity and education on the prevention and control of radioactive pollution, and make the public know about the relevant information and scientific knowledge on the prevention and control of radioactive pollution.

Article 6 Any entity or individual may have the right to disclose and prosecute the acts causing radioactive pollution.

Article 7 The people's government at the county level or above shall reward the entities and individuals that have made prominent achievements in the prevention and control of

radioactive pollution.

Article 8 The administrative department of environmental protection under the State Council shall implement unified supervision over the work of prevention and control of radioactive pollution throughout the country in accordance with the law.

The administrative department of health under the State Council and other relevant departments shall, upon their duties prescribed by the State Council, make supervision over the relevant work of prevention and control of radioactive pollution in accordance with the law.

Chapter II Supervision over Prevention and Control of Radioactive Pollution

Article 9 The national standards on the prevention and control of radioactive pollution shall be formulated by the administrative department of environmental protection under the State Council in light of the requirements on environmental safety and the economic and technological conditions of the State. The national standards on the prevention and control of radioactive pollution shall be jointly promulgated by the administrative department of environmental protection under the State Council and the administrative department of standardization under the State Council.

Article 10 The State establishes a system on monitoring radioactive pollution. The administrative department of environmental protection under the State Council shall, jointly with other relevant departments under the State Council, arrange for the environmental monitoring network, and implement monitoring administration over radioactive pollution.

Article 11 The administrative department of environmental protection under the State Council and other relevant departments under the State Council shall, upon the division of their duties, be responsible for their respective duties, transmit information to each other, cooperate closely, as well as supervise and inspect the prevention and control of radioactive pollution in the development and utilization of nuclear facilities and uranium (thorium) mines. The administrative department of environmental protection under the local people's government at the county level or above and other relevant departments at the same level shall, upon the division of their duties, be responsible for their respective duties, transmit information to each other, cooperate closely, as well as supervise and inspect the prevention and control of radioactive pollution in the utilization of nuclear technology and the development and utilization of associated radioactive mines within their own respective jurisdictions.

The supervision and inspection officers shall show their certificates when making the on-the-spot inspection. The inspected entity must truthfully present the information, and provide the necessary documents. The supervision and inspection officers shall keep confidential the technical secrets and business secrets for the inspected entity, and shall, when inspecting an entity or department involving State secrets, abide by the relevant provisions of the State on keeping confidential the State secrets, as well as handle the relevant formalities for approval in accordance with the law.

Article 12 An entity running transportation of nuclear facilities, an entity utilizing nuclear

technology or an entity developing and utilizing uranium (thorium) mines and associated radioactive mines shall be responsible for its own prevention and control of radioactive pollution, accept the supervision by the administrative department of environmental protection and other relevant departments, and bear the liabilities in accordance with the law for the radioactive pollution it has caused.

Article 13 An entity running transportation of nuclear facilities, an entity utilizing nuclear technology or an entity developing and utilizing uranium (thorium) mines and associated radioactive mines must take safety, prevention and protection measures to prevent various accidents that might cause radioactive pollution, and to avoid the harm from radioactive pollution.

An entity running transportation of nuclear facilities, an entity utilizing nuclear technology or an entity developing and utilizing uranium (thorium) mines and associated radioactive mines shall hold education and trainings on radioactive safety for its staff members, and take effective safety measures on prevention and protection.

Article 14 The State applies a qualification administration system to the professionals engaging in the prevention and control of radioactive pollution; and applies a credential administration system to the institutions engaging in monitoring of radioactive pollution.

Article 15 Whichever entity transports radioactive substance or ray devices including radioactive sources shall take effective measures to prevent radioactive pollution. The specific measures shall be prescribed by the State Council.

Article 16 An obvious radioactivity identification and the warning statements in Chinese shall be set for the radioactive substance and ray devices. At a place where radioactive substance and ray devices are produced, sold, used, stored or disposed, and on the means of transportation of radioactive substance and ray devices containing any radioactive source, an obvious radioactivity mark shall be set.

Article 17 A product containing radioactive substance shall meet the national standards on the prevention and control of radioactive pollution; if it does not meet the national standards on the prevention and control of radioactive pollution, it shall not leave the factory or be sold. If any associated radioactive mineral residues or any stone materials containing natural radioactive substance are used as building and decoration materials, they shall meet the national standards on radioactive nuclide control of building materials.

Chapter III Prevention and Control of Radioactive Pollution from Nuclear Facilities

Article 18 For the site selection of nuclear facilities, a scientific demonstration shall be carried out, and the formalities for approval shall be gone through in accordance with the relevant provisions of the State. Before going through the formalities for approval of site selection of nuclear facilities, the party concerned shall work out a written report on the influence to the environment, and submit it to the administrative department of environmental protection under the State Council for examination and approval; without approval, the relevant department shall not issue the approval document for the site selection of nuclear facilities.

Article 19 An entity running transportation of nuclear facilities must, before carrying out the

activities of construction, loading, operation or retirement, etc. for nuclear facilities, apply to obtain the permit for construction and operation of nuclear facilities and go through the formalities for approval of loading and retirement, etc. in accordance with the relevant provisions of the State Council on supervision and administration of the safety of nuclear facilities.

An entity running transportation of nuclear facilities may not carry out the corresponding activities of construction, loading, operation or retirement, etc. until it has obtained the relevant permit or approval document.

Article 20 An entity running transportation of nuclear facilities shall, before applying for obtaining the permit for construction and operation of nuclear facilities and going through the formalities for approval of retirement, work out a written report on the influence to the environment, and submit it to the administrative department of environmental protection under the State Council for examination and approval; without approval, the relevant department shall not issue the permit and the approval document.

Article 21 The facilities for the prevention and control of radioactive pollution which are auxiliary to nuclear facilities shall be designed, constructed and put into use simultaneously with the major engineering project.

The facilities for the prevention and control of radioactive pollution shall be inspected and accepted simultaneously with the major engineering project; the major engineering project may not be put into production or use until it has been inspected and accepted as qualified.

Article 22 The imported nuclear facilities shall meet the national standards for the prevention and control of radioactive pollution; if there are no corresponding national standards for the prevention and control of radioactive pollution, the relevant foreign standards designated by the administrative department of environmental protection under the State Council shall be adopted.

Article 23 In the outside region surrounding such important nuclear facilities as nuclear power plant, etc., a limited planning area shall be designated. The measures for designating and administering the limited planning area shall be prescribed by the State Council.

Article 24 An entity running transportation of nuclear facilities shall monitor the category and density of the radioactive nuclide contained in the environment surrounding the nuclear facilities as well as the total amount of radioactive nuclide from the effusion of the nuclear facilities, and regularly report the monitoring result to the administrative department of environmental protection under the State Council and the administrative department of environmental protection under the people's government of the province, autonomous region or municipality directly under the Central Government at its locality.

The administrative department of environmental protection under the State Council shall be responsible for conducting supervisory monitoring over such important nuclear facilities as nuclear power plant, etc., and monitor other effusion of the nuclear facilities in light of needs. The expenses for constructing, operating and maintaining the supervisory monitoring system shall be included in the financial budget.

Article 25 An entity running transportation of nuclear facilities shall set up and improve the security system, strengthen the security work, and accept the supervision and guidance of the public security department.

An entity running transportation of nuclear facilities shall, in light of the scale and nature of the nuclear facilities, make the plan on meeting emergency from nuclear accidents within the site, and do well in the preparation for meeting the emergency.

In the case of meeting the emergency from a nuclear accident, the entity running transportation of nuclear facilities must immediately take effective emergency measures to control the accident, and make a report to the administrative department of nuclear facilities, the administrative department of environmental protection, the administrative department of health, the public security department and other relevant departments.

Article 26 The State sets up and improves the system for meeting emergency from nuclear accidents.

The administrative department of nuclear facilities, the administrative department of environmental protection, the administrative department of health, the public security department and other relevant departments shall, under the arrangement and leadership of the people's government at the same level, do well in meeting emergency from nuclear accidents upon their respective duties in accordance with the law.

The Chinese People's Liberation Army and the Chinese People's Armed Police Force shall, in accordance with the relevant provisions of the State Council and the Central Military Commission, provide effective aids in meeting emergency from nuclear accidents.

Article 27 An entity running transportation of nuclear facilities shall formulate the plans on retirement of nuclear facilities.

The expenses for retirement of nuclear facilities and those for disposition of radioactive wastes shall be withheld in advance, and be listed in the investment budget and production costs. The measures for withholding and managing expenses for retirement of nuclear facilities and those for disposition of radioactive wastes shall be prescribed by the financial department and price administrative department under the State Council jointly with the administrative department of environmental protection and the administrative department of nuclear facilities under the State Council.

Chapter IV Prevention and Control of Radioactive Pollution from Utilization of Nuclear Technology

Article 28 An entity producing, selling or using radioisotope and ray devices shall, in accordance with the relevant provisions of the State Council on prevention of radioactivity from the radioisotope and ray devices, apply to obtain a permit, and make registration accordingly.

An entity transferring or importing radioisotope and ray devices or an entity equipped with radioisotope instruments shall go through the relevant formalities in accordance with the relevant provisions of the State Council on prevention of radioactivity from the radioisotope and ray devices.

Article 29 An entity producing, selling or using radioisotope, accelerators, neutron producers or ray devices containing radioactive sources shall, before applying to obtain the permit, work out the documents on appraisal of the influence to the environment, and submit them to the administrative department of environmental protection under the people's government of the province, autonomous region or municipality directly under the Central Government for examination and approval; without approval, the relevant department shall not issue the permit.

The State sets up a system of recording radioisotope. The specific measures shall be prescribed by the State Council.

Article 30 The facilities for prevention of radioactivity at a newly built, rebuilt or extended work site shall be designed, constructed and put into use simultaneously with the major engineering project.

The facilities for prevention of radioactivity shall be inspected and accepted simultaneously with the major engineering project; the major engineering project may not be put into production or use until the said facilities have been inspected and accepted as qualified.

Article 31 The radioisotope shall be kept separately, and shall not be put together with inflammable, explosive or corrosive articles, etc. The effective security and protection measures of fire prevention, precautions against theft, prevention of leakage of rays shall be taken for the storing place, and special persons shall be designated to be responsible for the storing. When radioisotope is stored, obtained, used or returned, it shall be registered and inspected, so that the accounts and the articles are in conformity with each other.

Article 32 An entity producing or using radioisotope or ray devices shall, in accordance with the provisions of the administrative department of environmental protection under the State Council, collect, pack and store the radioactive wastes it generates.

An entity producing radioactive sources shall, in accordance with the provisions of the administrative department of environmental protection under the State Council, recycle and utilize waste radioactive sources; an entity using radioactive sources shall, in accordance with the provisions of the administrative department of environmental protection under the State Council, return the waste radioactive sources to the entity producing radioactive sources or deliver them to an entity specially engaging in the storage and disposition of radioactive solid wastes.

Article 33 An entity producing, selling, using or storing radioactive sources shall set up and improve the security system, designate special persons to be responsible for the system, ensure the implementation of the system of liability for safety, and formulate the necessary measures for meeting emergency from accidents. In case of an accident that the radioactive sources are lost or stolen or a radioactive pollution accident, the relevant entity and individual must immediately take emergency measures, and make a report to the public security department, the administrative department of health and the administrative department of environmental protection.

The public security department, the administrative department of health and the

administrative department of environmental protection shall, after the receipt of the report on the accident that the radioactive sources are lost or stolen or the radioactive pollution accident, make a report to the people's government at the same level, and immediately take effective measures according to their respective duties to prevent the radioactive pollution from spreading, and to reduce the losses from the accident. The local people's government shall timely inform the public of the relevant information, and do well in investigating and dealing with the accident.

Chapter V Prevention and Control of Radioactive Pollution from Development and Utilization of Uranium (Thorium) mine and Associated Radioactive Mines

Article 34 An entity developing and utilizing or closing up uranium (thorium) mines shall, before applying to obtain the mining permit or going through the retirement formalities for approval, work out a written report on the influence to the environment, and submit it to the administrative department of environmental protection under the State Council for examination and approval.

An entity developing and utilizing associated radioactive mines shall, before applying to obtain the mining permit, work out a written report on the influence to the environment, and submit it to the administrative department of environmental protection under the people's government at the provincial level or above for examination and approval.

Article 35 The facilities for the prevention and control of radioactive pollution, which are auxiliary to the construction project of development and utilization of uranium (thorium) mines and associated radioactive mines, shall be designed, constructed and put into use simultaneously with the major engineering project.

The facilities for the prevention and control of radioactive pollution shall be inspected and accepted simultaneously with the major engineering project; the major engineering project may not be put into production or use until the said facilities have been inspected and accepted as qualified.

Article 36 An entity developing and utilizing uranium (thorium) mines shall monitor the effusion of the uranium (thorium) mines and the surrounding environment, and shall regularly report the monitoring result to the administrative department of environmental protection under the State Council and the administrative department of environmental protection under the people's government of the province, autonomous region or municipality directly under the Central Government at its locality.

Article 37 A tailing warehouse shall be built to store and dispose of the tailings generated in the process of development and utilization of the uranium (thorium) mines and the associated radioactive mines; the built tailing warehouse shall meet the requirements for prevention and control of radioactive pollution.

Article 38 An entity developing and utilizing uranium (thorium) mines shall make a plan on retirement of uranium (thorium) mines. The expenses for retirement of uranium mines shall be included in the financial budget of the State.

Chapter VI Administration of Radioactive Wastes

Article 39 An entity running transportation of nuclear facilities, an entity utilizing nuclear technology or an entity developing and utilizing uranium (thorium) mines and associated radioactive mines shall reasonably choose and utilize raw materials, use advanced producing process and equipment, and try to reduce the amount of generated radioactive wastes.

Article 40 Whichever entity discharges radioactive waste gas or waste liquid to the environment must meet the national standards on the prevention and control of radioactive pollution.

Article 41 An entity generating radioactive waste gas or waste liquid shall, if discharging to the environment radioactive waste gas or waste liquid which meets the national standards on the prevention and control of radioactive pollution, apply to the administrative department of environmental protection that examines and approves the documents on appraisal of the influence to the environment for the discharge amount of radioactive nuclide, and regularly report the result on measurement of discharge.

Article 42 An entity generating radioactive waste liquid must, upon the requirements of the national standards on the prevention and control of radioactive pollution, dispose or store the radioactive waste liquid which shall not be discharged to the environment.

An entity generating radioactive waste liquid must, if discharging to the environment the radioactive waste liquid that meets the national standards on the prevention and control of radioactive pollution, use the discharging method conforming to the provisions of the administrative department of environmental protection under the State Council.

It is prohibited to discharge radioactive waste liquid by using soakaway, seepage pit, natural crevice, karst cave or by other means prohibited by the State.

Article 43 The low-level or middle-level radioactive solid wastes shall be subject to near-surface disposition in an area conforming to the provisions of the State.

The high-level radioactive solid wastes shall be subject to concentrative deep-geologic disposition.

The α radioactive solid wastes shall be disposed in accordance with the preceding paragraph.

It is prohibited to dispose radioactive solid wastes in the water area of an inland river or on the sea.

Article 44 The administrative department of nuclear facilities under the State Council shall, jointly with the administrative department of environmental protection under the State Council, work out the planning on selection of the site for disposition of radioactive solid wastes in light of the geological conditions and the needs in disposition of the radioactive solid wastes and on the basis of appraising the influence to the environment, and shall submit the planning to the State Council for approval before implementation.

The relevant local people's government shall, according to the planning on selection of the site for disposition of radioactive solid wastes, provide the land for construction of the site for disposition of the radioactive solid wastes, and take effective measures to support the

disposition of the radioactive solid wastes.

Article 45 An entity generating radioactive solid wastes shall, in accordance with the provisions of the administrative department of environmental protection under the State Council, deliver the radioactive solid wastes it generates to the entity disposing the radioactive solid wastes for disposition after having them treated, and shall bear the disposition expenses.

The administrative measures for charging and using the fees for disposition of radioactive solid wastes shall be prescribed by the financial department and the price administrative department under the State Council jointly with the administrative department of environmental protection under the State Council.

Article 46 Whichever entity intends to establish an entity specially engaging in storage and disposition of radioactive solid wastes must be examined and approved by the administrative department of environmental protection under the State Council to obtain the permit. The specific measures shall be prescribed by the State Council.

It is prohibited to engage in the activities of storage and disposition of radioactive solid wastes without being permitted or not in accordance with the relevant provisions on permission.

It is prohibited to provide radioactive solid wastes to an entity without the permit for storage and disposition or entrust such an entity to store and dispose the said wastes.

Article 47 It is prohibited to import radioactive wastes or radioactively polluted articles into the territory of the People's Republic of China or to transfer them via the territory of the People's Republic of China.

Chapter VII Legal Liabilities

Article 48 Any member of the supervision and administration of the prevention and control of radioactive pollution who, in violation of the legal provisions, takes advantage of his office to accept money or property from others or seek other benefits, or neglects his duties, and commits any of the following acts, shall be imposed upon administrative sanctions in accordance with the law; if a crime is constituted, he shall be investigated for criminal liabilities:

- (1) issuing a permit or an approval document to an entity not qualified for the statutory conditions;
- (2) not implementing his supervisory and administrative duties in accordance with the law;
- (3) not investigating the illegal acts he has found.

Article 49 Whichever entity violates the present Law to commit any of the following acts shall be ordered by the administrative department of environmental protection or other relevant department under the people's government at the county level or above, upon their respective powers, to make a correction within a time limit, and may be imposed upon a fine of not more than 20,000 Yuan:

- (1) not reporting the monitoring result on the relevant environment in accordance with the provisions;

(2) refusing to accept the on-the-spot inspection by the administrative department of environmental protection and other relevant department, or not truthfully presenting the information or not providing the necessary documents when inspected.

Article 50 Whichever entity violates the present Law by failing to work out the documents on appraisal of the influence to the environment, or, without authorization, by carrying out the activities of construction, operation, production and use, etc. before the documents on appraisal of the influence to the environment are approved by the administrative department of environmental protection, shall be ordered by the administrative department of environmental protection that examines and approves the documents on appraisal of the influence to the environment to cease the illegal acts, and to go through the formalities or recover the original state within a time limit, and shall be imposed upon a fine of not less than 10,000 Yuan but not more than 200,000 Yuan in addition.

Article 51 Whichever entity violates the present Law by failing to construct the facilities for the prevention and control of radioactive pollution or the facilities for the prevention of radioactivity, or by putting the major engineering project into production or use before the prevention, control or protection facilities are inspected and accepted as qualified, shall be ordered by the administrative department of environmental protection that examines and approves the documents on appraisal of the influence to the environment to cease the illegal acts, and to make a correction within a time limit, and shall be imposed upon a fine of not less than 50,000 Yuan but not more than 200,000 Yuan in addition.

Article 52 If, without being permitted or approved, an entity running transportation of nuclear facilities violates the present Law by unauthorizedly carrying out the activities of construction, loading, operation or retirement, etc. of nuclear facilities, it shall be ordered by the administrative department of environmental protection under the State Council to cease the illegal acts, and to make a correction within a time limit, and shall be imposed upon a fine of not less than 200,000 Yuan but not more than 500,000 Yuan in addition; if a crime is constituted, it shall be investigated for criminal liabilities.

Article 53 Whichever entity violates the present Law by producing, selling, using, transferring, importing or storing radioisotope or ray devices or meters equipped with radioisotope, shall be ordered by the administrative department of environmental protection or other relevant department under the people's government at the county level or above upon its powers to cease the illegal acts, and to make a correction within a time limit; if the entity fails to make a correction within the time limit, it shall be ordered to cease its production or business, or its permit shall be suspended; if there are any illegal proceeds, such illegal proceeds shall be confiscated; if the illegal proceeds amount to 100,000 Yuan or more, the entity shall be imposed upon a fine of not less than one time but not more than five times of the illegal proceeds in addition; if there are no illegal proceeds or the illegal proceeds are less than 100,000 Yuan, the entity shall be imposed upon a fine of not less than 10,000 Yuan but not more than 100,000 Yuan in addition; if a crime is constituted, it shall be investigated for criminal liabilities.

Article 54 Whichever entity violates the present Law by committing any of the following acts shall be ordered by the administrative department of environmental protection under the people's government at the county level or above to cease the illegal acts, and to make a correction within a time limit, and shall be imposed upon a fine; if a crime is constituted, it shall be investigated for criminal liabilities:

(1) failing to build a tailing warehouse or not complying with the requirements on the prevention and control of radioactive pollution to build a tailing warehouse, or to store or dispose of tailings of uranium (thorium) mines and associated radioactive mines;

(2) discharging to the environment the radioactive waste gas or waste liquid which shall not be discharged;

(3) discharging radioactive waste liquid not by the prescribed means, or discharging radioactive waste liquid by using soakaway, seepage pit, natural crevice, karst cave or by other means prohibited by the State;

(4) not complying with the provisions to dispose of or store the radioactive waste liquid which shall not be discharged to the environment;

(5) providing radioactive solid wastes to an entity without the permit for storage and disposition or entrust such an entity to store and dispose the said wastes.

Whichever entity commits any of the acts in Items (1), (2), (3) and (5) of the preceding paragraph shall be imposed upon a fine of not less than 100,000 Yuan but not more than 200,000 Yuan; whichever entity commits the act in Item (4) of the preceding paragraph shall be imposed upon a fine of not less than 10,000 Yuan but not more than 100,000 Yuan.

Article 55 Whichever entity violates the present Law by committing any of the following acts shall be ordered by the administrative department of environmental protection or other relevant department under the people's government at the county level or above upon their powers to make a correction within a time limit; if the entity fails to make a correction within the time limit, it shall be ordered to cease its production or business, and shall be imposed upon a fine of not less than 20,000 Yuan but not more than 100,000 Yuan in addition; if a crime is constituted, it shall be investigated for criminal liabilities:

(1) failing to set the radioactive identification, mark or warning statements in Chinese in accordance with the provisions;

(2) failing to set up and improve the security system or to make the plan on meeting emergency from accidents or the emergency measures in accordance with the provisions;

(3) failing to report the information that the radioactive sources are lost or stolen or to report radioactive pollution accidents in accordance with the provisions.

Article 56 If an entity generating radioactive solid wastes does not comply with Article 45 of the present Law to dispose the radioactive solid wastes it has generated, it shall be ordered by the administrative department of environmental protection that approves the documents on appraisal of the influence to the environment submitted by the entity for project initiation to cease the illegal acts, and to make a correction within a time limit; if the entity fails to make a correction within the time limit, an entity with the capacity of disposition shall be designated

to dispose of the wastes on behalf of the former entity, and the needed expenses shall be borne by the former entity; in addition, a fine of not more than 200,000 Yuan may be imposed; if a crime is constituted, it shall be investigated for criminal liabilities.

Article 57 Whichever entity violates the present Law by committing any of the following acts shall be ordered by the administrative department of environmental protection under the people's government at the provincial level or above to cease its production or business, or its permit shall be suspended; if there are any illegal proceeds, the illegal proceeds shall be confiscated; if the illegal proceeds are no less than 100,000 Yuan, it shall be imposed upon a fine of not less than one time but not more than five times of the illegal proceeds in addition; if there are no illegal proceeds or the illegal proceeds are less than 100,000 Yuan, it shall be imposed upon a fine of not less than 50,000 Yuan but not more than 100,000 Yuan in addition; if a crime is constituted, it shall be investigated for criminal liabilities:

(1) engaging in the activities of storage and disposition of radioactive solid wastes without permission;

(2) engaging in the activities of storage and disposition of radioactive solid wastes not in accordance with relevant provisions on permission.

Article 58 Whoever imports radioactive wastes or radioactively polluted articles into the territory of the People's Republic of China or transfers them via the territory of the People's Republic of China shall be ordered by the customs to return the said radioactive wastes or radioactively polluted articles, and shall be imposed upon a fine of not less than 500,000 Yuan but not more than 1,000,000 Yuan in addition; if a crime is constituted, he/it shall be investigated for criminal liabilities.

Article 59 Whoever causes any damage to others due to radioactive pollution shall bear the civil liabilities in accordance with the law.

Chapter VIII Supplementary Provisions

Article 60 The supervision of the prevention and control of radioactive pollution from military facilities and equipment shall be conducted by the relevant competent departments under the State Council and of the army pursuant to the principles prescribed in the present Law and the duties prescribed by the State Council and the Central Military Commission.

Article 61 The prevention and treatment of occupational diseases of employees due to the radioactive substance in their occupational activities shall be governed by the “Law of the People's Republic of China on Prevention and Treatment of Occupational Diseases” .

Article 62 The meanings of the following terms in the present Law:

(1) Radioactive pollution means the radioactive substance or rays caused by human activities on the surface of or inside the materials, human bodies, sites or environmental media, which exceed the national standards.

(2) Nuclear facility means nuclear power plant (nuclear electric power plant, nuclear thermoelectric power plant, nuclear gas or heat supply plant, etc.) and other reactor (research reactor, experiment reactor, critical assembly, etc.), the facility for production, processing storage or reprocessing of nuclear fuel, or the facility for treatment or disposition

of radioactive wastes, and so on.

(3) Utilization of nuclear technology means the use of sealed radioactive sources, non-sealed radioactive sources and ray devices in such areas as medical treatment, industry, agriculture, geological survey, scientific research and teaching, etc.

(4) Radioisotope means the nuclide in a certain element with radioactive decay, which has the same ordinal number of atoms but different mass.

(5) Radioactive source means the solid radioactive material permanently sealed in the container or tightly wrapped, except for the materials in the category of nuclear fuel circulation in research reactors and power reactors.

(6) Ray device means X ray device, accelerator, neutron producer or other device containing radioactive sources.

(7) Associated radioactive mine means the non-uranium mine containing high-density natural radioactive nuclide (such as rare earth mine and phosphate mine, etc.).

(8) Radioactive wastes mean the wastes containing radioactive nuclide or polluted by radioactive nuclide, with the density or specific activity higher than the cleansing capacity determined by the State, and expected to be no longer used.

Article 63 The present Law shall come into force on October 1, 2003.

8. Fisheries Law of the People's Republic of China

(Adopted at the 14th Meeting of the Standing Committee of the National People's Congress and promulgated by Order No. 34 of the President of the People's Republic of China on January 20, 1986; amended for the first time according to the Decision of the Standing Committee of the National People's Congress on the Amendment of the Fishery Law of the People's Republic of China at the Eighteenth Session of the Standing Committee of the Ninth National People's Congress on October 31, 2000; amended for the second time according to the Decision of the Standing Committee of the National People's Congress on the Amendment of the Fishery Law of the People's Republic of China at the Eleventh Session of the Standing Committee of the Tenth National People's Congress on August 28, 2004; amended for the third time according to the Decision of the Standing Committee of the National People's Congress on Amending Some Laws at the Tenth Session of the Standing Committee of the Eleventh National People's Congress on August 27, 2009 and amended for the fourth time according to the Decision of the Standing Committee of the National People's Congress on Amending Seven Laws Including the Marine Environment Protection Law of the People's Republic of China at the Sixth Session of the Standing Committee of the Twelfth National People's Congress on December 28, 2013)

CHAPTER I GENERAL PROVISIONS

Article 1 This Law is formulated for the purpose of enhancing the protection, increase, development and reasonable utilization of fishery resources, developing artificial cultivation,

protecting fishery workers' lawful rights and interests and boosting fishery production, so as to meet the requirements of socialist construction and the needs of the people.

Article 2 All productive activities of fisheries, such as aquaculture and catching or harvesting of aquatic animals and plants in the inland waters, tidal flats and territorial waters of the People's Republic of China, or in other sea areas under the jurisdiction of the People's Republic of China, must be conducted in accordance with this Law.

Article 3 In fishery production, the state shall adopt a policy that calls for simultaneous development of aquaculture, fishing and processing, with special emphasis on aquaculture and with priority given to different pursuits in accordance with local conditions.

People's governments at various levels shall include fishery production in their economic development plans and take measures to enhance the overall planning and comprehensive utilization of water areas.

Article 4 The state shall encourage research in fishery science and technology and popularization of advanced technology in order to raise the level of the country's fishery science and technology.

Article 5 People's governments at various levels shall give moral encouragement or material awards to units and individuals who make outstanding contributions to the increase and protection of fishery resources, to development of fishery production, or to research in fishery science and technology.

Article 6 The department of fishery administration under the State Council shall be in charge of the administration of fisheries throughout the country. Departments of fishery administration under people's governments at or above the county level shall be in charge of fisheries in their respective areas. These departments shall be authorized to set up fishery superintendency agencies in important fishing areas and fishing ports.

Departments of fishery administration under people's governments at or above the county level and their fishery superintendency agencies may appoint fishery inspectors who will carry out assignments that those departments and agencies entrust to them.

Article 7 State superintendence of fisheries shall operate under the principle of unified leadership and decentralized administration.

Marine fishery shall be under the superintendence of departments of fishery administration under the people's governments of provinces, autonomous regions and centrally-administered municipalities contiguous to the sea, with the exception of those sea areas and fishing grounds with specially designated fishery resources that the State Council has put under direct administration of its fishery department and subordinate fishery superintendency agencies.

Fishery in rivers and lakes shall be subject to the superintendence of the departments of fishery administration under the relevant people's governments at or above the county level in accordance with administrative divisions. Fishery administration for water areas that straddle several administrative divisions shall be decided by the relevant people's governments at or above the county level through consultation or placed under departments

of fishery administration of people's governments at the next higher level and their subordinate fishery superintendency agencies.

Article 8 Foreigners and foreign fishing vessels must obtain permission from the relevant department under the State Council before entering the territorial waters of the People's Republic of China to carry on fishery production or investigations of fishery resources, and must abide by this Law and other related laws and regulations of the People's Republic of China. If those persons and vessels belong to countries that have signed relevant accords or agreements with the People's Republic of China, their activities shall be conducted in accordance with those accords or agreements.

State fishery administration and fishing port superintendency agencies shall exercise administrative and supervisory authority over external relations pertaining to fisheries and fishing ports.

Article 9 Neither the department in charge of fishery administration as well as its institutions for the supervision and administration of fishery nor their staff shall participate or be engaged in the activities of fishery production and operation.

CHAPTER II AQUACULTURE

Article 10 The state shall encourage units under ownership by the whole people, units under collective ownership and individuals to make the best use of suitable water surfaces and tidal flats to develop aquaculture.

Article 11 The State shall make united programming on utilization of water areas, and determine which water areas and beaches may be utilized for aquatic breeding industry. Where a unit or an individual uses a water area or beach with ownership by the whole people which is determined by the State programming to be used for aquatic breeding industry, the user shall apply to the department in charge of fishery administration of the local people's government at the county level or above for the aquatic breeding certificate which shall be checked and issued by the people's government at the same level. With this certificate, the user is permitted to be engaged in aquatic breeding production in the said water area or beach. Specific measures for the check and issuance of aquatic breeding certificates shall be stipulated by the State Council.

Water areas and beaches with collective ownership or with ownership by the whole people but used by the agricultural collective business organization may be individually or collectively contracted for aquatic breeding production.

Article 12 The local people's government at the county level or above shall give precedence to the local fishery producers while checking and issuing aquatic breeding certificates.

Article 13 In case any dispute arises between the parties due to the aquatic breeding production with a water area or beach determined by the State programming to be used for aquatic breeding industry, it shall be handled in accordance with the procedures stipulated in relevant laws. Before the dispute is settled, neither party shall destroy the aquatic breeding production.

Article 14 Where a water area or beach with collective ownership is requisitioned for use for

State construction, it shall be handled in accordance with the provisions relating to the requisition of land in the Law of the People's Republic of China on Administration of Land.

Article 15 The local people's government at the county level or above shall take measures to strengthen its protection on the production bases of commercial fish and the key water areas for aquatic breeding in the suburban areas of the city.

Article 16 The state encourages and supports the breeding, cultivation and popularization of good aquatics. No new aquatic may be popularized unless it has been examined and approved by the National Committee for Examination and Approval of Original Breeding and Good Breeding and has been announced by the fishery administrative department of the State Council.

The import and export of aquatic fingerlings shall be examined and approved by the department in charge of fishery administration of the State Council or of the provincial, autonomous regional, municipal people's governments.

The production of aquatic fingerlings shall be examined and approved by the department in charge of fishery administration of the local people's government at the county level or above, except for the aquatic fingerlings cultivated or used by the fishery producers themselves.

Article 17 Quarantine must be executed for the import and export of aquatic fingerlings in order to prevent disease from passing into or out of the territory. Specific quarantine work shall be carried out in accordance with the provisions in the laws and administrative regulations on the quarantine of animals and plants imported and exported.

The safety for imported transgenosis aquatic fingerlings must be evaluated. Specific administration shall be carried out in accordance with relevant provisions of the State Council.

Article 18 The department in charge of fishery administration of the local people's government at the county level or above shall strengthen technical guidance and disease prevention for the aquatic breeding production.

Article 19 Baits or feedstuff containing poisonous or harmful substances shall not be used in the aquatic breeding production.

Article 20 In the aquatic breeding production, the ecological environment of water areas shall be protected, and the aquatic breeding density shall be scientifically determined, baits be reasonably cast, fertilizer be reasonably thrown, and medicament be reasonably used. The water areas shall not be polluted.

CHAPTER III FISHING

Article 21 The State takes measures in finance, credit and taxation to encourage and support the development of ocean fishery industry, and arranges continental-river and inshore fishing according to the fishable amount of the fishery resources.

Article 22 The State determines the total fishable amount of the fishery resources and implements fishing quota system in accordance with the principle that the fishing amount shall be lower than the increasing amount of the fishery resources. The department in charge of fishery administration of the State Council shall be responsible for organizing the

investigation and evaluation of fishery resources, and provide scientific basis for the implementation of the fishing quota system. The total amount of the fishing quota for inland seas, territorial seas, exclusive economic zones and other jurisdictional seas of the People's Republic of China shall be determined by the department in charge of fishery administration of the State Council, and shall be distributed and reported to the governments level by level after it is submitted to and approved by the State Council. The total amount of the fishing quota for important rivers and pools determined by the State shall be determined by relevant provincial, autonomous regional, municipal people's governments or determined through consultation, and shall be distributed and reported level by level. The distribution of the total amount of the fishing quota shall embody the principle of fairness and justness. The distribution methods and distribution results must be open to the society and be supervised. The department in charge of fishery administration of the State Council and of the provincial, autonomous regional, municipal people's governments shall strengthen its supervision and inspection on the implementation of the fishing quota system. For the amount which exceed the fishing quota target required by the upper level, the said department shall check and reduce its fishing quota of the next year.

Article 23. The State implements fishing license system on fishery industry.

Fishing licenses for fishing operations in the jointly managed fishery zones defined in the agreements concluded between the People's Republic of China and the relevant countries or on the high seas shall be granted by the fishery administrative department of the State Council. Fishing licenses for marine fishing with large trawlers and purse seines shall be granted by the fishery administrative departments of the people's governments of provinces, autonomous regions, and municipalities directly under the Central Government. Fishing licenses for other operations shall be granted by the fishery administrative departments of the local people's governments at or above the county level; however, fishing licenses granted for marine operations may not exceed the control figures for vessels and fishing gears specified by the state, and the specific measures shall be developed by the people's governments of provinces, autonomous regions, and municipalities directly under the Central Government.

Fishing licenses may not be sold, leased or transferred by other illegal means, and they may not be altered.

Fishing operations on jurisdictional seas of other countries shall be approved by the department in charge of fishery administration of the State Council, and abide by relevant treaties and agreements concluded or acceded to by the People's Republic of China and the laws of relevant countries.

Article 24 A fishing license may be issued to the applicant only if he fulfills the following conditions:

- (1) he has the fishing vessel inspection certificate;
- (2) he has the fishing vessel registration certificate;
- (3) he fulfills other conditions stipulated by the department in charge of fishery administration

of the State Council.

The fishing certificates approved and issued by the department in charge of fishery administration of the local people's government at the county level or above shall fit in with the fishing quota target required by the department in charge of fishery administration of the people's government at the upper level.

Article 25 The unit or individual engaged in fishing operation must operate in accordance with the provisions in the fishing license on type of operation, location, time limit, quantity of fishing facilities and fishing quota, and abide by relevant provisions of the State on the protection of fishery resources. Large scale fishing vessels shall keep fishing logs.

Article 26 Vessels that are produced, rebuilt, purchased and imported for shipping operation must be inspected and proved qualified by the fishing vessel inspection department before it is launched for operation. Specific measures shall be stipulated by the State Council.

Article 27 The construction of fishing harbors shall abide by the State's united programming, and the principle of benefiting the investors shall be implemented. The local people's government at the county level or above shall strengthen its supervision and administration on the fishing harbors located in its own administrative region, and maintain the normal order of these fishing harbors.

CHAPTER IV INCREASE AND PROTECTION OF FISHERY RESOURCES

Article 28 Departments of fishery administration under the people's governments at and above the county level shall work out overall plans and take measures to increase fishery resources in the fishery waters under their jurisdiction. These departments may collect fees from the units and individuals profited by the use of such waters and devote the money thus collected to the increase and protection of fishery resources. The procedures for collecting such fees shall be formulated by the department of fishery administration and the department of finance under the State Council, and must be approved by the State Council before going into effect.

Article 29 The State protects germ plasm resources of aquatic products and their surviving environment, and establishes preservation areas for germ plasm resources of aquatic products in the main regions where germ plasm resources of aquatic products with high economic value and heredity and breeding value can grow and breed. No unit or individual shall be engaged in fishing activities in the preservation areas for germ plasm resources of aquatic products without the approval by the department in charge of fishery administration of the State Council.

Article 30 Such methods of destroying fishery resources as killing fish by explosion, with poison or with electricity, etc. are prohibited for fishing. It is prohibited to produce, sell or use banned fishing facilities. It is prohibited to go fishing in the banned fishing areas or within the banned fishing periods. It is prohibited to go fishing with nets smaller than the smallest size of mesh. The undersized fish among the fishing gains shall not exceed the stipulated proportion. It is prohibited to sell illegally fished fishing gains in the banned fishing areas or within the banned fishing periods.

The varieties of fishery resources under key protection as well as their fishable standards, the banned fishing areas and the banned fishing periods, fishing facilities and fishing methods prohibited to be used, the smallest size of mesh, and other measures to protect fishery resources shall be stipulated by the department in charge of fishery administration of the State Council or of the provincial, autonomous regional, municipal people's governments.

Article 31 Catching fry of aquatic animals of important economic value shall be prohibited. Catching fry of aquatic animals of important economic value or spawning aquatic animals under protection for artificial breeding or for other special purposes must be approved by the department of fishery administration under the State Council or by departments of fishery administration under the people's governments of provinces, autonomous regions, and municipalities directly under the Central Government, and it must be conducted in the designated areas and times and strictly in accordance with the quotas assigned.

Measures shall be adopted to protect fry of aquatic animals when channeling or using water from water areas that specialize in producing such fry.

Article 32 When building sluices and dams which will have serious effects on fishery resources on the migration routes of fish, shrimp and crabs, the construction units must build fish passages or adopt other remedial measures.

Article 33 For water bodies that are used for fisheries and also serve the purposes of water storage and regulation and irrigation, the departments concerned shall fix the lowest water level required for fishery.

Article 34 It shall be forbidden to reclaim land from lakes. Without approval from a people's government at or above the county level, it shall not be allowed to enclose tidal flats for cultivation and no one shall be allowed to reclaim land from water areas that are used as major seedling producing centres and aquatic breeding grounds.

Article 35 To conduct underwater explosions, exploration and construction that may have serious effects on fishery resources, the construction units shall consult in advance with the department of fishery administration under the relevant people's government at or above the county level and take measures to prevent or minimize the damage to fishery resources. In case any damages to fishery resources occur therefrom, the relevant people's government at or above the county level shall order the responsible party to pay compensation.

Article 36 The people's governments at all levels shall take measures to protect and improve the ecological environment of fishery water areas, prevent and cure pollution.

The supervision and administration of the ecological environment of fishery water areas as well as the investigation and treatment of fishery pollution accidents shall be executed in accordance with relevant provisions in the Law of the People's Republic of China on the Protection of Sea Environment and the Water Pollution Prevention and Control Law of the People's Republic of China.

Article 37 The State carries out key protection on aquatic wild animals which are valuable or in severe danger such as white-flag dolphins, etc. in order to prevent them from dying out. It is prohibited to fish and kill, or hurt the aquatic wild animals under the State's key protection.

Where it is needed to fish the aquatic wild animals under the State's key protection due to scientific research, domestication and breeding, exhibition or other special circumstances, it shall be executed in accordance with the provisions in the Law of the People's Republic of China on the Protection of Wild Animals.

CHAPTER V LEGAL LIABILITY

Article 38 Where the methods of destroying fishery resources such as killing fish by explosion, with poison or with electricity, etc. are used for fishing, the provisions on banned fishing areas or banned fishing periods are violated in fishing, or banned fishing facilities, fishing methods or nets smaller than the smallest size of mesh are used for fishing, or the undersized fish among the fishing gains exceeds the stipulated proportion, the fishing gains and illegal proceeds shall be confiscated, and a fine of 50,000 yuan or less shall be imposed; if the case is serious, the fishing facilities shall be confiscated and the fishing license shall be revoked; if the case is particularly serious, the fishing vessel may be confiscated; if such acts constitute an offence, criminal liabilities shall be investigated in accordance with the law. The department in charge of fishery administration of the local people's government at the county level or above shall timely investigate and dispose of the acts of selling illegally fished fishing gains in the banned fishing areas or within the banned fishing periods.

Where fishing facilities prohibited to be used are produced or sold, the illegally produced or sold fishing facilities and the illegal proceeds shall be confiscated, and a fine of 10,000 yuan or less shall be imposed.

Article 39 For anyone who steals or loots the aquatic products bred by others or destroy the breeding water or breeding facilities of others, he shall be ordered to remedy his acts, and may be imposed a fine of 20,000 yuan or less; if such acts cause any damage to others, he shall bear the compensation liability in accordance with the law; if such acts constitute an offence, criminal liabilities shall be investigated in accordance with the law.

Article 40 Where a water area or beach with ownership by the whole people used for aquatic breeding production lies waste for one year or longer without any justifiable reason, the authority which issues the aquatic breeding certificate shall order the user to develop and utilize it within a time limit; should the user fail to develop and utilize it within the time limit, his aquatic breeding certificate shall be revoked, and a fine of 10,000 or less may also be imposed.

For anyone who is engaged in aquatic breeding production in a water area with ownership by the whole people without permission before obtaining the aquatic breeding certificate in accordance with the law, he shall be ordered to remedy his acts, and re-apply for the aquatic breeding certificate or dismantle the aquatic breeding facilities within a time limit.

For anyone who is engaged in aquatic breeding production in a water area with ownership by the whole people before obtaining the aquatic breeding certificate in accordance with the law or who exceeds the permitted fishing scope in the aquatic breeding certificate, thus hinders water carriage or flood drainage, he shall be ordered to dismantle the aquatic breeding facilities within a time limit, and may be imposed a fine of 10,000 yuan or less.

Article 41 For anyone who goes fishing without permission before obtaining the fishing license in accordance with the law, the fishing gains and illegal proceeds shall be confiscated, and a fine of 100,000 yuan or less shall be imposed; if the case is serious, the fishing facilities and the fishing vessel may also be confiscated.

Article 42 For anyone who goes fishing by violating the provisions in the fishing license on type of operation, location, time limit, quantity of fishing facilities, the fishing gains and illegal proceeds shall be confiscated, and a fine of 50,000 yuan or less may also be imposed; if the case is serious, the fishing facilities may also be confiscated and the fishing license be revoked.

Article 43 Where the fishing license is altered, bought, sold, leased or otherwise transferred, the illegal proceeds shall be confiscated, and the fishing license be revoked, and a fine of 50,000 yuan or less may also be imposed; where the acts of forging, mutilating, buying or selling the fishing license constitute an offence, criminal liabilities shall be investigated in accordance with the law.

Article 44 Where the aquatic fingerlings are illegally produced, imported or exported, the fingerlings and illegal proceeds shall be confiscated, and a fine of 50,000 yuan or less shall be imposed.

For anyone who is engaged in feeding aquatic fingerlings without being examined, determined and approved, he shall be ordered to stop the operation immediately, the illegal proceeds shall be confiscated, and a fine of 50,000 yuan or less may also be imposed.

Article 45 For anyone who is engaged in fishing activities in an preservation area for germ plasm resources of aquatic products without permission, he shall be ordered to stop fishing immediately, the fishing gains and fishing facilities shall be confiscated, and a fine of 10,000 yuan or less may also be imposed.

Article 46 Where a foreigner or a foreign fishing vessel violates the provisions in this Law by entering the jurisdictional water areas of the People's Republic of China to be engaged in fishery production or activities for investigation of fishery resources, he/it shall be ordered to leave or be banished, the fishing gains and fishing facilities may be confiscated, and a fine of 500,000 yuan or less may also be imposed; if the case is serious, the fishing vessel may be confiscated; if such acts constitute an offence, criminal liabilities shall be investigated in accordance with the law.

Article 47 For anyone who destroys the ecological environment of fishery water areas or causes any fishery pollution accident, his legal liabilities shall be investigated in accordance with the provisions in the Law of the People's Republic of China on the Protection of Sea Environment and the Water Pollution Prevention and Control Law of the People's Republic of China.

Article 48 The administrative penalties provided in this Law shall be decided by the department in charge of fishery administration of the people's government at the county level or above as well as its institutions for the supervision and administration of fishery, except that this Law has already provided the penalty authority.

Where, in the execution of law on the sea, there are clear facts and sufficient evidence for the acts of fishing by violating the provisions on banned fishing areas or banned fishing periods or by using banned fishing facilities, fishing methods, and the acts of fishing without obtaining the fishing license, but the administrative penalty decision cannot be made or enforced in presence in accordance with legal procedures, the fishing license, fishing facilities or fishing vessel may be temporarily distrained in advance, and the administrative penalty decision shall be made and enforced in the harbor in accordance with law.

Article 49. Where the department in charge of fishery administration and its institutions for the supervision and administration of fishery as well as their staff violate the provisions in this Law in checking and issuing licenses, distributing fishing quota or in the activities of fishery production and operation, or conduct other acts of neglecting their duty and not performing the legal obligations, abusing the administrative power, practicing fraudulence for personal interests, they shall be subject to administrative sanctions in accordance with the law; if such acts constitute an offence, criminal liabilities shall be investigated in accordance with the law.

CHAPTER VI SUPPLEMENTARY PROVISIONS

Article 50 This Law shall come into force as of July 1, 1986.

9. Law of the People's Republic of China on Ports

(Adopted at the Third Session of the Standing Committee of the Tenth National People's Congress of the People's Republic of China on June 28, 2003, and amended in accordance with the Decision on Amending the Seven Laws Including the Law of the People's Republic of China on Ports adopted at the Third Session of the Twelfth National People's Congress on April 24, 2015; and amended for the second time in accordance with the Decision of the National People's Congress on Amending Eleven Laws including the Accounting Law of the People's Republic of China at the 30th Session of the Standing Committee of the Twelfth National People's Congress of the People's Republic of China on November 4, 2017)

Chapter I General Provisions

Article 1 The present Law is enacted with a view to strengthening the administration of ports, maintaining the safety and business order of ports, protecting the lawful rights and interests of the parties, and promoting the construction and development of ports.

Article 2 Whoever engages in port planning, construction, maintenance, business operation, management and the related activities shall be governed by the present Law.

Article 3 Port mentioned in the present Law means an area composed of a certain scope of water area and land area, which has the functions for vessels to enter and exit, to berth, to anchor, for passengers to embark and disembark, and for goods to be loaded and unloaded, lightered, stored, etc., and which has the corresponding wharf facilities.

A port may be composed of one or more port areas.

Article 4 The State Council and the relevant local people's government at the county level

or above shall embody the requirements on development and planning of ports in the plans on national economy and social development, and lawfully protect and reasonably utilize port resources.

Article 5 The State encourages domestic and foreign economic organizations and individuals to lawfully invest to construct and operate ports, and protects the lawful rights and interests of the investors.

Article 6 The administrative department of communications under the State Council shall be in charge of the affairs on ports throughout the country.

The administration by the local people's government of the ports within its own jurisdiction shall be determined in accordance with the provisions of the State Council on port administration system.

In accordance with the port administration system determined in the preceding paragraph, for any port under the administration of the people's government of the city or county where the port is located, the people's government of the city or county shall determine a department to specifically administer it; for any port under the administration of the people's government of the province, autonomous region or municipality directly under the Central Government, the people's government of the province, autonomous region or municipality directly under the Central Government shall determine a department to specifically administer it.

The departments determined in accordance with the preceding paragraph to specifically administer ports are hereinafter uniformly referred to as the administrative department of port.

Chapter II Port Planning and Construction

Article 7 A port planning shall be worked out in light of the requirements on national economy and social development as well as the needs in national defense building, embody the principle of reasonably utilizing coastline resources, conform to the planning of urban system, and be connected and in line with the overall planning on land utilization, the overall city planning, the planning of river valleys, the planning on prevention and control of floods, the divisions of maritime functions, the development planning on transportation by water and the development planning on other methods of transportation as well as other relevant planning prescribed in laws and administrative regulations.

The department that works out the port planning shall invite experts to hold a demonstration, and an appraisal on environmental influence shall be made in accordance with the law.

Article 8 Port planning includes distribution planning of ports and overall planning of a port. Distribution planning of ports means the distribution planning concerning ports, including the distribution planning of ports nationwide and of ports in provinces, autonomous regions and municipalities directly under the Central Government.

Overall planning of a port means the specific planning of one port during a certain period, including the scope of water area and land area of the port, the division of port areas, the handling capacity and the types of vessels to the port, the nature and functions of the port,

the use of the water area and land area, the construction of port facilities and the use of coastline, the allocation of the land for construction use, as well as the order of construction by stages, etc.

The overall planning of a port shall conform to the distribution planning of ports.

Article 9 The distribution planning of ports nationwide shall be worked out by the administrative department of communications under the State Council after it has sought opinions from the relevant department under the State Council and the relevant military organ, and be submitted to the State Council for approval before promulgation and implementation.

The distribution planning of ports in a province, autonomous region or municipality directly under the Central Government shall be worked out upon the arrangement by the people's government of the province, autonomous region or municipality directly under the Central Government according to the distribution planning of ports nationwide, and be submitted to the administrative department of communications under the State Council for its opinions. If the administrative department of communications under the State Council fails to render any amendment opinion at the expiry of 30 days as of the receipt of the materials for opinions, the distribution planning of ports shall be promulgated by the relevant people's government of the province, autonomous region or municipality directly under the Central Government for implementation; if the administrative department of communications under the State Council considers that the said planning does not conform to the distribution planning of ports nationwide, it shall, within 30 days as of the receipt of the materials for opinions, render its amendment opinions; if the people's government of the relevant province, autonomous region or municipality directly under the Central Government does not agree to the amendment opinions, it shall report to the State Council for decision.

Article 10 The overall planning of a port shall be worked out by the administrative department of port after it has sought opinions from the relevant department and the relevant military organ.

Article 11 The overall planning of a major port of important location, with large handling capacity, and of wide influence to economic development shall be approved and promulgated for implementation by the administrative department of communications under the State Council jointly with the people's government of the relevant province, autonomous region or municipality directly under the Central Government after it has sought opinions from the relevant department under the State Council and the relevant military organ. The directory of the major ports shall be determined and promulgated by the administrative department of communications under the State Council after it has sought opinions from the relevant department under the State Council.

The people's government of the province, autonomous region or municipality directly under the Central Government shall, after seeking opinions from the administrative department of communications under the State Council, determine the overall planning of the important ports in the region. The overall planning of an important port shall be approved and

promulgated for implementation by the people's government of the province, autonomous region or municipality directly under the Central Government after it has sought opinions from the administrative department of communications under the State Council.

The overall planning of the ports other than those prescribed in the preceding two paragraphs shall be promulgated for implementation after being approved by the people's government of the city or county where the port is located, and shall be submitted to the people's government of the province, autonomous region or municipality directly under the Central Government for record.

The overall planning worked out by the administrative department of port under the people's government of the city or county concerning a port prescribed in Paragraph 1 or 2 of the present article shall, prior to the submission for approval, be examined and consented to by the people's government at the same level.

Article 12 The amendment of a port planning shall be made according to the procedures for making the port planning.

Article 13 If the deep water coastline of a port needs to be used for the construction of port facilities within the port area under the overall planning, it shall be approved by the administrative department of communications under the State Council jointly with the economic comprehensive macro-control department under the State Council; if the non-deep water coastline needs to be used for the construction of port facilities, it shall be approved by the administrative department of port. However, if the coastline of a port needs to be used in a project approved by the State Council or the economic comprehensive macro-control department under the State Council for construction, no approval formalities for using the coastline need to be separately gone through.

The standards for the deep water coastline of a port shall be formulated by the administrative department of communications under the State Council.

Article 14 The construction of a port shall conform to the port planning. No port facilities shall be constructed in violation of the port planning.

Article 15 For a port construction project that must be approved by the relevant organ in accordance with the provisions of the State, approval formalities shall be gone through in accordance with the relevant provisions of the State, and the relevant standards and technical norms of the State shall be complied with.

For the construction of a port engineering project, the environmental influence appraisal shall be carried out in accordance with the law.

The safety facilities and environmental protection facilities of a port construction project must be designed, constructed and put into use simultaneously with the major engineering project.

Article 16 The use of land and water area for the construction of a port shall be subject to the relevant laws and administrative regulations on land administration, use and administration of sea area, river course administration, channel administration, protection and administration of military facilities as well as other relevant laws and administrative regulations.

Article 17 The work site of dangerous goods and the special place for sanitary disinfection at a port shall conform to the overall planning of the port and the relevant requirements of the State on safe production, fire prevention, inspection and quarantine as well as environmental protection. The distance of such a site or place to a densely populated area or to the passenger transport facilities of the port shall conform to the provisions of the relevant department under the State Council; it may not be constructed until relevant formalities have been undergone in accordance with the law.

Article 18 The navigation mark facilities and other auxiliary facilities shall be constructed simultaneously with the port, and must be put into use on time.

The construction of the work facilities for the relevant administrative institution within a port shall conform to the overall planning of a port, and the construction expenses shall not be apportioned from among the business operators of the port.

Article 19 After a project on construction of port facilities is completed, it may not be put into use until it has been inspected as qualified in accordance with the relevant provisions of the State.

The ownership of port facilities shall be determined in accordance with the relevant legal provisions.

Article 20 The relevant people's government at the county level or above shall guarantee the input of necessary funds for the construction and maintenance of such port infrastructures as public channels, breakwaters, anchorages, etc. The specific measures shall be prescribed by the State Council.

Article 21 The relevant people's government at the county level or above shall take measures to arrange for the construction of the facilities of channel, railway, highway, water supply and drainage, electricity supply, and communication, etc., which are auxiliary to the port.

Chapter III Business Operation of Ports

Article 22 Whoever intends to engage in the business operation of a port shall apply in writing to the administrative department of port for obtaining the permit for business operation of port, and shall make industrial and commercial registration in accordance with the law.

The administrative department of port shall, when granting the permit for business operation of port, comply with the principles of publicity, impartiality and fairness.

The business operation of a port includes the business operation of the wharf and of other port facilities, the business operation of port passenger transport services, the loading, unloading, lightering and storage of goods within the port area as well as the business operation of port tugs, etc.

Article 23 Whoever intends to obtain the permit for business operation of port shall have a fixed business place, the facilities, equipment, professionals and managers suitable for his business, and shall meet other conditions prescribed in laws and regulations.

Article 24 The administrative department of port shall, within 30 days as of the receipt of the written application prescribed in Paragraph 1 of Article 22 of the present Law, make a

decision in accordance with the law on whether to grant the permit. If it decides to grant the permit, it shall issue the permit for business operation of port; if it decides not to grant the permit, it shall notify the applicant in writing and inform the reason thereof.

Article 25 Whoever intends to operate the port tally business shall obtain the permit in accordance with the provisions. When granting the permit for port tally business operation, the principles of publicity, impartiality and fairness shall be complied with. The specific measures shall be prescribed by the administrative department of communications under the State Council.

A port tally business operator shall run the tally business impartially and accurately; and shall not concurrently engage in the business of loading and unloading goods or the business of storage prescribed in Paragraph 3 of Article 22 of the present Law.

Article 26 A business operator of port must, when engaging in business activities, abide by the relevant laws and regulations, and the relevant provisions of the administrative department of communications under the State Council on port working rules, and shall lawfully perform the obligations stipulated in the contract, and provide the clients with fair and good services.

An operator engaging in port passenger transport services shall take effective measures to guarantee the safety of the passengers, and provide the passengers with rapid and convenient services, as well as maintain a good environment for the passengers to wait for the ship.

The business operator of port shall, in accordance with the relevant laws and regulations on environmental protection, take effective measures to prevent and control the pollution and harmfulness to the environment.

Article 27 A business operator of port shall arrange in priority for the work on the goods and articles for emergency, those for provision of relief from disasters and those greatly needed in national defense building.

Article 28 A business operator of port shall announce at its business place the items and rates of the fees for its services; otherwise, such services shall not be provided.

If the business operational fees of a port are subject to government-guided price or government-set price in accordance with the law, the business operator of port shall implement the provisions.

Article 29 The State encourages and protects fair competition in the activities of business operation of port.

A business operator of port shall not commit any monopoly act or unfair competition act, and shall not force others by any means to accept the port services it provides.

Article 30 The business operators of port shall truthfully provide the statistical documents required by the administrative department of port in accordance with the Statistics Law of the People's Republic of China and the relevant administrative regulations.

The administrative department of port shall, in accordance with the relevant provisions of the State, report in good time the statistical documents submitted by the business operators

of port to the superior department, and maintain commercial secrets for the business operators of port.

Article 31 The lawful rights and interests of the business operators of port are protected by law. No entity or individual shall apportion expenses from among the business operators of port or violate the law to charge any fees, or illegally interfere in the decision-making power of the business operators of port on management affairs.

Chapter IV Port Safety and Supervision

Article 32 The business operator of port must, in accordance with the Production Safety Law of the People's Republic of China and other relevant laws and regulations as well as the relevant working rules of the administrative department of communications under the State Council on port safety, strengthen the management on safe production, set up and improve the rules and systems on liabilities for safe production, improve the conditions for safe production, take effective measures to guarantee safe production, so as to ensure the safe production.

A business operator of port shall make a scheme on meeting emergencies from its own accidents on dangerous goods, the scheme on emergency evacuation and rescue of passengers in case of any major accident on production safety, as well as the scheme on preventing natural disasters in accordance with the law, and shall guarantee and arrange for the implementation.

Article 33 The administrative department of port shall lawfully make the scheme on meeting emergencies from port accidents on dangerous goods which might endanger the public benefits, the scheme on emergency evacuation and rescue of passengers in case of any major accident on production safety, as well as the scheme on preventing natural disasters, set up and improve the system on meeting emergencies from and carrying out rescues for major port accidents on production safety.

Article 34 A vessel entering or exiting a port shall, in accordance with the relevant laws and administrative regulations on the safety of traffic by water, report to the maritime administrative institution. The maritime administrative institution shall, after the receipt of the report, inform the administrative department of port in time.

A vessel that carries dangerous goods to enter or exit a port shall, in accordance with the provisions of the administrative department of communications under the State Council, report the name, feature, and packing of the dangerous goods as well as the time of entry or exit to the maritime administrative institution. The maritime administrative institution shall, after the receipt of the report, make a decision on whether to consent within the time prescribed by the administrative department of communications under the State Council, notify the reporter, and inform the administrative department of port. However, for specified vessels, or vessels in specified navigation line or carrying specified goods, the report may be made regularly.

Article 35 Whoever loads or unloads dangerous goods or unloads dangerous goods by lightering within a port shall, in accordance with the provisions of the administrative

department of communications under the State Council, report the name, feature, and packing of the dangerous goods as well as the time and place of work to the administrative department of port. The administrative department of port shall, after the receipt of the report, make a decision on whether to consent within the time prescribed by the administrative department of communications under the State Council, notify the reporter, and inform the maritime administrative institution.

Article 36 The administrative department of port shall conduct supervision and inspection on the safe production at the ports in accordance with the law, and make special inspections on the wharfs where passengers embark and disembark densely and where goods are loaded and unloaded in a large quantity, or the wharfs for particular purposes; and shall, if finding any hidden trouble on safety during inspection, order the person/port under inspection to eliminate it immediately or within a time limit.

The departments responsible for supervision of safe production and other relevant departments shall, in accordance with the laws and regulations, conduct supervision and inspection on the safe production at ports within their respective scope of duties.

Article 37 It is prohibited to engage in breeding or planting activities within the water area of a port.

No one may engage at a port in excavation, blasting or other activities that may endanger the port safety; and if it is truly necessary to conduct such activities for project construction, corresponding safety protection measures shall be taken, and an application shall be submitted to the port administrative department for approval. The port administrative department shall notify the maritime administrative authority of the approval information in a timely manner, and the maritime administrative authority will no longer conduct examination in accordance with the relevant laws and administrative regulations on waterway traffic safety.

It is prohibited to dump soil or gravel to the water area of a port, or to violate the relevant laws and regulations on environmental protection to discharge poisonous or harmful substance that exceeds the prescribed standards.

Article 38 For any construction project of building a bridge, an underwater tunnel, a hydropower station, etc., which might affect the hydrological conditions of the port, the department responsible for approving the project shall, before examination and approval, seek opinions from the administrative department of port.

Article 39 In accordance with the relevant laws and administrative regulations on the safety of traffic by water, if a vessel entering or exiting a port has to be piloted, it shall apply to the pilotage institution for pilotage. The specific measures for pilotage shall be prescribed by the administrative department of communications under the State Council.

Article 40 When the passengers are held up or the goods are overstocked, and thus causing a jam to the port, the administrative department of port shall timely take effective measures to direct the flow of vessels in the port; the people's government of the city or county where the port is located may, when necessary, directly take measures to direct the flow of vessels

at the port.

Article 41 The administrative department of port shall arrange for the formulation of the articles of association of the port it administers, and announce them to the public.

The contents of the articles of association of a port shall include the statements on the geographical position of the port, conditions of the channel, depth of the water at the port, mechanical facilities, loading and unloading capacity, etc., as well as the specific measures for the port to implement the relevant laws and regulations on port administration and the relevant provisions of the administrative department of communications under the State Council.

Article 42 The administrative department of port shall, according to its powers and duties, supervise and inspect the enforcement of the present Law.

The supervision and inspection officers of an administrative department of port may, when conducting supervision and inspection in accordance with the law, have the right to know the relevant information from the inspected entity and the relevant persons, and may consult and copy the relevant documents.

The supervision and inspection officers shall keep confidential for the commercial secrets they know from inspection.

The supervision and inspection officers shall, when conducting supervision and inspection, show the law enforcement certificate.

Article 43 The supervision and inspection officers shall make written records on the time, place, contents of the supervision and inspection, the problems found and the settlement thereof, which shall be signed by the supervision and inspection officers and the responsible person of the inspected entity; if the responsible person of the inspected entity refuses to sign on the written records, the supervision and inspection officers shall record the case in the file, and report to the administrative department of port.

Article 44 The inspected entities and the relevant persons shall accept the supervision and inspection carried out by the administrative department of port in accordance with the law, truthfully provide the relevant information and documents, and shall not refuse the inspection or conceal or falsely report the relevant information and documents.

Chapter V Legal Liabilities

Article 45 In case of any of the following acts, the local people's government at the county level or above or the administrative department of port shall order the violator to make a correction within a time limit; if the violator fails to make a correction within the time limit, the organ making the decision on ordering for the correction within a time limit may apply to the people's court to compulsorily demolish the illegally built facilities; and may impose a fine of not more than 50,000 Yuan:

- (1) violating the port planning to construct a port, a wharf or other port facilities;
- (2) without being approved in accordance with the law, using the coastline of a port to construct port facilities.

If the approval department for construction projects approves any construction project in

violation of port planning, the directly responsible persons in charge and other directly liable persons shall be imposed upon administrative sanctions in accordance with the law.

Article 46 Where the distance from a work site of dangerous goods or a special place for sanitary disinfection at a port to a densely populated area or the passenger transport facilities at the port fails to comply with the provisions of the relevant departments of the State Council, the port administrative department shall order the violator to cease construction or use and take corrective action within a prescribed time limit, and may impose a fine of not more than 50,000 yuan on the violator.

Article 47 Whoever, without authorization, puts into use the loading and unloading facilities or the passenger transport facilities at a wharf or port which are not inspected as qualified, shall be ordered by the administrative department of port to cease the use and to make a correction within a time limit; he may be imposed upon a fine of not more than 50,000 Yuan in addition.

Article 48 In case of any of the following acts, the administrative department of port shall order the violator to cease the illegal business operation, and confiscate the illegal proceeds; if the illegal proceeds are no less than 100,000 Yuan, a fine of twice or more but 5 times or less of the illegal proceeds may be imposed in addition; if the illegal proceeds are less than 100,000 Yuan, a fine of not less than 50,000 Yuan but not more than 200,000 Yuan may be imposed:

- (1) engaging in the business operation of port without obtaining the permit for business operation of port in accordance with the law;
- (2) operating the port tally business without being permitted in accordance with the law;
- (3) a port tally business operator concurrently engages in the business of loading and unloading goods or the business of storage.

In case of the act in Item (3) of the preceding paragraph, if the case is serious, the relevant competent department shall suspend the violator's permit for port tally business operation.

Article 49 If a business operator of port does not arrange in priority for the work on the goods and articles for emergency, those for provision of relief from disasters and those greatly needed in national defense building, it shall be ordered by the administrative department of port to make a correction; if it causes serious consequences, its permit for business operation of port shall be suspended.

Article 50 If a business operator of port violates the relevant laws and administrative regulations to commit any monopoly act or unfair competition act in its business activities, it shall bear the legal liabilities in accordance with the relevant laws and administrative regulations.

Article 51 If a business operator of port violates Article 32 of the present Law on safe production, it shall be punished in accordance with the law by the administrative department of port or other department lawfully assuming the duties on supervision of safe production; if the case is serious, its permit for business operation of port shall be suspended by the administrative department of port, and its main responsible persons shall be imposed upon

sanctions in accordance with the law; if a crime is constituted, the operator's criminal liabilities shall be investigated for.

Article 52 If a vessel entering or exiting a port fails to report to the maritime administrative institution in accordance with Article 34 of the present Law, it shall be punished by the maritime administrative institution in accordance with the relevant laws and administrative regulations on the safety of traffic by water.

Article 53 Whoever loads or unloads dangerous goods or unloads dangerous goods by lightering within a port without reporting to the administrative department of port in accordance with the law and being consented to shall be ordered by the administrative department of port to cease the work, and be imposed upon a fine of not less than 5,000 Yuan but not more than 50,000 Yuan.

Article 54 Whoever engages in breeding or planting activities within the water area of a port shall be ordered by the maritime administrative institution to make a correction within a time limit; if he fails to make a correction within the time limit, his breeding or planting facilities shall be compulsorily dismantled, and the dismantling expenses shall be borne by himself; and he may be imposed upon a fine of not more than 10,000 Yuan.

Article 55 Whoever engages at a port in excavation, exploration or other activities that might endanger the port safety without being approved in accordance with the law, or dumps soil or gravel to the water area of a port, shall be ordered by the administrative department of port to cease the illegal acts, and to eliminate the hidden dangers on safety caused therefrom within a time limit; if he fails to eliminate the said hidden dangers within a time limit, it shall be eliminated compulsorily, and the expenses caused therefrom shall be borne by the violator; and a fine of not less than 5,000 Yuan but not more than 50,000 Yuan may be imposed; if, in accordance with the relevant laws and administrative regulations on the safety of traffic by water, the violator is to be punished by the maritime administrative institution, such provisions shall be complied with; if a crime is constituted, he shall be investigated for criminal liabilities.

Article 56 If the administrative department of communications, the administrative department of port or the maritime administrative institution, etc. does not perform its duties in accordance with the law, and commits any of the following acts, its directly responsible persons in charge and other directly liable persons shall be imposed upon administrative sanctions in accordance with the law; if a crime is constituted, they shall be investigated for criminal liabilities:

- (1) illegally approving a vessel to enter or exit a port by carrying dangerous goods, illegally approving the loading or unloading of dangerous goods or the unloading of dangerous goods by lightering within a port;
- (2) granting the permit for business operation of port or the permit for port tally business operation to an applicant failing to satisfy the statutory conditions;
- (3) after finding a business operator of port or a port tally business operator who has obtained the operational permit no longer satisfies the statutory conditions for permit, not timely

suspending its permit;

(4) not performing its duties of supervision and inspection in accordance with the law, and not investigating, in accordance with the law, the acts of constructing a port, a wharf or other port facilities in violation of the port planning, the acts of engaging in business operation of port or port tally business without being permitted in accordance with the law, the acts of not abiding by the provisions on the administration of safe production, the acts endangering the work safety at a port, and other acts in violation of the present Law.

Article 57 If an administrative organ illegally interfere in the decision-making power of the business operators of port on management affairs, it shall be ordered by its superior administrative organ or supervision organ to make a correction; if it apports properties from among the business operators of port or illegally charges any fees from them, it shall be ordered to return such properties and fees; if the case is serious, the directly responsible persons in charge and other directly liable persons shall be imposed upon administrative sanctions in accordance with the law.

Chapter VI Supplementary Provisions

Article 58 For the ports open to vessels sailing on international navigation lines, the relevant people's government of the province, autonomous region or municipality directly under the Central Government shall, in accordance with the relevant provisions of the State, negotiate with the relevant department under the State Council and the relevant military organ for consent, and then report them to the State Council for approval.

Article 59 The responsibility to administer fishery ports shall remain with the fishery administrative department under the people's government at the county level or above. The specific administrative measures shall be prescribed by the State Council.

Fishery ports mentioned in the preceding paragraph mean the artificial ports or natural harbors specially serving fishery production, for fishery vessels to berth, to take shelter from the wind, load and unload the catch from fishing, or to supplement goods and articles needed in fishing, including the special fishery wharfs at comprehensive ports, the special fishery water areas and the anchorages specially used for fishing vessels.

Article 60 The measures on construction and administration of military ports shall be prescribed by the State Council and the Central Military Commission.

Article 61 The present Law shall come into force on January 1, 2004.

10. Atmospheric Pollution Prevention and Control Law of the People's Republic of China

(Adopted at the 22nd session of the Standing Committee of the Sixth National People's Congress on September 5, 1987, amended according to the Decision on Amending the Atmospheric Pollution Prevention and Control Law of the People's Republic of China as adopted at the 15th session of the Standing Committee of the Eighth National People's Congress on August 29, 1995, revised for the first time at the 15th session of the Standing Committee of the Ninth National People's Congress on April 29, 2000, and revised for the

second time at the 16th session of the Standing Committee of the Twelfth National People's Congress on August 29, 2015)

Chapter I General Provisions

Article 1 This Law is developed for the purpose of protecting and improving the environment, preventing and controlling atmospheric pollution, safeguarding the health of the general public, enhancing ecological civilization, and promoting the sustainable development of economy and society.

Article 2 Atmospheric pollution prevention and control shall aim at improving the quality of the atmospheric environment, adhere to regulation from the source, make plans first, transform the economic development mode, optimize industry structure and layout, and adjust the energy structure.

Atmospheric pollution prevention and control shall strengthen the prevention and control of atmospheric pollution from coal, industry, motor-driven vehicles and vessels, dust, and agriculture, promote joint prevention and control of regional atmospheric pollution, and conduct cooperative control of atmospheric pollutants and greenhouse gas such as particles, sulfur dioxide, nitrogen oxide, volatile organic compounds, and ammonia, etc.

Article 3 The people's governments at and above the county level shall include atmospheric pollution prevention and control in the national economic and social development planning and increase financial support for it.

The local people's governments at all levels shall be responsible for the quality of the atmospheric environment of their respective administrative regions, make plans, take measures, control or gradually reduce the discharge of atmospheric pollutants, and make the atmospheric environment quality reach the prescribed standards and gradually improve it.

Article 4 The environmental protection administrative department under the State Council shall, jointly with other relevant departments under the State Council, evaluate the provinces, autonomous regions and municipalities directly under the Central Government regarding the achievement of goals of improving the quality of atmospheric environment and the completion of key atmospheric pollution prevention and control tasks. The people's governments of each province, autonomous region and municipality directly under the Central Government shall evaluate the achievement of goals of improving the quality of atmospheric environment and the completion of key atmospheric pollution prevention and control task within their respective administrative regions. The evaluation results shall be made available to the general public.

Article 5 The environmental protection administrative departments of the people's governments at and above the county level shall oversee and regulate the atmospheric pollution prevention and control in a unified way.

Other relevant departments of the people's governments at and above the county level shall oversee and regulate the atmospheric pollution prevention and control within the scope of their functions.

Article 6 The state encourages and supports the scientific and technological research of atmospheric pollution prevention and control, analyzes the sources and development trends of atmospheric pollution, promotes the use of advanced and applicable technologies and equipment for atmospheric pollution prevention and control, enhances the transformation of scientific and technological achievements, and gives play to the supporting role of science and technology in atmospheric pollution prevention and control.

Article 7 Enterprises, public institutions, and other business entities shall take effective measures to prevent or reduce atmospheric pollution and shall assume legal responsibility for the damage they have caused.

Citizens shall increase their awareness of protecting the atmospheric environment, take to low-carbon and economical lifestyles, and voluntarily fulfill their obligations of protecting the atmospheric environment.

Chapter II Atmospheric Pollution Prevention and Control Standards and Plans for Reaching Standards within the Prescribed Time

Article 8 When developing atmospheric environment quality standards, the environmental protection administrative department under the State Council or the people's government of a province, autonomous region or municipality directly under the Central Government shall aim at safeguarding the public health and protecting the ecological environment, adapt to economic and social development, and ensure that they are scientific and reasonable.

Article 9 When developing atmospheric pollutant discharge standards, the environmental protection administrative department under the State Council or the people's government of a province, autonomous region or municipality directly under the Central Government shall take [atmospheric environment quality standards](#) and the economic and technical conditions of the state as basis.

Article 10 In the development of atmospheric environment quality standards and atmospheric pollutant discharge standards, it is required to organize experts for examination and demonstration and solicit the opinions of relevant authorities, industry associations, enterprises, public institutions, and the general public.

Article 11 The environmental protection administrative department of a people's government at or above the provincial level shall publish atmospheric environment quality standards and atmospheric pollutant discharge standards on its website for the access of the general public and download free of charge.

Article 12 The implementation of atmospheric environment quality standards and atmospheric pollutant discharge standards shall be evaluated on a regular basis, and revisions shall be made according to the evaluation results when necessary.

Article 13 In the development of quality standards for products containing volatile organic compounds, such as coal, petroleum coke, biomass fuel, and coatings, fireworks and firecrackers, boilers, etc., the atmospheric environment protection requirements shall be specified.

Fuel quality standards shall comply with the atmospheric pollutant control requirements of

the state and shall be consistent and simultaneously implemented with the atmospheric pollutant discharge standards of the state for motor-driven vehicles and vessels and non-road mobile machinery.

The term “non-road mobile machinery” as mentioned in the preceding paragraph means mobile machines and transportable industrial equipment with engines.

Article 14 The people's governments of cities failing to reach the national atmospheric environment quality standards shall timely make plans for reaching atmospheric environment quality standards within the prescribed time and take measures to reach atmospheric environment quality standards within the time limit specified by the State Council or the provincial people's governments.

In the making of plans for reaching atmospheric environment quality standards within the prescribed time, it is required to solicit the opinions of relevant industry associations, enterprises, public institutions, experts, and the general public.

Article 15 A plan made for a city to reach atmospheric environment quality standards within a prescribed time shall be made public. The plan made for a municipality directly under the Central Government or a districted city for reaching atmospheric environment quality standards within a prescribed time shall be submitted to the environmental protection administrative department under the State Council for recordation.

Article 16 When reporting the environment condition and the achievement of environmental protection goals to the people's congress at the same level or the standing committee thereof, the people's government of a city shall report the implementation of the plan for reaching atmospheric environment quality standards within the prescribed time and shall make such information available to the public.

Article 17 The plan of a city to reach atmospheric environment quality standards within the prescribed time shall be evaluated and revised according to the atmospheric pollution prevention and control requirements and the economic and technical conditions when necessary.

Chapter III Supervision and Administration of Atmospheric Pollution Prevention and Control

Article 18 When building projects that have an impact on atmospheric environment, enterprises, public institutions, and other business entities shall conduct environmental impact assessments and publish the environmental impact assessment documents according to the law; when discharging pollutants to the atmosphere, they shall conform to the atmospheric pollutant discharge standards and abide by the total quantity control requirements for the discharge of key atmospheric pollutants.

Article 19 Enterprises and public institutions discharging industrial waste gases or the toxic or hazardous atmospheric pollutants listed in the catalogue specified in Article 78 of this Law, business entities using coal heat sources for central heating facilities, and other entities subject to pollutant discharging licensing administration shall obtain a pollutant discharge license. The specific measures and implementation steps for pollutant discharge licensing

shall be determined by the State Council.

Article 20 Enterprises, public institutions, and other business entities discharging pollutants to the atmosphere shall set atmospheric pollutant discharge outlets according to the laws, regulations, and the provisions of the environmental protection administrative department under the State Council.

It is prohibited to discharge atmospheric pollutants by means of evading supervision such as secretly discharging pollutants, altering or forging monitoring data, suspending production for the purpose of evading on-site inspection, opening emergency discharge channels under non-emergent situations, or operating atmospheric pollution prevention and control facilities in an abnormal manner.

Article 21 The state exercises total volume control over the discharge of key atmospheric pollutants.

The total volume control targets for the discharge of key atmospheric pollutants shall be reported by the environmental protection administrative department under the State Council, after soliciting the opinions of relevant departments under the State Council and the people's governments of all provinces, autonomous regions, and municipalities directly under the Central Government, together with the general administrative department of economics under the State Council to the State Council for approval before being assigned for implementation.

The people's governments of all provinces, autonomous regions, and municipalities directly under the Central Government shall, according to the total volume control targets assigned by the State Council, control or cut the total discharge volume of key atmospheric pollutants in their respective administrative regions.

The specific measures for determining and disassembling the total volume control targets shall be developed by the environmental protection administrative department under the State Council together with relevant departments under the State Council. The people's governments of all provinces, autonomous regions, and municipalities directly under the Central Government may, in view of the atmospheric pollution prevention and control needs in their respective administrative regions, exercise total volume control over the discharge of atmospheric pollutants other than those under the intensified supervision of the state.

The state will gradually promote the trading of the right to discharge key atmospheric pollutants.

Article 22 For an area which exceeds the state's total discharge volume control indicators of key atmospheric pollutants or fails to achieve the atmospheric environmental quality objectives assigned by the state, the environmental protection administrative department of the people's government at or above the provincial level shall hold interviews with the chief person-in-charge of the people's government of the area together with relevant departments, and suspend the procedures for approving the environmental impact assessment documents on construction projects in the area that will increase the total discharge volume of key atmospheric pollutants. The interview process shall be made open to the public.

Article 23 The environmental protection administrative department under the State Council shall be responsible for developing atmospheric environmental quality and atmospheric pollution source monitoring and assessment norms, organizing the building of and managing the national atmospheric environmental quality and atmospheric pollution source monitoring net, organizing atmospheric environmental quality and atmospheric pollution source monitoring activities, and releasing information about the national atmospheric environmental quality condition in a unified way.

The environmental protection administrative department of a local people's government at or above the county level shall be responsible for organizing the building of and managing the atmospheric environmental quality and atmospheric pollution source monitoring net for the administrative region, conducting atmospheric environmental quality and atmospheric pollution source monitoring, and releasing information about atmospheric environmental quality condition in the administrative region in a unified way.

Article 24 Enterprises, public institutions, and other business entities shall, according to relevant provisions and monitoring norms of the state, monitor the industrial waste gases and the toxic and hazardous atmospheric pollutants listed in the catalogue mentioned in Article 78 of this Law they have discharged, and preserve the original monitoring records. In particular, pollutant discharging entities under intensified supervision shall install and use automatic atmospheric pollutant discharge monitoring equipment, stay connected to the monitoring equipment of the environmental protection administrative departments, ensure the normal functioning of the monitoring equipment, and publish the discharge information according to law. The specific measures for monitoring and the conditions for pollutant discharging entities under intensified supervision shall be determined by the environmental protection administrative department under the State Council.

The list of pollutant discharging entities under intensified supervision shall be determined by the environmental protection administrative department of the local people's government at or above the level of districted city by consulting relevant departments in view of the atmospheric environmental carrying capacity, the total discharge volume control indicators for key atmospheric pollutants, and the variety, quantity, and concentration of the atmospheric pollutants discharged by pollutant discharging entities in the administrative region and shall be made public.

Article 25 Pollutant discharging entities under intensified supervision shall be responsible for the veracity and accuracy of automatic monitoring data. If discovering any unusual circumstance in the data transmission of the automatic atmospheric pollutant discharge monitoring equipment of any pollutant discharging entity under intensified supervision, the environmental protection administrative department shall conduct an investigation in a timely manner.

Article 26 It is prohibited to misappropriate, destroy, move or alter without approval atmospheric environment quality monitoring equipment or automatic atmospheric pollutant discharge monitoring equipment.

Article 27 The state shall apply an elimination system to the techniques, equipment, and products that cause serious pollution to the atmospheric environment.

The general administrative department of economics under the State Council shall, together with other relevant departments under the State Council, determine the time limits for elimination of the techniques, equipment, and products that cause serious pollution to the atmospheric environment and include them in the catalogue of comprehensive industrial policies of the state.

Producers, importers, distributors, and users shall stop producing, importing, selling or using the equipment and products in the catalogue as mentioned in the preceding paragraph within the prescribed time limits. Technique adopters shall stop adopting the techniques listed in the catalogue as mentioned in the preceding paragraph within the prescribed time limits.

Eliminated equipment and products shall not be transferred to anyone else for use.

Article 28 The environmental protection administrative department under the State Council shall, together with other relevant departments, establish an atmospheric pollution damage assessment system and improve it.

Article 29 Environmental protection administrative departments, the environmental supervision institutions authorized by them, and other departments with environmental protection regulatory functions shall have the authority to, by means of on-site inspection and monitoring, automatic monitoring, remote sensing monitoring, and remote infra-red photographing, oversee and inspect the enterprises, public institutions, and other business entities that discharge atmospheric pollutants. Entities under inspection shall honestly provide relevant information and necessary materials. Inspecting departments or institutions and the staff members thereof shall keep confidential the trade secrets of the entities under inspection.

Article 30 For enterprises, public institutions, and other business entities that discharge atmospheric pollutants in violation of any law or regulation, if it has caused or is likely to cause serious atmospheric pollution, or relevant evidence is likely to be destroyed or concealed, the environmental protection administrative departments of the people's governments at and above the county level and other departments with environmental protection regulatory functions may seize, impound or take other compulsory administrative measures for relevant facilities, equipment, and articles.

Article 31 Environmental protection administrative departments and other departments with environmental protection regulatory functions shall publish their tip-off hotlines and e-mail accounts to for the convenience of the general public to make tip-offs.

After receiving a tip-off, an environmental protection administrative department or any other department with environmental protection regulatory functions shall timely handle the tip-off and keep the tipster's information confidential. If the tip-off is reported in real name, the tipster shall be informed of the handling result, and if the tip-off is verified as true, the handling result shall be disclosed to the public according to the law and the tipster shall be rewarded.

Where a tipster makes a tip-off against his or her employer, the employer shall not retaliate against the tipster by means of rescinding or modifying the employment contract with the tipster.

Chapter IV Atmospheric Pollution Prevention and Control Measures

Section 1 Prevention and Control of Pollution from Coal and Other Energy

Article 32 Relevant departments under the State Council and local people's governments at all levels shall take measures to revamp the energy structure, promote the production and use of clean energy, optimize the use of coal, promote the clean and efficient utilization of coal, gradually reduce the proportion of coal in primary energy consumption, and reduce the discharge of atmospheric pollutants in the production, use, and transformation of coal.

Article 33 The state promotes the washing processing of coal for the purpose of reducing the sulfur and ash in coal, and restricting the mining of high-sulfur or high-ash coal. When building a new coal mine, supporting facilities for the washing of coal shall be built simultaneously so as to ensure that the sulfur and ash in coal are within the prescribed limits. For an existing coal mine, supporting facilities for the washing of coal shall be built within the prescribed time, unless the coal mined is low-sulfur or low-ash coal or washing is not required by the relevant coal-fired power plant that has reached the discharge standards.

It is prohibited to mine coal with radioactive, arsenic, and other toxic or harmful substances beyond the prescribed limits.

Article 34 The state adopts economic and technical policies and measures conducive to the clean and efficient utilization of coal and encourages and supports the development and popularization of clean coal technology.

The state encourages coal enterprises and other business entities to adopt reasonable and feasible technologies and measures to exploit coal seam gas and comprehensively utilize coal gangue. Those engaged in the exploitation of coal seam gas shall discharge coal seam gas in compliance with relevant standards and norms.

Article 35 The state bans the import, sale, and use of coal that fails to meet the quality standards and encourages the use of quality coal.

Entities stored with materials such as coal, coal gangue, coal cinder, and coal ash shall take flameproof measures to prevent atmospheric pollution.

Article 36 Local people's governments at all levels shall take measures to strengthen the management of scattered coal for civil uses, ban the sale of coal that fails to meet the quality standards for scattered coal for civil uses, encourage residents to use quality coal and clean coal, and promote energy-saving and environment-friendly stoves.

Article 37 Petroleum refining enterprises shall produce fuel oil according to the quality standards for fuel oil.

It is prohibited to import, sell or burn petrol coke that fails to meet the quality standards.

Article 38 Urban people's governments may delimit and publish combustion forbidden zones of high-pollution fuels and, in view of the atmospheric environment quality improvement requirements, gradually enlarge such zones. The catalogue of high-pollution fuels shall be

determined by the environmental protection administrative department under the State Council.

In combustion forbidden zones, it is prohibited to sell and use high-pollution fuels and build or expand facilities burning high-pollution fuels. Those already built shall replace high-pollution fuels with natural gas, shale gas, liquefied petroleum gas, electricity or other clean energy within the time limits as specified by the urban people's governments.

Article 39 In urban construction, overall arrangements and plans shall be made to promote combined heating and power and centralized heat supply. In areas covered by the centralized heat supply network, it is prohibited to build or expand decentralized coal-fueled heat supply boilers, and those existing coal-fueled heat boilers that fail to reach the discharge standards shall be demolished within the time limits as specified by the urban people's governments.

Article 40 The quality supervision departments of the people's governments at and above the county level shall, together with the environmental protection administrative departments, oversee and inspect the implementation of environmental protection standards or requirements in the production, import, sale, and use of boilers. Those failing to meet the environmental protection standards or requirements shall not be produced, imported, sold or used.

Article 41 Coal-fueled power plants and other coal-fueled entities shall adopt clean production techniques, establish dust removal, desulfurization, denitration, and other supporting devices, or carry out technical transformation or take other measures to control the discharge of atmospheric pollutants.

The state encourages coal-fired entities to use advanced dust removal, desulfurization, denitration, demercurilization, and other technologies and devices for the cooperative control of atmospheric pollutants to reduce the discharge of atmospheric pollutants.

Article 42 In electric power dispatch, electricity generated by clean energy shall be fed into the power grid with priority.

Section 2 Prevention and Control of Industrial Pollution

Article 43 Steel, building materials, nonferrous metals, petroleum, chemical engineering, and other enterprises that discharge dust, sulfide or nitrogen oxide in the production process shall adopt clean production techniques and build dust removal, desulfurization, denitration, and other supporting devices, or carry out technical transformation or take other measures to control the discharge of atmospheric pollutants.

Article 44 In the production, import, sale, and use of raw materials and products containing volatile organic compounds, the content of volatile organic compounds shall meet the quality standards or requirements.

The state encourages the production, import, sale, and use of hypotoxic and low volatile organic solvents.

Article 45 Production and service activities generating waste gases containing volatile organic compounds shall be conducted in an enclosed space or equipment, for which

pollution prevention and control facilities shall be installed and used as required. If the space or equipment is not enclosed, measures shall be taken to reduce the discharge of waste gases.

Article 46 Industrial coating enterprises shall use low volatile organic compounds and keep ledgers to record the consumption, discard, use, and content of volatile organic compounds of raw and auxiliary materials. Such ledgers shall be retained for not less than three years.

Article 47 Petroleum enterprises, chemical industrial enterprises, and other enterprises producing or using organic solvents shall take measures for the routine maintenance and repair of pipelines and equipment, reduce the leakage of substances, and collect and dispose of leaked substances without delay.

Oil and gas storage banks, oil and gas stations, crude oil and refined oil terminals, crude oil and refined oil transportation vessels and tankers, and gas tankers shall have oil and gas recycling devices and ensure their normal functioning.

Article 48 Steel, building materials, nonferrous metals, petroleum, chemical industrial, pharmaceutical, and mining enterprises shall strengthen intensive management and take such measures as centralized collection and disposal to strictly control the discharge of dust and gaseous pollutants.

Industrial production enterprises shall take measures such as sealing, fencing, sheltering, cleaning, and spraying, etc. to reduce the discharge of dust and gaseous pollutants in the stockpiling, transmission, loading and unloading, and other handling links of internal materials.

Article 49 The combustible gases generated from industrial production, garbage landfilling or other activities shall be recycled or, if non-recyclable, be treated for pollution prevention and control.

The recycling devices for combustible gases shall be repaired or updated without delay when they cannot function normally. Where it is really necessary to discharge combustible gases when the recycling devices cannot function normally, the discharged combustible gas shall be fully burned or other measures for control over the discharge of atmospheric pollutants shall be taken, the situation shall be reported to the local environmental protection administrative department, and the devices shall be repaired or updated as required within the prescribed time.

Section 3 Prevention and Control of Pollution from Motor-driven Vehicles and Vessels

Article 50 The state shall advocate low-carbon and environment-friendly transportation, reasonably control the quantity of oil-fueled motor vehicles according to urban planning, make great efforts to develop public transportation in urban areas, and increase the proportion of public transportation.

The state shall take fiscal, tax, governmental procurement, and other measures to promote and apply energy-saving, environment-friendly and new-energy motor-driven vehicles and vessels and non-road mobile machines, restrict the development of high fuel consumption and high pollutant discharge motor-driven vehicles and vessels and non-road mobile

machines, and reduce the consumption of fossil energy.

The people's governments of the provinces, autonomous regions, and municipalities directly under the Central Government may, in areas with the right conditions, implement the discharge limits for the corresponding stage of the national standards for the discharge of atmospheric pollutants by motor vehicles ahead of schedule and report to the environmental protection administrative department under the State Council for recordation.

Urban people's governments shall strengthen and improve urban traffic management, optimize road setting, and ensure the continuity and availability of pavements and non-motor vehicle lanes.

Article 51 Motor-driven vehicles and vessels and non-road mobile machines shall not discharge atmospheric pollutants beyond the prescribed standards.

It is prohibited to produce, import or sell motor-driven vehicles and vessels and non-road mobile machines that discharge atmospheric pollutants beyond the prescribed standards.

Article 52 Manufacturers of motor vehicles and non-road mobile machines shall inspect the discharge of the newly produced motor vehicles and non-road mobile machines. Those passing such inspection may leave the factory for sale. The inspection information shall be made public.

The environmental protection administrative departments of the people's governments at and above the provincial level may, by means of on-site inspection and sampling testing, strengthen supervision and inspection of the atmospheric pollutant discharge condition of newly manufactured and sold motor vehicles and non-road mobile machines. Industrial departments, quality supervision departments, administrative departments for industry and commerce, and other relevant departments shall provide assistance.

Article 53 For motor vehicles in use, motor vehicle discharge inspection institutions shall inspect their discharge of pollutants according to relevant national or local provisions on a regular basis. Only those passing such inspection may go on road. For those failing to pass such inspection, the traffic administrative departments of public security organs shall not issue safety and technical inspection conformity signs.

The environmental protection administrative departments of the local people's governments at and above the county level may, at centralized parking or repair places, make random tests of the atmospheric pollutant discharge of motor vehicles in use, and may, without affecting normal traffic, make random tests of the atmospheric pollutant discharge of motor vehicles on the road by such technical means as remote sensing monitoring, in which the traffic administrative departments of the public security organs shall provide assistance.

Article 54 Motor vehicle discharge inspection institutions shall pass measurement authentication, use motor vehicle discharge inspection devices that have passed inspection according to law, inspect the discharge of motor vehicles according to the norms developed by the environmental protection administrative department under the State Council, and remain connected to the network of environmental protection administrative departments to share inspection data on a real-time basis. Motor vehicle discharge inspection institutions

and the person-in-charge shall be responsible for the veracity and accuracy of inspection data.

Environmental protection administrative departments and authentication and certification departments shall oversee and inspect the discharge inspection work of motor vehicle discharge inspection institutions.

Article 55 Motor vehicle manufacturing and import enterprises shall disclose information about the discharge inspection, pollution control technology, and relevant maintenance technology of the motor vehicles they manufactured or imported.

Motor vehicle maintenance entities shall maintain and repair the motor vehicles in use according to the atmospheric pollution prevention and control requirements and the relevant technical standards of the state to ensure that they reach the prescribed discharge standards. Transport departments and environmental protection administrative departments shall strengthen supervision and administration according to law.

Motor vehicle owners are prohibited to pass the motor vehicle discharge inspection by fraudulent means, such as changing the pollution control devices of motor vehicles for the occasion. Motor vehicle maintenance entities are prohibited to provide such maintenance services. The discharge diagnosis system of motor vehicles shall not be damaged.

Article 56 Environmental protection administrative departments shall, together with transport, housing and urban-rural development, agricultural administrative, water administrative, and other relevant departments, oversee and inspect the discharge of atmospheric pollutants by non-road mobile machines, and those failing to reach the discharge standards shall not be used.

Article 57 The state advocates eco-driving and encourages drivers of oil-fueled motor vehicles to, when they need to stop the car for three minutes or longer, stop the engine without blocking the road so as to reduce the discharge of atmospheric pollutants.

Article 58 The state shall establish a motor vehicle and non-road mobile machinery recall system for environmental protection purposes.

A manufacturing and import enterprise shall, when informed that the motor vehicles or non-road mobile machines they manufactured or imported that discharge atmospheric pollutants beyond the prescribed standards, have any design or manufacturing defect, or fail to meet the prescribed durability requirements for environmental protection, recall them. If it fails to make the recall, the quality supervision department under the State Council shall, jointly with the environmental protection administrative department under the State Council, order it to make the recall.

Article 59 Where any heavy-duty diesel-powered vehicle or non-road mobile machine in use has no pollution control device or fails to reach the discharge standards due to non-conformity of its pollution control device, a pollution control device shall be installed or replaced as required.

Article 60 Motor vehicles in use shall be repaired if their atmospheric pollutant discharge exceeds the prescribed limits. Those still failing to reach the national atmospheric pollutant

discharge standards for motor vehicles in use after repair or application of pollution control technologies shall be compulsorily retired. Owners shall surrender or sell such motor vehicles to an enterprise recycling and dismantling retired motor vehicles for registration, dismantlement, and destruction under relevant state provisions.

The state shall encourage and support the advance retirement of high-emission motor-driven vehicles and vessels and non-road mobile machines.

Article 61 Urban people's governments may, in view of the quality condition of the atmospheric environment, delimit and publish the areas where the use of high-emission non-road mobile machinery is prohibited.

Article 62 Vessel inspection institutions shall conduct discharge inspections of the engines and other relevant equipment of vessels. Vessels shall not be put into operation until they are determined upon inspection that they have reached the discharge standards of the state.

Article 63 Vessels with direct access to inland rivers and river-seas shall use regular diesel that meets the prescribed standards. Ocean-going vessels shall use marine fuels that meet the atmospheric pollutant control requirements after reaching a port.

New docks shall plan, design, and build shore-based power supply facilities, and existing docks shall gradually renovate their shore-based power supply facilities. Vessels shall give priority to shore power in use of power.

Article 64 The transport administrative department under the State Council may delimit atmospheric pollutant discharge control areas in coastal sea areas, and vessels entering into the control areas shall meet the relevant discharge requirements for vessels.

Article 65 It is prohibited to produce, import, and sell fuels that fail to reach the prescribed standards for use by motor-driven vehicles and vessels and non-road mobile machines; to sell regular diesel and other fuels not for motor vehicles to automobiles and motorcycles; and to sell residual oil or heavy oil to non-road mobile machines or vessels with direct access to inland rivers and river-seas.

Article 66 The hazardous substance content and other atmospheric environment protection indicators of engine oil, nitrogen oxide reducing agents, fuel and lubricating oil additives, and other additives shall meet the requirements of relevant standards, without damaging the effect and durability of the pollution control devices of motor-driven vehicles and vessels and increasing the discharge of atmospheric pollutants.

Article 67 The state shall actively promote the prevention and control of atmospheric pollution from civil aircrafts and encourage the taking of effective measures in the design, manufacturing, and use of civil aircrafts to reduce the discharge of atmospheric pollutants. Civil aircrafts shall meet the engine-out emission requirements in the airworthiness standards of the state.

Section 4 Prevention and Control of Dust Pollution

Article 68 The local people's governments at all levels shall strengthen the administration of construction and transportation activities, keep the roads clean, control the storage of construction material piles and wastes, and enlarge the area of green land, water surface,

wet land, and pavement area so as to prevent and control dust pollution.

Housing and urban-rural development, city appearance and environmental sanitation, transport, land and resource, and other relevant departments shall jointly conduct the prevention and control of dust pollution according to their duties determined by the people's governments at the same levels.

Article 69 A construction project owner shall include dust pollution prevention and control expenses in the costs of the project and specify in the construction contracting contract the dust pollution prevention and control responsibilities of the construction contractor. The construction contractor shall make a specific implementation plan for the prevention and control of construction dust pollution.

Construction contractors engaged in house building, municipal infrastructure construction, river regulation, and building demolition shall be registered with the department in charge of the prevention and control of dust pollution.

Construction contractors shall set rigid enclosures around construction sites and shall take coverage, sectional operation, construction during scheduled periods, sprinkling for dust suppression, surface washing, car washing, and other effective measures for dust prevention and suppression. Construction earth, waste soil, and garbage shall be cleaned without delay. Stockpiles on construction sites shall be covered with enclosed dustproof net. Construction waste soil and garbage shall be utilized as resources.

Construction contractors shall publish dust pollution prevention and control measures, the persons in charge, and the departments in charge of dust supervision at construction sites. For construction land not available for construction for the time being, construction project owner shall cover the exposed ground. If the land is not used for more than three months, it shall be greened, paved or covered.

Article 70 Vehicles transporting coal, garbage, waste soil, sandstones, earth, mortar, and other bulk or liquid materials shall take enclosed or other measures to prevent dust pollution from their loss or leakage and shall stick to the predetermined route.

Enclosure, sprinkling, and other measures shall be taken in the loading and unloading of materials to prevent and control dust pollution.

Urban people's governments shall strengthen the cleaning management of roads, squares, parking lots, and other public places, and promote low-dust operations such as mechanized sweeping by clean power so as to prevent and control dust pollution.

Article 71 For exposed ground on municipal rivers, river courses, and common land, and other exposed ground in urban areas, relevant departments shall organize the planting of trees or grass or permeable pavement according to relevant planning.

Article 72 Materials easy to produce dust such as coal, gangue, coal cinder, coal ashes, cement, lime, plaster, sandstone, lime soil, and sandy soil shall be stored in enclosed spaces. If not enclosed, tight enclosures shall be established which shall not be lower than the stockpile of such materials, and effective coverage measures shall be taken to prevent and control dust pollution.

For docks, mines, landfills, and disposal sites, sectional operations shall be conducted, and effective measures shall be taken to prevent and control dust pollution.

Section 5 Prevention and Control of Agricultural and Other Pollution

Article 73 The local people's governments at all levels shall promote the transformation of agricultural production mode, develop agricultural circular economy, provide more support for the comprehensive disposal of wastes, and strengthen control of the discharge of atmospheric pollutants in agricultural production and operation activities.

Article 74 Agricultural producers and business operators shall improve their fertilization methods, scientifically and reasonably apply fertilizers, use pesticides in accordance with relevant state provisions, and reduce the discharge of atmospheric pollutants, such as ammonia and volatile organic compounds.

It is prohibited to spray extremely or highly toxic pesticides to trees, flowers and grasses in densely inhabited areas.

Article 75 Livestock and poultry farms and breeding areas shall collect, store, clean, and innocuously treat sewage, livestock and poultry wastes, and livestock and poultry manure in a timely manner so as to prevent odors.

Article 76 The people's governments at all levels and the agricultural administrative departments and other relevant departments under the people's governments shall encourage and support the application of advanced and applicable technologies for the comprehensive utilization of straws and fallen leaves such as turning them into fertilizers, feeds, energy resources, industrial raw materials, and base materials for edible fungus, and increase financial subsidies for returning crop straw to farmland and integrated collection agricultural machinery.

The people's governments at the county level shall organize the establishment of a service system for the collection, storage, transportation, and comprehensive utilization of straws, and take such measures as providing financial subsidies to support rural collective economic organizations, farmers' professional cooperative and economic organizations, and enterprises in their provision of services for the collection, storage, transportation, and comprehensive utilization of straws.

Article 77 The people's governments of provinces, autonomous regions, municipalities directly under the Central Government shall delimit areas where open burning of straws, fallen leaves, and other substances causing smoke pollution is prohibited.

Article 78 The environmental protection administrative department under the State Council shall, together with the health administrative department under the State Council, publish a directory of toxic and hazardous atmospheric pollutants for risk management in view of the harm and influence of atmospheric pollutants to public health and the ecological environment. Enterprises and public institutions discharging the toxic and hazardous atmospheric pollutants listed in the directory as mentioned in the preceding paragraph shall establish an environmental risk early warning system according to relevant provisions of the state, conduct regular monitoring over discharge outlets and neighboring environment, assess the

environmental risks, eliminate hidden environmental safety problems, and take effective measures to prevent environmental risk.

Article 79 Enterprises, public institutions, and other business entities that discharge permanent organic pollutants to the atmosphere, and entities operating waste burning facilities shall, according to relevant provisions of the state, take technological methods and techniques conducive to the reduction of the discharge of permanent organic pollutants, and install effective cleansing devices to reach the discharge standards.

Article 80 Enterprises, public institutions, and other business entities that produce malodorous gases shall select their sites in a scientific manner, rationally set protection distances, and install cleansing devices or take other measures to prevent the discharge of malodorous gases.

Article 81 Catering service providers that discharge soot shall install soot cleaning devices and maintain their normal functioning, or take other soot cleaning measures to ensure they reach the soot discharge standards and prevent pollution to the normal living environment of nearby residents.

It is prohibited to build, rebuild or expand catering service projects that produce soot, odor, or waste gases in residential buildings, commercial and residential complex buildings without special-purpose flues, or commercial floors adjacent to residential floors in commercial and residential complex buildings.

No entity or individual may have open-air barbecues or provide sites for open-air barbecues in areas where it is prohibited by the local people's government.

Article 82 The burning of asphalt, asphalt felt, rubber, plastics, leather, garbage, and other materials that produce toxic or harmful smoke or dust or malodorous gases in densely inhabited areas and other areas needing special protection shall be prohibited.

The production, distribution, and use of fireworks and firecrackers are prohibited. No entity or individual may use fireworks and firecrackers in the periods and areas prohibited by the local urban people's government.

Article 83 The state encourages and advocates civilized and green sacrifices.

Crematories shall have dustproof and other pollution prevention and control facilities and maintain their normal functioning so as to avoid affecting the neighboring environment.

Article 84 Business operators engaged in the dry cleaning of clothing, the maintenance and repair of motor vehicles, and other service activities shall install odor and waste gas disposal devices and other pollution prevention and control devices according to the relevant standards or requirements of the state and ensure their normal functioning so as to avoid affecting the neighboring environment.

Article 85 The state encourages and supports the production and use of substitutes of ozone depleting substances so as to gradually reduce and eventually stop the production and use of ozone depleting substances.

The state applies total quantity control and quota management to the production, use, import, and export of ozone depleting substances. The specific measures shall be developed by the

State Council.

Chapter V Joint Prevention and Control of Atmospheric Pollution in Key Areas

Article 86 The state shall establish a joint atmospheric pollution prevention and control mechanism for the key areas and make overall arrangements for atmospheric pollution prevention and control in the key areas. The environmental protection administrative department under the State Council shall, according to main functional zoning, regional atmospheric environment quality condition, and atmospheric pollution transmission and dispersion laws, delimit key atmospheric pollution prevention and control areas of the state, and report them to the State Council for approval.

The people's governments of the provinces, autonomous regions, and municipalities directly under the Central Government in the key areas shall determine the leading local people's governments, convene joint meetings on a regular basis, and conduct joint atmospheric pollution prevention and control and fulfill the objectives of atmospheric pollution prevention and control according to the requirements of unified planning, unified standards, unified monitoring, and unified prevention and control measures. The environmental protection administrative department under the State Council shall strengthen guidance and supervision.

Each province, autonomous region, and municipality directly under the Central Government may delimit key atmospheric pollution prevention and control areas in their respective administrative regions with reference to paragraph 1 herein.

Article 87 The environmental protection administrative department under the State Council shall, together with other relevant departments under the State Council and the people's governments of the relevant provinces, autonomous regions, and municipalities directly under the Central Government in the key atmospheric pollution prevention and control areas of the state, develop action plans for the joint prevention and control of atmospheric pollution in the key areas, determine the objectives, optimize the regional economic layout, make overall plans for traffic management, develop clean energy, determine the key prevention and control tasks and measures according to the economic and social development level and the atmospheric environment capacity of such key areas so as to improve the atmospheric environment quality of such key areas.

Article 88 The general administrative department of economics under the State Council shall, together with the environmental protection administrative department under the State Council, further improve environmental protection, energy consumption, safety, quality, and other requirements in view of the industry development condition and atmospheric environment quality condition of the key atmospheric pollution prevention and control areas of the state.

The people's governments of relevant provinces, autonomous regions, and municipalities directly under the Central Government in the key areas shall apply more rigid atmospheric pollutant discharge standards for motor vehicles, unify the inspection methods and discharge limits for motor vehicles in use, and provide vehicle fuels that meet the prescribed

standards.

Article 89 An environmental impact assessment shall be conducted in the development of relevant industrial park plans, development zone plans, regional industry plans, or development plans that are likely to cause serious pollution to the atmospheric environment of a key area. The organ developing such plans shall consult with the people's governments of the provinces, autonomous regions, and municipalities directly under the Central Government in the key area or relevant departments.

Where a construction project of a province, autonomous region, or municipality directly under the Central Government in a key area is likely to have a great impact on the atmospheric environment quality of a neighboring province, autonomous region, or municipality directly under the Central Government, relevant information shall be reported in a timely manner for consultation.

The consultation opinion and its adoption shall be taken as important basis for examination or approval of environmental impact assessment documents.

Article 90 The equal amount replacement or reduction replacement of coal shall be applied in the building, rebuilding or expansion of a coal project in a key atmospheric pollution prevention and control area of the state.

Article 91 The environmental protection administrative department under the State Council shall establish an information sharing mechanism for the atmospheric environment quality monitoring, atmospheric pollution source monitoring, and other aspects of the key atmospheric pollution prevention and control areas of the state, apply monitoring, simulation, satellite survey, aerial survey, remote sensing, and other new technologies to analyze atmospheric pollution sources in key areas and the development trend thereof, and make such information available to the public.

Article 92 The environmental protection administrative department under the State Council and the people's governments of provinces, autonomous regions, and municipalities directly under the Central Government in the key atmospheric pollution prevention and control areas of the state may organize relevant departments for joint law enforcement, cross-regional law enforcement, and cross law enforcement.

Chapter VI Response to Heavy Air Pollution Weather

Article 93 The state shall establish a heavy air pollution weather monitoring and early warning system.

The environmental protection administrative department under the State Council shall, together with the meteorological department and other relevant departments under the State Council and the people's governments of relevant provinces, autonomous regions, and municipalities directly under the Central Government in a key atmospheric pollution prevention and control area of the state, establish a heavy air pollution weather monitoring and early warning mechanism for the key area and unify the early warning ranking standards. Where regional heavy air pollution weather is likely to occur, the people's governments of relevant provinces, autonomous regions, and municipalities directly under the Central

Government in the key area shall be informed in a timely manner.

The environmental protection administrative department of the people's government of a province, autonomous region, municipality directly under the Central Government, or districted city shall, together with the meteorological department and other relevant departments, establish a heavy air pollution weather monitoring and early warning mechanism for the administrative region.

Article 94 The local people's governments at and above the county level shall include the response to heavy air pollution weather to the emergency management system of unexpected events.

The people's government of a province, autonomous region, municipality directly under the Central Government, or districted city or the people's government at the county level of a place where heavy air pollution weather is likely to occur shall develop an emergency response plan for heavy air pollution weather, submit it to the environmental protection administrative department of the people's government at the next higher level for recordation, and disclose it to the general public.

Article 95 The environmental protection administrative department of the people's government of a province, autonomous region, municipality directly under the Central Government, or districted city shall establish a consulting mechanism with the meteorological department to make atmospheric environment quality forecasts. When it is likely to be a heavy air pollution day, a report shall be submitted to the people's government at the same level without delay. The people's government of the province, autonomous region, municipality directly under the Central Government, or districted city shall make comprehensive research and judgment on the basis of heavy air pollution weather forecasts to determine the early warning rank and issue an early warning. The early warning rank shall be adjusted for the changing situation. No entity or individual may release any heavy air pollution forecasting and early warning information to the general public without approval.

Once early a warning is released, the people's government and the relevant departments thereof shall inform the general public to take health protection measures, provide travel guidance, and adjust other relevant social activities through TV, radio, network, and text messages.

Article 96 The local people's governments at and above the county level shall, according to the early warning grades of heavy air pollution weather, activate their emergency response plans in time, and may take emergency measures, such as ordering relevant enterprises to stop or limit production, restricting the driving of some motor vehicles, prohibiting the use of fireworks and firecrackers, suspending the earthwork at construction sites and the demolition of buildings, suspending barbecues, suspending the outdoor activities organized by kindergartens and schools, and organize artificial weather modification operations when necessary.

Upon completion of an emergency response, the people's government shall evaluate the implementation of the emergency response plan and modify and improve such plan if

necessary.

Article 97 Where an environmental emergency occurs and causes atmospheric pollution, the people's government and relevant departments thereof, and relevant enterprises and public institutions shall conduct an emergency response under the Emergency Response Law of the People's Republic of China and the Environmental Protection Law of the People's Republic of China. The environmental protection administrative department shall timely monitor the atmospheric pollutants resulting from the environmental emergency and disclose the monitoring information to the public.

Chapter VII Legal Liabilities

Article 98 Where a violator of this Law refuses to accept the supervisory inspection conducted by the environmental protection administrative department, an environmental supervision institution authorized by it, or any other department with atmospheric environmental protection regulatory functions by refusing it to enter the site, or engages in falsification when it is under supervisory inspection, the environmental protection administrative department of the people's government at or above the county level or any other department with atmospheric environment protection regulatory functions shall order the violator to make a correction and impose a fine of not less than 20,000 yuan but not more than 200,000 yuan; for a violation of public security administration, the public security organ shall impose punishment for public security administration according to law.

Article 99 For a violation of this Law under any of the following circumstances, the environmental protection administrative department of the people's government at or above the county level shall order it to make a correction or restrict or suspend production for rectifications, and impose a fine of not less than 100,000 yuan but not more than one million yuan; if the circumstances are serious, order the violator to stop business operations or close down with the approval of the competent people's government:

- (1) Discharging atmospheric pollutants without lawfully obtaining a pollutant discharge license.
- (2) Discharging atmospheric pollutants beyond the atmospheric pollutant discharge standards or the total quantity control requirements for the discharge of key atmospheric pollutants.
- (3) Discharging atmospheric pollutants by evading supervision.

Article 100 For a violation of this Law under any of the following circumstances, the environmental protection administrative department of the people's government at or above the county level shall order it to make correction and impose a fine of not less than 20,000 yuan but not more than 200,000 yuan; if the violator refuses to make correction, order it to suspend production for rectification:

- (1) Misappropriating, destroying, or moving or altering without approval any atmospheric environment quality monitoring equipment or automatic atmospheric pollutant discharge monitoring equipment.
- (2) Failing to monitor the industrial waste gases and the toxic and hazardous atmospheric

pollutants discharged or failing to preserve the original monitoring records as required.

(3) Failing to install or use automatic atmospheric pollutant discharge monitoring equipment, connect to the monitoring equipment of the environmental protection administrative departments, and ensure the normal functioning of monitoring equipment as required.

(4) For pollutant discharging entities under intensified supervision, failing to disclose or truthfully disclose automatic monitoring data.

(5) Failing to set atmospheric pollutant discharge outlets as required.

Article 101 Where a violator of this Law produces, imports, sells or uses any equipment or product prohibited in the catalogue of comprehensive industrial policies of the state, applies any technique prohibited in the catalogue of comprehensive industrial policies of the state, or transfers any eliminated equipment or product to others, the general administrative department of economics under the people's government at or above the county level or the entry-exit inspection and quarantine institution shall, according to its duties, order the violator to make a correction, confiscate the illegal proceeds, and impose a fine of not less than one time but not more than three times the monetary value of the equipment or product concerned; if the violator refuses to make a correction, order it to stop its business operations or close down with the approval of the competent people's government. If the import conduct constitutes smuggling, the customs shall impose punishment according to the law.

Article 102 Where, as in violation of this Law, a coal mine fails to build supporting facilities for the washing of coal as required, the energy administrative department of the people's government at or above the county level shall order it to make a correction and impose a fine of not less than 100,000 yuan but not more than one million yuan; if the violator refuses to make a correction, order it to stop its business operations or close down with the approval of the competent people's government.

Where a violator of this Law mines coal with radioactive, arsenic, and other toxic or harmful substances beyond the prescribed limits, the people's government at or above the county level shall order it to stop its business operations or close down according to the powers prescribed by the State Council.

Article 103 For a violation of this Law under any of the following circumstances, the quality supervision department or the administrative department for industry and commerce of the local people's government at or above the county level shall order the violator to make a correction, confiscate the raw materials, products, and illegal proceeds, and impose a fine of not less than one time but not more than three times the monetary value of the things in question:

(1) Selling coal or petrol coke that fails to meet the quality standards.

(2) Producing or selling raw materials and products whose content of volatile organic compounds fails to meet the quality standards or requirements.

(3) Producing or selling fuels for use by motor-driven vehicles and vessels and non-road mobile machines, engine oil, nitrogen oxide reducing agents, fuel and lubricating oil additives, and other additives that fail to reach the prescribed standards.

(4) Burning high-pollution fuels in combustion forbidden zones.

Article 104 For a violation of this Law under any of the following circumstances, the entry-exit inspection and quarantine institution shall order the violator to make a correction, confiscate the raw materials, products, and illegal gains, and impose a fine of not less than one time but not more than three times the monetary value of the things at issue; if the import conduct constitutes smuggling, the customs shall impose punishment according to the law:

(1) Importing coal or petro coke that fails to reach the prescribed quality standards.

(2) Importing raw materials and products whose content of volatile organic compounds fails to meet the quality standards or requirements.

(3) Importing fuels for use by motor-driven vehicles and vessels and non-road mobile machines, engine oil, nitrogen oxide reducing agents, fuel and lubricating oil additives, and other additives that fail to reach the prescribed standards.

Article 105 Where a violator of this Law burns coal or petro coke that fails to reach the prescribed quality standards, the environmental protection administrative department of the people's government at or above the county level shall order it to make a correction and impose a fine of not less than one time but not more than three times the monetary value of the coal or coke at issue.

Article 106 Where a violator of this Law uses marine fuels that fail to meet the prescribed standards or requirements, the marine safety administration or fishery administrative department shall, according to its duties, impose a fine of not less than 10,000 yuan but not more than 100,000 yuan.

Article 107 Where a violator of this Law builds or expands facilities that burn high-pollution fuels in a combustion forbidden zone, fails to stop using high-pollution fuels as required, builds or expands decentralized coal-fueled heat supply boilers in areas covered by the centralized heat supply network, or fails to demolish those existing coal-fueled heat boilers that fail to reach the discharge standards as required, the environmental protection administrative department of the local people's government at or above the county level shall confiscate the facilities at issue, organize the demolition of the coal-fired heat boilers, and impose a fine of not less than 20,000 yuan but not more than 200,000 yuan.

Where a violator of this Law produces, imports, sells, or uses boilers that fail to reach the prescribed standards or requirements, the quality supervision department or the environmental protection administrative department of the people's government at or above the county level shall order it to make a correction, confiscate the illegal proceeds, and impose a fine of not less than 20,000 yuan but not more than 200,000 yuan.

Article 108 Where a violation of this Law is under any of the following circumstances, the environmental protection administrative department of the people's government at or above the county level shall order it to make a correction, impose a fine of not less than 20,000 yuan but not more than 200,000 yuan, and, if it refuses to make a correction, order it to stop production for rectifications:

(1) Failing to conduct the production and service activities that generate waste gases

containing volatile organic compounds in an enclosed space or equipment, failing to install and use pollution prevention and control facilities as required, or failing to take measures to reduce the discharge of waste gases.

(2) In the case of an industrial coating enterprise, failing to use low volatile organic compounds or failing to establish and retain ledger books.

(3) In the case of a petroleum enterprise, chemical industrial enterprise, or any other enterprise that produces or uses organic solvents, failing to take measures for the routine maintenance and repair of pipelines and equipment, failing reduce the leakage of substances, or failing to collect and dispose of leaked substances without delay.

(4) Failing to install and normally use gas recycling devices in oil and gas storage banks, oil and gas stations, oil tankers, and gas tankers.

(5) In the case of a steel, building materials, nonferrous metals, petroleum, chemical industrial, pharmaceutical, or mining enterprise, failing to take measures such as centralized collection and disposal, sealing, fencing, sheltering, cleaning, and spraying so as to control and reduce the discharge of dust and gaseous pollutants.

(6) Failing to recycle the combustible gases generated from industrial production, garbage landfilling or other activities or failing to treat them for pollution prevention and control purposes if they are not recyclable, or failing to repair or update the recycling devices for combustible gases updated in a timely manner when they cannot function normally.

Article 109 Where a violator of this Law manufactures motor vehicles or non-road mobile machines that exceed the pollutant discharge standards, the environmental protection administrative department of the people's government at or above the provincial level shall order it to make a correction, confiscate the illegal proceeds, impose a fine of not less than one time but not more than three times the monetary value of the vehicles or machines at issue, and confiscate and destroy those motor vehicles or non-road mobile machines that fail to reach the pollutant discharge standards. If the violator refuses to make a correction, the environmental protection administrative department shall order it to stop production for rectifications, and the motor vehicle production administrative department under the State Council shall order it to stop the manufacturing of the models concerned.

Where a motor vehicle or non-road mobile machine manufacturing enterprise, as in violation of this Law, makes falsification, passes off inferior products as superior ones, or sells such vehicles as products that have passed discharge inspections, the environmental protection administrative department of the people's government at or above the provincial level shall order the violator to stop production for rectifications, confiscate the illegal proceeds, impose a fine of not less than one time but not more than three times the monetary value of vehicles and machines at issue, and confiscate and destroy those that fail to reach the pollutant discharge standards, and the motor vehicle production administrative department under the State Council shall order to stop the production of the models concerned.

Article 110 Where a violator of this Law imports or sells motor vehicles or non-road mobile machines that exceed the pollutant discharge standards, the administrative department for

industry and commerce of the people's government at or above the county level or the entry-exit inspection and quarantine institution shall order it to make a correction, confiscate the illegal proceeds, impose a fine of not less than one time but not more than three times the monetary value of the vehicles or machines at issue, and confiscate and destroy those that fail to reach the pollutant discharge standards. If the import conduct constitutes smuggling, the customs shall impose punishment according to law.

Where a violator of this Law sells motor vehicles or non-road mobile machines that fail to reach the pollutant discharge standards, the seller shall be responsible for repair, replacement or return of the vehicles and machines at issue; if the buyer has suffered any losses, the seller shall compensate for the losses.

Article 111 Where a motor vehicle manufacturing or import enterprise, as in violation of this Law, fails to disclose the discharge inspection data or pollution control technical data of the motor vehicle models it manufactures or imports as required, the environmental protection administrative department of the people's government at or above the provincial level shall order it to make a correction and impose a fine of not less than 50,000 yuan but not more than 500,000 yuan.

Where a motor vehicle manufacturing or import enterprise, as in violation of this Law, fails to disclose the maintenance technical data of the motor vehicle models it manufactures or imports as required, the transport administrative department of the people's government at or above the provincial level shall order it to make a correction and impose a fine of not less than 50,000 yuan but not more than 500,000 yuan.

Article 112 Where a violator of this Law forges the discharge inspection result of any motor vehicle or non-road mobile machine or issues any false discharge inspection report, the environmental protection administrative department of the people's government at or above the county level shall confiscate the illegal proceeds and impose a fine of not less than 100,000 yuan but not more than 500,000 yuan; if the circumstances are serious, the accreditation department shall disqualify it from inspection.

Where a violator of this Law forges the discharge inspection result of any vessel or issues any false discharge inspection report, the marine safety administration shall impose punishment according to law.

Where a violator of this Law passes the motor vehicle discharge inspection by fraudulent means such as changing the pollution control devices of motor vehicles for the occasion or damages the discharge diagnosis system of motor vehicles, the environmental protection administrative department of the people's government at or above the county level shall order it to make a correction, impose a fine of 5,000 yuan upon each motor vehicle owner, and impose a fine of 5,000 yuan per motor vehicle upon the motor vehicle maintenance entity.

Article 113 Where a motor vehicle driver, as in violation of this Law, drives on road a motor vehicle that fails to pass the discharge inspection, the traffic administrative department of the public security organ shall impose punishment according to law.

Article 114 Where a violator of this Law uses any non-road mobile machine that fails to reach the discharge standards, or installs or replaces pollution control devices on any heavy-duty diesel vehicle or non-road mobile machine, the environmental protection administrative department and other relevant departments of the people's government at or above the county level shall order him or it to make a correction and impose a fine of 5,000 yuan according to their duties.

Where a violator of this Law uses any high-emission non-road mobile machine in an area where the use of high-emission non-road mobile machinery is prohibited, the environmental protection administrative department and other relevant departments of the urban people's government shall impose punishment according to law.

Article 115 Where a construction contractor, as in violation of this Law, has any of the following conduct, the housing and urban-rural development administrative department and other relevant departments of the people's government at or above the county level shall order it to make a correction and impose a fine of not less than 10,000 yuan but not more than 100,000 yuan; if it refuses to make correction, order it to stop construction for rectifications:

(1) Failing to set rigid enclosures at the construction site, or failing to take coverage, sectional operation, construction work at scheduled period, sprinkling for dust suppression, surface washing, car washing, and other effective measures for dust prevention and suppression.

(2) Failing to pick up construction earth, waste soil, and garbage in a timely manner, or failing to cover with enclosed dustproof net.

Where a construction project owner, as in violation of this Law, fails to cover the exposed ground of the construction land not available for construction for the time being or fails to green, pave or cover the exposed ground when the construction land is not available for use for more than three months, the housing and urban-rural development administrative department and other relevant departments of the people's government at or above the county level shall impose punishment under the preceding paragraph.

Article 116 Where a vehicle transporting coal, garbage, waste soil, sandstones, earth, mortar, and other bulk or liquid materials, as in violation of this Law, fails to take enclosed or other measures to prevent the loss or leakage of such materials, the regulatory department designated by the local people's government at or above the county level shall order the vehicle operator to make a correction and impose a fine of not less than 2,000 yuan but not more than 20,000 yuan; if the relevant entity refuses to make correction, the vehicle shall not be driven on road.

Article 117 Where a violator of this Law has any of the following conducts, the environmental protection administrative department and other relevant departments of the people's government at or above the county level shall order it to make a correction and impose a fine of not less than 10,000 yuan but not more than 100,000 yuan according to their duties; if the violator refuses to make a correction, order it to shut down or stop its business

operations for rectifications:

- (1) Failing to store materials easy to produce dust such as coal, gangue, coal cinder, coal ashes, cement, lime, plaster, sandstone, lime soil, and sandy soil in an enclosed space.
- (2) Where it is impossible to store materials easy to produce dust in enclosed space, failing to set tight enclosures not lower than the stockpile of such materials or take effective coverage measures to prevent and control dust pollution.
- (3) Failing to control the discharge of dust by means of sealing or spraying in the loading and unloading of materials.
- (4) Failing to take flameproof measures in the storage of materials such as coal, coal gangue, coal cinder, and coal ash.
- (5) Failing to take effective measures to prevent and control dust pollution at docks, mines, landfills, and disposal sites.
- (6) In the case of an enterprise or public institution that discharges toxic or hazardous atmospheric pollutants as listed in the directory of toxic and hazardous atmospheric pollutants, failing to establish an environmental risk early warning system, conduct regular monitoring over discharge outlets and the neighboring environment, assess environmental risk, eliminate hidden environmental safety problems, and take effective measures to prevent environmental risk as required.
- (7) In the case of an enterprise, a public institution, or any other business entity that discharges permanent organic pollutants to the atmosphere, or an entity operating waste burning facilities, failing to take technological methods and techniques conducive to the reduction of the discharge of permanent organic pollutants and install effective cleansing devices to reach the discharge standards according to the relevant provisions of the state.
- (8) Failing to take measures to prevent the discharge of malodorous gases.

Article 118 Where a catering service provider discharges soot as in violation of this Law or discharges soot beyond the prescribed discharge standards as a result of its failure to install soot cleaning devices, use them normally, or take other soot cleaning measures, the regulatory department designated by the local people's government at or above the county level shall order it to make a correction and impose a fine of not less than 5,000 yuan but not more than 50,000 yuan; if it refuses to make a correction, order it to stop its business operations for rectifications.

Where a violator of this Law builds, rebuilds or expands a catering service project that produces soot, odor, or waste gas in a residential building, a commercial and residential complex building without special-purpose flues, or a commercial floor adjacent to residential floors in a commercial and residential complex building, the regulatory department designated by the local people's government at or above the county level shall order it to make a correction; if it refuses to make a correction, order it to close down and impose a fine of not less than 10,000 yuan but not more than 100,000 yuan.

Where a violator of this Law has an open-air barbecue or provides a site for open-air barbecues in a period or area forbidden by the local people's government, the regulatory

department designated by the local people's government at or above the county level shall order it to make a correction, confiscate the barbecue tools and illegal proceeds, and impose a fine of not less than 500 yuan but not more than 20,000 yuan.

Article 119 Where a violator of this Law sprays extremely or highly toxic pesticides to trees, flowers and grasses or burns straws, fallen leaves or other materials producing smoke pollution in a densely inhabited area, the regulatory department designated by the local people's government at or above the county level shall order it to make a correction, and may concurrently impose a fine of not less than 500 yuan but not more than 2,000 yuan.

Where a violator of this Law burns asphalt, asphalt felt, rubber, plastics, leather, garbage, and other materials that produce toxic or harmful smoke or dust or malodorous gases in a densely inhabited area or any other area needing special protection, the regulatory department designated by the local people's government at or above the county level shall order it to make a correction and impose a fine of not less than 10,000 yuan but not more than 100,000 yuan upon the entity or a fine of not less than 500 yuan but not more than 2,000 yuan upon the individual concerned.

Where a violator of this Law uses fireworks and firecrackers in a period or area prohibited by the local urban people's government, the regulatory department designated by the local people's government at or above the county level shall impose punishment according to law.

Article 120 Where a violator of this Law fails to install odor and waste gas disposal devices and other pollution prevention and control devices and ensure their normal functioning when engaging in the dry cleaning of clothing, the maintenance and repair of motor vehicles, or other service activities, which affects the neighboring environment, the environmental protection administrative department of the local people's government at or above the county level shall order it to make a correction and impose a fine of not less than 2,000 yuan but not more than 20,000 yuan; if it refuses to make a correction, order it to stop its business operations for rectifications.

Article 121 Where a violator of this Law releases any heavy air pollution forecasting and early warning information to the public without approval, if it constitutes a violation of public security administration, the public security organ shall impose punishment for public security administration according to law.

Where a violator of this Law refuses to execute the heavy air pollution weather emergency response measures such as stopping earthwork at construction sites or stopping the demolition of buildings, the regulatory department designated by the local people's government at or above the county level shall impose a fine of not less than 10,000 yuan but not more than 100,000 yuan.

Article 122 Where a violation of this Law results in an atmospheric pollution accident, the environmental protection administrative department of the people's government at or above the county level shall impose a fine under paragraph 2 of this Article, and, for the directly liable person in charge and other directly liable persons, may impose a fine of not more than 50% of their income from the enterprise or public institution in the last year.

Where an ordinary or less serious atmospheric pollution accident is caused, the fine shall be not less than one time but not more than three times the direct losses resulting from the accident; where a serious or especially atmospheric pollution serious accident is caused, the fine shall be not less than three times but not more than five times the direct losses resulting from the accident.

Article 123 Where any enterprise, public institution, or other business entity is fined and ordered to make a correction for any of the following conduct in violation of this Law but refuses to make a correction, the administrative organ lawfully making the punishment decision may impose continuous fines on it in the amount of the original fine for each day from the next day after it is ordered to make a correction:

- (1) Discharging atmospheric pollutants without lawfully obtaining a pollutant discharge license.
- (2) Discharging atmospheric pollutants beyond the atmospheric pollutant discharge standards or the total quantity control requirements for the discharge of key atmospheric pollutants.
- (3) Discharging atmospheric pollutants by evading supervision.
- (4) Failing to take effective measures to prevent dust pollution in the construction of projects or the storage of materials easy to produce dust.

Article 124 Where a violator of this Law retaliates against a tipster by means of rescinding or modifying the employment contract with the tipster, it shall assume liability pursuant to relevant laws.

Article 125 An entity causing damage by discharging atmospheric pollutants shall assume tort liabilities according to law.

Article 126 Where the local people's governments at all levels, the environmental protection administrative departments and other departments with atmospheric environment protection regulatory functions under the people's governments at and above the county level, or the staff members thereof abuse powers, neglect duties, practice favoritism, or make falsification, disciplinary actions shall be taken according to law.

Article 127 Where a violation of this Law constitutes a crime, the violator shall assume criminal liabilities according to law.

Chapter VIII Supplementary Provisions

Article 128 The prevention and control of atmospheric pollution from ocean engineering projects shall be governed by relevant provisions of the Marine Environment Protection Law of the People's Republic of China.

Article 129 This Law comes into force on January 1, 2016.

11. Maritime Law of the People's Republic of China

(Adopted at the 28th Meeting of the Standing Committee of the Seventh National People's

Congress on November 7, 1992, promulgated by Order No. 64 of the President of the People's Republic of China on November 7, 1992, and effective as of July 1, 1993)

CHAPTER I GENERAL PROVISIONS

Article 1 This Law is enacted with a view to regulating the relations arising from maritime transport and those pertaining to ships, to securing and protecting the legitimate rights and interests of the parties concerned, and to promoting the development of maritime transport, economy and trade.

Article 2 "Maritime transport" as referred to in this Law means the carriage of goods and passengers by sea, including the sea-river and river-sea direct transport. The provisions concerning contracts of carriage of goods by sea as contained in Chapter IV of this Law shall not be applicable to the maritime transport of goods between the ports of the People's Republic of China.

Article 3 "Ship" as referred to in this Law means sea-going ships and other mobile units, but does not include ships or craft to be used for military or public service purposes, nor small ships of less than 20 tons gross tonnage. The term "ship" as referred to in the preceding paragraph shall also include ship's apparel.

Article 4 Maritime transport and towage services between the ports of the People's Republic of China shall be undertaken by ships flying the national flag of the People's Republic of China, except as otherwise provided for by laws or administrative rules and regulations. No foreign ships may engage in the maritime transport or towage services between the ports of the People's Republic of China unless permitted by the competent authorities of transport and communications under the State Council.

Article 5 Ships are allowed to sail under the national flag of the People's Republic of China after being registered, as required by law, and granted the nationality of the People's Republic of China. Ships illegally flying the national flag of the People's Republic of China shall be prohibited and fined by the authorities concerned.

Article 6 All matters pertaining to maritime transport shall be administered by the competent authorities of transport and communications under the State Council. The specific measures governing such administration shall be worked out by such authorities and implemented after being submitted to and approved by the State Council.

CHAPTER II SHIPS

Section 1 Ownership of Ships

Article 7 The ownership of a ship means the shipowner's rights to lawfully possess, utilize, profit from and dispose of the ship in his ownership.

Article 8 With respect to a State-owned ship operated by an enterprise owned by the whole people having a legal person status granted by the State, the provisions of this Law regarding the shipowner shall apply to that legal person.

Article 9 The acquisition, transference or extinction of the ownership of a ship shall be registered at the ship registration authorities; no acquisition, transference or extinction of the ship's ownership shall act against a third party unless registered. The transference of the

ownership of a ship shall be made by a contract in writing.

Article 10 Where a ship is jointly owned by two or more legal persons or individuals, the joint ownership thereof shall be registered at the ship registration authorities. The joint ownership of the ship shall not act against a third party unless registered.

Section 2 Mortgage of Ships

Article 11 The right of mortgage with respect to a ship is the right of preferred compensation enjoyed by the mortgagee of that ship from the proceeds of the auction sale made in accordance with law where and when the mortgagor fails to pay his debt to the mortgagee secured by the mortgage of that ship.

Article 12 The owner of a ship or those authorized thereby may establish the mortgage of the ship. The mortgage of a ship shall be established by a contract in writing.

Article 13 The mortgage of a ship shall be established by registering the mortgage of the ship with the ship registration authorities jointly by the mortgagee and the mortgagor. No mortgage may act against a third party unless registered. The main items for the registration of the mortgage of a ship shall be:

- (1) Name or designation and address of the mortgagee and the name of designation and address of the mortgagor of the ship;
- (2) Name and nationality of the mortgaged ship and the authorities that issued the certificate of ownership and the certificate number thereof;
- (3) Amount of debt secured, the interest rate and the period for the repayment of the debt.
- (4) Information about the registration of mortgage of ships shall be accessible to the public for enquiry.

Article 14 Mortgage may be established on a ship under construction. In registering the mortgage of a ship under construction, the building contract of the ship shall as well be submitted to the ship registration authorities.

Article 15 The mortgaged ship shall be insured by the mortgagor unless the contract provides otherwise. In case the ship is not insured, the mortgagee has the right to place the ship under insurance coverage and the mortgagor shall pay for the premium thereof.

Article 16 The establishment of mortgage by the joint owners of a ship shall, unless otherwise agreed upon among the joint owners, be subject to the agreement of those joint owners who have more than two-thirds of the shares thereof. The mortgage established by the joint owners of a ship shall not be affected by virtue of the division of ownership thereof.

Article 17 Once a mortgage is established on a ship, the ownership of the mortgaged ship shall not be transferred without the consent of the mortgagee.

Article 18 In case the mortgagee has transferred all or part of his right to debt secured by the mortgaged ship to another person, the mortgage shall be transferred accordingly.

Article 19 Two or more mortgages may be established on the same ship. The ranking of the mortgages shall be determined according to the dates of their respective registrations. In case two or more mortgages are established, the mortgagees shall be paid out of the proceeds of the auction sale of the ship in the order of registration of their respective

mortgages. The mortgages registered on the same date shall rank equally for payment.

Article 20 The mortgages shall be extinguished when the mortgaged ship is lost. With respect to the compensation paid from the insurance coverage on account of the loss of the ship, the mortgagee shall be entitled to enjoy priority in compensation over other creditors.

Section 3 Maritime Liens

Article 21 A maritime lien is the right of the claimant, subject to the provisions of Article 22 of this Law, to take priority in compensation against shipowners, bareboat charterers or ship operators with respect to the ship which gave rise to the said claim.

Article 22 The following maritime claims shall be entitled to maritime liens:

(1) Payment claims for wages, other remuneration, crew repatriation and social insurance costs made by the Master, crew members and other members of the complement in accordance with the relevant labour laws, administrative rules and regulations or labour contracts;

(2) Claims in respect of loss of life or personal injury occurred in the operation of the ship;

(3) Payment claims for ship's tonnage dues, pilotage dues, harbour dues and other port charges;

(4) Payment claims for salvage payment;

(5) Compensation claims for loss of or damage to property resulting from tortious act in the course of the operation of the ship. Compensation claims for oil pollution damage caused by a ship carrying more than 2,000 tons of oil in bulk as cargo that has a valid certificate attesting that the ship has oil pollution liability insurance coverage or other appropriate financial security are not within the scope of sub-paragraph (5) of the preceding paragraph.

Article 23 The maritime claims set out in paragraph 1 of Article 22 shall be satisfied in the order listed. However, any of the maritime claims set out in sub-paragraph (4) arising later than those under sub-paragraph (1) through (3) shall have priority over those under sub-paragraph (1) through (3). In case there are more than two maritime claims under sub-paragraphs (1), (2), (3) or (5) of paragraph 1 of Article 22, they shall be satisfied at the same time regardless of their respective occurrences; where they could not be paid in full, they shall be paid in proportion. Should there be more than two maritime claims under sub-paragraph (4), those arising later shall be satisfied first.

Article 24 The legal costs for enforcing the maritime liens, the expenses for preserving and selling the ship, the expenses for distribution of the proceeds of sale and other expenses incurred for the common interests of the claimants, shall be deducted and paid first from the proceeds of the auction sale of the ship.

Article 25 A maritime lien shall have priority over a possessory lien, and a possessory lien shall have priority over ship mortgage. The possessory lien referred to in the preceding paragraph means the right of the ship builder or repairer to secure the building or repairing cost of the ship by means of detaining the ship in his possession when the other party to the contract fails in the performance thereof. The possessory lien shall be extinguished when the ship builder or repairer no longer possesses the ship he has built or repaired.

Article 26 Maritime liens shall not be extinguished by virtue of the transfer of the ownership of the ship, except those that have not been enforced within 60 days of a public notice on the transfer of the ownership of the ship made by a court at the request of the transferee when the transfer was effected.

Article 27 In case the maritime claims provided for in Article 22 of this Law are transferred, the maritime liens attached thereto shall be transferred accordingly.

Article 28 A maritime lien shall be enforced by the court by arresting the ship that gave rise to the said maritime lien.

Article 29 A maritime lien shall, except as provided for in Article 26 of this Law, be extinguished under one of the following circumstances:

- (1) The maritime claim attached by a maritime lien has not been enforced within one year of the existence of such maritime lien;
- (2) The ship in question has been the subject of a forced sale by the court;
- (3) The ship has been lost.
- (4) The period of one year specified in sub-paragraph (1) of the preceding paragraph shall not be suspended or interrupted.

Article 30 The provisions of this Section shall not affect the implementation of the limitation of liability for maritime claims provided for in Chapter XI of this Law.

CHAPTER III CREW

Section 1 Basic Principles

Article 31 The term "crew" means the entire complement of the ship, including the Master.

Article 32 The Master, deck officers, chief engineer, engineers, electrical engineer and radio operator must be those in possession of appropriate certificates of competency.

Article 33 Chinese "crew" engaged in international voyages must possess Seaman's Book and other relevant certificates issued by the harbour superintendency authorities of the People's Republic of China.

Article 34 In the absence of specific stipulations in this Law as regards the employment of the crew as well as their labour-related rights and obligations, the provisions of the relevant laws and administrative rules and regulations shall apply.

Section 2 The Master

Article 35 The Master shall be responsible for the management and navigation of the ship. Orders given by the Master within the scope of his functions and powers must be carried out by other members of the crew, the passengers and all persons on board. The Master shall take necessary measures to protect the ship and all persons on board, the documents, postal matters, the goods as well as other property carried.

Article 36 To ensure the safety of the ship and all persons on board, the Master shall be entitled to confine or take other necessary measures against those who have committed crimes or violated laws or regulations on board, and to guard against their concealment, destruction or forging of evidence. The Master, having taken actions as referred to in the preceding paragraph of this Article, shall make a written report of the case, which shall bear

the signature of the Master himself and those of two or more others on board, and shall be handed over, together with the offender, to the authorities concerned for disposition.

Article 37 The Master shall make entries in the log book of any occurrence of birth or death on board and shall issue a certificate to that effect in the presence of two witnesses. The death certificate shall be attached with a list of personal belongings of the deceased, and attestation shall be given by the Master to the will, if any, of the deceased. Both the death certificate and the will shall be taken into safe keeping by the Master and handed over to the family members of the deceased or the organizations concerned.

Article 38 Where a sea casualty has occurred to a ship and the life and property on board have thus been threatened, the Master shall, with crew members and other persons on board under his command, make best efforts to run to the rescue. Should the foundering and loss of the ship have become inevitable, the Master may decide to abandon the ship. However, such abandonment shall be reported to the shipowner for approval except in case of emergency. Upon abandoning the ship, the Master must take all measures first to evacuate the passengers safely from the ship in an orderly way, then make arrangements for crew members to evacuate, while the Master shall be the last to evacuate. Before leaving the ship, the Master shall direct the crew members to do their utmost to rescue the deck log book, the engine log book, the oil record book, the radio log book, the charts, documents and papers used in the current voyage, as well as valuables, postal matters and cash money.

Article 39 The duty of the Master in the management and navigation of the ship shall not be absolved even with the presence of a pilot piloting the ship.

Article 40 Should death occur to the Master or the Master be unable to perform his duties for whatever reason, the deck officer with the highest rank shall act as the Master; before the ship sails from its next port of call, the shipowner shall appoint a new Master to take command.

CHAPTER IV CONTRACT OF CARRIAGE OF GOODS BY SEA

Section 1 Basic Principles

Article 41 A contract of carriage of goods by sea is a contract under which the carrier, against payment of freight, undertakes to carry by sea the goods contracted for shipment by the shipper from one port to another.

Article 42 For the purposes of this Chapter:

- (1) "Carrier" means the person by whom or in whose name a contract of carriage of goods by sea has been concluded with a shipper;
- (2) "Actual carrier" means the person to whom the performance of carriage of goods, or of part of the carriage, has been entrusted by the carrier, and includes any other person to whom such performance has been entrusted under a sub-contract;
- (3) "Shipper" means:
 - a) The person by whom or in whose name or on whose behalf a contract of carriage of goods by sea has been concluded with a carrier;
 - b) The person by whom or in whose name or on whose behalf the goods have been delivered

to the carrier involved in the contract of carriage of goods by sea;

(4) "Consignee" means the person who is entitled to take delivery of the goods;

(5) "Goods" includes live animals and containers, pallets or similar Articles of transport supplied by the shipper for consolidating the goods.

Article 43 The carrier or the shipper may demand confirmation of the contract of carriage of goods by sea in writing. However, voyage charter shall be done in writing. Telegrams, telexes and telefaxes have the effect of written documents.

Article 44 Any stipulation in a contract of carriage of goods by sea or a bill of lading or other similar documents evidencing such contract that derogates from the provisions of this Chapter shall be null and void. However, such nullity and voidness shall not affect the validity of other provisions of the contract or the bill of lading or other similar documents. A clause assigning the benefit of insurance of the goods in favour of the carrier or any similar clause shall be null and void.

Article 45 The provisions of Article 44 of this Law shall not prejudice the increase of duties and obligations by the carrier besides those set out in this Chapter.

Section 2 Carrier's Responsibilities

Article 46 The responsibilities of the carrier with regard to the goods carried in containers covers the entire period during which the carrier is in charge of the goods, starting from the time the carrier has taken over the goods at the port of loading, until the goods have been delivered at the port of discharge. The responsibility of the carrier with respect to non-containerized goods covers the period during which the carrier is in charge of the goods, starting from the time of loading of the goods onto the ship until the time the goods are discharged therefrom. During the period the carrier is in charge of the goods, the carrier shall be liable for the loss of or damage to the goods, except as otherwise provided for in this Section. The provisions of the preceding paragraph shall not prevent the carrier from entering into any agreement concerning carrier's responsibilities with regard to non-containerized goods prior to loading onto and after discharging from the ship.

Article 47 The carrier shall, before and at the beginning of the voyage, exercise due diligence to make the ship seaworthy, properly man, equip and supply the ship and to make the holds, refrigerating and cool chambers and all other parts of the ship in which goods are carried, fit and safe for their reception, carriage and preservation.

Article 48 The carrier shall properly and carefully load, handle, stow, carry, keep, care for and discharge the goods carried.

Article 49 The carrier shall carry the goods to the port of discharge on the agreed or customary or geographically direct route. Any deviation in saving or attempting to save life or property at sea or any reasonable deviation shall not be deemed to be an act deviating from the provisions of the preceding paragraph.

Article 50 Delay in delivery occurs when the goods have not been delivered at the designated port of discharge within the time expressly agreed upon. The carrier shall be liable for the loss of or damage to the goods caused by delay in delivery due to the fault of

the carrier, except those arising or resulting from causes for which the carrier is not liable as provided for in the relevant Articles of this Chapter. The carrier shall be liable for the economic losses caused by delay in delivery of the goods due to the fault of the carrier, even if no loss of or damage to the goods had actually occurred, unless such economic losses had occurred from causes for which the carrier is not liable as provided for in the relevant Articles of this Chapter. The person entitled to make a claim for the loss of goods may treat the goods as lost when the carrier has not delivered the goods within 60 days from the expiry of the time for delivery specified in paragraph 1 of this Article.

Article 51 The carrier shall not be liable for the loss of or damage to the goods occurred during the period of carrier's responsibility arising or resulting from any of the following causes:

- (1) Fault of the Master, crew members, pilot or servant of the carrier in the navigation or management of the ship;
- (2) Fire, unless caused by the actual fault of the carrier;
- (3) Force majeure and perils, dangers and accidents of the sea or other navigable waters;
- (4) War or armed conflict;
- (5) Act of the government or competent authorities, quarantine restrictions or seizure under legal process;
- (6) Strikes, stoppages or restraint of labour;
- (7) Saving or attempting to save life or property at sea;
- (8) Act of the shipper, owner of the goods or their agents;
- (9) Nature or inherent vice of the goods;
- (10) Inadequacy of packing or insufficiency of illegibility of marks;
- (11) Latent defect of the ship not discoverable by due diligence;
- (12) Any other causes arising without the fault of the carrier or his servant or agent.

The carrier who is entitled to exoneration from the liability for compensation as provided for in the preceding paragraph shall, with the exception of the causes given in sub-paragraph (2), bear the burden of proof.

Article 52 The carrier shall not be liable for the loss of or damage to the live animals arising or resulting from the special risks inherent in the carriage thereof. However, the carrier shall be bound to prove that he has fulfilled the special requirements of the shipper with regard to the carriage of the live animals and that under the circumstances of the sea carriage, the loss or damage has occurred due to the special risks inherent therein.

Article 53 In case the carrier intends to ship the goods on deck, he shall come into an agreement with the shipper or comply with the custom of the trade or the relevant laws or administrative rules and regulations. When the goods have been shipped on deck in accordance with the provisions of the preceding paragraph, the carrier shall not be liable for the loss of or damage to the goods caused by the special risks involved in such carriage. If the carrier, in breach of the provisions of the first paragraph of this Article, has shipped the goods on deck and the goods have consequently suffered loss or damage, the carrier shall

be liable therefor.

Article 54 Where loss or damage or delay in delivery has occurred from causes from which the carrier or his servant or agent is not entitled to exoneration from liability, together with another cause, the carrier shall be liable only to the extent that the loss, damage or delay in delivery is attributable to the causes from which the carrier is not entitled to exoneration from liability; however, the carrier shall bear the burden of proof with respect to the loss, damage or delay in delivery resulting from the other cause.

Article 55 The amount of indemnity for the loss of the goods shall be calculated on the basis of the actual value of the goods so lost, while that for the damage to the goods shall be calculated on the basis of the difference between the values of the goods before and after the damage, or on the basis of the expenses for the repair. The actual value shall be the value of the goods at the time of shipment plus insurance and freight. From the actual value referred to in the preceding paragraph, deduction shall be made, at the time of compensation, of the expenses that had been reduced or avoided as a result of the loss or damage occurred.

Article 56 The carrier's liability for the loss of or damage to the goods shall be limited to an amount equivalent to 666.67 Units of Account per package or other shipping unit, or 2 Units of Account per kilogramme of the gross weight of the goods lost or damaged, whichever is the higher, except where the nature and value of the goods had been declared by the shipper before shipment and inserted in the bill of lading, or where a higher amount than the amount of limitation of liability set out in this Article had been agreed upon between the carrier and the shipper. Where a container, pallet or similar Article of transport is used to consolidate goods, the number of packages or other shipping units enumerated in the bill of lading as packed in such Article of transport shall be deemed to be the number of packages or shipping units. If not so enumerated, the goods in such Article of transport shall be deemed to be one package or one shipping unit. Where the Article of transport is not owned or furnished by the carrier, such Article of transport shall be deemed to be one package or one shipping unit.

Article 57 The liability of the carrier for the economic losses resulting from delay in delivery of the goods shall be limited to an amount equivalent to the freight payable for the goods so delayed. Where the loss of or damage to the goods has occurred concurrently with the delay in delivery thereof, the limitation of liability of the carrier shall be that as provided for in paragraph 1 of Article 56 of this Law.

Article 58 The defence and limitation of liability provided for in this Chapter shall apply to any legal action brought against the carrier with regard to the loss of or damage to or delay in delivery of the goods covered by the contract of carriage of goods by sea, whether the claimant is a party to the contract or whether the action is founded in contract or in tort. The provisions of the preceding paragraph shall apply if the action referred to in the preceding paragraph is brought against the carrier's servant or agent, and the carrier's servant or agent proves that his action was within the scope of his employment or agency.

Article 59 The carrier shall not be entitled to the benefit of the limitation of liability provided

for in Article 56 or 57 of this Law if it is proved that the loss, damage or delay in delivery of the goods resulted from an act or omission of the carrier done with the intent to cause such loss, damage or delay or recklessly and with knowledge that such loss, damage or delay would probably result. The servant or agent of the carrier shall not be entitled to the benefit of limitation of liability provided for in Article 56 or 57 of this Law, if it is proved that the loss, damage or delay in delivery resulted from an act or omission of the servant or agent of the carrier done with the intent to cause such loss, damage or delay or recklessly and with knowledge that such loss, damage or delay would probably result.

Article 60 Where the performance of the carriage or part thereof has been entrusted to an actual carrier, the carrier shall nevertheless remain responsible for the entire carriage according to the provisions of this Chapter. The carrier shall be responsible, in relation to the carriage performed by the actual carrier, for the act or omission of the actual carrier and of his servant or agent acting within the scope of his employment or agency. Notwithstanding the provisions of the preceding paragraph, where a contract of carriage by sea provides explicitly that a specified part of the carriage covered by the said contract is to be performed by a named actual carrier other than the carrier, the contract may nevertheless provide that the carrier shall not be liable for the loss, damage or delay in delivery arising from an occurrence which takes place while the goods are in the charge of the actual carrier during such part of the carriage.

Article 61 The provisions with respect to the responsibility of the carrier contained in this Chapter shall be applicable to the actual carrier. Where an action is brought against the servant or agent of the actual carrier, the provisions contained in paragraph 2 of Article 58 and paragraph 2 of Article 59 of this Law shall apply.

Article 62 Any special agreement under which the carrier assumes obligations not provided for in this Chapter or waives rights conferred by this Chapter shall be binding upon the actual carrier when the actual carrier has agreed in writing to the contents thereof. The provisions of such special agreement shall be binding upon the carrier whether the actual carrier has agreed to the contents or not.

Article 63 Where both the carrier and the actual carrier are liable for compensation, they shall jointly be liable within the scope of such liability.

Article 64 If claims for compensation have been separately made against the carrier, the actual carrier and their servants or agents with regard to the loss of or damage to the goods, the aggregate amount of compensation shall not be in excess of the limitation provided for in Article 56 of this Law.

Article 65 The provisions of Article 60 through 64 of this Law shall not affect the recourse between the carrier and the actual carrier.

Section 3 Shipper's Responsibilities

Article 66 The shipper shall have the goods properly packed and shall guarantee the accuracy of the description, mark, number of packages or pieces, weight or quantity of the goods at the time of shipment and shall indemnify the carrier against any loss resulting from

inadequacy of packing or inaccuracies in the above-mentioned information. The carrier's right to indemnification as provided for in the preceding paragraph shall not affect the obligation of the carrier under the contract of carriage of goods towards those other than the shipper.

Article 67 The shipper shall perform all necessary procedures at the port, customs, quarantine, inspection or other competent authorities with respect to the shipment of the goods and shall furnish to the carrier all relevant documents concerning the procedures the shipper has gone through. The shipper shall be liable for any damage to the interest of the carrier resulting from the inadequacy or inaccuracy or delay in delivery of such documents.

Article 68 At the time of shipment of dangerous goods, the shipper shall, in compliance with the regulations governing the carriage of such goods, have them properly packed, distinctly marked and labelled and notify the carrier in writing of their proper description, nature and the precautions to be taken. In case the shipper fails to notify the carrier or notified him inaccurately, the carrier may have such goods landed, destroyed or rendered innocuous when and where circumstances so require, without compensation. The shipper shall be liable to the carrier for any loss, damage or expense resulting from such shipment. Notwithstanding the carrier's knowledge of the nature of the dangerous goods and his consent to carry, he may still have such goods landed, destroyed or rendered innocuous, without compensation, when they become an actual danger to the ship, the crew and other persons on board or to other goods. However, the provisions of this paragraph shall not prejudice the contribution in general average, if any.

Article 69 The shipper shall pay the freight to the carrier as agreed.

The shipper and the carrier may reach an agreement that the freight shall be paid by the consignee. However, such an agreement shall be noted in the transport documents.

Article 70 The shipper shall not be liable for the loss sustained by the carrier or the actual carrier, or for the damage sustained by the ship, unless such loss or damage was caused by the fault of the shipper, his servant or agent. The servant or agent of the shipper shall not be liable for the loss sustained by the carrier or the actual carrier, or for the damage sustained by the ship, unless the loss or damage was caused by the fault of the servant or agent of the shipper.

Section 4 Transport Documents

Article 71 A bill of lading is a document which serves as an evidence of the contract of carriage of goods by sea and the taking over or loading of the goods by the carrier, and based on which the carrier undertakes to deliver the goods against surrendering the same. A provision in the document stating that the goods are to be delivered to the order of a named person, or to order, or to bearer, constitutes such an undertaking.

Article 72 When the goods have been taken over by the carrier or have been loaded on board, the carrier shall, on demand of the shipper, issue to the shipper a bill of lading. The bill of lading may be signed by a person authorized by the carrier. A bill of lading signed by the Master of the ship carrying the goods is deemed to have been signed on behalf of the

carrier.

Article 73 A bill of lading shall contain the following particulars:

- (1) Description of the goods, mark, number of packages or pieces, weight or quantity, and a statement, if applicable, as to the dangerous nature of the goods;
- (2) Name and principal place of business of the carrier;
- (3) Name of the ship;
- (4) Name of the shipper;
- (5) Name of the consignee;
- (6) Port of loading and the date on which the goods were taken over by the carrier at the port of loading;
- (7) Port of discharge;
- (8) Place where the goods were taken over and the place where the goods are to be delivered in case of a multimodal transport bill of lading;
- (9) Date and place of issue of the bill of lading and the number of originals issued;
- (10) Payment of freight;
- (11) Signature of the carrier or of a person acting on his behalf. In a bill of lading, the lack of one or more particulars referred to in the preceding paragraph does not affect the function of the bill of lading as such, provided that it nevertheless meets the requirements set forth in Article 71 of this Law.

Article 74 If the carrier has issued, on demand of the shipper, a received-for-shipment bill of lading or other similar documents before the goods are loaded on board, the shipper may surrender the same to the carrier as against a shipped bill of lading when the goods have been loaded on board. The carrier may also note on the received-for-shipment bill of lading or other similar documents with the name of the carrying ship and the date of loading, and, when so noted, the received-for-shipment bill of lading or other similar documents shall be deemed to constitute a shipped bill of lading.

Article 75 If the bill of lading contains particulars concerning the description, mark, number of packages or pieces, weight or quantity of the goods with respect to which the carrier or the other person issuing the bill of lading on his behalf has the knowledge or reasonable grounds to suspect that such particulars do not accurately represent the goods actually received, or, where a shipped bill of lading is issued, loaded, or if he has had no reasonable means of checking, the carrier or such other person may make a note in the bill of lading specifying those inaccuracies, the grounds for suspicion or the lack of reasonable means of checking.

Article 76 If the carrier or the other person issuing the bill of lading on his behalf made no note in the bill of lading regarding the apparent order and condition of the goods, the goods shall be deemed to be in apparent goods order and condition.

Article 77 Except for the note made in accordance with the provisions of Article 75 of this Law, the bill of lading issued by the carrier or the other person acting on his behalf is prima facie evidence of the taking over or loading by the carrier of the goods as described therein.

Proof to the contrary by the carrier shall not be admissible if the bill of lading has been transferred to a third party, including a consignee, who has acted in good faith in reliance on the description of the goods contained therein.

Article 78 The relationship between the carrier and the holder of the bill of lading with respect to their rights and obligations shall be defined by the clauses of the bill of lading.

Neither the consignee nor the holder of the bill of lading shall be liable for the demurrage, dead freight and all other expenses in respect of loading occurred at the loading port unless the bill of lading clearly states that the aforesaid demurrage, dead freight and all other expenses shall be borne by the consignee and the holder of the bill of lading.

Article 79 The negotiability of a bill of lading shall be governed by the following provisions:

(1) A straight bill of lading is not negotiable;

(2) An order bill of lading may be negotiated with endorsement to order or endorsement in blank;

(3) A bearer bill of lading is negotiable without endorsement.

Article 80 Where a carrier has issued a document other than a bill of lading as an evidence of the receipt of the goods to be carried, such a document is prima facie evidence of the conclusion of the contract of carriage of goods by sea and the taking over by the carrier of the goods as described therein. Such documents that are issued by the carrier shall not be negotiable.

Section 5 Delivery of Goods

Article 81 Unless notice of loss or damage is given in writing by the consignee to the carrier at the time of delivery of the goods by the carrier to the consignee, such delivery shall be deemed to be prima facie evidence of the delivery of the goods by the carrier as described in the transport documents and of the apparent goods order and condition of such goods. Where the loss of or damage to the goods is not apparent, the provisions of the preceding paragraph shall apply if the consignee has not given the notice in writing within seven consecutive days from the next day of the delivery of the goods, or, in the case of containerized goods, within 15 days from the next day of the delivery thereof. The notice in writing regarding the loss or damage need not be given if the state of the goods has, at the time of delivery, been the subject of a joint survey or inspection by the carrier and the consignee.

Article 82 The carrier shall not be liable for compensation if no notice on the economic losses resulting from delay in delivery of the goods has been received from the consignee within 60 consecutive days from the next day on which the goods had been delivered by the carrier to the consignee.

Article 83 The consignee may, before taking delivery of the goods at the port of destination, and the carrier may, before delivering the goods at the port of destination, request the cargo inspection agency to have the goods inspected. The party requesting such inspection shall bear the cost thereof but is entitled to recover the same from the party causing the damage.

Article 84 The carrier and the consignee shall mutually provide reasonable facilities for the

survey and inspection stipulated in Article 81 and 83 of this Law.

Article 85 Where the goods have been delivered by the actual carrier, the notice in writing given by the consignee to the actual carrier under Article 81 of this Law shall have the same effect as that given to the carrier, and that given to the carrier shall have the same effect as that given to the actual carrier.

Article 86 If the goods were not taken delivery of at the port of discharge or if the consignee has delayed or refused the taking delivery of the goods, the Master may discharge the goods into warehouses or other appropriate places, and any expenses or risks arising therefrom shall be borne by the consignee.

Article 87 If the freight, contribution in general average, demurrage to be paid to the carrier and other necessary charges paid by the carrier on behalf of the owner of the goods as well as other charges to be paid to the carrier have not been paid in full, nor has appropriate security been given, the carrier may have a lien, to a reasonable extent, on the goods.

Article 88 If the goods under lien in accordance with the provisions of Article 87 of this Law have not been taken delivery of within 60 days from the next day of the ship's arrival at the port of discharge, the carrier may apply to the court for an order on the selling the goods by auction; where the goods are perishable or the expenses for keeping such goods would exceed their value, the carrier may apply for an earlier sale by auction.

The proceeds from the auction sale shall be used to pay off the expenses for the storage and auction sale of the goods, the freight and other related charges to be paid to the carrier. If the proceeds fall short of such expenses, the carrier is entitled to claim the difference from the shipper, whereas any amount in surplus shall be refunded to the shipper. If there is no way to make the refund and such surplus amount has not been claimed at the end of one full year after the auction sale, it shall go to the State Treasury.

Section 6 Cancellation of Contract

Article 89 The shipper may request the cancellation of the contract of carriage of goods by sea before the ship sails from the port of loading. However, except as otherwise provided for in the contract, the shipper shall in this case pay half of the agreed amount of freight; if the goods have already been loaded on board, the shipper shall bear the expenses for the loading and discharge and other related charges.

Article 90 Either the carrier or the shipper may request the cancellation of the contract and neither shall be liable to the other if, due to force majeure or other causes not attributable to the fault of the carrier or the shipper, the contract could not be performed prior to the ship's sailing from its port of loading. If the freight has already been paid, it shall be refunded to the shipper, and, if the goods have already been loaded on board, the loading/discharge expenses shall be borne by the shipper. If a bill of lading has already been issued, it shall be returned by the shipper to the carrier.

Article 91 If, due to force majeure or any other causes not attributable to the fault of the carrier or the shipper, the ship could not discharge its goods at the port of destination as provided for in the contract of carriage, unless the contract provides otherwise, the Master

shall be entitled to discharge the goods at a safe port or place near the port of destination and the contract of carriage shall be deemed to have been fulfilled.

In deciding the discharge of the goods, the Master shall inform the shipper or the consignee and shall take the interests of the shipper or the consignee into consideration.

Section 7 Special Provisions Regarding Voyage Charter Party

Article 92 A voyage charter party is a charter party under which the shipowner chartered out and the charterer chartered in the whole or part of the ship's space for the carriage by sea of the intended goods from one port to another and the charterer pays the agreed amount of freight.

Article 93 A voyage charter party shall mainly contain, inter alia, name of the shipowner, name of the charterer, name and nationality of the ship, its bale or grain capacity, description of the goods to be loaded, port of loading, port of destination, laydays, time for loading and discharge, payment of freight, demurrage, dispatch and other relevant matters.

Article 94 The provisions in Article 47 and Article 49 of this Law shall apply to the shipowner under voyage charter party.

The other provisions in this Chapter regarding the rights and obligations of the parties to the contract shall apply to the shipowner and the charterer under voyage charter only in the absence of relevant provisions or in the absence of provisions differing therefrom in the voyage charter.

Article 95 Where the holder of the bill of lading is not the charterer in the case of a bill of lading issued under a voyage charter, the rights and obligations of the carrier and the holder of the bill of lading shall be governed by the clauses of the bill of lading. However, if the clauses of the voyage charter party are incorporated into the bill of lading, the relevant clauses of the voyage charter party shall apply.

Article 96 The shipowner shall provide the intended ship. The intended ship may be substituted with the consent of the charterer. However, if the ship substituted does not meet the requirements of the charter party, the charterer may reject the ship or cancel the charter. Should any damage or loss occur to the charterer as a result of the shipowner's failure in providing the intended ship due to his fault, the shipowner shall be liable for compensation.

Article 97 If the shipowner has failed to provide the ship within the laydays fixed in the charter, the charterer is entitled to cancel the charter party. However, if the shipowner had notified the charterer of the delay of the ship and the expected date of its arrival at the port of loading, the charterer shall notify the shipowner whether to cancel the charter within 48 hours of the receipt of the shipowner's notification.

Where the charterer has suffered losses as a result of the delay in providing the ship due to the fault of the shipowner, the shipowner shall be liable for compensation.

Article 98 Under a voyage charter, the time for loading and discharge and the way of calculation thereof, as well as the rate of demurrage that would incur after the expiration of the laytime and the rate of dispatch money to be paid as a result of the completion of loading or discharge ahead of schedule, shall be fixed by the shipowner and the charterer upon

mutual agreement.

Article 99 The charterer may sublet the ship he chartered, but the rights and obligations under the head charter shall not be affected.

Article 100 The charterer shall provide the intended goods, but he may replace the goods with the consent of the shipowner. However, if the goods replaced is detrimental to the interests of the shipowner, the shipowner shall be entitled to reject such goods and cancel the charter.

Where the shipowner has suffered losses as a result of the failure of the charterer in providing the intended goods, the charterer shall be liable for compensation.

Article 101 The shipowner shall discharge the goods at the port of discharge specified in the charter party. Where the charter party contains a clause allowing the choice of the port of discharge by the charterer, the Master may choose one from among the agreed picked ports to discharge the goods, in case the charterer did not, as agreed in the charter, instruct in time as to the port chosen for discharging the goods. Where the charterer did not instruct in time as to the chosen port of discharge, as agreed in the charter, and the shipowner suffered losses thereby, the charterer shall be liable for compensation; where the charterer has suffered losses as a result of the shipowner's arbitrary choice of a port to discharge the goods, in disregard of the provisions in the relevant charter, the shipowner shall be liable for compensation.

Section 8 Special Provisions Regarding Multimodal Transport Contract

Article 102 A multimodal transport contract as referred to in this Law means a contract under which the multimodal transport operator undertakes to transport the goods, against the payment of freight for the entire transport, from the place where the goods were received in his charge to the destination and to deliver them to the consignee by two or more different modes of transport, one of which being sea carriage.

The multimodal transport operator as referred to in the preceding paragraph means the person who has entered into a multimodal transport contract with the shipper either by himself or by another person acting on his behalf.

Article 103 The responsibility of the multimodal transport operator with respect to the goods under multimodal transport contract covers the period from the time he takes the goods in his charge to the time of their delivery.

Article 104 The multimodal transport operator shall be responsible for the performance of the multimodal transport contract or the procurement of the performance therefor, and shall be responsible for the entire transport.

The multimodal transport operator may enter into separate contracts with the carriers of the different modes defining their responsibilities with regard to the different sections of the transport under the multimodal transport contracts. However, such separate contracts shall not affect the responsibility of the multimodal transport operator with respect to the entire transport.

Article 105 If loss of or damage to the goods has occurred in a certain section of the transport,

the provisions of the relevant laws and regulations governing that specific section of the multimodal transport shall be applicable to matters concerning the liability of the multimodal transport operator and the limitation thereof.

Article 106 If the section of transport in which the loss of or damage to the goods occurred could not be ascertained, the multimodal transport operator shall be liable for compensation in accordance with the stipulations regarding the carrier's liability and the limitation thereof as set out in this Chapter.

CHAPTER V CONTRACT OF CARRIAGE OF PASSENGERS BY SEA

Article 107 A contract of carriage of passengers by sea is a contract whereby the carrier undertakes to carry passengers and their luggage by sea from one port to another by ships suitable for that purpose against payment of fare by the passengers.

Article 108 For the purposes of this Chapter:

(1) "Carrier" means the person by whom or in whose name a contract of carriage of passengers by sea has been entered into with the passengers;

(2) "Actual carrier" means the person by whom the whole or part of the carriage of passengers has been performed as entrusted by the carrier, including those engaged in such carriage under a sub-contract.

(3) "Passenger" means a person carried under a contract of carriage of passengers by sea. With the consent of the carrier, a person supervising the carriage of goods aboard a ship covered by a contract of carriage of goods is regarded as a passenger;

(4) "Luggage" means any Article or vehicle shipped by the carrier under the contract of carriage of passengers by sea, with the exception of live animals.

(5) "Cabin luggage" means the luggage which the passenger has in his cabin or is otherwise in his possession, custody or control.

Article 109 The provisions regarding the responsibilities of the carrier as contained in this Chapter shall be applicable to the actual carrier, and the provisions regarding the responsibilities of the servant or agent of the carrier as contained in this Chapter shall be applicable to the servant or agent of the actual carrier.

Article 110 The passage ticket serves as an evidence that a contract of carriage of passengers by sea has been entered into.

Article 111 The period of carriage for the carriage of passengers by sea commences from the time of embarkation of the passengers and terminates at the time of their disembarkation, including the period during which the passengers are transported by water from land to the ship or vice versa, if such cost of transport is included in the fare. However, the period of carriage does not include the time when the passengers are at a marine terminal or station or on a quay or in or on any other port installations.

The period of carriage for the cabin luggage of the passengers shall be the same as that stipulated in the preceding paragraph. The period of carriage for luggage other than the cabin luggage commences from the time when the carrier or his servant or agent receives it into his charge and terminates at the time when the carrier or his servant or agent redelivers

it to the passengers.

Article 112 A passenger travelling without a ticket or taking a higher class berth than booked or going beyond the distance paid for shall pay for the fare or the excess fare as required by relevant regulations, and the carrier may, according to the relevant regulations, charge additional fare. Should any passenger refuse to pay, the Master is entitled to order him to disembark at a suitable place and the carrier has the right of recourse against him.

Article 113 No passenger may take on board or pack in their luggage contraband goods or any Article of an inflammable, explosive, poisonous, corrosive or radioactive nature or other dangerous goods that would endanger the safety of life and property on board.

The carrier may have the contraband or dangerous goods brought on board by the passenger or packed in his luggage in breach of the provisions of the preceding paragraph discharged, destroyed or rendered innocuous at any time and at any place or sent over to the appropriate authorities, without being liable for compensation.

The passenger shall be liable for compensation if any loss or damage occurs as a result of his breach of the provisions of paragraph 1 of this Article.

Article 114 During the period of carriage of the passengers and their luggage as provided for in Article 111 of this Law, the carrier shall be liable for the death of or personal injury to passengers or the loss of or damage to their luggage resulting from accidents caused by the fault of the carrier or his servant or agent committed within the scope of his employment or agency.

The claimant shall bear the burden of proof regarding the fault of the carrier or his servant or agent, with the exception, however, of the circumstances specified in paragraphs 3 and 4 of this Article.

If the death of or personal injury to the passengers or loss of or damage to the passengers' cabin luggage occurred as a result of shipwreck, collision, stranding, explosion, fire or the defect of the ship, it shall be presumed that the carrier or his servant or agent has committed a fault, unless proof to the contrary has been given by the carrier or his servant or agent.

As to any loss of or damage to the luggage other than the passenger's cabin luggage, unless the carrier or his servant or agent proves to the contrary, it shall be presumed that the carrier or his servant or agent has committed a fault, no matter how the loss or damage was caused.

Article 115 If it is proved by the carrier that the death of or personal injury to the passenger or the loss of or damage to his luggage was caused by the fault of the passenger himself or the faults of the carrier and the passenger combined, the carrier's liability may be exonerated or appropriately mitigated.

If it is proved by the carrier that the death of or personal injury to the passenger or the loss of or damage to the passenger's luggage was intentionally caused by the passenger himself, or the death or personal injury was due to the health condition of his, the carrier shall not be liable therefor.

Article 116 The carrier shall not be liable for any loss of or damage to the monies, gold, silver,

jewellery, negotiable securities or other valuables of the passengers.

If the passenger has entrusted the above-mentioned valuables to the safe-keeping of the carrier under an agreement for that purpose, the carrier shall be liable for compensation in accordance with the provisions of Article 117 of this Law. Where the limitation of liability agreed upon between the carrier and the passenger in writing is higher than that set out in Article 117 of this Law, the carrier shall make the compensation in accordance with that higher amount.

Article 117 Except the circumstances specified in paragraph 4 of this Article, the limitation of liability of the carrier under each carriage of passengers by sea shall be governed by the following:

- (1) For death of or personal injury to the passenger: not exceeding 46,666 Units of Account per passenger;
- (2) For loss of or damage to the passengers' cabin luggage: not exceeding 833 Units of Account per passenger;
- (3) For loss of or damage to the passengers' vehicles including the luggage carried therein: not exceeding 3,333 Units of Account per vehicle;
- (4) For loss of or damage to luggage other than those described in sub- paragraphs (2) and (3) above: not exceeding 1,200 Units of Account per passenger.

An agreement may be reached between the carrier and the passengers with respect to the deductibles applicable to the compensation for loss of or damage to the passengers' vehicles and luggage other than their vehicles. However, the deductible with respect to the loss of or damage to the passengers' vehicles shall not exceed 117 Units of Account per vehicle, whereas the deductible for the loss of or damage to the luggage other than the vehicle shall not exceed 13 Units of Account per piece of luggage per passenger. In calculating the amount of compensation for the loss of or damage to the passenger's vehicle or the luggage other than the vehicle, deduction shall be made of the agreed deductibles the carrier is entitled to.

A higher limitation of liability than that set out in sub-paragraph (1) above may be agreed upon between the carrier and the passenger in writing.

The limitation of liability of the carrier with respect to the carriage of passengers by sea between the ports of the People's Republic of China shall be fixed by the competent authorities of transport and communications under the State Council and implemented after its being submitted to and approved by the State Council.

Article 118 If it is proved that the death of or personal injury to the passenger or the loss of or damage to the passenger's luggage resulted from an act or omission of the carrier done with the intent to cause such loss or damage or recklessly and with knowledge that such death or personal injury or such loss or damage would probably result, the carrier shall not invoke the provisions regarding the limitation of liability contained in Articles 116 and 117 of this Law.

If it is proved that the death of or personal injury to the passenger or the loss of or damage

to the passenger's luggage resulted from an act or omission of the servant or agent of the carrier done with the intent to cause such loss or damage or recklessly and with knowledge that such death or personal injury or such loss or damage would probably result, the servant or agent of the carrier shall not invoke the provisions regarding the limitation of liability contained in Article 116 and 117 of this Law.

Article 119 In case of apparent damage to the luggage, the passenger shall notify the carrier or his servant or agent in writing according to the following:

(1) Notice with respect to cabin luggage shall be made before or at the time of his embarkation;

(2) Notice regarding luggage other than cabin luggage shall be made before or at the time of redelivery thereof.

If the damage to the luggage is not apparent and it is difficult for the passenger to discover such damage at the time of his disembarkation or of the redelivery of the luggage, or if the luggage has been lost, the passenger shall notify the carrier or his servant or agent in writing within 15 days from the next day of disembarkation of the passenger or of the redelivery of the luggage.

If the passenger fails to send in the notice in writing in time in accordance with the provisions of sub-paragraphs (1) and (2) of this Article, it shall be presumed that the luggage has been received undamaged, unless proof to the contrary is made.

Where the luggage has been jointly surveyed or inspected by the passenger and the carrier at the time of redelivery thereof, the above- mentioned notice need not be given.

Article 120 With regard to the claims made to the carrier's servant or agent, such servant or agent shall be entitled to invoke the provisions regarding defence and limitation of liability contained in Article 115, 116 and 117 of this Law if such servant or agent proves that his act or omission was within the scope of his employment or agency.

Article 121 Where the performance of the carriage of passengers or part thereof has been entrusted by the carrier to an actual carrier, the carrier shall, as stipulated in this Chapter, remain liable for the entire carriage. Where the carriage is performed by the actual carrier, the carrier shall be liable for the act or omission of the actual carrier or the act or omission of his servant or agent within the scope of his employment or agency.

Article 122 Any special agreement under which the carrier assumes obligations not provided for in this Chapter or waives the rights conferred by this Chapter shall be binding upon the actual carrier where the actual carrier has expressly agreed in writing to the contents thereof. Such a special agreement shall be binding upon the carrier whether the actual carrier has agreed to its contents or not.

Article 123 Where both the carrier and the actual carrier are liable for compensation, they shall be liable jointly and severally within the scope of such liability.

Article 124 Where separate claims have been brought against the carrier, the actual carrier and their servants or agents with respect to the death of or personal injury to the passengers or the loss of or damage to their luggage, the aggregate amount of compensation shall not

be in excess of the limitation prescribed in Article 117 of this Law.

Article 125 The provisions of Articles 121 through 124 of this Law shall not affect the right of recourse between the carrier and the actual carrier.

Article 126 Any of the following clauses contained in a contract of carriage of passengers by sea shall be null and void:

(1) Any clause that exonerates the statutory responsibility of the carrier in respect of the passenger;

(2) Any clause that reduces the limitation of liability of the carrier as contained in this Chapter;

(3) Any clause that contains provisions contrary to those of this Chapter concerning burden of proof;

(4) Any clause that restricts the right of claim of the passenger.

The nullity and voidness of the clauses set out in the preceding paragraph shall not prejudice the validity of the other clauses of the contract.

CHAPTER VI CHARTER PARTIES

Section 1 Basic Principles

Article 127 The provisions concerning the rights and obligations of the shipowner and the charterer in this Chapter shall apply only when there are no stipulations or no different stipulations in this regard in the charter party.

Article 128 Charter parties including time charter parties and bareboat charter parties shall be concluded in writing.

Section 2 Time Charter Party

Article 129 A time charter party is a contract under which the shipowner provides a designated manned ship to the charterer, and the charterer employs the ship during the contractual period for the agreed service against payment of hire.

Article 130 A time charter party mainly contains the name of the shipowner, the name of the charter; the name, nationality, class, tonnage, capacity, speed and fuel consumption of the ship; the trading area; the agreed service, the contractual period, the time, place and conditions of delivery and redelivery of the ship; the hire and the way of its payment and other relevant matters.

Article 131 The shipowner shall deliver the ship within the time agreed upon in the charter party.

Where the shipowner acts against the provisions of the preceding paragraph, the charterer is entitled to cancel the charter. However, if the shipowner has notified the charterer of the anticipated delay in delivery and has given an estimated time of arrival of the ship at the port of delivery, the charterer shall notify the shipowner, within 48 hours of the receipt of such notice from the shipowner, of his decision whether to cancel the charter or not.

The shipowner shall be liable for the charterer's loss resulting from the delay in delivery of the ship due to the shipowner's fault.

Article 132 At the time of delivery, the shipowner shall exercise due diligence to make the ship seaworthy. The ship delivered shall be fit for the intended service.

Where the shipowner acts against the provisions in the preceding paragraph, the charterer shall be entitled to cancel the charter and claim any losses resulting therefrom.

Article 133 During the charter period, if the ship is found at variance with the seaworthiness or the other conditions agreed upon in the charter, the shipowner shall take all reasonable measures to have them restored as soon as possible.

Where the ship has not been operated normally for 24 consecutive hours due to its failure to maintain the seaworthiness or the other conditions as agreed upon, the charterer shall not pay the hire for the operating time so lost, unless such failure was caused by the charterer.

Article 134 The charterer shall guarantee that the ship shall be employed in the agreed maritime transport between the safe ports or places within the trading area agreed upon.

If the charterer acts against the provisions of the preceding paragraph, the shipowner is entitled to cancel the charter and claim any losses resulting therefrom.

Article 135 The charterer shall guarantee that the ship shall be employed to carry the lawful merchandise agreed.

Where the ship is to be employed by the charterer to carry live animals or dangerous goods, a prior consent of the shipowner is required.

The charterer shall be liable for any loss of the shipowner resulting from the charterer's violation of the provisions of paragraph 1 or paragraph 2 of this Article.

Article 136 The charterer shall be entitled to give the Master instructions with respect to the operation of the ship. However, such instructions shall not be inconsistent with the stipulations of the time charter.

Article 137 The charterer may sublet the ship under charter, but he shall notify the shipowner of the sublet in time. The rights and obligations agreed upon in the head charter shall not be affected by the sub-charter.

Article 138 Where the ownership of the ship under charter has been transferred by the shipowner, the rights and obligations agreed upon under the original charter shall not be affected. However, the shipowner shall inform the charterer thereof in time. After such transfer, the transferee and the charterer shall continue to perform the original charter.

Article 139 Should the ship be engaged in salvage operations during the charter period, the charterer shall be entitled to half of the amount of the payment for salvage operations after deducting therefrom the salvage expenses, compensation for damage, the portion due to crew members and other relevant costs.

Article 140 The charterer shall pay the hire as agreed upon in the charter. Where the charterer fails to pay the hire as agreed upon, the shipowner shall be entitled to cancel the charter party and claim any losses resulting therefrom.

Article 141 In case the charterer fails to pay the hire or other sums of money as agreed upon in the charter, the shipowner shall have a lien on the charterer's goods, other property on board and earnings from the sub-charter.

Article 142 When the charter redelivers the ship to the shipowner, the ship shall be in the

same good order and condition as it was at the time of delivery, fair wear and tear excepted. Where, upon redelivery, the ship fails to remain in the same good order and condition as it was at the time of delivery, the charter shall be responsible for rehabilitation or for compensation.

Article 143 If, on the basis of a reasonable calculation, a ship may be able to complete its last voyage at around the time of redelivery specified in the charter and probably thereafter, the charterer is entitled to continue to use the ship in order to complete that voyage even if its time of redelivery will be overdue. During the extended period, the charterer shall pay the hire at the rate fixed by the charter, and, if the current market rate of hire is higher than that specified in the charter, the charterer shall pay the hire at the current market rate.

Section 3 Bareboat Charter Party

Article 144 A bareboat charter party is a charter party under which the shipowner provides the charterer with an unmanned ship which the charterer shall possess, employ and operate within an agreed period and for which the charterer shall pay the shipowner the hire.

Article 145 A bareboat charter party mainly contains the name of the shipowner and the name of the charter; the name, nationality, class, tonnage and capacity of the ship; the trading area, the employment of the ship and the charter period; the time, place and condition of delivery and redelivery; the survey, maintenance and repair of the ship; the hire and its payment; the insurance of the ship; the time and condition for the termination of the charter and other relevant matters.

Article 146 The shipowner shall deliver the ship and its certificates to the charterer at the port or place and time as stipulated in the charter party. At the time of delivery, the shipowner shall exercise due diligence to make the ship seaworthy. The ship delivered shall be fit for the agreed service.

Where the shipowner acts against the provisions of the preceding paragraph, the charterer shall be entitled to cancel the charter and claim any losses resulting therefrom.

Article 147 The charterer shall be responsible for the maintenance and repair of the ship during the bareboat charter period.

Article 148 During the bareboat charter period, the ship shall be insured, at the value agreed upon in the charter and in the way consented to by the shipowner, by the charterer at his expense.

Article 149 During the bareboat charter period, if the charterer's possession, employment or operation of the ship has affected the interests of the shipowner or caused any losses thereto, the charterer shall be liable for eliminating the harmful effect or compensating for the losses. Should the ship be arrested due to any disputes over its ownership or debts owned by the shipowner, the shipowner shall guarantee that the interest of the charterer is not affected. The shipowner shall be liable for compensation for any losses suffered by the charterer thereby.

Article 150 During the bareboat charter period, the charterer shall not assign the rights and obligations stipulated in the charter or sublet the ship under bareboat charter without the

shipowner's consent in writing.

Article 151 The shipowner shall not establish any mortgage of the ship during the bareboat charter period without the prior consent in writing by the charterer.

Where the shipowner acts against the provisions of the preceding paragraph and thereby causes losses to the charterer, the shipowner shall be liable for compensation.

Article 152 The charterer shall pay the hire as stipulated in the charter. In default of payment by the charterer for seven consecutive days or more after the time as agreed in the charter for such payment, the shipowner is entitled to cancel the charter without prejudice to any claim for the loss arising from the charterer's default.

Should the ship be lost or missing, payment of hire shall cease from the day when the ship was lost or last heard of. Any hire paid in advance shall be refunded in proportion.

Article 153 The provisions of Article 134, paragraph 1 of Article 135, Article 142 and Article 143 of this Law shall be applicable to bareboat charter parties.

Article 154 The ownership of a ship under bareboat charter containing a lease-purchase clause shall be transferred to the charterer when the charterer has paid off the lease-purchase price to the shipowner as stipulated in the charter.

CHAPTER VII CONTRACT OF SEA TOWAGE

Article 155 A contract of sea towage is a contract whereby the tugowner undertakes to tow an object by sea with a tug from one place to another and the tow party pays the towage. The provisions of this Chapter shall not be applicable to the towage service rendered to ships within the port area.

Article 156 A contract of sea towage shall be made in writing. Its contents shall mainly include name and address of the tugowner, name and address of the tow party, name and main particulars of the tug and name and main particulars of the object to be towed, horse power of the tug, place of commencement of the towage and the destination, the date of commencement of the towage, towage price and the way of payment thereof, as well as other relevant matters.

Article 157 The tugowner shall, before and at the beginning of the towage, exercise due diligence to make the tug seaworthy and tow-worthy and to properly man the tug and equip it with gears and tow lines and to provide all other necessary supplies and appliances for the intended voyage.

The two party shall, before and at the beginning of the towage, make all necessary preparations therefor and shall exercise due diligence to make the object to be towed tow-worthy and shall give a true account of the object to be towed and provide the certificate of tow-worthiness and other documents issued by the relevant survey and inspection organizations.

Article 158 If before the commencement of the towage service, due to force majeure or other causes not attributable to the fault of either party, the towage contract could not be performed, either party may cancel the contract and neither shall be liable to the other. In such event, the towage price that had already been paid shall be returned to the tow party by the

tugowner, unless otherwise agreed upon in the towage contract.

Article 159 If after the commencement of the towage service, due to force majeure or other causes not attributable to the fault of either party, the towage contract could not be performed, either party may cancel the towage contract and neither shall be liable to the other.

Article 160 Where the object towed could not reach its destination due to force majeure or other causes not attributable to the fault of either party, unless the towage contract provides otherwise, the tugowner may deliver the object towed to the two party or its agent at a place near the destination or at a safe port or an anchorage chosen by the Master of the tug, and the contract of towage shall be deemed to have been fulfilled.

Article 161 Where the tow party fails to pay the towage price or other reasonable expenses as agreed, the tugowner shall have a lien on the object towed.

Article 162 In the course of the sea towage, if the damage suffered by the tugowner or the two party was caused by the fault of one of the parties, the party in fault shall be liable for compensation. If the damage was caused by the faults of both parties, both parties shall be liable for compensation in proportion to the extent of their respective faults.

Notwithstanding the provisions of the preceding paragraph, the tugowner shall not be liable if he proves that the damage suffered by the tow party is due to one of the following causes:

(1) Fault of the Master or other crew members of the tug or the pilot or other servants or agents of the tugowner in the navigation and management of the tug:

(2) Fault of the tug in saving or attempting to save life or property at sea.

The provisions of this Article shall only apply if and when there are no provisions or no different provisions in this regard in the sea towage contract.

Article 163 If death of or personal injury to a third party or damage to property thereof has occurred during the sea towage due to the fault of the tugowner or the tow party, the tugowner and the tow party shall be liable jointly and severally to that third party. Except as otherwise provided for in the towage contract, the party that has jointly and severally paid a compensation in an amount exceeding the proportion for which it is liable shall have the right of recourse against the other party.

Article 164 Where a tugowner towing a barge owned or operated by him to transport goods by sea from one port to another, it shall be deemed as an act of carriage of goods by sea.

CHAPTER VIII COLLISION OF SHIPS

Article 165 Collision of ships means an accident arising from the touching of ships at sea or in other navigable waters adjacent thereto.

Ships referred to in the preceding paragraph shall include those non- military or public service ships or craft that collide with the ships mentioned in Article 3 of this Law.

Article 166 After a collision, the Master of each of the ships in collision is bound, so far as he can do so without serious danger to his ship and persons on board to render assistance to the other ship and persons on board.

The Master of each of the ships in collision is likewise bound so far as possible to make known to the other ship the name of his ship, its port of registry, port of departure and port

of destination.

Article 167 Neither of the parties shall be liable to the other if the collision is caused by force majeure or other causes not attributable to the fault of either party or if the cause thereof is left in doubt.

Article 168 If the collision is caused by the fault of one of the ships, the one in fault shall be liable therefor.

Article 169 If the colliding ships are all in fault, each ship shall be liable in proportion to the extent of its fault; if the respective faults are equal in proportion or it is impossible to determine the extent of the proportion of the respective faults, the liability of the colliding ships shall be apportioned equally.

The ships in fault shall be liable for the damage to the ship, the goods and other property on board pursuant to the proportions prescribed in the preceding paragraph. Where damage is caused to the property of a third party, the liability for compensation of any of the colliding ships shall not exceed the proportion it shall bear.

If the ships in fault have caused loss of life or personal injury to a third party, they shall be jointly and severally liable therefor. If a ship has paid an amount of compensation in excess of the proportion prescribed in paragraph 1 of this Article, it shall have the right of recourse against the other ship(s) in fault.

Article 170 Where a ship has caused damage to another ship and persons, goods or other property on board that ship, either by the execution or non-execution of a manoeuvre or by the non-observance of navigation regulations, even if no collision has actually occurred, the provisions of this Chapter shall apply.

CHAPTER IX SALVAGE AT SEA

Article 171 The provisions of this Chapter shall apply to salvage operations rendered at sea or any other navigable waters adjacent thereto to ships and other property in distress.

Article 172 For the purposes of this Chapter:

(1) "Ship" means any ship referred to in Article 3 of this Law and any other non-military, public service ship or craft that has been involved in a salvage operation therewith;

(2) "Property" means any property not permanently and intentionally attached to the shoreline and includes freight at risk.

(3) "Payment" means any reward, remuneration or compensation for salvage operations to be paid by the salvaged party to the salvor pursuant to the provisions of this Chapter.

Article 173 The provisions of this Chapter shall not apply to fixed or floating platforms or mobile offshore drilling units when such platforms or units are on location engaged in the exploration, exploitation or production of sea-bed mineral resources.

Article 174 Every Master is bound, so far as he can do so without serious danger to his ship and persons on board, to render assistance to any person in danger of being lost at sea.

Article 175 A contract for salvage operations at sea is concluded when an agreement has been reached between the salvor and the salvaged party regarding the salvage operations to be undertaken. The Master of the ship in distress shall have the authority to conclude a

contract for salvage operations on behalf of the shipowner.

The Master of the ship in distress or its owner shall have the authority to conclude a contract for salvage operations on behalf of the owner of the property on board.

Article 176 The salvage contract may be modified by a judgment of the court which has entertained the suit brought by either party, or modified by an award of the arbitration organization to which the dispute has been submitted for arbitration upon the agreement of the parties, under any of the following circumstances:

- (1) The contract has been entered into under undue influence or the influence of danger and its terms are obviously inequitable;
- (2) The payment under the contract is in an excessive degree too large or too small for the services actually rendered.

Article 177 During the salvage operation, the salvor shall owe a duty to the salvaged party to:

- (1) Carry out the salvage operation with due care;
- (2) Exercise due care to prevent or minimize the pollution damage to the environment;
- (3) Seek the assistance of other salvors where reasonably necessary;
- (4) Accept the reasonable request of the salvaged party to seek the participation in the salvage operation of other salvors. However, if the request is not well-founded, the amount of payment due to the original salvor shall not be affected.

Article 178 During the salvage operation, the party salvaged is under an obligation to the salvor to:

- (1) Cooperate fully with the salvor;
- (2) Exercise due care to prevent or minimize the pollution damage to the environment;
- (3) Promptly accept the request of the salvor to take delivery of the ship or property salvaged when such ship or property has been brought to a place of safety.

Article 179 Where the salvage operations rendered to the distressed ship and other property have had a useful result, the salvor shall be entitled to a reward. Except as otherwise provided for by Article 182 of this Law or by other laws or the salvage contract, the salvor shall not be entitled to the payment if the salvage operations have had no useful result.

Article 180 The reward shall be fixed with a view to encouraging salvage operations, taking into full account the following criteria:

- (1) Value of the ship and other property salvaged;
- (2) Skill and efforts of the salvors in preventing or minimizing the pollution damage to the environment;
- (3) Measure of success obtained by the salvors;
- (4) Nature and extent of the danger;
- (5) Skill and efforts of the salvors in salvaging the ship, other property and life;
- (6) Time used and expenses and losses incurred by the salvors;
- (7) Risk of liability and other risks run by the salvors or their equipment;
- (8) Promptness of the salvage services rendered by the salvors;
- (9) Availability and use of ships or other equipment intended for salvage operations;

(10) State of readiness and efficiency of the salvors' equipment and the value thereof.

The reward shall not exceed the value of the ship and other property salvaged.

Article 181 The salvaged value of the ship and other property means the assessed value of the ship and other property salvaged or the proceeds of the sale thereof, after deduction of the relevant taxes and customs dues, quarantine expenses, inspection charges as well as expenses incurred in connection with the discharge, storage, assessment of the value and the sale thereof.

The value prescribed in the preceding paragraph does not include the value of the salvaged personal belongings of the crew and that of the cabin luggage of the passengers.

Article 182 If the salvor has carried out the salvage operations in respect of a ship which by itself or its goods threatened pollution damage to the environment and has failed to earn a reward under Article 180 of this Law at least equivalent to the special compensation assessable in accordance with this Article, he shall be entitled to special compensation from the owner of that ship equivalent to his expenses as herein defined.

If the salvor has carried out the salvage operations prescribed in the preceding paragraph and has prevented or minimized pollution damage to the environment, the special compensation payable by the owner to the salvor under paragraph 1 of this Article may be increased by an amount up to a maximum of 30% of the expenses incurred by the salvor. The court which has entertained the suit or the arbitration organization may, if it deems fair and just and taking into consideration the provisions of paragraph 1 of Article 180 of this Law, render a judgment or an award further increasing the amount of such special compensation, but in no event shall the total increase be more than 100% of the expenses incurred by the salvor.

The salvor's expenses referred to in this Article means the salvor's out-of-pocket expenses reasonably incurred in the salvage operation and the reasonable expenses for the equipment and personnel actually used in the salvage operation. In determining the salvor's expenses, the provisions of sub-paragraphs (8), (9) and (10) of paragraph 1 of Article 180 of this Law shall be taken into consideration.

Under all circumstances, the total special compensation provided for in this Article shall be paid only if such compensation is greater than the reward recoverable by the salvor under Article 180 of this Law, and the amount to be paid shall be the difference between the special compensation and the reward.

If the salvor has been negligent and has thereby failed to prevent or minimize the pollution damage to the environment, the salvor may be totally or partly deprived of the right to the special compensation.

Nothing in this Article shall affect the right of recourse on the part of the shipowner against any other parties salvaged.

Article 183 The salvage reward shall be paid by the owners of the salvaged ship and other property in accordance with the respective proportions which the salvaged values of the ship and other property bear to the total salvaged value.

Article 184 The distribution of salvage reward among the salvors taking part in the same salvage operation shall be made by agreement among such salvors on the basis of the criteria set out in Article 180 of this Law; failing such agreement, the matter may be brought before the court hearing the case for judgment, or, upon the agreement of the parties, submitted to the arbitration organization for an award.

Article 185 The salvors of human life may not demand any remuneration from those whose lives are saved. However, salvors of human life are entitled to a fair share of the payment awarded to the salvors for salvaging the ship or other property or for preventing or minimizing the pollution damage to the environment.

Article 186 The following salvage operations shall not be entitled to remuneration:

(1) The salvage operation is carried out as a duty to normally perform a towage contract or other service contract, with the exception, however, of providing special services beyond the performance of the above said duty.

(2) The salvage operation is carried out in spite of the express and reasonable prohibition on the part of the Master of the ship in distress, the owner of the ship in question and the owner of the other property.

Article 187 Where the salvage operations have become necessary or more difficult due to the fault of the salvor or where the salvor has committed fraud or other dishonest conduct, the salvor shall be deprived of the whole or part of the payment payable to him.

Article 188 After the completion of the salvage operation, the party salvaged shall, at the request of the salvor, provide satisfactory security for salvage reward and other charges.

Without prejudice to the provisions of the preceding paragraph, the owner of the ship salvaged shall, before the release of the goods, make best endeavours to cause the owners of the property salvaged to provide satisfactory security for the share of the payment that they ought to bear.

Without the consent of the salvor, the ship or other property salvaged shall not be removed from the port or place at which they first arrived after the completion of the salvage operation, until satisfactory security has been provided with respect to the ship or other property salvaged, as demanded by the salvor.

Article 189 The court or the arbitration organization handling the salvor's claim for payment may, in light of the specific circumstances and under fair and just terms, decide or make an award ordering the party salvaged to pay on account an appropriate amount to the salvor.

On the basis of the payment on account made by the party salvaged in accordance with the provisions of the preceding paragraph, the security provided under Article 188 of this Law shall be reduced accordingly.

Article 190 If the party salvaged has neither made the payment nor provided satisfactory security for the ship and other property salvaged after 90 days of the salvage, the salvor may apply to the court for an order on forced sale by auction. With respect to the ship or the property salvaged that cannot be kept or cannot be properly kept, or the storage charge to be incurred may exceed its value, the salvor may apply for an earlier forced sale by auction.

The proceeds of the sale shall, after deduction of the expenses incurred for the storage and sale, be used for the payment in accordance with the provisions of this Law. The remainder, if any, shall be returned to the party salvaged, and, if there is no way to return the remainder or if the remainder has not been claimed after one year of the forced sale, it shall go to the State Treasury. In case of any deficiency, the salvor has the right of recourse against the party salvaged.

Article 191 The provisions of this Chapter shall apply to the salvor's right to the payment for the salvage operations carried out between the ships of the same owner.

Article 192 With respect to the salvage operations performed or controlled by the relevant competent authorities of the State, the salvors shall be entitled to avail themselves of the rights and remedies provided for in this Chapter in respect of salvage operations.

CHAPTER X GENERAL AVERAGE

Article 193 General average means the extraordinary sacrifice or expenditure intentionally and reasonably made or incurred for the common safety for the purpose of preserving from peril the ship, goods or other property involved in a common maritime adventure.

Loss or damage sustained by the ship or goods through delay, whether on the voyage or subsequently, such as demurrage and loss of market as well as other indirect losses, shall not be admitted as general average.

Article 194 When a ship, after having been damaged in consequence of accident, sacrifice or other extraordinary circumstances, shall have entered a port or place of refuge or returned to its port or place of loading to effect repairs which are necessary for the safe prosecution of the voyage, then the port charges paid, the wages and maintenance of the crew incurred and the fuel and stores consumed during the extra period of detention in such port or place, as well as the loss or damage and charges arising from the discharge, storage, reloading and handling of the goods, fuel, stores and other property on board in order to have the repairs done shall be allowed as general average.

Article 195 Any extra expense incurred in place of another expense which would have been allowed as general average shall be deemed to be general average and so allowed, but the amount of such expense incurred shall not be in excess of the general average expense avoided.

Article 196 The onus of proof shall be upon the party claiming in general average to show that the loss or expense claimed is properly allowable as general average.

Article 197 Rights to contribution in general average shall not be affected, though the event which gave rise to the sacrifice or expenditure may have been due to the fault of one of the parties to the adventure. However, this shall not prejudice any remedies or defences which may be open against or to that party in respect of such fault.

Article 198 The amounts of sacrifice of the ship, the goods and the freight shall be respectively determined as follows:

(1) The amount of sacrifice of the ship shall be calculated on the basis of the repair cost of the ship actually paid, from which any reasonable deduction in respect of "new for old" being

made. Where the ship has not been repaired after the sacrifice, the amount of sacrifice thereof shall be calculated on the basis of the reasonable reduced value of ship after the general average sacrifice. Such amount shall not exceed the estimated cost of repair.

Where the ship is an actual total loss or where the cost of repair would exceed the value of the ship after the repair, the amount of sacrifice of the ship shall be calculated on the basis of the estimated sound value of the ship, less the estimated cost of repair not allowable as general average, as well as the value of the ship after the damage.

(2) The amount of sacrifice of the goods already lost shall be calculated on the basis of the value of the goods at the time of shipment plus insurance and freight, from which the freight that need not be paid due to the sacrifice made being deducted. For the damaged goods that had already been sold before an agreement was reached on the extent of the damage sustained, the amount of sacrifice thereof shall be calculated on the basis of the difference between the value of the goods at the time of shipment plus insurance and freight, and the net proceeds of the goods so sold.

(3) The amount of sacrifice of the freight shall be calculated on the basis of the amount of loss of freight on account of the sacrifice of the goods, from which the operating expenses that ought to be paid in order to earn such freight but need not be paid because of the sacrifice shall be deducted.

Article 199 The contribution in general average shall be made in proportion to the contributory values of the respective beneficiaries.

The contributory value in general average by the ship, goods and freight shall be determined as follows:

(1) The contributory value of the ship shall be calculated on the basis of the sound value of the ship at the place where the voyage ends, from which any damage that does not come under general average sacrifice being deducted; alternately, the actual value of the ship at the place where the voyage ends, plus the amount of general average sacrifice.

(2) The contributory value of the goods shall be calculated on the basis of the value of the goods at the time of shipment plus insurance and freight, from which the damage that does not come under the general average sacrifice and the carrier's freight at risk being deducted. Where the goods had been sold before its arrival at the port of destination, its value for contribution shall be the net proceeds plus the amount of general average sacrifice.

Passenger's luggage and personal belongings shall not be included in the value for contribution.

(3) The contributory value of freight shall be calculated on the basis of the amount of freight at the risk of the carrier and which the carrier is entitled to collect at the end of the voyage, less any expense incurred for the prosecution of the voyage after the general average, in order to earn the freight, plus the amount of general average sacrifice.

Article 200 Goods undeclared or wrongfully declared shall be liable for the contribution to general average, but the special sacrifice sustained by such goods shall not be allowed as general average.

Where the value of the goods has been improperly declared at a value below its actual value, the contribution to general average shall be made on the basis of their actual value and, where a general average sacrifice has occurred, the amount of sacrifice shall be calculated on the basis of the declared value.

Article 201 Interest shall be allowed on general average sacrifice and general average expenses paid on account. A commission shall be allowed for the general average expenses paid on account, except those , for the wages and maintenance of the crew and fuel and store consumed.

Article 202 The contributing parties shall provide security for general average contribution at the request of the parties that have an interest therein.

Where the security has been provided in the form of cash deposits, such deposits shall be put in a bank by an average adjuster in the name of a trustee.

The provision, use and refund of the deposits shall be without prejudice to the ultimate liability of the contributing parties.

Article 203 The adjustment of general average shall be governed by the average adjustment rules agreed upon in the relevant contract. In the absence of such an agreement in the contract, the relevant provisions contained in this Chapter shall apply.

CHAPTER XI LIMITATION OF LIABILITY FOR MARITIME CLAIMS

Article 204 Shipowners and salvors may limit their liability in accordance with the provisions of this Chapter for claims set out in Article 207 of this Law.

The shipowners referred to in the preceding paragraph shall include the charterer and the operator of a ship.

Article 205 If the claims set out in Article 207 of this Law are not made against shipowners or salvors themselves but against persons for whose act, neglect or default the shipowners or salvors are responsible, such persons may limit their liability in accordance with the provisions of this Chapter.

Article 206 Where the assured may limit his liability in accordance with the provisions of this Chapter, the insurer liable for the maritime claims shall be entitled to the limitation of liability under this Chapter to the same extent as the assured.

Article 207 Except as provided otherwise in Article 208 and 209 of this Law, with respect to the following maritime claims, the person liable may limit his liability in accordance with the provisions of this Chapter, whatever the basis of liability may be:

- (1) Claims in respect of loss of life or personal injury or loss of or damage to property including damage to harbour works, basins and waterways and aids to navigation occurring on board or in direct connection with the operation of the ship or with salvage operations, as well as consequential damages resulting therefrom;
- (2) Claims in respect of loss resulting from delay in delivery in the carriage of goods by sea or from delay in the arrival of passengers or their luggage;
- (3) Claims in respect of other loss resulting from infringement of rights other than contractual rights occurring in direct connection with the operation of the ship or salvage operations;

(4) Claims of a person other than the person liable in respect of measures taken to avert or minimize loss for which the person liable may limit his liability in accordance with the provisions of this Chapter, and further loss caused by such measures.

All the claims set out in the preceding paragraph, whatever the way they are lodged, may be entitled to limitation of liability. However, with respect to the remuneration set out in subparagraph (4) for which the person liable pays as agreed upon in the contract, in relation to the obligation for payment, the person liable may not invoke the provisions on limitation of liability of this Article.

Article 208 The provisions of this Chapter shall not be applicable to the following claims:

- (1) Claims for salvage payment or contribution in general average;
- (2) Claims for oil pollution damage under the International Convention on Civil Liability for Oil Pollution Damage to which the People's Republic of China is a party;
- (3) Claims for nuclear damage under the International Convention on Limitation of Liability for Nuclear Damage to which the People's Republic of China is a party;
- (4) Claims against the shipowner of a nuclear ship for nuclear damage;
- (5) Claims by the servants of the shipowner or salvor, if under the law governing the contract of employment, the shipowner or salvor is not entitled to limit his liability or if he is by such law only permitted to limit his liability to an amount greater than that provided for in this Chapter.

Article 209 A person liable shall not be entitled to limit his liability in accordance with the provisions of this Chapter, if it is proved that the loss resulted from his act or omission done with the intent to cause such loss or recklessly and with knowledge that such loss would probably result.

Article 210 The limitation of liability for maritime claims, except as otherwise provided for in Article 211 of this Law, shall be calculated as follows:

- (1) In respect of claims for loss of life or personal injury:
 - a) 333,000 Units of Account for a ship with a gross tonnage ranging from 300 to 500 tons;
 - b) For a ship with a gross tonnage in excess of 500 tons, the limitation under a) above shall be applicable to the first 500 tons and the following amounts in addition to that set out under a) shall be applicable to the gross tonnage in excess of 500 tons:
 - For each ton from 501 to 3,000 tons: 500 Units of Account;
 - For each ton from 3,001 to 30,000 tons: 333 Units of Account;
 - For each ton from 30,001 to 70,000 tons: 250 Units of Account;
 - For each ton in excess of 70,000 tons: 167 Units of Account.
- (2) In respect of claims other than that for loss of life or personal injury:
 - a) 167,000 Units of Account for a ship with a gross tonnage ranging from 300 to 500 tons;
 - b) For a ship with a gross tonnage in excess of 500 tons, the limitation under a) above shall be applicable to the first 500 tons, and the following amounts in addition to that under a) shall be applicable to the part in excess of 500 tons:
 - For each ton from 501 to 30,000 tons: 167 Units of Account;

For each ton from 30,001 to 70,000 tons: 125 Units of Account;

For each ton in excess of 70,000 tons: 83 Units of Account.

(3) Where the amount calculated in accordance with sub-paragraph (1) above is insufficient for payment of claims for loss of life or personal injury set out therein in full, the amount calculated in accordance with sub-paragraph (2) shall be available for payment of the unpaid balance of claims under sub-paragraph (1), and such unpaid balance shall rank prorata with claims set out under sub-paragraph (2).

(4) However, without prejudice to the right of claims for loss of life or personal injury under sub-paragraph (3), claims in respect of damage to harbour works, basins and waterways and aids to navigation shall have priority over other claims under sub-paragraph (2).

(5) The limitation of liability for any salvor not operating from any ship or for any salvor operating solely on the ship to, or in respect of which, he is rendering salvage services, shall be calculated according to a gross tonnage of 1,500 tons.

The limitation of liability for ships with a gross tonnage not exceeding 300 tons and those engaging in transport services between the ports of the People's Republic of China as well as those for other coastal works shall be worked out by the competent authorities of transport and communications under the State Council and implemented after its being submitted to and approved by the State Council.

Article 211 In respect of claims for loss of life or personal injury to passengers carried by sea, the limitation of liability of the shipowner thereof shall be an amount of 46,666 Units of Account multiplied by the number of passengers which the ship is authorized to carry according to the ship's relevant certificate, but the maximum amount of compensation shall not exceed 25,000,000 Units of Account.

The limitation of liability for claims for loss of life or personal injury to passengers carried by sea between the ports of the People's Republic of China shall be worked out by the competent authorities of transport and communications under the State Council and implemented after its being submitted to and approved by the State Council.

Article 212 The limitation of liability under Article 210 and 211 of this Law shall apply to the aggregate of all claims that may arise on any given occasion against shipowners and salvors themselves, and any person for whose act, neglect or fault the shipowners and the salvors are responsible.

Article 213 Any person liable claiming the limitation of liability under this Law may constitute a limitation fund with a court having jurisdiction. The fund shall be constituted in the sum of such an amount set out respectively in Articles 210 and 211, together with the interest thereon from the date of the occurrence giving rise to the liability until the date of the constitution of the fund.

Article 214 Where a limitation fund has been constituted by a person liable, any person having made a claim against the person liable may not exercise any right against any assets of the person liable. Where any ship or other property belonging to the person constituting the fund has been arrested or attached, or, where a security has been provided by such

person, the court shall order without delay the release of the ship arrested or the property attached or the return of the security provided.

Article 215 Where a person entitled to limitation of liability under the provisions of this Chapter has a counter-claim against the claimant arising out of the same occurrence, their respective claims shall be set off against each other and the provisions of this Chapter shall only apply to the balance, if any.

CHAPTER XII CONTRACT OF MARINE INSURANCE

Section 1 Basic principles

Article 216 A contract of marine insurance is a contract whereby the insurer undertakes, as agreed, to indemnify the loss to the subject matter insured and the liability of the insured caused by perils covered by the insurance against the payment of an insurance premium by the insured.

The covered perils referred to in the preceding paragraph mean any maritime perils agreed upon between the insurer and the insured, including perils occurring in inland rivers or on land which is related to a maritime adventure.

Article 217 A contract of marine insurance mainly includes:

- (1) Name of the insurer;
- (2) Name of the insured;
- (3) Subject matter insured;
- (4) Insured value;
- (5) Insured amount;
- (6) Perils insured against and perils excepted;
- (7) Duration of insurance coverage;
- (8) Insurance premium.

Article 218 The following items may come under the subject matter of marine insurance;

- (1) Ship;
- (2) Cargo;
- (3) Income from the operation of the ship including freight, charter hire and passenger's fare;
- (4) Expected profit on cargo;
- (5) Crew's wages and other remuneration;
- (6) Liabilities to a third person;
- (7) Other property which may sustain loss from a maritime peril and the liability and expenses arising therefrom.

The insurer may reinsure the insurance of the subject matter enumerated in the preceding paragraph. Unless otherwise agreed in the contract, the original insured shall not be entitled to the benefit of the reinsurance.

Article 219 The insurable value of the subject matter insured shall be agreed upon between the insurer and the insured.

Where no insurable value has been agreed upon between the insurer and the insured, the insurable value shall be calculated as follows:

- (1) The insurable value of the ship shall be the value of the ship at the time when the insurance liability commences, being the total value of the ship's hull, machinery, equipment, fuel, stores, gear, provisions and fresh water on board as well as the insurance premium;
- (2) The insurable value of the cargo shall be the aggregate of the invoice value of the cargo or the actual value of the non-trade commodity at the place of shipment, plus freight and insurance premium when the insurance liability commences;
- (3) The insurable value of the freight shall be the aggregate of the total amount of freight payable to the carrier and the insurance premium when the insurance liability commences;
- (4) The insurable value of other subject matter insured shall be the aggregate of the actual value of the subject matter insured and the insurance premium when the insurance liability commences.

Article 220 The insured amount shall be agreed upon between the insurer and the insured. The insured amount shall not exceed the insured value. Where the insured amount exceeds the insured value, the portion in excess shall be null and void.

Section 2 Conclusion, Termination and Assignment of Contract

Article 221 A contract of marine insurance comes into being after the insured puts forth a proposal for insurance and the insurer agrees to accept the proposal and the insurer and the insured agrees on the terms and conditions of the insurance. The insurer shall issue to the insured an insurance policy or other certificate of insurance in time, and the contents of the contract shall be contained therein.

Article 222 Before the contract is concluded, the insured shall truthfully inform the insurer of the material circumstances which the insured has knowledge of or ought to have knowledge of in his ordinary business practice and which may have a bearing on the insurer in deciding the premium or whether he agrees to insure or not.

The insured need not inform the insurer of the facts which the insurer has known of or the insurer ought to have knowledge of in his ordinary business practice if about which the insurer made no inquiry.

Article 223 Upon failure of the insured to truthfully inform the insurer of the material circumstances set forth in paragraph 1 of Article 222 of this Law due to his intentional act, the insurer has the right to terminate the contract without refunding the premium. The insurer shall not be liable for any loss arising from the perils insured against before the contract is terminated.

If, not due to the insured's intentional act, the insured did not truthfully inform the insurer of the material circumstances set out in paragraph 1 of Article 222 of this Law, the insurer has the right to terminate the contract or to demand a corresponding increase in the premium. In case the contract is terminated by the insurer, the insurer shall be liable for the loss arising from the perils insured against which occurred prior to the termination of the contract, except where the material circumstances uninformed or wrongly informed of have an impact on the occurrence of such perils.

Article 224 Where the insured was aware or ought to be aware that the subject matter

insured had suffered a loss due to the incidence of a peril insured against when the contract was concluded, the insurer shall not be liable for indemnification but shall have the right to the premium. Where the insurer was aware or ought to be aware that the occurrence of a loss to the subject matter insured due to a peril insured against was impossible, the insured shall have the right to recover the premium paid.

Article 225 Where the insured concludes with several insurers for the same subject matter insured and against the same risk, and the insured amount of the said subject matter insured thereby exceeds the insured value, then, unless otherwise agreed in the contract, the insured may demand indemnification from any of the insurers and the aggregate amount to be indemnified shall not exceed the loss value of the subject matter insured. The liability of each insurer shall be in proportion to that which the amount he insured bears to the total of the amounts insured by all insurers. Any insurer who has paid an indemnification in an amount greater than that for which he is liable, shall have the right of recourse against those who have not paid their indemnification in the amounts for which they are liable.

Article 226 Prior to the commencement of the insurance liability, the insured may demand the termination of the insurance contract but shall pay the handling fees to the insurer, and the insurer shall refund the premium.

Article 227 Unless otherwise agreed in the contract, neither the insurer nor the insured may terminate the contract after the commencement of the insurance liability.

Where the insurance contract provides that the contract may be terminated after the commencement of the liability, and the insured demands the termination of the contract, the insurer shall have the right to the premium payable from the day of the commencement of the insurance liability to the day of termination of the contract and refund the remaining portion. If it is the insurer who demands the termination of the contract, the unexpired premium from the day of the termination of the contract to the day of the expiration of the period of insurance shall be refunded to the insured.

Article 228 Notwithstanding the stipulations in Article 227 of this Law, the insured may not demand termination of the contract for cargo insurance and voyage insurance on ship after the commencement of the insurance liability.

Article 229 A contract of marine insurance for the carriage of goods by sea may be assigned by the insured by endorsement or otherwise, and the rights and obligations under the contract are assigned accordingly. The insured and the assignee shall be jointly and severally liable for the payment of the premium if such premium remains unpaid up to the time of the assignment of the contract.

Article 230 The consent of the insurer shall be obtained where the insurance contract is assigned in consequence of the transfer of the ownership of the ship insured. In the absence of such consent, the contract shall be terminated from the time of the transfer of the ownership of the ship. Where the transfer takes place during the voyage, the contract shall be terminated when the voyage ends.

Upon termination of the contract, the insurer shall refund the unexpired premium to the

insured calculated from the day of the termination of the contract to the day of its expiration.
Article 231 The insured may conclude an open cover with the insurer for the goods to be shipped or received in batches within a given period. The open cover shall be evidenced by an open policy to be issued by the insurer.

Article 232 The insurer shall, at the request of the insured, issued insurance certificates separately for the cargo shipped in batches according to the open cover.

Where the contents of the insurance certificates issued by the insurer separately differ from those of the open policy, the insurance certificates issued separately shall prevail.

Article 233 The insured shall notify the insurer immediately on learning that the cargo insured under the open cover has been shipped or has arrived. The items to be notified of shall include the name of the carrying ship, the voyage, the value of the cargo and the insured amount.

Section 3 Obligation of the Insured

Article 234 Unless otherwise agreed in the insurance contract, the insured shall pay the premium immediately upon conclusion of the contract. The insurer may refuse to issue the insurance policy or other insurance certificate before the premium is paid by the insured.

Article 235 The insured shall notify the insurer in writing immediately where the insured has not complied with the warranties under the contract. The insurer may, upon receipt of the notice, terminate the contract or demand an amendment to the terms and conditions of the insurance coverage or an increase in the premium.

Article 236 Upon the occurrence of the peril insured against, the insured shall notify the insurer immediately and shall take necessary and reasonable measures to avoid or minimize the loss. Where special instructions for the adoption of reasonable measures to avoid or minimize the loss are received from the insurer, the insured shall act according to such instructions.

The insurer shall not be liable for the extended loss caused by the insured's breach of the provisions of the preceding paragraph.

Section 4 Liability of the Insurer

Article 237 The insurer shall indemnify the insured promptly after the loss from a peril insured against has occurred.

Article 238 The insurer's indemnification for the loss from the peril insured against shall be limited to the insured amount. Where the insured amount is lower than the insured value, the insurer shall indemnify in the proportion that the insured amount bears to the insured value.

Article 239 The insurer shall be liable for the loss to the subject matter insured arising from several perils insured against during the period of the insurance even though the aggregate of the amounts of loss exceeds the insured amount. However, the insurer shall only be liable for the total loss where the total loss occurs after the partial loss which has not been repaired.

Article 240 The insurer shall pay, in addition to the indemnification to be paid with regard to the subject matter insured, the necessary and reasonable expenses incurred by the insured

for avoiding or minimizing the loss recoverable under the contract, the reasonable expenses for survey and assessment of the value for the purpose of ascertaining the nature and extent of the peril insured against and the expenses incurred for acting on the special instructions of the insurer.

The payment by the insurer of the expenses referred to in the preceding paragraph shall be limited to that equivalent to the insured amount.

Where the insured amount is lower than the insured value, the insurer shall be liable for the expenses referred to in this Article in the proportion that the insured amount bears to the insured value, unless the contract provides otherwise.

Article 241 Where the insured amount is lower than the value for contribution under the general average, the insurer shall be liable for the general average contribution in the proportion that the insured amount bears to the value for contribution.

Article 242 The insurer shall not be liable for the loss caused by the intentional act of the insured.

Article 243 Unless otherwise agreed in the insurance contract, the insurer shall not be liable for the loss of or damage to the insured cargo arising from any of the following causes:

- (1) Delay in the voyage or in the delivery of cargo or change of market price;
- (2) Fair wear and tear, inherent vice or nature of the cargo;
- (3) Improper packing.

Article 244 Unless otherwise agreed in the insurance contract, the insurer shall not be liable for the loss of or damage to the insured ship arising from any of the following causes:

- (1) Unseaworthiness of the ship at the time of the commencement of the voyage, unless where under a time policy the insured has no knowledge thereof;
- (2) Wear and tear or corrosion of the ship.

The provisions of this Article shall apply mutatis mutandis to the insurance of freight.

Section 5 Loss of or Damage to the Subject Matter Insured and Abandonment

Article 245 Where after the occurrence of a peril insured against the subject matter insured is lost or is so seriously damaged that it is completely deprived of its original structure and usage or the insured is deprived of the possession thereof, it shall constitute an actual total loss.

Article 246 Where a ship's total loss is considered to be unavoidable after the occurrence of a peril insured against or the expenses necessary for avoiding the occurrence of an actual total loss would exceed the insured value, it shall constitute a constructive total loss.

Where an actual total loss is considered to be unavoidable after the cargo has suffered a peril insured against, or the expenses to be incurred for avoiding the total actual loss plus that for forwarding the cargo to its destination would exceed its insured value, it shall constitute a constructive total loss.

Article 247 Any loss other than an actual total loss or a constructive total loss is a partial loss.

Article 248 Where a ship fails to arrive at its destination within a reasonable time from the place where it was last heard of, unless the contract provides otherwise, if it remains unheard

of upon the expiry of two months, it shall constitute missing. Such missing shall be deemed to be an actual total loss.

Article 249 Where the subject matter insured has become a constructive total loss and the insured demands indemnification from the insurer on the basis of a total loss, the subject matter insured shall be abandoned to the insurer. The insurer may accept the abandonment or choose not to, but shall inform the insured of his decision whether to accept the abandonment within a reasonable time. The abandonment shall not be attached with any conditions.

Once the abandonment is accepted by the insurer, it shall not be withdrawn.

Article 250 Where the insurer has accepted the abandonment, all rights and obligations relating to the property abandoned are transferred to the insurer.

Section 6 Payment of Indemnity

Article 251 After the occurrence of a peril insured against and before the payment of indemnity, the insurer may demand that the insured submit evidence and materials related to the ascertainment of the nature of the peril and the extent of the loss.

Article 252 Where the loss of or damage to the subject matter insured within the insurance coverage is caused by a third person, the right of the insured to demand compensation from the third person shall be subrogated to the insurer from the time the indemnity is paid. The insured shall furnish the insurer with necessary documents and information that should come to his knowledge and shall endeavour to assist the insurer in pursuing recovery from the third person.

Article 253 Where the insured waives his right of claim against the third person without the consent of the insurer or the insurer is unable to exercise the right of recourse due to the fault of the insured, the insurer may make a corresponding reduction from the amount of indemnity.

Article 254 In effecting payment of indemnity to the insured, the insurer may make a corresponding reduction therefrom of the amount already paid by a third person to the insured.

Where the compensation obtained by the insurer from the third person exceeds the amount of indemnity paid by the insurer, the part in excess shall be returned to the insured.

Article 255 After the occurrence of a peril insured against, the insurer is entitled to waive his right to the subject matter insured any pay the insured the amount in full to relieve himself of the obligations under the contract.

In exercising the right prescribed in the preceding paragraph, the insurer shall notify the insured thereof within seven days from the day of the receipt of the notice from the insured regarding the indemnity. The insurer shall remain liable for the necessary and reasonable expenses paid by the insured for avoiding or minimizing the loss prior to his receipt of the said notice.

Article 256 Except as stipulated in Article 255 of this Law, where a total loss occurs to the subject matter insured and the full insured amount is paid, the insurer shall acquire the full

right to the subject matter insured. In the case of under-insurance, the insurer shall acquire the right to the subject matter insured in the proportion that the insured amount bears to the insured value.

CHAPTER XIII LIMITATION OF TIME

Article 257 The Limitation period for claims against the carrier with regard to the carriage of goods by sea is one year, counting from the day on which the goods were delivered or should have been delivered by the carrier. Within the limitation period or after the expiration thereof, if the person allegedly liable has brought up a claim of recourse against a third person, that claim is time-barred at the expiration of 90 days, counting from the day on which the person claiming for the recourse settled the claim, or was served with a copy of the process by the court handling the claim against him.

The limitation period for claims against the carrier with regard to voyage charter party is two years, counting from the day on which the claimant knew or should have known that his right had been infringed.

Article 258 The limitation period for claims against the carrier with regard to the carriage of passengers by sea is two years, counting respectively as follows:

(1) Claims for personal injury: Counting from the day on which the passenger disembarked or should have disembarked;

(2) Claims for death of passengers that occurred during the period of carriage: Counting from the day on which the passenger should have disembarked; whereas those for the death of passengers that occurred after the disembarkation but resulted from an injury during the period of carriage by sea, counting from the day of the death of the passenger concerned, provided that this period does not exceed three years from the time of disembarkation.

(3) Claims for loss of or damage to the luggage: Counting from the day of disembarkation or the day on which the passenger should have disembarked.

Article 259 The limitation period for claims with regard to charter parties is two years, counting from the day on which the claimant knew or should have known that his right had been infringed.

Article 260 The limitation period for claims with regard to sea towage is one year, counting from the day on which the claimant knew or should have known that his right had been infringed.

Article 261 The limitation period for claims with regard to collision of ships is two years, counting from the day on which the collision occurred. The limitation period for claims with regard to the right of recourse as provided for in paragraph 3 of Article 169 of this Law is one year, counting from the day on which the parties concerned jointly and severally paid the amount of compensation for the damage occurred.

Article 262 The limitation period for claims with regard to salvage at sea is two years, counting from the day on which the salvage operation was completed.

Article 263 The limitation period for claims with regard to contribution in general average is one year, counting from the day on which the adjustment was finished.

Article 264 The limitation period for claims with regard to contracts of marine insurance is two years, counting from the day on which the peril insured against occurred.

Article 265 The limitation period for claims with regard to compensation for oil pollution damage from ships is three years, counting from the day on which the pollution damage occurred. However, in no case shall the limitation period exceed six years, counting from the day on which the accident causing the pollution occurred.

Article 266 Within the last six months of the limitation period if, on account of force majeure or other causes preventing the claims from being made, the limitation period shall be suspended. The counting of the limitation period shall be resumed when the cause of suspension no longer exists.

Article 267 The limitation of time shall be discontinued as a result of bringing an action or submitting the case for arbitration by the claimant or the admission to fulfill obligations by the person against whom the claim was brought up. However, the limitation of time shall not be discontinued if the claimant withdraws his action or his submission for arbitration, or his action has been rejected by a decision of the court.

Where the claimant makes a claim for the arrest of a ship, the limitation of time shall be discontinued from the day on which the claim is made.

The limitation period shall be counted anew from the time of discontinuance.

CHAPTER XIV APPLICATION OF LAW IN RELATION TO FOREIGN-RELATED MATTERS

Article 268 If any international treaty concluded or acceded to by the People's Republic of China contains provisions differing from those contained in this Law, the provisions of the relevant international treaty shall apply, unless the provisions are those on which the People's Republic of China has announced reservations.

International practice may be applied to matters for which neither the relevant laws of the People's Republic of China nor any international treaty concluded or acceded to by the People's Republic of China contain any relevant provisions.

Article 269 The parties to a contract may choose the law applicable to such contract, unless the law provides otherwise. Where the parties to a contract have not made a choice, the law of the country having the closest connection with the contract shall apply.

Article 270 The law of the flag State of the ship shall apply to the acquisition, transfer and extinction of the ownership of the ship.

Article 271 The law of the flag State of the ship shall apply to the mortgage of the ship. The law of the original country of registry of a ship shall apply to the mortgage of the ship if its mortgage is established before or during its bareboat charter period.

Article 272 The law of the place where the court hearing the case is located shall apply to matters pertaining to maritime liens.

Article 273 The law of the place where the infringing act is committed shall apply to claims for damages arising from collision of ships.

The law of the place where the court hearing the case is located shall apply to claims for

damages arising from collision of ships on the high sea.

If the colliding ships belong to the same country, no matter where the collision occurs, the law of the flag State shall apply to claims against one another for damages arising from such collision.

Article 274 The law where the adjustment of general average is made shall apply to the adjustment of general average.

Article 275 The law of the place where the court hearing the case is located shall apply to the limitation of liability for maritime claims.

Article 276 The application of foreign laws or international practices pursuant to the provisions of this Chapter shall not jeopardize the public interests of the People's Republic of China.

CHAPTER XV SUPPLEMENTARY PROVISIONS

Article 277 The Unit of Account referred to in this Law is the Special Drawing Right as defined by the International Monetary Fund; the amount of the Chinese currency (RMB) in terms of the Special Drawing Right shall be that computed on the basis of the method of conversion established by the authorities in charge of foreign exchange control of this country on the date of the judgment by the court or the date of the award by the arbitration organization or the date mutually agreed upon by the parties.

Article 278 This Law shall come into force as of July 1, 1993.

12. Wild Animal Conservation Law of the People's Republic of China

(Adopted at the 4th Session of the Standing Committee of the Seventh National People's Congress on November 8, 1988; amended for the first time in accordance with the Decision to Amend the Wild Animal Conservation Law of the People's Republic of China adopted at the 11th Session of the Standing Committee of the Tenth National People's Congress on August 28, 2004; amended for the second time in accordance with the Decision to Amend Certain Laws adopted at the 10th Session of the Standing Committee of the Eleventh National People's Congress on August 27, 2009; and revised at the 21st Session of the Standing Committee of the Twelfth National People's Congress on July 2, 2016)

Chapter I General Provisions

Article 1 This Law is enacted for the purposes of conserving wild animals, saving rare and endangered species of wild animals, maintaining biological diversity and ecological balance, and advancing ecological civilization.

Article 2 The conservation of wild animals and associated activities within the territory of the People's Republic of China and other sea areas under the jurisdiction of the People's Republic of China shall be governed by this Law.

“Wild animals” conserved in this Law means the rare and endangered species of terrestrial and aquatic wild animals and the terrestrial wild animals of significant ecological, scientific, or social value.

“Wild animals and their products” in this Law means the whole (including spawns and eggs), parts, and derivatives of wild animals.

The conservation of aquatic wild animals other than the rare and endangered species of aquatic wild animals shall be governed by the Fisheries Law of the People's Republic of China and other relevant laws.

Article 3 Wild animal resources are owned by the state.

The state protects the lawful rights and interests of organizations and individuals engaging in wild animal conservation and associated activities in accordance with the law, such as scientific research and artificial breeding.

Article 4 The state applies the principles of “conservation first, regulated utilization, and stringent supervision” to wild animals, encourages scientific research on wild animals, cultivates citizens' awareness of wild animal conservation, and promotes the harmonious development of human and nature.

Article 5 The state conserves wild animals and their habitats. The people's governments at or above the county level shall develop general plans and measures for the conservation of wild animals and their habitats, and include the funding for the conservation of wild animals into their budgets.

The state encourages citizens, legal persons, and other organizations to participate in wild animal conservation activities by donations, financial aids, voluntary services, and other means in accordance with the law, and supports public undertakings for wild animal conservation.

“Wild animal habitats” in this Law means the major areas where the wild populations of wild animals live and breed.

Article 6 All organizations and individuals shall have the obligation to conserve wild animals and their habitats. It shall be prohibited to illegally hunt wild animals or destruct the habitats of wild animals.

All organizations and individuals shall have the right to report violations of this Law to or file accusations of violations of this Law with the relevant departments and authorities. The competent departments of wild animal conservation and other relevant departments and authorities shall, in a timely manner, handle the reports or accusations in accordance with the law.

Article 7 The competent departments of forestry and fisheries of the State Council shall respectively take charge of the conservation of terrestrial and aquatic wild animals nationwide.

The competent departments of forestry and fisheries of the local people's governments at or above the county level shall respectively take charge of the conservation of terrestrial and aquatic wild animals within their respective administrative regions.

Article 8 The people's governments at all levels shall strengthen the publicity, education, and popularization of science on wild animal conservation, and encourage and support activities of publicity of the laws and regulations and the knowledge on wild animal conservation

conducted by the basic-level people's autonomous organizations, social organizations, enterprises, public institutions, and volunteers.

Education administrative departments and schools shall provide students with education on wild animal conservation knowledge.

News media shall conduct publicity of the laws and regulations and the knowledge on wild animal conservation, and conduct supervision by public opinions against illegal acts.

Article 9 Organizations and individuals that have made remarkable achievements in wild animal conservation or scientific research on wild animals shall be rewarded by the people's governments at or above the county level.

Chapter II Conservation of Wild Animals and Their Habitats

Article 10 The state conducts conservation of wild animals by classification and grading.

The state places the rare and endangered species of wild animals under priority conservation. Species of wild animals under state priority conservation are divided into wild animals under Grade-I conservation and wild animals under Grade-II conservation. The list of wild animals under state priority conservation shall be developed by the competent department of wild animal conservation of the State Council after organization of scientific evaluation, and adjustments to the list shall be determined every five years according to results of evaluation. The list of wild animals under state priority conservation shall be reported to the State Council for approval and publication.

Wild animals under local priority conservation are wild animals under priority conservation by provinces, autonomous regions, or municipalities directly under the Central Government other than those under state priority conservation. The lists of wild animals under local priority conservation shall be developed, adjusted, and published by the people's governments of provinces, autonomous regions, or municipalities directly under the Central Government after organization of scientific evaluation.

The lists of terrestrial wild animals of significant ecological, scientific, or social value shall be developed, adjusted, and published by the competent department of wild animal conservation of the State Council after organization of scientific evaluation.

Article 11 The competent departments of wild animal conservation of the people's governments at or above the county level shall, on a regular basis, organize, or authorize relevant scientific research institutions to conduct, survey, monitoring, and evaluation of the status of wild animals and their habitats, and establish and improve the archives of wild animals and their habitats.

The survey, monitoring, and evaluation of the status of wild animals and their habitats shall include the following:

- (1) Distribution areas and population sizes and structures in the wild of wild animals.
- (2) Areas and ecological status of the habitats of wild animals.
- (3) Major factors threatening wild animals and their habitats.
- (4) Artificial breeding of wild animals and other circumstances requiring survey, monitoring, and evaluation.

Article 12 The competent department of wild animal conservation of the State Council shall, in conjunction with the relevant departments of the State Council, determine and issue the lists of major habitats of wild animals according to the results of the survey, monitoring, and evaluation of the status of wild animals and their habitats.

The people's governments at or above the provincial level shall delimit relevant nature reserves in accordance with the law to conserve wild animals and their important habitats and protect, restore and improve the living environment of wild animals. Where the conditions for the delimitation of relevant nature reserves are not met, the people's governments at or above the county level may conserve wild animals and their habitats by delimiting no-hunting (or no-fishing) zones or prescribing closed hunting (or fishing) seasons or other means.

Human disturbances threatening the living and breeding of wild animals, such as introducing alien species into relevant nature reserves, creating pure forests, and excessively spraying pesticides, shall be prohibited or restricted.

The relevant nature reserves shall be delimited and administered in accordance with the provisions of relevant laws and regulations.

Article 13 The people's governments at or above the county level and the relevant departments shall, during the relevant development and utilization planning, take into full consideration the needs for the conservation of wild animals and their habitats, analyze, predict, and evaluate the possible overall impacts of the implementation of the plans on the conservation of wild animals and their habitats, and avoid or reduce the possible adverse consequences of the implementation of the plans.

It shall be prohibited to construct, in relevant nature reserves, any projects which are not allowed to be constructed under relevant laws and regulations. The site and line selection for airport, railway, highway, water conservancy and hydropower, cofferdams, sea reclamation, and other construction projects shall avoid relevant nature reserves and wild animals' migration routes; and if the avoidance thereof is impossible, measures such as the construction of migration channels for wild animals and fish passage facilities shall be taken to eliminate or reduce the adverse impacts on wild animals.

Where any construction project may impact the relevant nature reserves or wild animals' migration routes, the departments in charge of approval of environmental impact assessment documents shall, in the process of approving environmental impact assessment documents, solicit the opinions of the competent department of wild animal conservation of the State Council if wild animals under state priority conservation are involved; or solicit the opinions of the competent departments of wild animal conservation of the people's governments of provinces, autonomous regions, or municipalities directly under the Central Government if wild animals under local priority conservation are involved.

Article 14 The competent departments of wild animal conservation at all levels shall oversee and monitor the impacts of environment on wild animals. If any environmental impact causes harm to wild animals, the competent departments of wild animal conservation shall

investigate and handle such impacts in conjunction with the relevant departments.

Article 15 Where the wild animals under state or local priority conservation are threatened by any natural disaster, major environmental pollution accident, or other emergency, the local people's governments shall take emergency rescue measures in a timely manner.

The competent departments of wild animal conservation at or above the county level shall organize the sheltering and rescue of wild animals in accordance with the relevant provisions issued by the state.

It shall be prohibited to trade in wild animals and their products in the name of sheltering or rescuing wild animals.

Article 16 The competent departments of wild animal conservation and the competent departments of veterinarians of the people's governments at or above the county level shall, according to the division of their functions, monitor the epidemic sources and epidemic diseases of wild animals, organize prediction, forecasting, and other work, develop contingency plans for epidemic situations of wild animals, and report them to the people's governments at the same levels for approval or recordation.

The competent departments of wild animal conservation, the competent departments of veterinarians, the competent departments of health of the people's governments at or above the county level shall, according to the division of their functions, be responsible for the prevention and control management of infectious diseases of animals related to anthroozoonosis.

Article 17 The state shall strengthen the conservation of genetic resources of wild animals, and conduct rescuing conservation of the endangered species of wild animals.

The competent department of wild animal conservation of the State Council shall, in conjunction with the relevant departments of the State Council, conduct planning on the conservation and utilization of genetic resources of wild animals, establish a national gene bank of genetic resources of wild animals, and implement priority conservation of the genetic resources of rare and endangered species of wild animals originating in China.

Article 18 The relevant local people's governments shall take measures to prevent and control the damage possibly caused by wild animals to guarantee the safety of human beings and livestock and the agricultural and forestry production.

Article 19 Where any human casualties or any crop or other property losses are caused by the conservation of wild animals as required to be conserved under this Law, the local people's governments shall make compensation. The specific measures shall be developed by the people's governments of provinces, autonomous regions, or municipalities directly under the Central Government. The relevant local people's governments may impel insurance institutions to provide insurance compensation for damage caused by wild animals.

The relevant local people's governments shall be subsidized by the central finance in accordance with the relevant provisions issued by the state for the funding necessary for them to take measures for preventing and controlling the damage caused by wild animals

under state priority conservation and make compensation.

Chapter III Wild Animal Administration

Article 20 It shall be prohibited to hunt or catch wild animals or otherwise disturb the living and breeding of wild animals within the relevant nature reserves and the no-hunting (or no-fishing) zones or during the closed hunting (or fishing) seasons, except as otherwise specified by laws and regulations.

During the migration periods of wild animals, hunting or catching wild animals shall be prohibited, and activities otherwise disturbing the living and breeding of wild animals shall be strictly restricted, within the migration routes other than the areas prescribed in the preceding paragraph. The scope of migration routes and the activities disturbing the living and breeding of wild animals shall be prescribed and published by the people's governments at or above the county level or their competent departments of wild animal conservation.

Article 21 Hunting, catching, or killing wild animals under state priority conservation shall be prohibited.

Where it is necessary to hunt or catch any wild animals under Grade-I state conservation for scientific research, population control, or monitoring of epidemic sources and epidemic diseases or under other special circumstances, an application for a special hunting or catching permit shall be filed with the competent department of wild animal conservation of the State Council. Where it is necessary to hunt or catch any wild animals under Grade-II state conservation, an application for a special hunting or catching permit shall be filed with the competent department of wild animal conservation of the people's government of the province, autonomous region, or municipality directly under the Central Government.

Article 22 Whoever intends to hunt or catch any wild animals not under state priority conservation shall obtain, in accordance with the law, a hunting or catching permit issued by the competent department of wild animal conservation of the local government at or above the county level, and be subject to the hunting quota management.

Article 23 A hunter or catcher of wild animals shall hunt or catch wild animals according to the species, quantity, location, tools, means, and time limit as set forth in the special hunting or catching permit or the hunting license.

Whoever intends to hunt or catch any wild animals with a gun must obtain a gun license issued by the public security authority.

Article 24 Hunting with poisons, explosives, electric shock and electronic trapping devices, hunting snares and clamps, gun traps, volley guns, and other tools shall be prohibited, and illuminated hunting at night, annihilation hunting by encirclement, and hunting by destruction of nests, fire attack, smoke attack, net capturing, and other means shall be prohibited, except that net capturing or electronic trapping is necessary for scientific research.

The prohibited hunting and catching tools and means other than those as set forth in the preceding paragraph shall be prescribed and published by the local people's governments at or above the county level.

Article 25 The state supports the artificial breeding of wild animals under state priority

conservation by relevant scientific research institutions for the purpose of species conservation.

The artificial breeding of wild animals under state priority conservation for any purpose other than that as prescribed in the preceding paragraph shall be subject to a licensing system. Whoever intends to artificially breed wild animals under state priority conservation shall obtain an artificial breeding license upon approval of the competent department of wild animal conservation of the people's government of the province, autonomous region, or municipality directly under the Central Government, except that the State Council provides otherwise for the approval authorities.

In the artificial breeding of wild animals under state priority conservation, the progeny and provenance under artificial breeding shall be used, and species pedigree, breeding archives, and individual data shall be maintained. Where it is necessary to adopt wild provenance for the purpose of species conservation, the provisions of Articles 21 and 23 of this Law shall apply.

“Progeny under artificial breeding” in this Law means the offspring individuals bred and born under artificial control with their parents also born under artificial control.

Article 26 The artificial breeding of wild animals under state priority conservation shall be conducive to species conservation and scientific research thereon, and may not destroy the wild population resources; it shall be ensured according to the habits of wild animals that the necessary conditions for activity space, living and breeding, and hygiene and health of wild animals are met, there are places, facilities, and technologies suitable for the breeding purposes and varieties and development scales, and the relevant technical standards and epidemic prevention requirements are satisfied; and no wild animals shall be abused.

The competent departments of wild animal conservation of the people's governments at or above the provincial level may, as needed for conservation of wild animals under state priority conservation, organize the release of wild animals under state priority conservation to wild environment.

Article 27 It shall be prohibited to sell, purchase, or utilize wild animals under state priority conservation and their products.

Where it is necessary to sell, purchase, or utilize wild animals under state priority conservation and their products for scientific research, artificial breeding, public display or performance, or cultural relics conservation or under other special circumstances, the approval from the competent departments of wild animal conservation of the people's governments of provinces, autonomous regions, or municipalities directly under the Central Government shall be obtained, and special labels shall be obtained and used in accordance with the relevant provisions to ensure traceability, except that the State Council provides otherwise for the approval authorities.

The scope of and the administrative measures for the special labels for wild animals under state priority conservation and their products shall be developed by the competent department of wild animal conservation of the State Council.

Whoever sells or utilizes wild animals not under state priority conservation shall provide certificates on legal sources such as hunting or import and export.

Whoever sells wild animals prescribed in paragraphs 2 and 4 of this Article shall also attach quarantine certificates in accordance with the law.

Article 28 Wild animals under state priority conservation for which the artificial breeding technologies are mature and stable shall, upon scientific demonstration, be included in the list of wild animals under state priority conservation for artificial breeding as developed by the competent department of wild animal conservation of the State Council. For wild animals and their products included in the list, the special labels may be directly obtained based on the artificial breeding licenses according to the annual production quantities authorized by the competent departments of wild animal conservation of the people's governments of provinces, autonomous regions, and municipalities directly under the Central Government, and the wild animals and their products may be sold and utilized based on the special labels to ensure traceability.

When the list of wild animals under state priority conservation as mentioned in Article 10 of this Law is adjusted, the artificial populations of the wild animals for which the relevant artificial breeding technologies are mature and stable as prescribed in the preceding paragraph may no longer be included in the list of wild animals under state priority conservation according to the status of conservation of relevant wild populations, and management measures different from those for wild populations may be taken, but the artificial breeding licenses and special labels shall be obtained in accordance with the provisions of paragraph 2 of Article 25 and paragraph 1 of this Article of this Law.

Article 29 The utilization of wild animals and their products shall be primarily based on artificial breeding populations, be conducive to the maintenance of wild populations, and satisfy the requirements of developing ecological civilization; social morality shall be respected; and laws and regulations and the relevant provisions issued by the state shall be complied with.

Where wild animals and their products are distributed and utilized as drugs, the laws and regulations on drug administration shall also be complied with.

Article 30 It shall be prohibited to produce or distribute food made of wild animals under state priority conservation and their products or food made of wild animals not under state priority conservation and their products without certificates on legal sources.

It shall be prohibited to illegally purchase wild animals under state priority conservation and their products for eating.

Article 31 It shall be prohibited to publish advertisements for selling, purchasing, or utilizing wild animals or for prohibited hunting or catching tools. It shall be prohibited to publish advertisements for the illegal sale, purchase or utilization of products of wild animals.

Article 32 Online trading platforms, commodity trading markets, and other trading venues shall be prohibited from providing trading services for the illegal sale, purchase, and utilization of wild animals and their products or prohibited hunting or catching tools.

Article 33 Whoever transports, carries, or delivers wild animals under state priority conservation or their products or wild animals prescribed in paragraph 2 of Article 28 of this Law or their products out of a county shall hold or attach the duplicate of the license or approval document or the special labels prescribed in Article 21, 25, 27, or 28 of this Law and the quarantine certificates.

Whoever transports wild animals not under state priority conservation out of a county shall hold the certificates on legal sources such as hunting or import and export and the quarantine certificates.

Article 34 The competent departments of wild animal conservation of the people's governments at or above the county level shall supervise and administer the scientific research, artificial breeding, public display or performance, and other activities utilizing wild animals and their products.

The other relevant departments of the people's governments at or above the county level shall, according to the division of their functions, supervise and inspect the sale, purchase, utilization, transportation, and delivery, among others, of wild animals and their products.

Article 35 The lists of wild animals and their products prohibited or restricted from trade under international conventions concluded or acceded to by the People's Republic of China shall be developed, adjusted, and published by the administrative authority of the state in charge of the import and export of endangered species.

To import and export wild animals or their products included in the lists in the preceding paragraph or export wild animals under state priority conservation or their products, the approval from the competent department of wild animal conservation of the State Council or from the State Council shall be obtained, and the certificate allowing import and export issued by the administrative authority of the state in charge of the import and export of endangered species shall also be obtained. Entry and exit quarantine shall be implemented in accordance with the law. The Customs shall handle the customs clearance formalities on the basis of the certificate allowing import and export and quarantine certificates in accordance with the relevant provisions.

The export of any species of wild animals involving science and technology confidentiality shall be handled in accordance with the relevant provisions issued by the State Council.

The wild animals included in the list in paragraph 1 of this Article shall, upon confirmation by the competent department of wild animal conservation of the State Council, be administered as wild animals under state priority conservation within the scope of application of this Law.

Article 36 The state shall organize international cooperation and exchange on wild animal conservation and relevant law enforcement; and establish an inter-departmental coordination mechanism for preventing and suppressing the smuggling of and illicit trading in wild animals and their products, and take action to prevent and suppress the smuggling of and illicit trading in wild animals and their products.

Article 37 The introduction of any species of wild animals from abroad shall be subject to the approval of the competent department of wild animal conservation of the State Council.

Where any species of wild animals included in the list in paragraph 1 of Article 35 of this Law is introduced from abroad, the certificate allowing import and export shall also be obtained in accordance with the law. Entry quarantine shall be implemented in accordance with the law. The Customs shall handle the customs clearance formalities on the basis of the import approval document or the certificate allowing import and export and the quarantine certificate in accordance with the relevant provisions.

Where any species of wild animals is introduced from abroad, safe and reliable preventive measures shall be taken to prevent the wild animals from entering wild environment and avoid any damage to the ecosystem. If it is necessary to release them to wild environment, it shall comply with the relevant provisions issued by the state.

Article 38 Any organization or individual that releases captured wild animals to wild environment shall select the local species suitable for surviving in the wild at the places of release, and such release shall cause no disturbances in the normal life and production of local residents, and avoid any damage to the ecosystem. Where any organization or individual that releases wild animals at will causes any bodily injury or property damage to any other person or causes any damage to the ecosystem, the organization or individual shall be held liable in accordance with the law.

Article 39 It shall be prohibited to forge, alter, purchase, sell, transfer, or lease the special hunting or catching permits, the hunting licenses, the artificial breeding licenses or special labels, the approval documents for selling, purchasing, or utilizing wild animals under state priority conservation or their products, the certificates allowing import and export, or the import and export approval documents, among others.

The information on issuance of the relevant licenses, special labels, and approval documents as prescribed in the preceding paragraph shall be disclosed to the public in accordance with the law.

Article 40 Foreigners intending to conduct field surveys or make films or videos of wild animals under state priority conservation in China shall be subject to the approval of the competent departments of wild animal conservation of the people's governments of provinces, autonomous regions, or municipalities directly under the Central Government or the entities authorized by them, and comply with the provisions of relevant laws and regulations.

Article 41 The measures for the administration of wild animals under local priority conservation and other wild animals not under state priority conservation shall be developed by the people's congresses of provinces, autonomous regions, or municipalities directly under the Central Government or their standing committees.

Chapter IV Legal Liability

Article 42 Where a competent department of wild animal conservation or any other relevant department or authority fails to make an administrative licensing decision in accordance with the law, fails to investigate and punish any violation of the law after discovering it or receiving a report on it or legally investigate and punish the violation of the law, abuses its power, or

otherwise fails to perform its functions in accordance with the law, the people's government at the same level or the relevant department or authority of the people's government at a higher level shall order it to take corrective action, and take disciplinary action of a demerit, a major demerit, or demotion against the liable official in charge and other directly liable persons; if the consequences of the conduct are serious, it shall take disciplinary action of removal from office or expulsion against them, and the primary person in charge thereof shall resign to assume responsibility for the conduct; or if the conduct is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Article 43 Violators of paragraph 3 of Article 12 or paragraph 2 of Article 13 of this Law shall be punished in accordance with the provisions of relevant laws and regulations.

Article 44 Whoever, in violation of paragraph 3 of Article 15 of this Law, trades in wild animals or their products in the name of sheltering or recuing wild animals shall be fined not less than two nor more than ten times the value of the wild animals or their products by the competent department of wild animal conservation of the people's government at or above the county level, with the wild animals or their products and all illegal income confiscated, and the relevant information on the violation shall be recorded in the violator's social credit file and announced to the public; and if the violation is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Article 45 Whoever, in violation of Article 20, Article 21, paragraph 1 of Article 23, or paragraph 1 of Article 24, hunts or catches any wild animal under state priority conservation in a relevant nature reserve or a no-hunting (or no-fishing) zone or during a closed hunting (or fishing) season, hunts, catches, or kills any wild animal under state priority conservation without a special hunting or catching permit or against the requirements of a special hunting or catching permit, or hunts or catches any wild animal under state priority conservation with a prohibited tool or by a prohibited means shall be fined not less than two nor more than ten times the value of the catch or if there is no catch, be fined not less than 10,000 yuan nor more than 50,000 yuan by the competent department of wild animal conservation of the people's government at or above the county level, the oceanic law enforcement department, or the administrative authority of the relevant reserve according to the division of their functions, with the catch, the hunting or catching tool, and all illegal income confiscated and the special hunting or catching permit revoked; and if the violation is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Article 46 Whoever, in violation of Article 20, Article 21, paragraph 1 of Article 23, or paragraph 1 of Article 24, hunts or catches any wild animal not under state priority conservation in a relevant nature reserve or a no-hunting (or no-fishing) zone or during a closed hunting (or fishing) season, hunts, catches, or kills any wild animal not under state priority conservation without a special hunting or catching permit or against the requirements of a special hunting or catching permit, or hunts or catches any wild animal not under state priority conservation with a prohibited tool or by a prohibited means shall be fined not less than the value nor more than five times the value of the catch or if there is no catch, be fined

not less than 2,000 yuan nor more than 10,000 yuan by the competent department of wild animal conservation of the people's government at or above the county level or the administrative authority of the relevant reserve according to the division of their functions, with the catch, the hunting or catching tool, and all illegal income confiscated and the special hunting or catching permit revoked; and if the violation is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Whoever, in violation of paragraph 2 of Article 23 of this Law, hunts or catches any wild animal with a gun without obtaining a gun license, which constitutes a violation of public security administration, shall be punished in accordance with the law by the public security authority for violating public security administration; or if the violation is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Article 47 Whoever, in violation of paragraph 2 of Article 25 of this Law, breeds any wild animals under state priority conservation or any wild animals prescribed in paragraph 2 of Article 28 of this Law without obtaining an artificial breeding license shall be fined not less than the value nor more than five times the value of the wild animals and their products by the competent department of wild animal conservation of the people's government at or above the county level, with the wild animals and their products confiscated.

Article 48 Whoever, in violation of paragraphs 1 and 2 of Article 27, paragraph 1 of Article 28, or paragraph 1 of Article 33 of this Law, uses without approval, fails to obtain, or fails to use as required any special labels, or sells, purchases, utilizes, transports, carries, or delivers any wild animals under state priority conservation or their products or any wild animals prescribed in paragraph 2 of Article 28 of this Law or their products without holding or attaching the duplicate of the artificial breeding license or the approval document or the special labels shall be fined not less than two nor more than ten times the value of the wild animals or their products by the competent department of wild animal conservation or the administrative department for industry and commerce of the people's government at or above the county level according to the division of their functions, with the wild animals or their products and all illegal income confiscated; if the circumstances are serious, the artificial breeding license shall be revoked, the approval document shall be cancelled, and the special labels shall be retracted; and if the violation is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Whoever, in violation of paragraph 4 of Article 27 or paragraph 2 of Article 33 of this Law, sells, utilizes, or transports any wild animals not under state priority conservation without the certificates on legal sources shall be fined not less than the value nor more than five times the value of the wild animals by the competent department of wild animal conservation or the administrative department for industry and commerce of the people's government at or above the county level according to the division of their functions, with the wild animals confiscated.

Whoever, in violation of paragraph 5 of Article 27 or Article 33 of this Law, sells, transports, carries, or delivers relevant wild animals or their products without holding or attaching

quarantine certificates shall be punished in accordance with the provisions of the Animal Epidemic Prevention Law of the People's Republic of China.

Article 49 Whoever, in violation of Article 30 of this Law, produces or distributes any food made of wild animals under state priority conservation or their products or wild animals not under state priority conservation or their products without certificates on legal sources or illegally purchases wild animals under state priority conservation or their products for eating shall be ordered to stop the illegal act and be fined not less than two nor more than ten times the value of the wild animals or their products by the competent department of wild animal conservation or the administrative department for industry and commerce of the people's government at or above the county level according to the division of their functions, with the wild animals or their products and all illegal income confiscated; and if the violation is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Article 50 Whoever, in violation of Article 31 of this Law, publishes advertisements for selling, purchasing, or utilizing wild animals or their products or for prohibited hunting or catching tools shall be punished in accordance with the provisions of the Advertising Law of the People's Republic of China.

Article 51 Whoever, in violation of Article 32 of this Law, provides trading services for the illegal sale, purchase, or utilization of wild animals or their products or for prohibited hunting or catching tools shall be ordered to stop the illegal act and take corrective action during a specified period, with all illegal income confiscated, and be fined not less than two nor more than five times the value of the illegal income or if there is no illegal income, be fined not less than 10,000 yuan nor more than 50,000 yuan by the administrative department for industry and commerce of the people's government at or above the county level; and if the violation is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Article 52 Whoever, in violation of Article 35 of this Law, imports or exports wild animals or their products shall be punished by the Customs, inspection and quarantine department, public security authority, and oceanic law enforcement authority in accordance with laws, administrative regulations, and the relevant provisions issued by the state; or if the violation is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Article 53 Whoever, in violation of paragraph 1 of Article 37 of this Law, introduces from abroad any species of wild animals shall be fined not less than 50,000 yuan nor more than 250,000 yuan by the competent department of wild animal conservation of the people's government at or above the county level, with the introduced wild animals confiscated; and if the introduced wild animals fail to undergo the entry quarantine formalities in accordance with the law, shall be punished in accordance with the provisions of the Law of the People's Republic of China on the Quarantine of Entry and Exit Animals and Plants; and if the violation is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Article 54 Whoever, in violation of paragraph 2 of Article 37 of this Law, releases any wild animals introduced from abroad to wild environment shall be ordered to recapture such animals during a specified period and be fined not less than 10,000 yuan nor more than 50,000 yuan by the competent department of wild animal conservation of the people's government at or above the county level; and if the violator fails to do so during the specified period, the competent department of wild animal conservation shall recapture such animals on behalf of the violator or take measures to reduce the impacts, with all costs necessary assumed by the violator ordered to recapture such animals during the specified period.

Article 55 Whoever, in violation of paragraph 1 of Article 39 of this Law, forges, alters, purchases, sells, transfers, or leases the relevant permits, licenses, special labels, or relevant approval documents shall be fined not less than 50,000 yuan nor more than 250,000 yuan by the competent department of wild animal conservation of the people's government at or above the county level, with the illicit permits, licenses, special labels, or relevant approval documents and all illegal income confiscated; and if the violation constitutes a violation of public security administration, the violator shall be punished in accordance with the law by the public security authority for violating public security administration; or if the violation is criminally punishable, the offender shall be held criminally liable in accordance with the law.

Article 56 The physical property confiscated under this Law shall be handled by the competent department of wild animal conservation of the people's government at or above the county level or the entity authorized by it in accordance with the relevant provisions.

Article 57 The evaluation standards and methods for the values of the catches and the values of wild animals and their products as prescribed in this Law shall be developed by the competent department of wild animal conservation of the State Council.

Chapter V Supplemental Provisions

Article 58 This Law shall come into force on January 1, 2017.

13. Environmental Protection Tax Law of the People's Republic of China

(Adopted at the 25th Session of the Standing Committee of the Twelfth National People's Congress on December 25, 2016)

Chapter I General Provisions

Article 1 This Law is enacted for the purposes of protecting and improving the environment, reducing pollutant discharges, and promoting ecological civilization construction.

Article 2 Within the territory of the People's Republic of China and other sea areas under the jurisdiction of the People's Republic of China, the enterprises, public institutions and other producers and operators that directly discharge pollutants to the environment are taxpayers of environmental pollution tax, and shall pay environmental pollution tax in accordance with the provisions of this Law.

Article 3 For the purpose of this Law, “taxable pollutants” means the air pollutants, water

pollutants, solid wastes and noises as prescribed in the Schedule of Tax Items and Tax Amounts of Environmental Protection Tax and the Schedule of Taxable Pollutants and Equivalent Values.

Article 4 Where an enterprise, public institution or any other producer or operator falls under any of the following circumstances, it shall not be deemed as directly discharging pollutants to the environment, and shall not pay environmental protection tax on the corresponding pollutants:

(1) It discharges taxable pollutants to a centralized sewage or domestic garbage treatment site established in accordance with the law.

(2) It stores or disposes of solid wastes at any facility or site that meets the national and local environmental protection standards.

Article 5 Where a centralized urban and rural sewage or domestic garbage treatment site established in accordance with the law discharges taxable pollutants to the environment in excess of the discharge standards as prescribed by the state or the local area, it shall pay environmental protection tax.

Where an enterprise, public institution or any other producer or operator that stores or disposes of solid wastes fails to comply with the national or local environmental protection standards, it shall pay environmental protection tax.

Article 6 Tax items and tax amounts of environmental protection tax shall be governed by the Schedule of Tax Items and Tax Amounts of Environmental Protection Tax attached to this Law.

The people's governments of all provinces, autonomous regions and municipalities directly under the Central Government shall, by taking into overall consideration the environmental carrying capacities, status quo of pollutant discharges, and the requirements of economic, social and ecological development goals, determine and adjust the specific tax amounts applicable to taxable air pollutants and water pollutants within the range of the tax amounts as prescribed in the Schedule of Tax Items and Tax Amounts of Environmental Protection Tax attached to this Law, and report them to the standing committees of the people's congresses at the same levels for decision, and to the Standing Committee of the National People's Congress and the State Council for recordation.

Chapter II Tax Basis and Tax Amount payable

Article 7 The tax basis for taxable pollutants shall be determined by using the following methods:

(1) The tax basis for taxable air pollutants shall be determined on the basis of the pollution equivalents converted from pollutant emissions.

(2) The tax basis for taxable water pollutants shall be determined on the basis of the pollutant equivalents converted from pollutant discharges.

(3) The tax basis for taxable solid wastes shall be determined on the basis of the discharges of solid wastes.

(4) The tax basis for taxable noises shall be determined on the basis of the decibels in

excess of the standards as prescribed by the state.

Article 8 The pollution equivalents of taxable air pollutants and water pollutants shall be calculated by dividing the pollutants discharged by the pollution equivalent values of such pollutants. The specific pollution equivalent values of various categories of air pollutants and water pollutants shall be governed by the Schedule of Taxable Pollutants and Equivalent Values attached to this Law.

Article 9 Of the air pollutants discharged from each discharge outlet for which no discharge outlet is established, the first three items of pollutants ranked in descending order of pollution equivalents shall be subject to environmental protection tax.

Of the taxable water pollutants discharged from each discharge outlet, the water pollutants of Category I and other categories of water pollutants shall be distinguished in accordance with the Schedule of Taxable Pollutants and Pollution Equivalents attached to this Law, and be ranked in descending order of pollution equivalents. Environmental protection tax shall be collected on the first five items of the water pollutants of Category I, and on the first three items of other categories of water pollutants.

The people's government of a province, autonomous region or municipality directly under the Central Government may, according to the special needs of the local area for pollutant discharge reduction, increase the number of taxable items of pollutants discharged from the same discharge outlet, on which environmental protection tax is collected, which shall be reported to the standing committee of the people's congress at the same level for decision and to the Standing Committee of the National People's Congress and the State Council for recordation.

Article 10 The discharge of taxable air pollutants, water pollutants, or solid wastes and decibels of noises shall be calculated by using the following methods and in the following orders:

(1) Where a taxpayer installs and uses automatic monitoring equipment for pollutants that complies with the provisions and monitoring specifications of the state, the discharge or decibels thereof shall be calculated on the basis of the automatic monitoring data on pollutants.

(2) Where a taxpayer fails to install and use automatic monitoring equipment for pollutants, the discharges or decibels thereof shall be calculated on the basis of the monitoring data concerning the compliance with relevant provisions and monitoring specifications of the state issued by the monitoring institution.

(3) If the conditions for monitoring are not satisfied due to the diversity of pollutants discharged or for any other reason, the discharges or decibels thereof shall be calculated on the basis of the pollution discharging coefficient and balanced material calculation method as prescribed by the competent department of environmental protection of the State Council.

(4) Where the calculation cannot be made by using the methods as specified in Items (1) through (3) of this Article, the discharges or decibels thereof shall be ratified and calculated

by using the sampling calculation method as prescribed by the competent department of environmental protection of the people's government of the province, autonomous region, or municipality directly under the Central Government.

Article 11 The amount of environmental protection tax payable shall be calculated by using the following methods:

(1) The amount of tax payable on taxable air pollutants shall be the pollution equivalent multiplied by the specific applicable tax amount.

(2) The amount of tax payable on taxable water pollutants shall be the pollution equivalent multiplied by the specific applicable tax amount.

(3) The amount of tax payable on solid wastes shall be the discharges of solid wastes multiplied by the specific applicable tax amount.

(4) The amount of tax payable on taxable noises shall be the specific applicable tax amount to which the decibels in excess of the standards as prescribed by the state correspond.

Chapter III Tax Reduction and Exemption

Article 12 The following circumstances shall be exempted from environmental protection tax for the time being:

(1) Taxable pollutants are discharged from agricultural production (excluding large-scale breeding).

(2) Taxable pollutants are discharged from motor vehicles, railway locomotives, non-road mobile machineries, vessels, aircrafts and other mobile pollution sources.

(3) The corresponding taxable pollutants which do not exceed the discharge standards as prescribed by the state and local areas are discharged from centralized urban and rural sewage and domestic garbage treatment sites established in accordance with the law.

(4) The solid wastes comprehensively utilized by taxpayers comply with the national and local environmental protection standards.

(5) Other circumstances exempted from tax as approved by the State Council.

The provisions on tax exemption in Item (5) of the preceding paragraph shall be reported by the State Council to the Standing Committee of the National People's Congress for recordation.

Article 13 Where the concentration value of the taxable air pollutants or water pollutants discharged by a taxpayer is lower than 30% of the pollutant discharge standards as prescribed by the state or the local area, the environmental protection tax thereon shall be collected at a reduced rate of 75%. Where the concentration value of the taxable air pollutants or water pollutants discharged by a taxpayer is lower than 50% of the pollutant discharge standards as prescribed by the state or the local area, the environmental protection tax thereon shall be collected at a reduced rate of 50%.

Chapter IV Tax Collection Administration

Article 14 Tax authorities shall administer the collection of environmental protection tax in accordance with the relevant provisions of the Law of the People's Republic of China on the Administration of Tax Collection and this Law.

The competent departments of environmental protection shall take charge of the monitoring and administration of pollutants in accordance with the provisions of this Law and the relevant laws and regulations on environmental protection.

The local people 's governments at or above the county level shall establish a work mechanism featured by division of functions and coordination of tax authorities, competent departments of environmental protection and other relevant entities, strengthen the administration of collection of environmental protection tax, and guarantee the taxes are turned over to the state treasury in full amount in a timely manner.

Article 15 The competent departments of environmental protection and tax authorities shall establish a tax-related information sharing platform and work cooperation mechanisms.

The competent department of environmental protection shall submit the relevant environmental protection information on the pollutant discharge licenses of pollutant discharging entities, pollutant discharge data, and violations of environmental laws and administrative penalties thereon, etc., to the tax authorities on a regular basis.

Tax authorities shall submit taxpayers' tax returns, premitted taxes to the state treasury, tax deduction and exemption, tax arrears, doubtful risk points and other tax-related information on environmental protection to the competent departments of environmental protection on a regular basis.

Article 16 The time when the tax payment obligation of a taxpayer occurs shall be the date when the taxpayer discharges taxable pollutants.

Article 17 A taxpayer shall file its returns of environmental protection tax with the tax authority at the place of discharge of taxable pollutants.

Article 18 Environmental protection tax shall be calculated on a monthly basis, and the returns shall be filed on a quarterly basis. Where the calculation and payment thereof cannot be made on a regular basis, the returns thereof may be filed on a transaction-by-transaction basis.

When a taxpayer files tax returns, it shall submit to the tax authority the categories and quantities of the taxable pollutants it discharges, the concentration value of the air pollutants and water pollutants, and other tax payment materials required by the tax authority according to the actual needs.

Article 19 Where a taxpayer files tax returns on a quarterly basis, it shall file its tax returns with and pay taxes to the tax authority within 15 days after the end of each quarter. Where a taxpayer files tax returns on a transaction-by-transaction basis, it shall file its tax returns with and pay taxes to the tax authority within 15 days from the date when the tax payment obligation occurs.

A taxpayer shall truthfully file tax returns in accordance with the law, and be responsible for the authenticity and completeness of the filing of tax returns.

Article 20 Tax authorities shall compare the data materials on taxpayers' filing of tax returns with relevant data materials submitted by the competent departments of environmental protection.

Where a tax authority finds the data materials on the filing of tax returns by any taxpayer is abnormal or the taxpayer fails to file tax returns within a prescribed time limit, the tax authority may request the competent department of environmental protection to conduct a review, and the competent department of environmental protection shall, within 15 days from the date of receipt of the data materials from the tax authority, issue its review opinions to the tax authority. The tax authority shall adjust the tax amount payable by the taxpayer according to the data materials reviewed by the competent department of environmental protection.

Article 21 Where pollutant discharges are ratified and calculated in accordance with the provisions of item (4) of Article 10 of this Law, tax authorities shall, in conjunction with the competent departments of environmental protection, ratify the categories and quantities of and tax amounts payable on pollutants discharged.

Article 22 The specific measures for the filing of environmental protection tax returns by taxpayers engaging in ocean engineering for their discharges of taxable air pollutants, water pollutants or solid wastes to the sea areas under the jurisdiction of the People's Republic of China shall be provided for by the competent tax department of the State Council in conjunction with the competent oceanic department of the State Council.

Article 23 Taxpayers and tax authorities, competent departments of environmental protection and their staff members that violate any of the provisions of this Law shall be held liable in accordance with the Law of the People's Republic of China on the Administration of Tax Collection, the Environmental Protection Law of the People's Republic of China and other relevant laws and regulations.

Article 24 The people's governments at all levels shall encourage taxpayers to increase investments in environmental protection construction, and provide financial and policy support for taxpayers' investments in the automatic monitoring equipment for pollutants.

Chapter V Supplementary Provisions

Article 25 In this Law, the following terms shall have the meanings as follows:

- (1) "Pollution equivalent" means the comprehensive indicator or measurement unit used to measure the environmental pollutions caused by different pollutants according to the degrees of damages of pollutants or pollutant discharge activities to the environment and the technical and economic perform of the handling thereof. The degrees of pollution caused by different pollutants with the same pollution equivalent value discharged via the same medium are basically the same.
- (2) "Pollution discharging coefficient" means the statistical average value of the quantity of pollutants that should be discharged by products of production entities under normal technical, economic and management conditions.
- (3) "Balanced material calculation" means a method for calculating the raw materials used, products produced and wastes generated in the process of production under the law of conservation of mass.

Article 26 Enterprises, public institutions and other producers and operators that directly

discharge taxable pollutants to the environment shall, in addition to paying environmental protection tax in accordance with the provisions of this Law, assume liabilities for the damages caused thereby in accordance with the law.

Article 27 From the date when this Law comes into force, environmental protection law shall be collected in accordance with the provisions of this Law, and no pollutant discharge fees shall be collected any more.

Article 28 This Law shall come into force on January 1, 2018.

14. Emergency Response Law of the People's Republic of China

(Adopted at the 29th session of the Standing Committee of the Tenth National People's Congress of the People's Republic of China on August 30, 2007)

Chapter I General Provisions

Article 1 This Law has been made to prevent and reduce the occurrences of emergency incidents, control, mitigate and eliminate the serious social damage caused by emergency incidents, standardize the emergency response activities, protect the life and property safety of the people, and maintain the national security, public safety, environment safety and social order.

Article 2 This Law shall apply to such emergency response activities as prevention and preparedness, surveillance and warning, response operations and rescue, and post-emergency response rehabilitation and reconstruction.

Article 3 An emergency incident as mentioned in this Law shall refer to a natural disaster, accidental disaster, public health incident or social safety incident, which takes place by accident, has caused or might cause serious social damage and needs the adoption of emergency response measures.

According to such factors as degree of social damage and extent of effects, the natural disasters, accidental disasters and public health incidents shall be divided into four levels: especially serious, serious, large and ordinary, except as otherwise provided for by a law or administrative regulation or the State Council.

The standards for such division of levels of emergency incidents shall be made by the State Council or a department as determined by the State Council.

Article 4 The state shall establish an emergency response management system mainly featuring the uniform leadership, comprehensive coordination, categorized management, graded responsibility and territorial management.

Article 5 The work on emergency response shall adhere to the principle of giving priority to prevention and combining prevention with emergency response. The state shall establish a risk assessment system for major emergency incidents to conduct comprehensive assessment of possible emergency incidents, reduce the occurrences of major emergency incidents, and maximally mitigate the effects of major emergency incidents.

Article 6 The state shall establish an effective social mobilization mechanism to strengthen

the awareness of public safety and risk prevention and control of all citizens and improve the ability of risk avoidance and rescue in the whole society.

Article 7 The people's government at the county level shall be responsible for responding to an emergency incident within its administrative region; where two or more administrative regions are involved, the common people's government at the next higher level of the relevant administrative regions shall be responsible, or the people's governments at the next higher level of the relevant administrative regions shall be jointly responsible.

After the occurrence of an emergency incident, the people's government at the county level at the place of occurrence shall immediately take measures to control the developments of the incident, organize and carry out the emergency response rescue and operations, and immediately report on it to the people's government at the next higher level, or report without regard to the levels when necessary.

The people's government at the county level at the place of occurrence of an emergency incident that cannot eliminate or effectively control the serious social damage caused by the emergency incident shall timely report on it to the people's government at the next higher level. The people's government at the next higher level shall timely take measures and uniformly lead the emergency response operations.

Where a law or administrative regulation provides that a relevant department of the State Council shall be responsible for responding to an emergency incident, such a law or administrative regulation shall apply; and the local people's government shall offer assistance and necessary support.

Article 8 Under the leadership of the Premier, the State Council shall study, decide and deploy response to an especially serious emergency incident; as needed in reality, shall form a state emergency response command body to be responsible for responding to the emergency incident; and when necessary, may send a task group to guide the relevant work. Every local people's government at or above the county level shall form an emergency response command body made up of the principals of the people's government, the persons in charge of the relevant departments and the relevant persons in charge of the local stationed People's Liberation Army of China and People's Armed Police Force to uniformly lead and coordinate the emergency response by all relevant departments of the people's government and the people's governments at the lower levels; as needed in reality, shall form an emergency response command body for a relevant category of emergency incidents to organize, coordinate and command the emergency response.

In their respective capacities, the competent departments of the higher people's governments shall guide and assist the lower people's governments and their relevant departments in response to a relevant emergency incident.

Article 9 The State Council and all local people's governments at and above the county level shall be the leading administrative organs for emergency response, and their operating offices and specific duties and responsibilities shall be provided for by the State Council.

Article 10 The decisions and orders made by a relevant people's government and its

departments in response to an emergency incident shall be timely made available to the public.

Article 11 The emergency response measures taken by a relevant people's government and its departments shall be appropriate for the nature, degree and extent of social damage caused by an emergency incident; and where multiple measures are available for selection, those conducive to the maximum protection of the rights and interests of citizens, legal persons and other organizations shall be selected.

Citizens, legal persons and other organizations are obligated to participate in the emergency response.

Article 12 A relevant people's government and its departments may requisition the property of entities and individuals in response to an emergency incident. The requisitioned property shall be timely returned after use or after the emergency response operations terminate. Compensations shall be made for the requisitioned property or property damaged or destroyed after requisition.

Article 13 Where, for the adoption of any emergency response measure, any litigation, administrative reconsideration or arbitration cannot proceed normally, the provisions on the suspension of limitations and proceedings shall apply, except as otherwise provided for by a law.

Article 14 The People's Liberation Army of China, People's Armed Police Force and militia organizations shall participate in the emergency response rescue and operations in accordance with the provisions of this Law and other relevant laws, administrative regulations and military regulations as well as orders of the State Council and the Central Military Commission.

Article 15 The Government of the People's Republic of China shall carry out cooperation and exchange with foreign governments and relevant international organizations in such respects as emergency prevention, surveillance and warning, emergency response rescue and operations and post-emergency response rehabilitation and reconstruction.

Article 16 The decisions and orders made by the people's government at or above the county level in response to an emergency incident shall be submitted to the standing committee of the same-level people's congress for archival purposes; and after the emergency response operations terminate, the people's government shall make a specialized work report to the standing committee of the same-level people's congress.

Chapter II Prevention and Emergency Response Preparedness

Article 17 The state shall establish and enhance an emergency response plan system.

The State Council shall make the overall state emergency response plans, and organize and make the specialized state emergency response plans; and the relevant departments of the State Council shall make the departmental state emergency response plans in their respective capacities in line with the relevant emergency response plans of the State Council. The local people's governments at all levels and the relevant departments of the local people's governments at and above the county level shall make the corresponding

emergency response plans in accordance with the relevant laws, administrative regulations and rules, emergency response plans of the people's governments at higher levels and their relevant departments, and local realities.

The organ making an emergency response plan shall amend the plan from time to time according to the practical needs and change of situations. The procedures for making and amending an emergency response plan shall be made by the State Council.

Article 18 An emergency response plan shall provide in detail for the organizational and command system and responsibilities for emergency response management, emergency incident prevention and warning mechanisms, operating procedures, emergency response protective measures, post-emergency response rehabilitation and reconstruction measures, etc., in terms of the nature and characteristics of and social damage likely to be caused by the emergency incident in accordance with this Law and other relevant laws and administrative regulations.

Article 19 The urban or rural planning shall meet the needs for emergency incident prevention and response operations, overall arrangements shall be made on the equipment and infrastructure construction necessary for emergency response, and emergency shelters shall be reasonably determined.

Article 20 The people's government at the county level shall investigate, register and assess the risks of, regularly inspect and monitor, and order the relevant entities to take safety preventative and control measures for the danger sources and danger areas tending to cause natural disasters, accidental disasters and public health incidents within its administrative region.

The people's government at the provincial level or the people's government of a city with districts shall investigate, register and assess the risks of, organize the inspection and monitoring of, and order the relevant entities to take safety preventative and control measures for the danger sources and danger areas tending to cause especially serious and serious emergency incidents within its administrative region.

The danger sources and danger areas registered by the local people's government at or above the county level according to this Law shall be timely made available to the public according to the provisions of the state.

Article 21 The people's governments at the county level and their relevant departments, the people's governments at the township level, the sub-district offices, the residents' committees and the villagers' committees shall timely mediate and handle conflicts and disputes likely to cause social safety incidents.

Article 22 Every entity shall establish and enhance a safety management system, regularly examine the implementation of all its safety preventative and control measures, and timely eliminate hidden incident risks; control and timely handle existing problems in the entity likely to cause social safety incidents, and prevent the intensification of conflicts and expansion of situations; and timely report on the emergency incidents likely to occur and on the safety preventative and control measures taken in the entity to the people's government at the

place where the entity is located or the relevant departments of the people's government as required.

Article 23 A mine or building construction entity or an entity producing, operating, storing, transporting or using such dangerous substances as flammable or explosive substances, hazardous chemicals or radioactive substances shall make a specific emergency response plan, investigate hidden risks in the production or business operation premises, buildings and structures where dangerous substances exist and the surrounding environment, and timely take measures to eliminate hidden risks and prevent the occurrences of emergency incidents.

Article 24 An entity operating or managing public transportation vehicles, public places or other places with a high density of people shall make a specific emergency response plan, install alarm devices and necessary emergency response rescue equipment and facilities to the transportation vehicles or relevant places, clearly explain how to use them and illustrate the passages and routes for safety evacuation, and ensure free safety passages and exits. The relevant entity shall regularly examine, test and maintain its alarm devices and emergency response rescue equipment and facilities, keep them in a good condition, and ensure the normal use of them.

Article 25 The people's government at or above the county level shall establish and enhance a training system for emergency response management to conduct regular training of the working staff with responsibility for emergency incident operations of the people's government and its relevant departments.

Article 26 The people's government at or above the county level shall adjust emergency response resources, and establish or determine general emergency response rescue teams. The relevant departments of the people's government may set up specialized emergency response rescue teams as needed.

The people's government at or above the county level and its relevant departments may establish emergency response rescue teams made up of adult volunteers. An entity shall establish a full-time or part-time emergency response rescue team made up of its employees. The people's government at or above the county level shall strengthen the cooperation between specialized and non-specialized emergency response rescue teams, conduct the joint training or drilling, and raise the abilities of synthesized and cooperative emergency response.

Article 27 The relevant departments of the State Council, the local people's governments at and above the county level and their relevant departments and the relevant entities shall take out personal accidental injury insurance for the specialized emergency response rescuers, and provide them with necessary protective equipment and instruments, to reduce the personal risks on the part of the emergency response rescuers.

Article 28 The People's Liberation Army of China, the People's Armed Police Force and the militia organizations shall organize and carry out specialized emergency response exercise as planned.

Article 29 The people's governments at the county level and their relevant departments, the people's governments at the township level and the sub-district offices shall organize and carry out the publicity and dissemination of emergency response knowledge and necessary emergency response drilling.

The residents' committees, the villagers' committees, enterprises and institutions shall carry out the publicity and dissemination of knowledge on the response to an emergency incident and necessary emergency response drilling, according to the requirements of the people's government at the place where they are located, in combination with their respective realities. The news media shall carry out the free publicity of knowledge on the emergency incident prevention and response, self-rescue and mutual rescue for the public good.

Article 30 The schools at various levels and of various descriptions shall include the emergency response knowledge education in their teaching to educate students on emergency response knowledge and foster the safety awareness and abilities of self-rescue and mutual rescue on the part of students.

The competent education departments shall guide and supervise the schools in carrying out the emergency response knowledge education.

Article 31 The State Council and the local people's governments at and above the county level shall take fiscal measures to ensure the funds necessary for the work on the response to emergency incidents.

Article 32 The state shall establish and enhance an emergency response material reserve security system to improve the supervision, production, reserve, allocation and urgent distribution systems of the major emergency response materials.

The people's government at or above the level of a city with districts or the people's government at the county level at the place where emergency incidents tend to occur or occur frequently shall establish the emergency response rescue material, living necessity and emergency response operation equipment reserve systems.

Every local people's government at or above the county level shall enter into agreements with the relevant enterprises to ensure the production and supply of emergency response rescue materials, living necessities and emergency response operation equipment according to its local reality.

Article 33 The state shall establish and enhance an emergency response communication security system, improve the public communication network, establish an emergency response communication system characterized by the combination of cable and wireless communication and the integration of basic telecommunication networks and standby communication systems, to ensure free communication in the work on the response to emergency incidents.

Article 34 The state shall encourage citizens, legal persons and other organizations to provide materials, funds, technical support and donations to the people's governments in the work on the response to emergency incidents.

Article 35 The state shall develop the insurance cause, establish a huge-disaster risk

insurance system supported by the state finance, and encourage entities and citizens to take out insurance.

Article 36 The state shall encourage and support the teaching and scientific research institutions meeting corresponding conditions to foster talents specializing in emergency response management, and encourage and support the teaching and scientific research institutions and relevant enterprises to conduct research and development of new technologies, new equipment and new instruments for the emergency incident prevention, surveillance and warning and the emergency response operations and rescue.

Chapter III Surveillance and Warning

Article 37 The State Council shall establish a nationally uniform emergency incident information system.

Every local people's government at or above the county level shall establish or determine a locally uniform emergency incident information system, converge, store, analyze and transmit information on emergency incidents, and realize the interconnection with the emergency incident information systems of the people's governments at higher levels and their relevant departments, the people's government at lower levels and their relevant departments, the specialized institutions and the surveillance points to strengthen the cross-department and cross-region information exchange and intelligence cooperation.

Article 38 The people's governments at and above the county level and their relevant departments and the specialized institutions shall collect incident information through various channels.

The people's government at the county level shall establish a full-time or part-time information reporter system in the residents' committees, the villagers' committees and the relevant entities.

A citizen, legal person or any other organization acquiring emergency incident information shall immediately report on it to the local people's government, the relevant competent department or the designated specialized institution.

Article 39 A local people's government at any level shall submit emergency incident information to the people's government at a higher level according to the relevant provisions of the state. The relevant competent departments of the people's government at or above the county level shall notify in writing the relevant department of the same-level people's government of the emergency incident information. A specialized institution, surveillance point or information reporter shall timely report on the emergency incident information to the local people's government and the relevant competent departments of the people's government.

The emergency incident information submitted or reported by the relevant entities and persons shall be timely, objective and true, and it shall be prohibited to delay the reporting, falsify the reporting, conceal the reporting or omit the reporting of such information.

Article 40 Every local people's government at or above the county level shall timely summarize and analyze information on the hidden risks and warning of emergency incidents,

and when necessary, organize the relevant departments, specialized technicians, experts and scholars to conduct consultations and make assessment of the possibility of occurrence of an emergency incident and the effects likely to be caused by the emergency incident; and when deeming that a serious or especially serious emergency incident is likely to occur, shall immediately report on it to the higher people's government, and notify in writing the relevant departments of the higher people's government, the local stationed army and the people's government at the adjacent or relevant place likely to be damaged.

Article 41 The state shall establish and enhance an emergency incident surveillance system. The people's government at or above the county level and its relevant departments shall establish and enhance a basic information database, improve surveillance networks, divide surveillance regions, determine surveillance points, define surveillance items, provide necessary equipment and facilities, and assign full-time or part-time personnel, to monitor emergency incidents likely to occur, according to the categories and characteristics of natural disasters, accidental disasters and public health incidents,.

Article 42 The state shall establish and enhance an emergency incident warning system. The levels of warning of natural disasters, accidental disasters and public health incidents that may be warned of shall be divided into level 1, level 2, level 3 and level 4 according to the emergency degree of, trend of development of and degree of damage likely to be caused by an emergency incident, and shall be marked in red, orange, yellow and blue respectively, with level 1 being the highest level.

The criteria for division of levels of warning shall be made by the State Council or the department as determined by the State Council.

Article 43 Where a natural disaster, accidental disaster or public health incident that may be warned of is about to occur or the possibility of occur grows, in accordance with the powers and procedures as provided for by the relevant laws and administrative regulations and the State Council, a local people's government at or above the county level shall issue a relevant level of warning, decide and declare that a relevant region enters on a period of warning, and report on it to the people's government at the next higher level at the same time, and when necessary, may report without regard to the levels, and notify the local stationed army and the people's government at the adjacent or relevant place likely to be damaged.

Article 44 After issuing a level 3 or level 4 warning and declaring the entry into a period of warning, a local people's government at or above the county level shall take the following measures according to the characteristics of and the damage likely to be caused by an emergency incident that is about to occur:

1. Activating the emergency response plan;
2. Ordering the relevant departments, specialized institutions, surveillance points and personnel with particular responsibility to timely collect and report the relevant information, announcing channels for the public to report emergency incident information, and strengthening the surveillance, forecast and warning of the occurrence and development of an emergency incident;

3. Organizing the relevant departments and institutions, specialized technicians and relevant experts and scholars to analyze and assess emergency incident information at any time, forecast the degree of possibility of occurrence, extent of effects and scale of intensity of an emergency incident as well as the level of an emergency incident likely to occur;
4. Issuing the forecast information and analysis and assessment results on an emergency incident concerning the general public in fixed time, and managing the coverage on the relevant information; and
5. Issuing timely a warning that damage is likely to be caused by an emergency incident to the society according to the relevant provisions, publicizing the general knowledge on the avoidance and mitigation of damage, and announcing the consulting telephone numbers.

Article 45 After issuing a level 1 or level 2 warning and declaring the entry into a period of warning, a local people's government at or above the county level shall take any or more of the following measures according to the characteristics of and the damage likely to be caused by an emergency incident that is about to occur, in addition to the measures set forth in Article 44 of this Law:

1. Ordering the emergency response rescue team and personnel with particular responsibility to stand by to await order, and mobilizing the reserve personnel to be well prepared to attend the emergency response rescue and operations;
2. Mustering the materials, equipment and instruments necessary for emergency response rescue, preparing the emergency response facilities and shelters, and ensuring them to be in good condition and ready for being put into normal use at any time;
3. Strengthening the safety and defense of key entities, key positions and key infrastructures, and maintaining the social peace and order;
4. Taking necessary measures to ensure the safety and normal operation of such public utilities as transportation, communications, water supply, drainage, power supply, gas supply and heat supply;
5. Issuing timely suggestions and advice on taking special measures to avoid or mitigate damage;
6. Transferring, dispersing or evacuating and properly settling persons who are liable to the damage by an emergency incident, and transferring important property;
7. Shutting down or restricting the use of places that are liable to the damage by an emergency incident, and controlling or restricting the activities in public places that tend to cause the expansion of damage; and
8. Other necessary preventative, control and protective measures as provided for by laws and administrative regulations and rules.

Article 46 On a social safety incident that is about to occur or has occurred, a local people's government at or above the county level and its relevant competent department shall report to the people's government at the next higher level and its relevant competent department as required, and when necessary, may report without regard to the levels.

Article 47 The people's government issuing a warning of emergency incident shall properly

adjust and reissue the level of warning, according to the development of situations.

Where facts prove that the occurrence of an emergency incident is impossible or the danger has been eliminated, the people's government issuing a warning shall immediately announce the rescission of warning, terminate the period of warning, and relax the relevant measures having been taken.

Chapter IV Emergency Response Operations and Rescue

Article 48 After an emergency incident occurs, the people's government performing the responsibility for uniform leadership or organizing the emergency response operations shall immediately organize the relevant departments, deploy the emergency response rescue teams and social forces, and take measures for emergency response operations in terms of the nature, characteristics and degree of damage of the emergency incidents in accordance with the provisions of this Chapter and the provisions of relevant laws and administrative regulations and rules.

Article 49 After a natural disaster, accidental disaster or public health incident occurs, the people's government performing the responsibility for uniform leadership may adopt any or more of the following measures for emergency response operations:

1. Organizing the rescue and treatment of victims, dispersing, evacuating and properly settling persons threatened and taking other rescue measures;
2. Controlling promptly the danger sources, marking the danger areas, blockading the danger places, demarcating the cordoned areas, implementing traffic controls and taking other control measures;
3. Repairing immediately such damaged public utilities as transportation, communications, water supply, drainage, power supply, gas supply and heat supply, providing the harmed persons with shelters and living necessities, and implementing medical rescue, hygienic, quarantine and other security measures;
4. Prohibiting or restricting the use of relevant equipment and facilities, shutting down or restricting the use of relevant places, terminating the activities with a high density of people or production or business operation activities likely to cause the expansion of damage, and taking other protective measures;
5. Activating the use of the fiscal reserve funds and emergency response rescue material reserve set aside by the people's government, and when necessary, mustering other materials, equipment, facilities and instruments for use;
6. Organizing citizens to attend the emergency response rescue and operations, and requiring those with specialties to provide services;
7. Safeguarding the supply of food, drinking water, fuels and other basic living necessities;
8. Imposing stricter punishments against forestalling, bidding up prices, making and selling fake products and other violations of the market order according to law, to stabilize the market prices and maintain the market order;
9. Imposing stricter punishments against looting property, interfering with the emergency response operations and other violations of the social order according to law, to maintain

the social peace and order; and

10. Taking necessary measures for preventing the occurrences of secondary and derivative incidents.

Article 50 After a social safety incident occurs, the people's government organizing the response operations shall immediately organize the relevant departments, and the public security organs shall take any or more of the following measures for emergency response operations in terms of the nature and characteristics of the incident according to laws and administrative regulations and other relevant provisions of the state:

1. Coercively insulating the parties who confront each other with instruments or participate in conflicts in a violent way, and properly resolving disputes and contradictions on the spot, and controlling the development of situations;
2. Controlling the buildings, transportation vehicles, equipment, facilities and supply of fuels, gas, power and water in particular regions;
3. Blockading the relevant places and roads, examining the identity certificates of persons on the spot, and restricting the activities in the relevant public places;
4. Strengthening the guard of central organs and entities liable to the impact, and setting up temporary cordons near the state organs, military organs, state news agency, radio and television stations, foreign embassies in China; and
5. Other necessary measures as provided for by laws, administrative regulations and the State Council.

When an incident seriously endangering the social peace and order occurs, the public security organs shall immediately send out police forces, take relevant coercive measures legally according to the situations on the spot, and bring the social order back to normal as soon as possible.

Article 51 Where the occurrence of an emergency incident seriously affects the normal operation of the national economy, the State Council or the relevant competent departments empowered by the State Council may take security, control and other necessary emergency response measures to secure the basic living necessities of the people and maximally mitigate the effects of the emergency incident.

Article 52 When necessary, the people's government performing the responsibility for uniform leadership or organizing the emergency response operations may requisition equipment, facilities, premises, transportation vehicles and other materials from entities and individuals, request other local people's governments to provide human, material and financial resources or technical support, require enterprises that produce or supply living necessities and emergency response rescue materials to organize production and ensure supply, and require organizations that provide medical, transportation and other public services to provide the relevant services.

The people's government performing the responsibility for uniform leadership or organizing the emergency response operations shall organize and coordinate entities engaging in transportation to give priority to the transportation of materials, equipment, instruments and

emergency response rescuers necessary for the emergency response operations and the victims of the emergency incident.

Article 53 The people's government performing the responsibility for uniform leadership or organizing the emergency response operations shall uniformly, accurately and timely release information on the development of situations of an emergency incident and emergency response operations according to relevant provisions.

Article 54 No entity or individual shall fabricate or disseminate false information on the development of situations of an emergency incident or emergency response operations.

Article 55 The residents' committees, villagers' committees and other organizations at the place of occurrence of an emergency incident shall conduct publicity and mobilization, organize people to carry out self-rescue and mutual rescue, and assist in maintaining the social order according to the decisions and orders of the local people's government.

Article 56 An entity damaged by a natural disaster or where an accidental disaster or public health incident occurs shall immediately organize its emergency response rescue team and working staff to rescue the victims, disperse, evacuate and settle persons threatened, control danger sources, demarcate danger areas, blockade danger premises, take other measures necessary for the prevention of expansion of damage, and at the same time, report to the people's government at the county level at the place where it is located; for a social safety incident that is caused by a problem with the entity or mainly involves the personnel of the entity, the relevant entity shall report on it to a higher authority as required and promptly send out persons in charge to the site to conduct persuasion and guidance.

Any other entity at the place of occurrence of an emergency incident shall obey the decisions and orders issued by the people's government, assist the people's government in taking the measures for emergency response operations, do a good job in its emergency response rescue, and actively organize personnel to attend the emergency response rescue and operations at the place where it is located.

Article 57 A citizen at the place of occurrence of an emergency incident shall obey the direction and arrangements of the people's government, residents' committees, villagers' committees or entity where he or she is employed, assist the people's government in taking the measures for emergency response operations, actively attend the emergency response rescue, and assist in maintaining the social order.

Chapter V Post-Emergency Response Rehabilitation and Reconstruction

Article 58 After the threats and damage caused by an emergency incident have been controlled or eliminated, the people's government performing the responsibility for uniform leadership or organizing the emergency response operations shall terminate the implementation of the measures for emergency response operations taken according to this Law, and at the same time, take or continue implementing necessary measures to prevent the occurrences of secondary or derivative incidents of a natural disaster, accidental disaster or public health incident or re-occurrence of a social safety incident.

Article 59 After the end of emergency response operations, the people's government

performing the responsibility for uniform leadership shall immediately organize the assessment of losses caused by the emergency incident, organize the affected areas to restore the production, living, working and social order as soon as possible, make rehabilitation and reconstruction plans, and report them to the people's government at the next higher level.

The people's government in an area affected by the emergency incident shall timely organize and coordinate with the public security, transportation, railway, civil aviation, postal, construction and other relevant departments to restore the social peace and order and repair such damaged public utilities as transportation, communications, water supply, drainage, power supply, gas supply and heat supply as soon as possible.

Article 60 Where the rehabilitation and reconstruction to be carried out by the people's government in an area affected by an emergency incident require the support by the people's government at the next higher level, a request may be submitted to the people's government at the next higher level. According to the losses suffered by the affected area and its actual conditions, the people's government at the next higher level shall provide fund and material support and technical guidance and organize other areas to provide fund, material and human resource support.

Article 61 According to the losses suffered by an area affected by an emergency incident, the State Council shall make preferential policies supporting the development of relevant industries in the area.

The people's government in an area affected by an emergency incident shall make and organize the implementation of work plans on assistance, compensation, conciliation, relief, settlement, etc. according to the losses suffered by the area, and properly resolve conflicts and disputes caused by the emergency response operations.

During the period of a citizen's attending the emergency response rescue or assisting in maintaining the social order, his or her salary treatment and welfare in its employing entity shall be unchanged; where the citizen has performed remarkably or made great achievements, the people's government at or above the county level shall commend or reward him.

The people's government at or above the county level shall grant relief to persons injured or dead when participating in the emergency response rescue according to law.

Article 62 The people's government performing the responsibility for uniform leadership shall timely found out the process of and causes for the occurrence of an emergency incident, summarize the experience and lessons learned from the emergency response operations, make improvement measures, and report them to the people's government at the next higher level.

Chapter VI Legal Liability

Article 63 Where a local people's government or a relevant department of a people's government at or above the county level fails to perform its statutory functions in violation of this Law, its higher administrative organ or the supervisory organ shall order it to make

correction; and a sanction shall be imposed on the directly responsible persons in charge and other directly liable persons as the case may be, under any of the following circumstances:

1. Failure to take preventative measures as required and causing the occurrence of an emergency incident, or failure to take necessary preventative and control measures and causing the occurrence of a secondary or derivative incident;
2. Delay, falsification, concealment or omission in reporting the information on an emergency incident, or notification in writing, submission or release of false information, and causing consequences;
3. Failure to timely issue an emergency incident warning or take measures of entry into the period of warning as required and causing the occurrence of damage;
4. Failure to timely take measures for emergency response operations as required or making improper emergency response operations, and causing consequences;
5. Disobedience to the higher people's government's uniform leadership, command and coordination of emergency response operations;
6. Failure to timely organize and carry out production self-rescue, rehabilitation and reconstruction and other post-emergency response work;
7. Interception, misappropriation, private distribution or private distribution in a disguised form of the emergency response rescue funds or materials; or
8. Failure to timely return the requisitioned property of entities or individuals, or failure to compensate the entities or individuals whose property is requisitioned as required.

Article 64 For a relevant entity under any of the following circumstances, the people's government performing the responsibility for uniform leadership at the place where the entity is located shall order it to cease production or business, suspend or cancel its license or business license, and impose a fine of not less than 50,000 yuan but not more than 200,000 yuan; where a violation of the public security administration is constituted, the public security organ shall impose a penalty according to law:

1. Failing to take preventative measures as required and causing the occurrence of a serious emergency incident;
2. Failing to timely eliminate discovered hidden risks likely to cause an emergency incident and causing the occurrence of a serious emergency incident;
3. Failing to do a good job in the daily maintenance and testing of emergency response equipment and facilities and causing the occurrence of a serious emergency incident or the expansion of damage caused by an emergency incident; or
4. Failing to timely organize and carry out the emergency response rescue and causing serious consequences, after the occurrence of an emergency incident.

Where any other law or administrative regulation provides that the relevant department of the people's government shall decide on the punishment against any of the violations in the preceding paragraph, such a provision shall apply.

Article 65 Where an entity or individual in violation of this Law fabricates and disseminates

false information on the development of situations of an emergency incident or emergency response operations, or knowingly disseminates false information on the development of situations of an emergency incident or emergency response operations, it or he shall be ordered to make correction, and a warning shall be imposed; where serious consequences are caused, the business operation or practicing license of the entity or individual shall be ceased or cancelled according to law; where the directly liable persons are state functionaries, they shall be sanctioned according to law; and where a violation of the public security administration is constituted, the public security organ shall impose a penalty according to law.

Article 66 Where an entity or individual in violation of the provisions of this Law disobeys a decision or order issued by the people's government at the place where the entity or individual is located or its relevant department or refuses to assist in the measures legally taken, which constitutes a violation of the public security administration, the public security organ shall impose a penalty on the entity or individual according to law.

Article 67 Any entity or individual that violates any provision of this Law, causes the occurrence of an emergency incident or expansion of damage and inflicts damage to the body or property of any other person shall assume the civil liability according to law.

Article 68 Where a violation of any provision of this Law constitutes a crime, the offender shall be pursued for criminal liability.

Chapter VII Supplementary Provisions

Article 69 Where an especially serious emergency incident occurs, which posts a serious threat to the life or property safety of the people, national security, public safety, environmental safety or social order, and its serious social damage cannot be eliminated or effectively controlled or mitigated by taking the emergency response operation measures as provided for in this Law and other relevant laws and administrative regulations and rules, and therefore it is necessary to enter a state of emergency, the Standing Committee of the National People's Congress or the State Council shall decide in accordance with the powers and procedures as provided for by the Constitution and other relevant laws.

The exceptional measures taken during the period of a state of emergency shall be subject to the provisions of relevant laws or shall be separately provided for by the Standing Committee of the National People's Congress.

Article 70 This Law shall be effective as of November 1, 2007.

15. Tort Law of the People's Republic of China

(Adopted at the 12th session of the Standing Committee of the Eleventh National People's Congress on December 26, 2009)

Chapter I General Provisions

Article 1 In order to protect the legitimate rights and interests of parties in civil law relationships, clarify the tort liability, prevent and punish tortious conduct, and promote the

social harmony and stability, this Law is formulated.

Article 2 Those who infringe upon civil rights and interests shall be subject to the tort liability according to this Law.

“Civil rights and interests” used in this Law shall include the right to life, the right to health, the right to name, the right to reputation, the right to honor, right to self image, right of privacy, marital autonomy, guardianship, ownership, usufruct, security interest, copyright, patent right, exclusive right to use a trademark, right to discovery, equities, right of succession, and other personal and property rights and interests.

Article 3 The victim of a tort shall be entitled to require the tortfeasor to assume the tort liability.

Article 4 Where a tortfeasor shall assume administrative liability or criminal liability for the same conduct, it shall not prejudice the tort liability that the tortfeasor shall legally assume. Where the assets of a tortfeasor are not adequate for payments for the tort liability and administrative liability or criminal liability for the same conduct, the tortfeasor shall first assume the tort liability.

Article 5 Where any other law provides otherwise for any tort liability in particular, such special provisions shall prevail.

Chapter II Constituting Liability and Methods of Assuming Liability

Article 6 One who is at fault for infringement upon a civil right or interest of another person shall be subject to the tort liability.

One who is at fault as construed according to legal provisions and cannot prove otherwise shall be subject to the tort liability.

Article 7 One who shall assume the tort liability for infringing upon a civil right or interest of another person, whether at fault or not, as provided for by law, shall be subject to such legal provisions.

Article 8 Where two or more persons jointly commit a tort, causing harm to another person, they shall be liable jointly and severally.

Article 9 One who abets or assists another person in committing a tort shall be liable jointly and severally with the tortfeasor.

One who abets or assists a person who does not have civil conduct capacity or only has limited civil conduct capacity in committing a tort shall assume the tort liability; the guardian of such a person without civil conduct capacity or with limited civil conduct capacity shall assume the relevant liability if failing to fulfill his guardian duties.

Article 10 Where two or more persons engage in a conduct that endangers the personal or property safety of another person, if only the conduct of one or several of them causes harm to another person and the specific tortfeasor can be determined, the tortfeasor shall be liable; or if the specific tortfeasor cannot be determined, all of them shall be liable jointly and severally.

Article 11 Where two or more persons commit torts respectively, causing the same harm, and each tort is sufficient to cause the entire harm, the tortfeasors shall be liable jointly and

severally.

Article 12 Where two or more persons commit torts respectively, causing the same harm, if the seriousness of liability of each tortfeasor can be determined, the tortfeasors shall assume corresponding liabilities respectively; or if the seriousness of liability of each tortfeasor is hard to be determined, the tortfeasors shall evenly assume the compensatory liability.

Article 13 Where the joint and several liability shall be assumed by the tortfeasors according to law, the victim of torts shall be entitled to require some or all of the tortfeasors to assume the liability.

Article 14 The compensation amounts corresponding to the tortfeasors who are jointly and severally liable shall be determined according to the seriousness of each tortfeasor; and if the seriousness of each tortfeasor cannot be determined, the tortfeasors shall evenly assume the compensatory liability.

A tortfeasor who has paid an amount of compensation exceeding his contribution shall be entitled to be reimbursed by the other tortfeasors who are jointly and severally liable.

Article 15 The methods of assuming tort liabilities shall include:

1. cessation of infringement;
2. removal of obstruction;
3. elimination of danger;
4. return of property;
5. restoration to the original status;
6. compensation for losses;
7. apology; and
8. elimination of consequences and restoration of reputation.

The above methods of assuming the tort liability may be adopted individually or jointly.

Article 16 Where a tort causes any personal injury to another person, the tortfeasor shall compensate the victim for the reasonable costs and expenses for treatment and rehabilitation, such as medical treatment expenses, nursing fees and travel expenses, as well as the lost wages. If the victim suffers any disability, the tortfeasor shall also pay the costs of disability assistance equipment for the living of the victim and the disability indemnity. If it causes the death of the victim, the tortfeasor shall also pay the funeral service fees and the death compensation.

Article 17 Where the same tort causes the deaths of several persons, a uniform amount of death compensation may be determined.

Article 18 Where a tort causes the death to the victim, the close relative of the victim shall be entitled to require the tortfeasor to assume the tort liability. Where the victim of a tort, which is an entity, is split or merged, the entity succeeding to the rights of the victim shall be entitled to require the tortfeasor to assume the tort liability.

Where a tort causes the death to the victim, those who have paid the medical treatment expenses, funeral service fees and other reasonable costs and expenses for the victim shall be entitled to require the tortfeasor to compensate them for such costs and expenses, except

that the tortfeasor has already paid such costs and expenses.

Article 19 Where a tort causes any harm to the property of another person, the amount of loss to the property shall be calculated as per the market price at the time of occurrence of the loss or calculated otherwise.

Article 20 Where any harm caused by a tort to a personal right or interest of another person gives rise to any loss to the property of the victim of the tort, the tortfeasor shall make compensation as per the loss sustained by the victim as the result of the tort. If the loss sustained by the victim is hard to be determined and the tortfeasor obtains any benefit from the tort, the tortfeasor shall make compensation as per the benefit obtained by it. If the benefit obtained by the tortfeasor from the tort is hard to be determined, the victim and the tortfeasor disagree to the amount of compensation after consultation, and an action is brought to a people's court, the people's court shall determine the amount of compensation based on the actual situations.

Article 21 Where a tort endangers the personal or property safety of another person, the victim of the tort may require the tortfeasor to assume the tort liabilities including but not limited to cession of infringement, removal of obstruction and elimination of danger.

Article 22 Where any harm caused by a tort to a personal right or interest of another person inflicts a serious mental distress on the victim of the tort, the victim of the tort may require compensation for the infliction of mental distress.

Article 23 Where one sustains any harm as the result of preventing or stopping the infringement upon the civil right or interest of another person, the tortfeasor shall be liable for the harm. If the tortfeasor flees or is unable to assume the liability and the victim of the tort requires compensation, the beneficiary shall properly make compensation.

Article 24 Where neither the victim nor the actor is at fault for the occurrence of a damage, both of them may share the damage based on the actual situations.

Article 25 After the occurrence of any harm, the parties may consult each other about the methods to pay for compensations. If the consultation fails, the compensations shall be paid in a lump sum. If it is hard to make the payment in a lump sum, the payment may be made in installments but a corresponding security shall be provided.

Chapter III Circumstances to Waive Liability and Mitigate Liability

Article 26 Where the victim of a tort is also at fault as to the occurrence of harm, the liability of the tortfeasor may be mitigated.

Article 27 The actor shall not be liable for any harm that is caused intentionally by the victim.

Article 28 Where any harm is caused by a third party, the third party shall assume the tort liability.

Article 29 Where any harm to another person is caused by a force majeure, the tortfeasor shall not be liable, except as otherwise provided for by law.

Article 30 Where any harm is caused by self-defense, the person exercising self-defense shall not be liable. If the self-defense exceeds the necessary limit, causing any undue harm, the person exercising self-defense shall assume proper liability.

Article 31 Where any harm is caused by any conduct of necessity, the person causing the occurrence of danger shall be liable. If the danger is as the result of a natural cause, the person causing the harm for necessity shall not be liable or shall make proper compensation. If improper measures of necessity are taken or a necessary limit is exceeded, causing any undue harm, the person causing the harm for necessity shall assume proper liability.

Chapter IV Special Provisions on Tortfeasors

Article 32 Where a person without civil conduct capacity or with limited civil conduct capacity causes any harm to another person, the guardian shall assume the tort liability. If the guardian has fulfilled his guardian duties, his tort liability may be mitigated.

Where a person without civil conduct capacity or with limited civil conduct capacity, who has property, causes any harm to another person, the compensations shall be paid out of his own property. The guardian shall make up any deficit of the compensations.

Article 33 Where a person with full civil conduct capacity causes any harm to another person as the result of his temporary loss of consciousness or control of his conduct, if he is at fault, he shall assume the tort liability; or if he is not at fault, the victim shall be compensated properly according to the economic condition of the person causing the harm.

Where a person with full civil conduct capacity causes any harm to another person as the result of his temporary loss of consciousness or control of his conduct due to alcohol intoxication or abuse of narcotic or psychoactive drug, he shall assume the tort liability.

Article 34 Where an employee of an employer which is an entity causes any harm to another person in the execution of his work duty, the employer shall assume the tort liability.

Where, during the period of labor dispatch, a dispatched employee causes any harm to another person in the execution of his work duty, the entity employer receiving the dispatched employee shall assume the tort liability; and the entity employer dispatching the employee, if at fault, shall assume the corresponding complementary liability.

Article 35 Where, in a labor relationship formed between individuals, the party providing labor services causes any harm to another person as the result of the labor services, the party receiving labor services shall assume the tort liability. If the party providing labor services causes any harm to himself as the result of the labor services, both parties shall assume corresponding liabilities according to their respective faults.

Article 36 A network user or network service provider who infringes upon the civil right or interest of another person through network shall assume the tort liability.

Where a network user commits a tort through the network services, the victim of the tort shall be entitled to notify the network service provider to take such necessary measures as deletion, block or disconnection. If, after being notified, the network service provider fails to take necessary measures in a timely manner, it shall be jointly and severally liable for any additional harm with the network user.

Where a network service provider knows that a network user is infringing upon a civil right or interest of another person through its network services, and fails to take necessary measures, it shall be jointly and severally liable for any additional harm with the network user.

Article 37 The manager of a public venue such as hotel, shopping center, bank, station or entertainment place or the organizer of a mass activity shall assume the tort liability for any harm caused to another person as the result of his failure to fulfill the duty of safety protection. If the harm to another person is caused by a third party, the third party shall assume the tort liability; and the manager or organizer, if failing to fulfill the duty of safety protection, shall assume the corresponding complementary liability.

Article 38 Where a person without civil conduct capacity sustains any personal injury during the period of studying or living in a kindergarten, school or any other educational institution, the kindergarten, school or other educational institution shall be liable unless it can prove that it has fulfilled its duties of education and management.

Article 39 Where a person with limited civil conduct capacity sustains any personal injury during the period of studying or living in a school or any other educational institution, the school or other educational institution shall be liable if failing to fulfill its duties of education and management.

Article 40 Where, during the period of studying or living in a kindergarten, a school or any other educational institution, a person without civil conduct capacity or with limited civil conduct capacity sustains any personal injury caused by any person other than those of the kindergarten, school or other education institution, the person causing the harm shall assume the tort liability; and the kindergarten, school or other educational institution shall assume the corresponding complementary liability if failing to fulfill its duties of management.

Chapter V Product Liability

Article 41 Where a defective product causes any harm to another person, the manufacturer shall assume the tort liability.

Article 42 Where a product with any defect caused by the fault of the seller causes any harm to another person, the seller shall assume the tort liability.

Where a seller can neither specify the manufacturer of a defective product nor specify the supplier of the defective product, the seller shall assume the tort liability.

Article 43 Where any harm is caused by a defective product, the victim may require compensation to be made by the manufacturer of the product or the seller of the product.

If the defect of the product is caused by the manufacturer and the seller has made the compensation for the defect, the seller shall be entitled to be reimbursed by the manufacturer. If the defect of the product is caused by the fault of the seller and the manufacturer has made the compensation for the defect, the manufacturer shall be entitled to be reimbursed by the seller.

Article 44 Where any harm is caused to another person by a defective product and the defect is caused by the fault of a third party such as carrier or warehouseman, the manufacturer or seller of the product that has paid the compensation shall be entitled to be reimbursed by the third party.

Article 45 Where the defect of a product endangers the personal or property safety of another person, the victim shall be entitled to require the manufacturer or seller to assume

the tort liabilities by removing the obstruction or eliminating the danger.

Article 46 Where any defect of a product is found after the product is put into circulation, the manufacturer or seller shall take such remedial measures as warning and recall in a timely manner. The manufacturer or seller who fails to take remedial measures in a timely manner or take sufficient and effective measures and has caused any harm shall assume the tort liability.

Article 47 Where a manufacturer or seller knowing any defect of a product continues to manufacture or sell the product and the defect causes a death or any serious damage to the health of another person, the victim shall be entitled to require the corresponding punitive compensation.

Chapter VI Liability for Motor Vehicle Traffic Accident

Article 48 Where a motor vehicle traffic accident causes any harm, the compensatory liability shall be assumed according to the relevant provisions of the Road Traffic Safety Law.

Article 49 Where the owner and the user of a motor vehicle are not the same person due to the relationship of a lease, a borrowing or any other reason and the liability of a traffic accident is attributed to the motor vehicle, the insurance company shall make compensation within the liability limit of the mandatory motor vehicle insurance. The user of the motor vehicle shall make up any deficit of the compensation; and if the owner of the motor vehicle is at fault as to the harm, he shall assume the corresponding compensatory liability.

Article 50 Where a motor vehicle has been transferred and delivered from one party to another through sale or in any other transaction method but the registration of ownership transfer has not been conducted, if the liability of a traffic accident is attributed to the motor vehicle, the insurance company shall make compensation within the liability limit of the mandatory motor vehicle insurance. The transferee of the motor vehicle shall make up any deficit of the compensation.

Article 51 Where an illegally assembled motor vehicle or a motor vehicle reaching the standard of retirement, which has been transferred through sale or in any other transfer method, causes a traffic accident and a harm, the transferor and the transferee shall be liable jointly and severally.

Article 52 Where a traffic accident occurs to a motor vehicle that has been obtained by theft, robbery or snatch and causes a harm, the thief, robber or snatcher shall assume the compensatory liability. The insurance company that makes advances for rescue expenses within the liability limit of the mandatory motor vehicle insurance shall be entitled to be reimbursed by the person liable for the traffic accident.

Article 53 Where the driver of a motor vehicle flees after a traffic accident occurs to the motor vehicle, if the motor vehicle is covered by the mandatory insurance, the insurance company shall make compensation within the liability limit of the mandatory motor vehicle insurance; or if the motor vehicle cannot be identified or is not covered by the mandatory insurance, and the expenses for the death of or personal injury to the victim, such as rescue and funeral fees, need to be paid, the advances shall be made out of the Social Assistance Fund for

Road Traffic Accidents. After advances are made out of the Social Assistance Fund for Road Traffic Accidents, the governing body of the fund shall be entitled to be reimbursed by the person liable for the traffic accident.

Chapter VII Liability for Medical Malpractice

Article 54 Where a patient sustains any harm during diagnosis and treatment, if the medical institution or any of its medical staff is at fault, the medical institution shall assume the compensatory liability.

Article 55 During the diagnosis and treatments, the medical staff shall explain the illness condition and relevant medical measures to their patients. If any operation, special examination or special treatment is needed, the medical staff shall explain the medical risks, alternate medical treatment plans and other information to the patient in a timely manner, and obtain a written consent of the patient; or, when it is not proper to explain the information to the patient, explain the information to the close relative of the patient, and obtain a written consent of the close relative.

Where any medical staff member fails to fulfill the duties in the preceding paragraph and causes any harm to a patient, the medical institution shall assume the compensatory liability.

Article 56 Where the opinion of a patient or his close relative cannot be obtained in the case of an emergency such as rescue of a patient in critic condition, with the approval of the person in charge of the medical institution or an authorized person in charge, the corresponding medical measures may be taken immediately.

Article 57 Where any medical staff member fails to fulfill the obligations of diagnosis and treatment up to the standard at the time of the diagnosis and treatment and causes any harm to a patient, the medical institution shall assume the compensatory liability.

Article 58 Under any of the following circumstances, a medical institution shall be at fault constructively for any harm caused to a patient:

1. violating a law, administrative regulation or rule, or any other provision on the procedures and standards for diagnosis and treatment;
2. concealing or refusing to provide the medical history data related to a dispute; or
3. forging, tampering or destroying any medical history data.

Article 59 Where any harm to a patient is caused by the defect of any drug, medical disinfectant or medical instrument or by the transfusion of substandard blood, the patient may require a compensation from the manufacturer or institution providing blood, or require a compensation from the medical institution. If the patient requires a compensation from the medical institution, the medical institution that has paid the compensation shall be entitled to be reimbursed by the liable manufacturer or institution providing blood.

Article 60 Under any of the following circumstances, a medical institution shall not assume compensatory liability for any harm caused to a patient:

1. the patient or his close relative does not cooperate with the medical institution in the diagnosis and treatment in line with the procedures and standards for diagnosis and treatment;

2. the medical staff have fulfilled the duty of reasonable diagnosis and treatment in the case of an emergency such as rescue of a patient in critical condition; or

3. diagnosis and treatment of the patient is difficult due to the medical level at the time.

Under the circumstance in item 1 of the preceding paragraph, if the medical institution or any of its medical staff is also at fault, the medical institution shall assume the corresponding compensatory liability.

Article 61 A medical institution and its medical staff shall fill out and properly keep the hospital admission logs, medical treatment order slips, test reports, operation and anesthesia records, pathology records, nurse care records, medical expenses sheets and other medical history data according to the relevant provisions.

Where a patient files a request for consulting or copying the medical history data in the preceding paragraph, the medical institution shall provide the data.

Article 62 A medical institution and its medical staff shall keep confidential the privacy of a patient. If any privacy data of a patient is divulged or any of the medical history data of a patient is open to the public without the consent of the patient, causing any harm to the patient, the medical institution shall assume the tort liability.

Article 63 A medical institution and its medical staff shall not conduct unnecessary examinations in violation of the procedures and standards for diagnosis and treatment.

Article 64 The legitimate rights and interests of a medical institution and its medical staff shall be protected by law. Anyone who interrupts the order of the medical system or obstructs the work or life of medical staff shall be subject to legal liability.

Chapter VIII Liability for Environmental Pollution

Article 65 Where any harm is caused by environmental pollution, the polluter shall assume the tort liability.

Article 66 Where any dispute arises over an environmental pollution, the polluter shall assume the burden to prove that it should not be liable or its liability could be mitigated under certain circumstances as provided for by law or to prove that there is no causation between its conduct and the harm.

Article 67 Where the environmental pollution is caused by two or more polluters, the seriousness of liability of each polluter shall be determined according to the type of pollutant, volume of emission and other factors.

Article 68 Where any harm is caused by environmental pollution for the fault of a third party, the victim may require a compensation from either the polluter or the third party. After making compensation, the polluter shall be entitled to be reimbursed by the third party.

Chapter IX Liability for Ultrahazardous Activity

Article 69 One who causes any harm to another person while engaging in any ultrahazardous operation shall assume the tort liability.

Article 70 Where a nuclear accident occurs to a civil nuclear facility and causes any harm to another person, the operator of the civil nuclear facility shall assume the tort liability unless it can prove that the harm is caused by a situation such as war or by the victim intentionally.

Article 71 Where a civil aircraft causes any harm to another person, the operator of the civil aircraft shall assume the tort liability unless it can prove that the harm is caused by the victim intentionally.

Article 72 Where the possession or use of inflammable, explosive, acutely toxic, radioactive or any other ultrahazardous materials causes any harm to another person, the possessor or user shall assume the tort liability unless it can prove that the harm is caused by the victim intentionally or by a force majeure. If the victim is grossly negligent for the occurrence of the harm, the liability of the possessor or user may be mitigated.

Article 73 Where any harm is caused to another person by an aerial, high pressure or underground excavation activity or by the use of high speed rail transport vehicle, the operator shall assume the tort liability unless it can prove that the harm is caused by the victim intentionally or by a force majeure. If the victim is negligent for the occurrence of the harm, the liability of the operator may be mitigated.

Article 74 Where any harm is caused to another person by the loss or abandonment of ultrahazardous materials, the owner shall assume the tort liability. If the owner has delivered the ultrahazardous materials to another person for management, the person who manages the materials shall assume the tort liability; and if the owner is at fault, he shall be liable jointly and severally with the person who manages the materials.

Article 75 Where any harm to another person is caused by the illegal possession of ultrahazardous materials, the illegal possessor shall assume the tort liability. If the owner and the managing person cannot prove that it has fulfilled its duty of a high degree of care in preventing others from illegal possession, they shall be liable jointly and severally with the illegal possessor.

Article 76 Where any harm is caused by the entry into an area of ultrahazardous activities or an area of storing ultrahazardous materials, if the managing person has taken safety measures and fulfilled its duty of warning, its liability may be mitigated or it may assume no liability.

Article 77 Where any legal provision prescribes a limit of compensation for liability for an ultrahazardous activity, such a provision shall apply.

Chapter X Liability for Harm Caused by Domestic Animal

Article 78 Where a domestic animal causes any harm to another person, the keeper or manager of the animal shall assume the tort liability, but may assume no liability or assume mitigated liability, if it can prove that the harm is caused by the victim intentionally or by the gross negligence of the victim.

Article 79 Where any harm is caused to another person by a failure to take safety measures against an animal in violation of management rules, the keeper or manager of the animal shall assume the tort liability.

Article 80 Where any dangerous animal such as a fierce dog that is prohibited from keeping causes any harm to another person, the keeper or manger of the animal shall assume the tort liability.

Article 81 Where any animal of a zoo causes any harm to another person, the zoo shall assume the tort liability unless it can prove that it has fulfilled its duties of management.

Article 82 Where an abandoned or fleeing animal causes any harm to another person during the time period of its abandonment or fleeing, the original keeper or manager of the animal shall assume the tort liability.

Article 83 Where any harm is caused to another person by an animal for the fault of a third party, the victim may require a compensation from the keeper or manger of the animal, or require a compensation from the third party. After making compensation, the keeper or manager of the animal shall be entitled to be reimbursed by the third party.

Article 84 Animals shall be kept in accordance with the law, in the manner of respecting the social morals, and without interference with the life of others.

Chapter XI Liability for Harm Caused by Object

Article 85 Where any building, structure or facility or any thing laid thereon or suspended therefrom falls off or falls down, causing any harm to another person, if the owner, manager or user cannot prove that he is not at fault, he shall assume the tort liability. After making compensation, the owner, manager or user shall be entitled to be reimbursed by other liable persons if any.

Article 86 Where any building, structure or facility collapses, causing any harm to another person, the construction employer and contractor shall be liable jointly and severally. After making compensation, the construction employer or contractor shall be entitled to be reimbursed by other liable persons if any.

Where the collapse of any building, structure or facility, which causes any harm to another person, is attributed to any other liable person, the other liable person shall assume the tort liability.

Article 87 Where any object thrown out of a building or falling down from a building causes any harm to another person and it is hard to determine the specific tortfeasor, all the users of the building who possibly commit the tort but those who can prove that they are not the tortfeasor shall make indemnity.

Article 88 Where a pile of objects collapse and cause any harm to another person, the person making the pile shall assume the tort liability if it cannot prove that it has no fault.

Article 89 Where any harm is caused to another person by objects piled, dumped or scattered on a public road, which obstruct passage, the relevant entity or individual shall assume the tort liability.

Article 90 Where any harm is caused to another person by a broken tree, the owner or manager of the tree shall assume the tort liability if it cannot prove that he is not at fault.

Article 91 Where anyone digs a pit, repairs or installs any underground facility, etc. at a public venue or on a public road but fails to set up any obvious warning sign or take any safety measure, and causes any harm to another person, the person shall assume the tort liability. Where a manhole or any other underground facility causes any harm to another person, the manager of the manhole or the facility shall assume the tort liability if he cannot prove that

he has fulfilled the duties of management.

Chapter XII Supplementary Provision

Article 92 This Law shall come into force on July 1, 2010.

16. Public Security Administration Punishments Law of the People's Republic of China

(Adopted at the 17th Session of the Standing Committee of the 10th National People's Congress on August 28, 2005; amended in accordance with the Decision on Amending the Public Security Administration Punishments Law of the People's Republic of China as adopted at the 29th Session of the Standing Committee of the Eleventh National People's Congress on October 26, 2012 Order No. 67 of the President of the People's Republic of China)

Chapter I General Provisions

Article 1 This Law is enacted with a view to maintaining the social security order, guaranteeing public safety, protecting the lawful rights and interests of the citizens, legal persons and other organizations, regulating and ensuring the lawful fulfillment of the public security administration duties by the public security organs and the people's policemen.

Article 2 With regard to an act of disrupting public order, encroaching upon the right of the person, the right of property or impairing social administration, if it is of social harmfulness and constitutes any crime as provided for in the Criminal Law of the People's Republic of China, it shall be subject to criminal liabilities. If it is not serious enough to be subject to a criminal punishment, it shall, in accordance with this law, be subject to public security punishment by the public security organ.

Article 3 The provisions of this Law shall apply to the procedures for the public security administration punishments. If any matter is not covered by this Law, the relevant provisions of the Administrative Punishment Law of the People's Republic of China shall apply.

Article 4 This Law shall apply to the acts violating the public security administration within the territory of the People's Republic of China unless it is otherwise provided for in any law. This Law shall apply to the acts violating the public security administration that occur in the vessels and aircrafts of the People's Republic of China unless it is otherwise provided for in any law.

Article 5 The public security administration punishments shall be based on facts and shall be suitable for the nature and circumstances and extent of harm to the society caused by the act violating the public security administration.

The imposition of public security administration punishments shall be open and impartial, shall respect and guarantee human rights and shall protect the personal dignity of the citizens.

The principle of combining education with punishments shall be observed in tackling security cases.

Article 6 The people's governments at all levels shall strengthen the comprehensive control

of social security, shall take effective measures to solve social contradictions, enhance social harmony and maintain social stability.

Article 7 The public security department of the State Council shall be responsible for the public security administration throughout the country. The public security organs of the people's governments at all levels shall be responsible for the public security administration within their respective administrative division.

The jurisdiction of security cases shall be forest forth by the public security department of the State Council.

Article 8 Where an act violating public security administration causes any damage to any other person, the violator or its guardian shall bear civil liabilities under the law.

Article 9 With regard to the acts violating public security administration, such as fight and destroy of property of any other person due to civil disputes, if the circumstances are lenient, the public security organ may solve them by mediation. Upon mediation of the public security organ, if the parties concerned reach an agreement, it shall be exempted from punishment. If no agreement is reached, or if an agreement has been reached but not executed, the public security organ may punish the violator of public security administration in accordance with this Law and inform the parties concerned that they may lodge a civil lawsuit in the people's court for the civil dispute concerned.

Chapter II Categories and Application of the Punishments Thereto

Article 10 The public security administration punishments are classified into the following categories:

- (1)Warning;
- (2)Pecuniary penalty;
- (3)Administrative detention; and
- (4)Revocation of the license issued by the public security organ;

Any foreigner who violates the public security administration may be given an additionally applicable time limit for exiting China or being expelled from China.

Article 11 The drugs, obscene articles and other prohibited articles, gambling tools, gambling stakes, tools for drug injection, and all the tools of the violator directly used for committing a violation of the public security administration that are discovered in a public security case shall be confiscated and disposed of in accordance with the relevant provisions.

The properties gained by violating the public security administration shall be confiscated and returned to the victim. If there is no victim, the properties shall be recorded down and shall be auctioned openly or shall be disposed of in accordance with the relevant provisions of the state, and the proceeds therefrom shall be turned over to the state treasury.

Article 12 Where a person who attains to the age of 14 but is less than 18 years old violates public security administration, he shall be given a lighter or mitigated punishment. Where a person who is less than 14 years old violates public security administration, he (she) shall be immune from punishment, but his guardian shall be ordered to offer him strict custodian education.

Article 13 If a mentally insane patient causes any harmful consequences at a time when he (she) is unable to understand or control his own conduct, he shall be immune from punishment, but his (her) guardian shall be ordered to keep him under strict watch and control and give him medical treatment. An intermittently mentally insane patient shall be punished if he (she) violates the public security administration when he is in a normal mental state.

Article 14 A blind or deaf-and-mute person who violates the administration of public security may be given a lighter or mitigated punishment or may be exempted from punishment.

Article 15 An intoxicated person who violates the administration of public security shall be punished.

As to any intoxicated person who may face danger himself (herself) or cause danger to the body or property of any other person or to the public safety, a protective measure shall be taken to control him (her) until he (she) sobers up.

Article 16 Where a person commits two or more acts violating public security administration, rulings shall be made separately but shall be executed concurrently. The maximum time period for the concurrently executed punishments as administrative detention shall not exceed 20 days.

Article 17 Where 2 or more persons jointly commit a violation of public security administration, they shall be punished separately on the basis of their respective role in the violation.

Any person who instigates, coerces or induces any other person to violate public security administration, he (she) shall be punished according to the act he has instigated, coerced or induced.

Article 18 Where an entity violates public security administration, the directly liable person-in-charge of the entity and other directly liable persons shall be punished in accordance with this Law. Where any other law or administrative regulation prescribes any punishment on the same violation, the other law or administrative regulation shall prevail.

Article 19 Under any of the following circumstances, the violator of public security administration shall be given a mitigated punishment or may be exempted from punishment:

- (1)The circumstances are extremely lenient;
- (2)The violator has eliminated or mitigated the consequences of the illegal act on his own initiative and has obtained the understanding of the victim;
- (3)He (She) committed the violation because he (she) is forced or induced to do so;
- (4)He (She) surrenders himself to justice and faithfully makes a statement about the violation to the public security organ; and
- (5)He (She) has performed meritorious services.

Article 20 Under any of the following circumstances, a violator of public security administration shall be given a heavier punishment:

- (1)Having caused rather serious consequences;
- (2)Instigating, coercing or inducing any other person to violate public security administration;
- (3)Revenging on the person who reported the case to the public security organ, the accuser,

informant or witness;

(4) Having ever been subjected to any public security administration punishment within 6 months.

Article 21 Where a violator of public security administration is under any of the following circumstances, if he should be given a punishment of administrative detention under this Law, the punishment of administrative detention shall not be executed:

(1) He (She) attains to the age of 14 but is under the age of 16;

(2) He (She) attains to the age of 16 but less than the age of 18 and violates public security administration for the first time;

(3) He (She) attains to the age of 70 or more; or

(4) She (is) pregnant or is breast-feeding her baby of less than 1 year old.

Article 22 Where any violation of public security administration has not been found by the public security organ within 6 months, no punishment may be given thereafter.

The time period as provided for in the preceding paragraph shall be counted from the day when the violation is committed. If the violation is continuous or in a state of continuity, the time period shall be counted as of the day when the violation ends.

Chapter III Acts Violating Public Security Administration and the Punishments Thereto

Section 1 Acts Disrupting Public Order and the Punishments Thereto

Article 23 Where a person commits any of the following acts, he shall be given a warning or a pecuniary penalty. If the circumstances are serious, he (she) shall be detained for not less than 5 days but not more than 10 days and may be fined 500 yuan:

(1) He (she) disturbs the order of any organ, social organization, enterprise or public institution and makes it impossible for the work, production, business, medical services, teaching or scientific research to proceed normally, but has not caused any serious loss;

(2) He (She) disturbs the order of any bus station, port, dock, civil airport, emporium, park, exhibition hall or any other public place;

(3) He (She) disturbs the order of any bus, trolleybus, train, ship, aircraft or any other means of public transport;

(4) He (She) illegally stops or board any slowly going motor vehicle, ship, aircraft or any other means of transport and affects the normal operation of the means of transport; or

(5) He (She) disturbs the order of any on-going election.

The principal violator who gathers a crowd to commit any of the acts as mentioned in the preceding paragraph shall be detained for not less than 10 days but not more than 15 days, and may be fined not more than 1, 000 yuan.

Article 24 Where a person commits any of the following acts to disturb the order of a cultural activity, sport or any other large scale mass activity, he (she) shall be given a warning or fined not more than 200 yuan. If the circumstances are serious, he (she) be detained for not less than 5 days but not more than 10 days, and may be fined not more than 500 yuan:

(1) Entering into the venue by force;

- (2) Setting off fireworks and firecrackers or other articles in a prohibited area by violating relevant provisions;
- (3) Showing any insulting banner, scroll or other article;
- (4) Besieging any referee, athlete or other working personnel;
- (5) Throwing sundries into the arena and refusing to stop doing so after being ordered to stop; or
- (6) Other acts disturbing the order of large scale mass activities.

Where a person is given a punishment of detention due to disturbing the order of a sport game, he (she) may be ordered not to enter into gymnasiums to watch games of the same type. If he enters into a gymnasium by violating the provisions, he shall be forced to leave the venue.

Article 25 Anyone who commits any of the following acts shall be detained for not less than 5 days but not more than 10 days, and may be concurrently fined 500 yuan. If the circumstances are relatively lenient, he (she) shall be detained 5 days or less or be fined not more than 500 yuan:

- (1) Intentionally disturbing public order by spreading any rumor, giving false information about the situation of any risk, epidemic disease or emergency, or by any other means;
- (2) Disturbing public order by throwing any fake explosive, toxic, radioactive or caustic substances, or any fake infectious disease pathogen;
- (3) Disturbing public order by threat to set fire, blast or throw dangerous substances.

Article 26 Anyone who commits any of the following acts shall be detained for not less than 5 days but not more than 10 days, and may be fined not more than 500 yuan. If the circumstances are quite serious, he (she) shall be detained for not less than 10 days but not more than 15 days, and may be fined not more than 1, 000 yuan:

- (1) Gang-fighting;
- (2) Chasing or heading off any other person;
- (3) Forcibly taking or demanding, willfully damaging, destroying or appropriating any public or private property;
- (4) Other acts of picking a quarrel and making trouble.

Article 27 Anyone who commits any of the following acts may be detained for not less than 10 days but not more than 15 days, and may be concurrently fined not more than 1, 000 yuan. If the circumstances are relatively lenient, he (she) shall be detained for not less than 5 days but not more than 10 days, and may be concurrently fined not more than 5, 00 yuan:

- (1) Organizing, instigating, intimidating, inducing or inciting any other person to carry out activities of any cult or superstitious sect or secret society, or disturbing the social order or impairing the health of any other person by using any cult, or superstitious sect or secret society, or superstitious activity; or
- (2) Disturbing the social order or impairing the health of any other person in the name of any religion or Qigong.

Article 28 Where anyone, who deliberately interfere with the operation of any normal radio

business or produces harmful interference to any normally operating radio station by violating the provisions of the state, fails to adopt effective measures to eliminate the interference after the relevant administrative organ points it out. If the circumstances are serious, he (she) shall be detained for not less than 10 days but not more than 15 days.

Article 29 Anyone who commits any of the following acts shall be detained for not more than 5 days. If the circumstances are relatively serious, he (she) shall be detained for not less than 5 days but not more than 10 days:

(1)Invading a computer information system and causing any damage by violating the provisions of the state;

(2)Deleting, modifying, increasing or interfering with the functions of a computer information system and making the computer information system impossible to operate normally by violating the provisions of the state;

(3)Deleting, modifying or adding the data memorized, processed or transmitted in a computer information system, and the application programs of the computer information system; or

(4)Deliberately making and spreading any destructive programs such as computer virus and affecting the normal operation of a computer information system.

Section 2 Acts Impairing Public Safety and the Punishments Thereto

Article 30 Anyone who produces, buys, sells, preserves, transports, mails, carries, uses, offers or disposes of any dangerous substance, such as explosive, toxic, radioactive or caustic substances or infectious disease pathogens, he (she) shall be detained for not less than 10 days but not more than 15 days. If circumstances are relatively lenient, he (she) shall be detained for not less than 5 days but not more than 10 days.

Article 31 Where any dangerous substance, such as explosive, toxic, radioactive or caustic substances or any infectious disease pathogen, are stolen, robbed or lost, if the liable person fails to report according to the relevant provisions, he (she) shall be detained for not more than 5 days. If he (she) deliberately conceals the fact so as not to report, he (she) shall be detained for not less than 5 days but not more than 10 days.

Article 32 Anyone who illicitly carries any gun, ammunition, crossbow, dagger or any other tool controlled by the state shall be detained for not more than 5 days, and may be concurrently fined 500 yuan. If the circumstances are lenient, he (she) shall be given a warning or be fined not more than 200 yuan.

Anyone who illicitly carries any gun, ammunition, crossbow, dagger or any other tool controlled by the state into a public place or public transport tool shall be detained for not less than 5 days but not less than 10 days and may be concurrently fined 500 yuan.

Article 33 Anyone who commits any of the following acts shall be detained for not less than 10 days but not more than 15 days:

(1)Stealing, damaging or destroying any public facilities for oil and gas pipeline, electricity and telecom, radio and television facilities, water conservancy and flood prevention engineering or facilities for hydrological monitoring and measurement, weather observation

and forecast, environment monitoring, geographical monitoring or earthquake monitoring;
(2) Removing, damaging or destroying any border mark and facilities such as boundary tablet, boundary marker, or indicating facilities for territorial land or territorial sea; or
(3) Illicitly carrying out any activity that may affect the direction of the border (boundary) line or build any facilities that may hamper the border (boundary) administration.

Article 34 Anyone who steals, damages or illegally moves any aviation facilities in use, or forces into the cockpit of any aircraft shall be detained for not less than 10 days but not more than 15 days.

Where a person uses any device or tool that may affect the normal functions of the navigation system on an aircraft in use, if he (she) refuses to stop its act after being dissuaded from doing so, he (she) shall be detained for not more than 5 days or shall be fined not more than 500 yuan.

Article 35 Where a person commits any of the following acts shall be detained for not less than 5 days but not more than 10 days, and may be concurrently fined 500 yuan. If the circumstances are relatively lenient, he (she) shall be detained for not more than 5 days or shall be fined not more than 500 yuan:

- (1) Stealing, damaging or destroying or illicitly removing any railway facilities, equipment, locomotive fittings and safety signals;
 - (2) Placing obstacles on a railway or intentionally throwing any object to a train;
 - (3) Digging holes or quarrying or obtaining sand at the location of a railway, bridge or culvert;
- or
- (4) Illegally establishing any crossway or road junction on a railway.

Article 36 Where a person illegally enters into a railway protection net or walks, sits or lie on a railway or rushes to cross a railway when a train is coming, if he (she) affects the safety of the train, he (she) shall be given a warning or shall be fined not more than 200 yuan.

Article 37 Anyone who commits any of the following acts shall be detained for not more than 5 days or shall be fined not more than 500 yuan. If the circumstances are serious, he (she) shall be detained for not less than 5 days but not more than 10 days, and may be concurrently fined not more than 500 yuan:

- (1) Installing or using any power grid without approval, or installing or using any power grid that doesn't conform to the safety requirements;
- (2) Failing to install any covering, sign or fence for a pit, well, ridge and hole in a construction site where vehicles and pedestrians pass, or intentionally damaging, destroying, or removing any covering, sign and fence;
- (3) Stealing, damaging or destroying any public facilities, such as well lids and lighting devices on a road.

Article 38 Where a large scale mass culture or sport activity is in violation of the relevant provisions, if there is any risk of safety accident, the organizer shall be detained for not less than 5 days but not more than 10 days, and shall be concurrently fined not less than 200 yuan but not more than 500 yuan. If the circumstances are relatively lenient, he (she)

detained for not more than 5 days or shall be fined not more than 500 yuan.

Article 39 Where the business manager of a hotel, restaurant, cinema, theatre, entertainment place, playground, exhibition hall or any other place for public activity causes any safety accident risk in this place by violating the safety provisions, if he (she) refuses to make corrections after he (she) has been ordered to make corrections, he (she) shall be detained for not more than 5 days.

Section 3 Acts Infringing upon Personal Rights or Encroaching upon Property Right and the Punishments Thereto

Article 40 Anyone who commits any of the following acts shall be detained for not less than 10 days but not more than 15 days, and shall be concurrently fined not less than 500 yuan but not more than 1, 000 yuan. If the circumstances are relatively lenient, he (she) shall be detained for not less than 5 days but not more than 10 days, and shall be concurrently fined not less than 200 yuan but not more than 500 yuan:

- (1)Organizing, coercing or inducing any minor who hasn't attained to the age of 16 or a disabled person to make terrific or cruel performances;
- (2)Forcing any other person to work by violence, menace or by any other means; or
- (3)Illegally restricting the personal freedom of any other person, illegally intruding the house of any other person or illegally searching the body of any other person.

Article 41 Anyone who coerces, induces or uses any person to go begging shall be detained for not less than 10 days but not more than 15 days, and may be concurrently fined not more than 1, 000 yuan.

Anyone who goes begging by importuning, forcibly begging or by any other means of annoying any person shall be detained for not more than 5 days or shall be given a warning.

Article 42 Anyone who commits any of the following acts shall be detained for not more than 5 days or shall be fined not more than 500 yuan. If the circumstances are relatively serious, he (she) shall be detained for not less than 5 days but not more than 10 days, and may be concurrently fined not more than 500 yuan:

- (1)Threatening the personal safety of any other person by writing threat letters or by any other means;
- (2)Insulting any other person openly or making up stories to defame any other person;
- (3)Attempting to make any other person subject to criminal punishment or public security administration punishment by making up stories and bringing a false charge against any other person;
- (4)Threatening, insulting, beating or revenging upon the witness and his (her) close relatives;
- (5)Interfering with the normal life of any other person by sending any obscene, insulting, threatening or other information time after time;
- (6)Peeping into, sneaking photos, wiretapping or spreading the privacy of any other person.

Article 43 Anyone who blows any person or intentionally injures the body of any person shall be detained for not less than 5 days but not more than 10 days, and shall be fined not less than 200 yuan but not more than 500 yuan. If the circumstances are lenient, he (she) shall

be detained for not more than 5 days or shall be fined not more than 500 yuan.

Anyone who commits any of the following acts shall be detained for not less than 10 days but not more than 15 days, and shall be fined not less than 500 yuan but not more than 1, 000 yuan:

- (1) Beating or injuring any person by forming a group;
- (2) Beating or injuring any person who is disabled, pregnant, under the age of 14 or more than 60 years old; or
- (3) Beating or injuring any person for two or more times, or beating or injuring several people at a time.

Article 44 Anyone who acts indecently towards any person or deliberately expose his body at a public place shall be detained for not less than 5 days but not more than 10 days if the circumstances are absolutely vile. Anyone who acts indecently towards a disabled person, mentally insane patient, or minor under the age of 14, or who commits any other severe violation shall be detained for not less than 10 days but not more than 15 days.

Article 45 Anyone who commits any of the following acts shall be detained for not more than 5 days or shall be given a warning:

- (1) Maltreating his (her) family member; the maltreated person requests for punishing him or her; or
- (2) Abandoning any person who hasn't the abilities of living by himself and shall be supported by him (her).

Article 46 Anyone who forcibly buys and sells any goods, forces any person to provide services or forces any person to accept services shall be detained for not less than 5 days but not more than 10 days, and shall be concurrently fined not less than 200 yuan but not more than 500 yuan. If the circumstances are lenient, he (she) shall be detained for not more than 5 days or shall be fined not more than 500 yuan.

Article 47 Anyone who stir up hatred or discrimination among ethnic groups, or publishes any content discriminating or insulting any minority ethnic group shall be detained for not less than 10 days but not more than 15 days, and may be concurrently fined 1, 000 yuan.

Article 48 Anyone who claims any other's mail in the latter's name, concealing, destroying and discarding, opening any other's mail without permission, or illegally inspecting any other's mail shall be detained for not more than 5 days or fined not more than 500 yuan.

Article 49 Anyone who steals, swindles, plunders, pillages, extorts or intentionally damages or destroys any public or private property shall be detained for not less than 5 days but not more than 10 days, and may be concurrently fined 500 yuan. If the circumstances are serious, he (she) shall be detained for not less than 10 days but not more than 15 days, and may be concurrently fined 1, 000 yuan.

Section 4 Acts Impairing the Social Administration and the Punishments Thereto

Article 50 Anyone who commits any of the following acts shall be given a warning or shall be fined not less than 200 yuan. If the circumstances are serious, he shall be detained for not less than 5 days but not more than 10 days, and may be concurrently fined 500 yuan:

- (1) Refusing to execute the decision or order lawfully issued by the people's government in an emergent situation;
- (2) Obstructing any functionaries of the state organ from performing their duties;
- (3) Hindering any fire engine, ambulance, engineering emergency-relief vehicle or police car from passing; or
- (4) Forcibly rushing into the warning area or warning zone delimited by the public organ.

Anyone who prevents the people's policemen from performing their duties shall be given a heavier punishment.

Article 51 Anyone who commits any fraudulent act by impersonating any functionary of the state organ or by using any other false identity shall be detained for not less than 5 days but not more than 10 days, and may be concurrently fined 500 yuan. If the circumstances are relatively lenient, he (she) shall be detained for not more than 5 days or shall be fined not more than 500 yuan.

Anyone who commits any fraudulent act by impersonating any serviceman or policeman shall be given a heavier punishment.

Article 52 Anyone who commits any of the following acts shall be detained for not less than 10 days but not more than 15 days, and may be concurrently fined not more than 1,000 yuan. If the circumstances are relatively lenient, he (she) shall be detained for not less than 5 days but not more than 10 days, and may be concurrently fined not more than 500 yuan:

- (1) Counterfeiting, altering, buying or selling any document, certificate, certification document or seal of any state organ, mass organization, enterprise, public institution or any other organization;
- (2) Buying, selling or using any counterfeited or altered document, certificate, certification document or seal of any state organ, mass organization, enterprise, public institution or any other organization;
- (3) Counterfeiting, altering, scalping passengers tickets for vehicles, vessels, airplanes, artistic and cultural performances or sport games, or other negotiable instruments or vouchers; or
- (4) Counterfeiting or altering any registration plates of vessels, buying, selling or using any counterfeited or altered registration plates of vessels, or altering the serial number of the engine of a vessel.

Article 53 Where a vessel illegally enters into or moors in an area or island banned or restricted by the state, the person-in-charge and other relevant liable persons of the vessel shall be fined not less than 500 yuan but not more than 1,000 yuan. If the circumstances are serious, he (she) shall be detained for not more than 5 days, and shall be fined not less than 500 yuan but not more than 1,000 yuan.

Article 54 Anyone who commits any of the following acts shall be detained for not less than 10 days but not more than 15 days, and shall be concurrently fined not less than 500 yuan but not more than 1,000 yuan:

- (1) Violating the relevant provisions of the state by carrying out activities in the name of an

unregistered social organization, and continuing to carry out activities after the social organization is canceled;

(2) A deregistered social organization still carries out activities in the name of the social organization; or

(3) Illegally engaging in any business that shall be subject to the approval of the public organ under the relevant provisions of the state.

Any of the acts as mentioned in the preceding paragraph shall be cracked down.

Where a business operator licensed by the public organ violates the relevant provisions of the state, if the circumstances are serious, the public organ may revoke the license.

Article 55 Where a person instigates or schemes any unlawful assembly, parade or demonstration, if he (she) refuses to stop its act after being dissuaded from doing so, he (she) shall be detained for not less than 10 days but not more than 15 days.

Article 56 Where a worker of a hotel fails to register the name, type and number of the identity certificate of any customer, or where the worker of a hotel clearly knows that a customer is carrying dangerous substances, if he fails to stop him from carrying the dangerous substances into the hotel, he shall be fined not less than 200 yuan but not more than 500 yuan.

Where a worker of a hotel knows any customer is a criminal suspect or is wanted for arrest by the public organ, if he (she) fails to report it to the public organ, he (she) shall be fined not less than 200 yuan but not more than 500 yuan. If the circumstances are serious, he (she) shall be detained for not more than 5 days, and may be concurrently fined not more than 500 yuan.

Article 57 A lessor of a house who rents the house to a person without an identity certificate or who fails to register the name, type and number of the identity certificate of the lessee shall be fined not less than 200 yuan but not more than 500 yuan.

A lessor of a house who knows that the lessee is committing any crime by using the rented house but fails to report it to the public organ shall be fined not less than 200 yuan but not more than 500 yuan. If the circumstances are serious, he (she) shall be detained for not less than 5 days, and may be fined not less than 500 yuan.

Article 58 Anyone who makes noises and disturbs the normal life of any other person by violating the legal provisions on the prevention and control of pollution of social life noises shall be given a warning. If he (she) fails to make corrections after he (she) has been given a warning, he (she) shall be fined not less than 200 yuan but not more than 500 yuan.

Article 59 Anyone who commits any of the following acts shall be fined not less than 500 yuan but not more than 1, 000 yuan. If the circumstances are serious, he (she) shall be detained for not less than 5 days but not more than 10 days, and shall be concurrently fined 1, 000 yuan.

(1) If a pawnbroking worker fails to check the relevant certifications or to perform the register formalities for any pawn accepted by him (her), or if a he (she) clearly knows that the pawner is a criminal suspect or the pawn is a booty, he (she) fails to report it to the public organ;

(2) Purchasing any discarded equipment and device specifically used for railways, oil fields, power supply, telecommunications, mines, water conservancy or urban public utilities;

(3) Purchasing any of booties or articles suspected to be booties that are being searched by the public organ; or

(4) Purchasing any other articles as prohibited by the state from being purchased.

Article 60 Anyone who commits any of the following acts shall be detained for not less than 5 days but not more than 10 days, and shall be concurrently fined not less than 200 yuan but not more than 500 yuan:

(1) Concealing, removing, selling off, damaging or destroying any property detained, sealed up or frozen by any administrative law enforcement organ;

(2) Affecting the administrative law enforcement organ's handling of a case by counterfeiting, concealing or destroying any evidence, or providing any false testimonies, giving any false information about the cases in question;

(3) Harboring, removing or selling on behalf of any other person any booties which he (she) obviously knows;

(4) A criminal who is subject to execution of supervision without incarceration or deprivation of political rights according to law, is under suspension of execution or is temporarily serving a sentence outside an incarceration facility or a person who is subject to a compulsory criminal measure according to law violates any law, administrative regulation, or provisions of a relevant department of the State Council on supervision and administration.

Article 61 Anyone who helps to organize or transport any other person(s) to illegally cross the national border (frontier) shall be detained for not less than 10 days but not more than 15 days, and shall be concurrently fined not less than 1, 000 yuan but not more than 5, 000 yuan.

Article 62 Anyone who knowingly facilitates any other person to illegally cross the national border (frontier) shall be detained for not less than 5 days but not more than 10 days, and shall be fined not less than 500 yuan but not more than 2, 000 yuan.

Anyone who illegally crosses the national border (frontier) shall be detained for not more than 5 days or shall be fined not more than 500 yuan.

Article 63 Anyone who commits any of the following acts shall be given a warning or shall be fined not more than 200 yuan. If any circumstances are serious, he (she) shall be detained for not less than 5 days but not more than 10 days, and shall be concurrently fined not less than 200 yuan but not more than 500 yuan:

(1) Destroying any cultural relics or historical sites of interest under national protection by carving on, smearing them or by any other means;

(2) Endangering the safety of cultural relics by carrying out any activities of blasting, excavation or otherwise in violation of the provisions of the state.

Article 64 Anyone who commits any of the following acts shall be fined not less than 500 yuan but not more than 1, 000 yuan. If the circumstances are serious, he (she) shall be detained for not less than 10 days but not more than 15 days, and shall be concurrently fined

not less than 500 yuan but not more than 1, 000 yuan:

- (1) Driving the motor vehicle of any other person without permission; or
- (2) Driving any aircraft or motor vessel without a driving license or driving the aircraft or motor vessel of any other person without permission.

Article 65 Anyone who commits any of the following acts shall be detained for not less than 5 days but not more than 10 days. If the circumstances are serious, he shall be detained for not less than 10 days but not more than 15 days, and may be concurrently fined 1, 000 yuan:

- (1) Deliberately destroying or defiling the tomb of any other person or destroying, throwing away the skeleton or bone ashes of any other person; or
- (2) Parking any corpse at a public place or affecting the normal life or work order of any other person for parking a corpse, and refusing to stop his (her) act after being dissuaded from doing so.

Article 66 Anyone who whores or goes whoring shall be detained for not less than 10 days but not more than 15 days, and may be concurrently fined not more than 5, 000 yuan. If the circumstances are relatively lenient, he (she) shall be detained for not more than 5 days or shall be fined not more than 500 yuan.

Anyone who finds customers for any prostitute at a public place shall be detained for not more than 5 days or shall be fined not less than 500 yuan.

Article 67 Anyone who induces, shelters, introduces any other person to prostitute shall be detained for not less than 10 days but not more than 15 days, and may be concurrently fined 5, 000 yuan. If the circumstances are relatively lenient, he (she) shall be detained for not more than 5 days or shall be fined not 500 yuan.

Article 68 Anyone who produces, transports, copies, sells or rents any obscene book and periodical, picture, film, audio and visual product, etc. or transmitting any obscene information through the computer network, telephone or other telecommunication tools shall be detained for not less than 10 days but not more than 15 days and may be concurrently fined 3, 000 yuan. If the circumstances are relatively lenient, he (she) shall be detained for not more than 5 days or shall be fined not more than 500 yuan.

Article 69 Anyone who commits any of the following acts shall be detained for not less than 10 days but not more than 15 days, and may be concurrently fined not less than 500 yuan but not more than 1, 000 yuan:

- (1) Organizing the broadcasting of any obscene audio and video program;
- (2) Organizing or making any obscene performance; or
- (3) Joining people in licentious activities.

Anyone who knowingly facilitates any other person to engage in any of the activities as mentioned in the preceding paragraph shall be punished in accordance with the preceding paragraph.

Article 70 Anyone who facilitates gambling for the purpose of making profits, or participates in any gambling activity on a relatively large sum of gambling stakes shall be detained for not more than 5 days or shall be fined not more than 500 yuan. If the circumstances are

serious, he (she) shall be detained for not less than 10 days but not more than 15 days, and shall be concurrently fined not less than 500 yuan but not more than 3, 000 yuan.

Article 71 Anyone who commits any of the acts shall be detained for not less than 10 days but not more than 15 days, and may be concurrently fined not more than 3, 000 yuan. If the circumstances are relatively lenient, he (she) shall be detained for not more than 5 days or shall be fined not more than 500 yuan:

(1) Illegally planting 500 opium poppies or less or a small number of original plants for narcotics;

(2) Illegally buying, selling, transporting, carrying or holding a small number of seeds or seedlings of mother plants of narcotic drugs; or

(3) Illegally transporting, buying, selling, storing or selling a small number of poppy capsules. If a person stops committing the acts as mentioned in the Item (1) of the preceding paragraph on his (her) initiative before it is mature, he (she) shall not be punished.

Article 72 Anyone who commits any of the following acts shall be detained for not less than 10 days but not more than 15 days, and may be concurrently fined not more than 2, 000 yuan. If the circumstances are relatively lenient, he (she) shall be detained for not more than 5 days or shall be fined not more than 500 yuan:

(1) Illegally holding less than 200 grams of opium, heroin or methyl amphetamine, or a small quantity of other drugs;

(2) Providing any drug to any other person;

(3) Taking or injecting any drug; or

(4) Coercing or cheating any medical worker to prescribe any narcotic or psychotropic drug.

Article 73 Anyone who instigates, induces or cheats any other person to take or inject any drug shall be detained for not less than 10 days but not more than 15 days, and shall be fined not less than 500 yuan but not more than 2, 000 yuan.

Article 74 Where a staff member of an entity of the hotel industry, catering industry, culture and entertainment industry or taxi industry divulges the secret information to a violator or criminal when the public security organ investigates into or punishes an activity, i.e. drug addiction, gambling, whoring or going whoring, he (she) shall be detained for not less than 10 days but not more than 15 days.

Article 75 Anyone who interferes with the normal life of any other person due to animal breeding shall be given a warning. If he fails to make corrections after the warning, or if he indulges his animal to frighten any other person, he (she) shall be fined not less than 200 yuan but not more than 500 yuan.

Anyone who provokes an animal to injure any other person shall be punished in accordance with the first paragraph of Article 43

Article 76 Where a person commits any of the acts as mentioned in Article 67, 68 or 70, if he (she) refuses to make corrections despite of repeated warning, he (she) may be subject to a compulsory education measure as provided for by the state.

Chapter IV Punishment Procedures

Section 1 Investigation

Article 77 A public security organ shall timely accept and record any case involving a violation of the public security administration, which is reported, charged or tipped off by any person or entity, or any case in which the violator of public security administration gives himself up to the police, or transferred by any other administrative department or by a judicial organ.

Article 78 After the public security organ accepts a case reported, charged, tipped off by any person or entity, or voluntarily confessed by the violator (s), if it considers that it falls within the category of violation of public security administration, it shall immediately begin to investigate into it. If it considers that it doesn't fall within the category of violation of public security administration, it shall notify the person or entity who reports, charges or tips off the case, or the violator who gives himself up to police of the relevant information and shall make an explanation.

Article 79 The public security organs and the people's policemen shall investigate into the public security cases in compliance with the law. It is strictly prohibited for anyone to collect evidence by illegal methods, such as making an interrogation by torture or extorting a confession from the interrogated, or threatening, enticing or cheating the interrogated. Any proof gathered by illegal means shall not be the basis for punishment.

Article 80 The public security organs and the people's policemen shall keep confidential the state secrets and business secrets to which they access when handling the public security cases.

Article 81 When the people's policemen confront with any of the following circumstances when handling a case, they shall disqualify themselves. The violators of public security administration, victims or their statutory agents may also have the right to request them to disqualify themselves:

(1) Being partied concerned or being close relatives of any party concerned in the case in question;

(2) They themselves or their close relatives have any interest in the case in question;

(3) Having any other relationship with any party concerned in this case that may affect the impartial handling of the case.

The disqualification of the people's policeman shall be decided by the public organ they work for. The person-in-charge of a public security organ shall be decided by the superior public security organ.

Article 82 Where it is necessary to summon a violator of public security administration to accept investigation, upon approval the person-in-charge of the case-handling department of the public security organ, a summon certificate shall be used for summoning him (her). With regard to a violator of public security administration found on the spot, the people's policeman may, after presenting his work certificate, orally summon him (her), but shall give explanatory notes in the interrogatory transcripts.

Public security organs shall inform the summoned of the reasons and grounds for summoning. Anyone who refuses to accept the summon without sufficient reasons or evades

the summon may be summoned by force.

Article 83 For anyone who violates the rules of public security administration, the public security organ shall make a timely interrogation after summoning him, and the interrogation may not last more than eight hours at most. Where the circumstances are complicated and the punishment of administrative detention may apply according to the present Law, the time for interrogation may not exceed twenty four hours.

The public security organ shall inform a family member of the summoned of the reason of summon and his whereabouts in a timely manner.

Article 84 The interrogatory transcripts shall be presented to the interrogated for verification. If the interrogated cannot read, the transcripts shall be read out to him. Where there is any omission or mistake in the transcripts, the interrogated may suggest a supplement or correction. When the interrogated assures that there is no error or mistake in the transcripts, he shall affix his signature or seal to the transcripts, to which the people's policeman who effects the interrogation shall also affix his own signature.

Where the interrogated requests for providing written materials by himself regarding the matters he is interrogated of, such request shall be permitted; where necessary, the people's policeman may also demand the interrogated to produce written materials by himself.

To interrogate any violator of public security administration who is under the age of sixteen, the parents or any other guardian of the violator shall be informed to be present.

Article 85 To interrogate a victim or any other witness, the people's policeman may make the interrogation at the entity where the victim or the witness works or the abode where the victim or witness lives; where necessary, the victim or witness may also be informed to bear witness at the public security organ.

To interrogate the victim or any other witness at any place other than the public security organ, the people's policeman shall show his working certificate.

The interrogation of victims and witnesses shall be simultaneously governed by the provisions of Article 85 of the present Law.

Article 86 To interrogate a violator of public security administration, a victim or any other witness who is deaf or dumb, someone who is home at sign language shall be present to provide assistance, and it shall be remarked on the transcripts.

To interrogate a violator of public security administration, a victim or any other witness who does not understand the language which is commonly used in the local place, an interpreter shall be equipped, which shall be remarked on the transcripts.

Article 87 The public security organ may search the places, articles, and persons involved in a violation of public security administration. To conduct the search, there shall be no less than two people's policemen present, who shall show their working certificates and the proof of search as issued by the public security organ of the people's government at the county level or above. Where it is necessary to make an immediate search, the people's policemen may carry out an onsite search, with the exception of searching a citizen's abode when a proof of search as issued by the public security organ of the people's government at the

county level or above shall be produced.

The search of the body of a woman shall be conducted by a female worker.

Article 88 Transcripts shall be made for the searches conducted, to which the searchers, the searched and witnesses shall affix their signatures or seals. Where the searched refuses to affix his signature, it shall be remarked on the transcripts by the people's policemen.

Article 89 When handling a public security administration case, the public security organ may detain the articles which are to be used as evidence relating to the case in question, with the exception of the property lawfully occupied by the victim or bona fide third party which shall not be detained but shall be recorded down. Anything that is irrelevant to the case in question shall not be detained.

For the detained articles, the people's policemen shall make a check jointly with the witnesses on the spot and the holder of the detained articles and shall produce a checklist in duplicate, which shall bear the signature or seal of the searchers, witnesses, and holder, with one copy kept by the holder and the other kept in the case files for future reference.

The detained articles shall be properly preserved and may not be used for any other purposes. For those articles that are not suitable for longtime keeping, they shall be dealt with according to relevant provisions. Where it is found that any of the detained articles is irrelevant to the case in question, it shall be returned in a timely manner. Where it is verified that it is the lawful property of any other person, it shall be returned after being recorded down. Where no person claims right to the said property or where it is impossible to find out the right holder after six months expires, it shall be publicly auctioned or dealt with according to the relevant provisions of the state, and the proceeding arising therefrom shall be turned over to the state treasury.

Article 90 Where it is necessary to solve any controversial issue involved in the case in question for the purpose of clarifying the facts involved, a person with the corresponding professional knowledge may be designated or hired to conduct an authentication. After making the authentication, the authenticator shall produce his opinions of authentication, to which he shall affix his signature.

Section 2 Decision

Article 91 A public security punishment shall be decided by the public security organ of the people's government on the county level or above; in particular, a warning or a fine of less than 500 yuan may be decided by a local police station.

Article 92 For anyone to whom it is decided to give the punishment of administrative detention, the time for restricting his personal freedom by compulsory measures taken prior to the punishment shall be counted into the administrative detention, with one day of personal freedom restriction counting as one day of administrative detention.

Article 93 The public security organ may, in the handling of a public security administration case, make a public security punishment decision where there is no statement of the violator but there are sufficient evidence to prove the facts of the case in question. However, where there are statements of the violator without the support of other evidences, no public security

punishment decision may be made.

Article 94 The public security organ shall, before making a public security punishment decision, inform the violator of public security administration of the facts, reasons, and grounds, and shall inform him of the rights that he may enjoy according to law.

The violator of public security administration shall have the right to make statements and defend himself. The public security organ shall fully listen to the thoughts of the violator of public security administration, and shall check the facts, reasons and evidences as presented by the violator; where any of the facts, reasons and evidences as presented by the violator is found to hold water, it shall be accepted by the public security organ.

The public security organ may not aggravate the punishment as a result of the violator's making a statement or defense.

Article 95 The public security organ shall, after finishing the investigation of a public security administration case, make the following decisions according to the different situations:

(1)Where there is any act to which a public security punishment shall be given according to law, a punishment decision shall be made according to the severity and the specific situation of the circumstances concerned;

(2)Where no punishment is to be given according to law or where the facts of breaking the law cannot establish, a decision of no punishment shall be made;

(3)Where the violation is suspected to constitute any crime, it shall be transferred to the competent organ to subject the violator to criminal liabilities;

(4)Where it is found that the violator of public security administration has committed any other law-breaking acts, the public security organ shall inform the competent organ to deal with it when it makes the decision of punishment for the violation of public security administration.

Article 96 Where the public security organ makes a decision of public security punishment, it shall make a written decision of public security punishment, which shall specify the following contents:

(1)the name, gender, and age of the person to be punished, the name and number of the identity certificate as well as the address of residence thereof;

(2)the facts and evidences of violation;

(3)the type of punishment and the grounds thereof;

(4)the way and term of executing the punishment;

(5)how to request for administrative reconsideration or how to lodge an administrative lawsuit and the time limit thereof in case the person to be punished refuses to accept the punishment decision;

(6)the name of the public security that makes the punishment decision and the date when the punishment decision is made.

The written decision shall bear the seal of the public security organ that makes the said decision.

Article 97 The public security organ shall announce the written decision of public security

punishment to the person to be punished and shall deliver it to him on the spot. Where it is impossible to deliver to him the written decision on the spot, the written decision shall be served to him within two days. Where it is decided to give him an administrative punishment, the public security organ that makes the decision shall inform a family member of the person to be punished.

Where there is any victim, the public security organ shall send a reproduction of the written decision to the victim concerned.

Article 98 The public security organ shall, before making the public security punishment decision of canceling the license of the violator or impose upon the violator a fine of 2,000 yuan or more, inform the violator of the right to request for holding a hearing. Where the violator requests for holding a hearing, the public security organ shall hold a hearing according to law in a timely manner.

Article 99 The time limit for the public security organs to handle public security cases shall not be any more than thirty days as of the day when it accepts the case in question; where the case is very difficult or complicated, the time limit may be prolonged for thirty days, subject to the approval of the public security organ on the next higher level.

The time required by authentication for the purpose of clarifying the facts concerned shall not be included in the time limit for handling the case in question.

Article 100 For a violation of public security administration with clear facts and exact evidence to which a warning or a fine of not more than 200 yuan shall apply, a public security punishment decision may be made on the spot.

Article 101 To make a public security punishment decision on the spot, the people's policemen shall show their working certificates to the violator of public security administration and shall fill out a punishment decision. The punishment decision shall be delivered to the punished on the spot. If there is any victim, a copy of the decision shall be given to the victim. The punishment decision as mentioned in the preceding paragraph shall state the name and violation of the punished, the basis for punishment, amount of the fine, the time, venue as well as the name of the public security organ, and shall bear the signature or seal of the people's policemen who make the punishment decision.

Where a public security punishment decision is made on the spot, the people's policemen who make it shall, within 24 hours, report it to public security organ where they work for archival purposes.

Article 102 If the punished refuses to accept the public security punishment decision, he (she) may apply for administrative reconsideration or lodge an administrative lawsuit.

Section 3 Execution

Article 103 For a person to whom it is decided to give the punishment of administrative detention, he shall be sent to the detention house by the public security organ that makes the decision for executing the decision.

Article 104 A person who is given a punishment of fine shall, within 15 days after he (she) receives a punishment decision, pay the fine to the designated bank. However, the people's

policemen may collect the fine under any of the following circumstances:

- (1)The fine is not more than 50 yuan and the punished raises no objection to the fine;
- (2)In a remote, on-water or unaccessible area, after the public security organ and its policemen makes a decision of fine in accordance with this Law, it is really difficult for the punished to pay the fine to the designated bank and the punished states his difficulty; or
- (3)The punished has no fixed abode in the local area and it is difficult to execute the fine in the future if the fine is not collected on the spot.

Article 105 The people's policemen shall, within 2 days after collecting a fine, turn the fine over to the public security organ where they work. An on-site fine collected on water or passenger train shall be turned over to the public security organ within 2 days after the vessel reaches the land or arrives at a station. The public security organ shall put the fine into the designated bank within 2 days after it receives it.

Article 106 To collect a fine on the spot, the policemen shall issue to the punished a receipt of fine uniformly produced by the public finance department of the people's government of the province, autonomous region or municipality directly under the Central Government. If they fail to do so, the punished may refuse to pay the fine.

Article 107 If the punished refuses to accept the administrative punishment detention decision and if he (she) applies for an administrative reconsideration or lodge an administrative lawsuit, he (she) may file an application with the public security organ for suspending the execution of the administrative detention. If the public security organ believes that there will be no danger as a result of the suspension of administrative detention, after the punished or his (her) close relative proposes a guarantor who meets the requirements as specified in Article 108 of this Law or pays a bail of 200 per day, the execution of punishment decision of administrative detention may be suspended.

Article 108 A guarantor may meet shall following conditions:

- (1)He (She) is not involved in this case;
- (2)He (She) enjoys the political rights and his (her) personal freedom is not restricted;
- (3)He (She) has a registered permanent residence or fixed abode in the local area; and
- (4) He (She) is able to perform his (her) the obligations of a guarantor.

Article 109 The guarantor shall guarantee that the guaranteed will not evade the execution of punishment of administrative detention.

If the guarantor fails to perform the obligations of a guarantor, which leads to the guaranteed's evading the execution of punishment of administrative detention, the public security organ shall fine him (her) not more than 3, 000 yuan.

Article 110 Where a person to whom it is decided to give a punishment of administrative detention evades the execution thereof after a bail is paid and the administrative detention is suspended, the security shall be confiscated and shall be turned over to the state treasury and the decision of administrative detention shall be still executed.

Article 111 After a punishment decision of administrative detention is revoked or after an administrative detention punishment begins to be executed, the bail collected by the public

security organ shall be refunded to the payer in a timely manner.

Chapter V Supervision over Law Enforcement

Article 112 The public security organs and the policemen shall deal with the public security cases impartially, strictly and efficiently in accordance with the law. None of them may seek any private benefits therefrom.

Article 113 During the process of handling a public security administration case, the public security organ and the people's policemen are prohibited from beating, scolding, maltreating or insulting any violator of public security administration.

Article 114 A public security organ and their policemen thereof shall be ready to accept the supervision of the general public and citizens in handling public security cases.

Where, in the process of handling any public security case, a public security organ or any of its people's policemen fails to enforce the law strictly or violate any law or discipline, any entity or individual shall be entitled to expose or charge against them in the public security organ or administrative supervision organ, which shall timely deal with the case according to its functions.

Article 115 To execute a fine in accordance with the law, the public security organ shall, in accordance with the relevant law or administrative regulation, separate the decision of a fine from the collection of fine. All the fines it has collected shall be turned over to the state treasury.

Article 116 Where a people's policeman conducts any of the following acts when handling a public security case, he (she) shall be given an administrative sanction. If any crime is constituted, he (she) shall be subject to criminal liabilities:

- (1) Making an interrogation by torture or extorting a confession from the interrogated, inflicting physical suffering on, maltreating or insulting any other person;
- (2) Restricting the personal freedom by exceeding the time limit for interrogation;
- (3) Failing to execute the system with the decision of a fine separated from the collection of fine, failing to turn any confiscated property over to the state treasury according to relevant provisions, or illegally disposing of any confiscated property;
- (4) Illegally dividing, occupying, misappropriating or deliberately destroying any confiscated or detained property;
- (5) Using the property of a victim or failing to return the property of a victim in a timely manner by violating the relevant provisions;
- (6) Failing to return the security in a timely manner by violating the relevant provisions;
- (7) Accepting the property of any other person or seeking other benefits by taking the advantages of his (her) position;
- (8) Failing to issue a receipt of fine or failing to faithfully fill in the amount of a fine after collecting the fine on the spot;
- (9) Failing to deal with the case in a timely manner after being requested to stop a violation of public security administration;
- (10) Divulging the secret information to the suspect of a violation or crime when punishing

and investing a violation of public security administration; or

(11) Seeking private benefits, abusing his (her) power, or other circumstances in which he (she) fails to perform the statutory duties.

Where the public security organ commits any of the acts as mentioned in the preceding paragraph, the directly liable person-in-charge and other directly liable persons shall be given an administrative sanction accordingly.

Article 117 Where a public security organ or any of the people's policeman encroaches upon the lawful rights and interests of any citizen, legal person or any other organization due its (his) exercise of power, it (he) shall make an apology. If it (he) causes any damage, it (he) shall liable for compensation.

Chapter VI Supplementary Provisions

Article 118 The terms "not less than", "not more than" and "within" as mentioned in this Law include the said figure.

Article 119 This Law shall come into force as of March 1, 2006. The Regulation of the on the Administrative Penalties for Public Security which was promulgated on September 5, 1986 and was amended and promulgated on May 12, 1994 shall be abolished simultaneously.

17. Criminal Law of the People's Republic of China

(Adopted by the Second Session of the Fifth National People's Congress on July 1, 1979 and amended by the Fifth Session of the Eighth National People's Congress on March 14, 1997. According to the Amendment to the Criminal Law of the People's Republic of China on December 25, 1999, Amendment (II) to the Criminal Law of the People's Republic of China on August 31, 2001, Amendment (III) to the Criminal Law of the People's Republic of China on December 29, 2001; Amendment (IV) to the Criminal Law of the People's Republic of China on December 28, 2002, Amendment (V) to the Criminal Law of the People's Republic of China on February 28, 2005, Amendment (VI) to the Criminal Law of the People's Republic of China on June 29, 2006, Amendment (VII) to the Criminal Law of the People's Republic of China on February 28, 2009, Amendment (VIII) to the Criminal Law of the People's Republic of China on February 25, 2011, Amendment (IX) to the Criminal Law of the People's Republic of China on August 29, 2015, and Amendment (X) to the Criminal Law of the People's Republic of China on November 4, 2017.)

Part I General Provisions

Chapter I Tasks, Basic Principles, and Scope of Application of the Criminal Law

Article 1. This law is formulated in accordance with the Constitution and in light of the concrete experience of China launching a struggle against crime and the realities in the country, with a view to punishing crime and protecting the people.

Article 2. The tasks of the PRC Criminal Law are to use punishment struggle against all criminal acts to defend national security, the political power of the people's democratic dictatorship, and the socialist system; to protect state-owned property and property

collectively owned by the laboring masses; to protect citizens' privately owned property; to protect citizens' right of the person, democratic rights, and other rights; to maintain social and economic order; and to safeguard the smooth progress of the cause of socialist construction.

Article 3. Any act deemed by explicit stipulations of law as a crime is to be convicted and given punishment by law and any act that no explicit stipulations of law deems a crime is not to be convicted or given punishment.

Article 4. Every one is equal before the law in committing crime. No one is permitted to have privileges to transgress the law.

Article 5. The severity of punishments must be commensurate with the crime committed by an offender and the criminal responsibility he bears.

Article 6. This law is applicable to all who commit crimes within the territory of the PRC except as specially stipulated by law.

This law is also applicable to all who commit crimes aboard a ship or aircraft of the PRC.

When either the act or consequence of a crime takes place within PRC territory, a crime is deemed to have been committed within PRC territory.

Article 7. This law is applicable to PRC citizens who commit the crimes specified in this law outside the territory of the PRC; but those who commit the crimes, provided that this law stipulates a minimum sentence of less than a three-year fixed-term imprisonment for such crimes, may not be dealt with.

This law is applicable to PRC state personnel and military personnel who commit the crimes specified in this law outside PRC territory.

Article 8. This law may be applicable to foreigners, who outside PRC territory, commit crimes against the PRC state or against its citizens, provided that this law stipulates a minimum sentence of not less than a three-year fixed term of imprisonment for such crimes; but an exception is to be made if a crime is not punishable according the law of the place where it was committed.

Article 9. This law is applicable to the crimes specified in international treaties to which the PRC is a signatory state or with which it is a member and the PRC exercises criminal jurisdiction over such crimes within its treaty obligations.

Article 10. Any person who commits a crime outside PRC territory and according to this law bear criminal responsibility may still be dealt with according to this law even if he has been tried in a foreign country; however, a person who has already received criminal punishment in a foreign country may be exempted from punishment or given a mitigated punishment.

Article 11. The problem of criminal responsibility of foreigners who enjoy diplomatic privileges and immunity is to be resolved through diplomatic channels.

Article 12. If an act committed after the founding of the PRC and before the implementation of this law was not deemed a crime under the laws at that time, the laws at that time are to be applicable. If the act was deemed a crime under the laws at that time, and if under the provisions of Chapter IV, Section 8 of the general provisions of this law it should be

prosecuted, criminal responsibility is to be investigated according to the laws at that time. However, if this law does not deem it a crime or imposes a lesser punishment, this law is to be applicable.

The effective judgments that were made according to the laws at that time before the implementation of this law will continue to be in force.

Chapter II Crimes

Section 1. Crimes and Criminal Responsibility

Article 13. All acts that endanger the sovereignty, territorial integrity, and security of the state; split the state; subvert the political power of the people's democratic dictatorship and overthrow the socialist system; undermine social and economic order; violate property owned by the state or property collectively owned by the laboring masses; violate citizens' privately owned property; infringe upon citizens' rights of the person, democratic rights, and other rights; and other acts that endanger society, are crimes if according to law they should be criminally punished. However, if the circumstances are clearly minor and the harm is not great, they are not to be deemed crimes.

Article 14. An intentional crime is a crime constituted as a result of clear knowledge that one's own act will cause socially dangerous consequences, and of hope for or indifference to the occurrence of those consequences.

Criminal responsibility shall be borne for intentional crimes.

Article 15. A negligent crime occurs when one should foresee that one's act may cause socially dangerous consequences but fails to do so because of carelessness or, having foreseen the consequences, readily assumes he can prevent them, with the result that these consequences occur.

Criminal responsibility is to be borne for negligent crimes only when the law so stipulates.

Article 16. Although an act objectively creates harmful consequences, if it does not result from intent or negligence but rather stems from irresistible or unforeseeable causes, it is not a crime.

Article 17. A person who has reached the age of sixteen who commits a crime shall bear criminal responsibility.

A person who has reached the age of fourteen but not the age of sixteen who commits the crimes of intentionally killing another or intentionally injuring another, even causing serious injury or death, and the crimes of rape, robbery, drug trafficking, arson, explosion, and poisoning shall bear criminal responsibility.

A person who has reached the age of fourteen but not the age of eighteen who commits a crime shall be given a lesser punishment or a mitigated punishment.

When a person is not criminally punished because he has not reached the age of sixteen, the head of his family or guardian is to be ordered to subject him to discipline. When necessary, he may also be given shelter and rehabilitation by the government.

Article 17(I) :A person attaining the age of 75 may be given a lighter or mitigated penalty if he commits an intentional crime; or shall be given a lighter or mitigated penalty if he commits

a negligent crime.

Article 18. A mentally ill person who causes dangerous consequences at a time when he is unable to recognize or unable to control his own conduct is not to bear criminal responsibility after being established through accreditation of legal procedures; but his family or guardian shall be ordered to subject him to strict surveillance and arrange for his medical treatment. When necessary, he will be given compulsory medical treatment by the government.

A person whose mental illness is of an intermittent nature shall bear criminal responsibility if he commits a crime during a period of mental normality.

A mentally ill person who commits a crime at a time when he has not yet completely lost his ability to recognize or control his own conduct shall bear criminal responsibility but he may be given a lesser or a mitigated punishment.

An intoxicated person who commits a crime shall bear criminal responsibility.

Article 19. A deaf-mute or a blind person who commits a crime may be given a lesser punishment or a mitigated punishment or be exempted from punishment.

Article 20. Criminal responsibility is not to be borne for an act of legitimate defense that is undertaken to stop present unlawful infringement of the state's and public interest or the rights of the person, property or other rights of the actor or of other people and that causes harm to the unlawful infringer.

Criminal responsibility shall be borne where legitimate defense noticeably exceeds the necessary limits and causes great harm. However, consideration shall be given to imposing a mitigated punishment or to granting exemption from punishment.

Criminal responsibility is not to be borne for a defensive act undertaken against ongoing physical assault, murder, robbery, rape, kidnap, and other violent crimes that seriously endanger personal safety that causes injury or death to the unlawful infringer since such an act is not an excessive defense.

Article 21. Criminal responsibility is not to be borne for damage resulting from an act of urgent danger prevention that must be undertaken in order to avert the occurrence of present danger to the state or public interest or the rights of the person, property rights, or other rights of the actor or of other people.

Criminal responsibility shall be borne where urgent danger prevention exceeds the necessary limits and causes undue harm. However, consideration shall be given according to the circumstances to imposing a mitigated punishment or to granting exemption from punishment.

The provisions of the first paragraph with respect to preventing danger to oneself do not apply to a person who bears specific responsibility in his post or profession.

Section 2. Preparation for a Crime, Criminal Attempt and Discontinuation of a Crime

Article 22. Preparation for a crime is preparation of the instruments or creation of the conditions for the commission of a crime.

One who prepares for a crime may, in comparison with one who consummates the crime, be given a lesser punishment or a mitigated punishment or be exempted from punishment.

Article 23. Criminal attempt occurs when a crime has already begun to be carried out but is not consummated because of factors independent of the will of the criminal element.

One who attempts to commit a crime may, in comparison with one who consummates the crime, be given a lesser punishment or a mitigated punishment.

Article 24. Discontinuation of a crime occurs when, during the process of committing a crime, the actor voluntarily discontinues the crime or voluntarily and effectively prevents the consequences of the crime from occurring.

One who discontinues a crime shall be exempted from punishment when there is no harm done or be given a mitigated punishment when there is harm done.

Section 3. Joint Crimes

Article 25. A joint crime is an intentional crime committed by two or more persons jointly.

A negligent crime committed by two or more persons jointly is not to be punished as a joint crime; those who should bear criminal responsibility are to be punished separately according to the crimes they have committed.

Article 26. A principal offender is one who organizes and leads a criminal group in conducting criminal activities or plays a principal role in a joint crime.

A crime syndicate is a more or less permanent crime organization composed of three or more persons for the purpose of jointly committing crimes.

The head who organizes or leads a crime syndicate shall bear criminal responsibility for all the crimes committed by the syndicate.

A principal offender other than the one stipulated in the third paragraph shall bear criminal responsibility for all the crimes he participated in, organized, or directed.

Article 27. An accomplice is one who plays a secondary or supplementary role in a joint crime.

An accomplice shall, in comparison with a principal offender, be given a lesser punishment or a mitigated punishment or be exempted from punishment.

Article 28. One who is coerced to participate in a crime shall, according to the circumstances of his crime, be given a mitigated punishment or be exempted from punishment.

Article 29. One who instigates others to commit a crime shall be punished according to the role he plays in the joint crime. One who instigates a person under the age of eighteen to commit a crime shall be given a heavier punishment.

If the instigated person does not commit the instigated crime, the instigator may be given a lesser punishment or a mitigated punishment.

Section 4. Crimes Committed by a Unit

Article 30. A company, enterprise, institution, organization, or group which commits an act endangering society that is considered a crime under the law shall bear criminal responsibility.

Article 31. A unit responsible for a criminal act shall be fined. The person in charge and other personnel who are directly responsible shall also bear criminal responsibility. Where there are other stipulations in the Special Provisions of this Law or other laws, those stipulations

shall apply.

Chapter III Punishments

Section 1. Types of Punishments

Article 32. Punishments are divided into principal punishments and supplementary punishments.

Article 33. The types of principal punishments are:

- (1) control;
- (2) Criminal detention;
- (3) fixed-term imprisonment;
- (4) life imprisonment; and
- (5) The death penalty.

Article 34. The types of supplementary punishments are:

- (1) Fines;
- (2) Deprivation of political rights; and
- (3) Confiscation of property.

Supplementary punishments may also be applied independently.

Article 35. Deportation may be applied in an independent or supplementary manner to a foreigner who commits a crime.

Article 36. Where the victim has suffered economic loss as a result of a criminal act, the criminal element, in addition to receiving criminal sanctions according to law, shall in accordance with the circumstances be sentenced to make compensation for the economic loss.

Where the criminal element bears responsibility for civil compensation and is also imposed a fine, if his property is not enough to pay the compensation and fine in full or if he has also been sentenced to confiscation of property, he shall first pay civil compensation to the victim.

Article 37. Where the circumstances of a person's crime are minor and do not require sentencing for punishment, an exemption from criminal sanctions may be granted him, but he may, according to the different circumstances of each case, be reprimanded or ordered to make a statement of repentance or formal apology or make compensation for losses, or be subjected to administrative sanctions by the competent department.

Article 37(1): Whoever is given a penalty due to a crime committed by taking advantage of his or her profession or a crime committed in violation of the specific obligations required by his or her profession may be prohibited by the people's court from engaging in the relevant profession for three to five years from the date when the penalty ends or the date when the person is released on parole in light of the circumstances of the crime committed and the need for preventing the commission of any other crime.

Where a person who is prohibited from engaging in the relevant profession violates the decision made by a people's court in accordance with the provisions of the preceding paragraph, the person shall be given a penalty by the public security authority in accordance with the law and, if the circumstances are serious, be convicted and punished in accordance

with the provisions of Article 313 of this Law.

Where there are other prohibitive or restrictive provisions in any other law or administrative regulation on the person's engagement in the relevant profession, such provisions shall prevail.

Section 2. Control

Article 38. The term of control is not less than three months and not more than two years.

In light of the crime committed, a convict sentenced to control may also be prohibited from engaging in certain activities, entering certain areas or places or contacting certain persons during the term of execution.

Criminals sentenced to control shall be subject to community correction.

Whoever violates a restraining order as provided for in paragraph 2 shall be punished in accordance with the Public Security Administrative Punishments Law of the People's Republic of China.

Article 39. A criminal element who is sentenced to control must abide by the following rules during the term in which his control is being carried out:

- (1) abide by laws and administrative regulations, submit himself to supervision;
- (2) shall not exercise the rights to freedom of speech, of the press, of assembly, of association, of procession, and of demonstration without the approval of the organ executing the control;
- (3) report on his own activities pursuant to the rules of the organ executing the control;
- (4) abide by the rules of the organ executing the control for meeting visitors;
- (5) report and obtain approval from the organ executing the control for a change in residence or departure from the city or county.

A criminal element who is sentenced to control shall, while engaged in labor, receive equal pay for equal work.

Article 40. Upon the expiration of the term of the control, the organ executing the control shall announce the termination of control to the criminal element sentenced to control and to the masses concerned.

Article 41. The term of control is counted as commencing on the date the judgment begins to be executed; where custody has been employed before the judgment begins to be executed, the term is to be shortened by two days for each day spent in custody.

Section 3. Criminal Detention

Article 42. The term of criminal detention is not less a month and not more than six months.

Article 43. A criminal element sentenced to criminal detention is to have his sentence executed by the public security organ in the vicinity.

During the period of execution, a criminal element sentenced to criminal detention may go home for one or two days each month; consideration may be given according to the circumstances to granting compensation to those who participate in labor.

Article 44. The term of criminal detention is counted as commencing on the date the judgment begins to be executed; where custody has been employed before the judgment,

the term is to be shortened by one day for each day spent in custody.

Section 4. Fixed-Term Imprisonment And Life Imprisonment

Article 45. Except as otherwise provided in Articles 50 and 69 of this Law, the term of fixed-term imprisonment is not less than six months and not more than fifteen years.

Article 46. A criminal element sentenced to fixed-term imprisonment or life imprisonment is to have his sentence executed in prison or in another organ executing the sentence; anyone with the ability to labor shall take part in labor, receive education, and undergo reform.

Article 47. The term of fixed-term imprisonment is counted as commencing on the date the judgment begins to be executed; where custody has been employed before the judgment begins to be executed, the term is to be shortened by one day for each day spent in custody.

Section 5. The Death Penalty

Article 48. The death penalty is only to be applied to criminal elements who commit the most heinous crimes. In the case of a criminal element who should be sentenced to death, if immediate execution is not essential, a two-year suspension of execution may be announced at the same time the sentence of death is imposed.

Except for judgments made by the Supreme People's Court according to law, all sentences of death shall be submitted to the Supreme People's Court for approval. Sentences of death with suspension of execution may be decided or approved by a high people's court.

Article 49. The death penalty is not to be applied to persons who have not reached the age of eighteen at the time the crime is committed or to women who are pregnant at the time of adjudication.

Death penalty shall not be given to a person attaining the age of 75 at the time of trial, unless he has caused the death of another person by especially cruel means.

Article 50. Where a convict is sentenced to death with a reprieve, if he or she does not commit any intentional crime during the period of reprieve, the sentence shall be commuted to life imprisonment upon expiration of the two-year period; if he or she has any major meritorious performance, the sentence shall be commuted to imprisonment of 25 years upon expiration of the two-year period; if the criminal has committed an intentional crime with execrable circumstances, the death penalty shall be executed with the approval of the Supreme People's Court. If the crime is committed intentionally but the death penalty is not executed, the period of death penalty with a reprieve shall be recalculated and be reported to the Supreme People's Court for recordation.

For a recidivist or a convict of murder, rape, robbery, abduction, arson, explosion, dissemination of hazardous substances or organized violence who is sentenced to death with a reprieve, the people's court may, in sentencing, decide to put restrictions on commutation of his sentence in light of the circumstances of the crime committed.

Article 51. The term for suspending execution of a sentence of death is counted as commencing on the date the judgment becomes final. The term of a sentence that is reduced from the death penalty with suspension of execution to fixed-term imprisonment is counted as commencing on the date the suspension of execution expires.

Section 6. Fines

Article 52. In imposing a fine, the amount of the fine shall be determined according to the circumstances of the crime.

Article 53. A fine shall be paid in a lump sum or in installments within the period specified in the judgment. The person who fails to pay the fine in full upon the expiration of the period shall be compelled to pay. If the person sentenced is unable to pay the fine in full, the people's court may collect whenever the person is found in possession of executable property.

Where a person truly has difficulties in paying the fine because he or she due to irresistible calamity or any other reason, the people's court may render a ruling to postpone the payment of the fine, or grant a reduction or even exemption in light of the actual circumstances.

Section 7. Deprivation of Political Rights

Article 54. Deprivation of political rights is deprivation of the following rights:

- (1) The right to elect and the right to be elected;
- (2) the right to freedom of speech, of the press, of assembly, of association, of procession, and of demonstration;
- (3) the right to hold a position in state organs; and
- (4) the right to hold a leading position in a state-owned company, enterprise, or institution or people's organization.

Article 55. The term of deprivation of political rights is not less than one year and not more than five years, except as otherwise stipulated in Article 57 of this Law.

In situations where a person is sentenced to control and to deprivation of political rights as a supplementary punishment, the term of deprivation of political rights is to be the same as the term of control, and the punishments are to be executed at the same time.

Article 56. A criminal element endangering state security shall be sentenced to deprivation of political rights as a supplementary punishment; a criminal element guilty of murder, rape, arson, explosion, spreading poison, or robbery who seriously undermines social order may also be sentenced to deprivation of political rights as a supplementary punishment.

Where deprivation of political rights is applied independently, stipulations in the Special Provisions of this Law shall be followed.

Article 57. A criminal element who is sentenced to death or to life imprisonment shall be deprived of political rights for life.

When the death penalty with a suspension of execution is reduced to fixed-term imprisonment, or life imprisonment is reduced to fixed-term imprisonment, the term of the supplementary punishment of deprivation of political rights shall be changed to not less than three years and not more than ten years.

Article 58. The term of the supplementary punishment of deprivation of political rights is counted as commencing on the date that imprisonment or criminal detention ends or on the date that parole begins; the deprivation of political rights is naturally to be effective during the period in which the principal punishment is being executed.

A criminal element who is deprived of political rights shall abide by laws, administrative regulations, and relevant regulations on supervision and administration promulgated by public security departments under the State Council; submit to supervision; and is forbidden from exercising rights stipulated in Article 54 of this Law.

Section 8. Confiscation of Property

Article 59. Confiscation of property is the confiscation of part or all of the property personally owned by the criminal element. Where all of the property personally owned by the criminal element is confiscated, living expenses shall be set aside for the criminal element himself and the dependents he supports.

When a sentence of confiscation of property is imposed, property that belongs to or should belong to family members of the criminal element may not be confiscated.

Article 60. Where it is necessary to use the confiscated property to repay legitimate debts incurred by the criminal element before the property was confiscated, the debts shall be paid at the request of the creditors.

Chapter IV The Concrete Application Of Punishments

Section 1. Sentencing

Article 61. When deciding the punishment of a criminal element, the sentence shall be imposed on the basis of the facts of the crime, the nature and circumstances of the crime, and the degree of harm to society, in accordance with the relevant stipulations of this law.

Article 62. Where the circumstances of a criminal element are such as to give him a heavier punishment or a lesser punishment under the stipulations of this law, he shall be sentenced to a punishment within the legally prescribed limits of punishment.

Article 63. Where there is any circumstance of mitigation of penalty, a convict shall be given a penalty below the statutory penalty; and if there are two or more ranges of sentencing under this Law, the penalty shall be given within the range next lower to the statutory range. Although the circumstances of a criminal element do not warrant giving him a mitigated punishment under the stipulations of this law, he too may be sentenced to a punishment below the legally prescribed punishment based on the special situation of the case and with the approval of the Supreme People's Court.

Article 64. All articles of property illegally obtained by the criminal element shall be recovered or he shall be ordered to make restitution or pay compensation for them. The legitimate property of the victims shall be promptly returned. Contraband and articles of the criminal's own property used for committing the crime shall be confiscated. Articles of confiscated property and fines shall be handed over to the national treasury and shall not be diverted or otherwise disposed of.

Section 2. Recidivists

Article 65. Where a convict sentenced to fixed-term imprisonment or a heavier penalty commits again a crime for which a fixed-term imprisonment or a heavier penalty shall be given within five years after finishing serving his sentence or being pardoned, he shall be a recidivist and be given a heavier penalty, unless it is a negligent crime or he commits the

crime under the age of 18.

In situations where a criminal element is granted a parole, the period stipulated in the preceding paragraph is to be counted as commencing on the date of expiration of the parole.

Article 66. A convict of jeopardizing the national security, terrorist activities or organized crime of a gangland nature shall be punished as a recidivist for any of such crimes committed again by him at any time after he finishes serving his sentence or is pardoned.

Section 3. Voluntary Surrender and Meritorious Service

Article 67. The act of voluntarily giving oneself up to the police and giving a true account of one's crime after committing it is an act of voluntary surrender. Criminal elements who voluntarily surrender may be given a lesser punishment or a mitigated punishment. Those among them whose crimes are relatively minor may be exempted from punishment.

Where criminal suspects, defendants, and criminals serving sentences give a true account of their other crimes which are not known to the judicial organ, their actions are regarded as an act of voluntary surrender.

A criminal suspect who truthfully confesses to his crime may be given a lighter penalty although there is no voluntary surrender as mentioned in the preceding two paragraphs; and may be given a mitigated penalty if any especially serious consequence is avoided for his truthful confession.

Article 68. Criminal elements who perform meritorious service by exposing other people's crimes that can be verified or who provide important clues leading the cracking of other cases may be given a lesser punishment or a mitigated punishment. Those who performed major meritorious service may be given a mitigated punishment or may be exempted from punishment.

Section 4. Combined Punishment For More Than One Crime

Article 69. Where a person is convicted of more than one crime before a sentence is pronounced, except for death penalty or life imprisonment, the term of criminal penalty to be executed shall be decided in light of the actual circumstances below the sum of terms but above the highest term of the imposed criminal penalties; however, the decided term of control shall not exceed three years, the decided term of criminal detention shall not exceed one year, and the decided fixed-term imprisonment shall not exceed 20 years if the sum of terms of fixed-term imprisonment is less than 35 years or shall not exceed 25 years if the sum of terms is 35 years or more.

If, for the plural crimes, imprisonment and criminal detention shall be imposed, the imprisonment shall be executed. If imprisonment and surveillance, or criminal detention and surveillance, shall be imposed for the plural crimes, surveillance shall still be executed after imprisonment or criminal detention is executed.

If there are accessory penalties imposed for the crimes, the accessory penalties must still be executed. Accessory penalties of the same kind shall be executed on a consolidated basis, while those of different kinds shall be executed separately.

Article 70. If, after judgment has been pronounced but before the punishment has been

completely executed, it is discovered that, before judgment was pronounced, the sentenced criminal element committed another crime for which he has not been sentenced, a judgment shall be rendered for the newly-discovered crime, and the punishment to be executed for the punishments sentenced in the two, former and latter, judgments decided according to the stipulations of Article 69 of this law. The term that has already been executed shall be counted in the term decided by the new judgment.

Article 71. If after judgment has been pronounced but before the punishment has been completely executed the sentenced criminal element again commits a crime, a judgment shall be rendered for the newly-committed crime, and the punishment to be executed for the punishment that has not been executed for the former crime and the punishment imposed for the latter crime decided according to the stipulations of Article 69 of this law.

Section 5. Suspension of Sentence

Article 72. Where a convict sentenced to criminal detention or imprisonment of not more than 3 years meets the following conditions, a probation may be announced, and a probation shall be announced if he is under the age of 18, is pregnant or attains the age of 75:

- (1) The circumstances of the crime are minor;
- (2) He shows repentance;
- (3) He is not likely to commit any offense again; and
- (4) Announcing the probation will not have any major adverse impact on the community where he lives.

When probation is announced, in light of the crime committed, the convict may also be prohibited from engaging in certain activities, entering certain areas or places or contacting certain persons during probation.

If there is any accessory penalty imposed on a convict on probation, the accessory penalty must still be executed.

Article 73. The probation period for suspension of criminal detention is to be not less than the term originally decided and not more than one year, but it may not be less than two months.

The probation period for suspension of fixed-term imprisonment is to be not less than the term originally decided and not more than five years, but it may not be less than one year.

The probation period for suspension is to be counted as commencing on the date the judgment becomes final.

Article 74. Probation shall not apply to recidivists and ringleaders of criminal gangs.

Article 75. A criminal element for whom a suspension of sentence has been pronounced shall observe the following stipulations:

- (1) observing the law and administrative statutes and accepting supervision;
- (2) reporting his activities in accordance with the stipulation of the observing organ;
- (3) following the observing organ's stipulation on meeting visitors;
- (4) reporting and applying to the observing organ for approval before leaving or moving from the city or county of residence.

Article 76. A convict on probation shall be subject to community correction during probation, and if none of the circumstances as set out in Article 77 of this Law occurs, the original sentence shall no longer be executed upon expiration of probation, which shall be announced to the public.

Article 77. If a criminal element for whom a suspension of sentence has been pronounced commits new crimes during the probation period for suspension or is discovered that, before judgment was pronounced, the sentenced criminal element committed another crime for which he has not been sentenced, the suspension is to be revoked and the punishment to be executed for the punishments imposed for the former and latter crimes is to be decided according to the stipulations of Article 69 of this law.

Where a convict on probation violates any provision of laws, administrative regulations or the relevant department of the State Council on probation supervision and management or violates any restraining order in the judgment of the people's court during probation, if the circumstances are serious, the probation shall be revoked and the original sentence shall be executed.

Section 6. Reduction of Sentence

Article 78. A criminal element who is sentenced to control, criminal detention, fixed-term imprisonment or life imprisonment may have his sentence reduced if, during the period his punishment is being executed, he earnestly observes prison regulations, accepts reform through education, truly repents, or performs meritorious service. The sentence shall be reduced if any of the following meritorious services are performed:

- (1) preventing someone from engaging in major criminal activities;
- (2) informing on major criminal activities in or outside the prison that can be verified;
- (3) making inventions or major technological renovations;
- (4) risking his life to save others in day-to-day production activities and life;
- (5) performing outstanding service in combating natural disaster or preventing major accidents;
- (6) making other major contributions to the state or society.

After commutation, the actually executed term of criminal penalty shall not be:

- (1) less than 1/2 of the original term of criminal penalty, if control, criminal detention or fixed-term imprisonment is imposed;
- (2) less than 13 years, if life imprisonment is imposed; or
- (3) less than 25 years if the death penalty with a reprieve imposed on a convict is legally commuted to life imprisonment upon expiration of the reprieve period, or less than 20 years if it is commuted to imprisonment of 25 years upon expiration of the reprieve period, where the people's court has put restrictions on commutation of the death penalty with a reprieve according to paragraph 2, Article 50 of this Law.

Article 79. To receive reductions of sentence for criminal elements, the organ executing the sentence shall submit letters of sentence reduction proposal to the people's court at or above the intermediate level. The people's court shall form a collegial panel to examine the

proposals and to issue sentence reduction orders for those who demonstrate true repentance and performed meritorious service.

Article 80. The term of fixed-term imprisonment that is reduced from life imprisonment is counted as commencing on the date of the order reducing the sentence; no sentence reduction shall be made without due legal process.

Section 7. Parole

Article 81. Where a convict sentenced to fixed-term imprisonment has served not less than half of the term of his original sentence, or a convict sentenced to life imprisonment has actually served not less than 13 years of imprisonment, he may be paroled if he earnestly observes the prison rules, accepts reform through education and shows true repentance and is not likely to commit any crime again. Under special circumstances, with the approval of the Supreme People's Court, a parole may be granted without regard to the above restrictions on the term served.

No parole shall be granted to a recidivist or a convict sentenced to imprisonment of not less than 10 years or life imprisonment for murder, rape, robbery, abduction, arson, explosion, dissemination of hazardous substances or organized violent crime.

When a parole decision is made on a convict, the impact of his release on parole on the community where he lives shall be considered.

Article 82. The granting of parole to criminal elements shall be carried out in accordance with the procedures stipulated in Article 79 of this law; no parole shall be granted without due legal process.

Article 83. The probation period for parole in the case of fixed-term imprisonment is the term that has not been completed; the probation period for parole in the case of life imprisonment is 10 years.

The probation period for parole is counted as commencing on the date of parole.

Article 84. Criminal elements granted parole shall observe the following stipulations:

- (1) observing the law and administrative statutes and accepting supervision;
- (2) reporting his activities in accordance with the stipulation of the supervising organ;
- (3) observing the supervising organ's stipulation on meeting visitors;
- (4) reporting and applying to the observing organ for approval before leaving or moving from the city or county of residence.

Article 85. A convict released on parole shall be subject to community correction during parole according to law, and if none of the circumstances as set out in Article 86 of this Law occurs, the original sentence shall be deemed to have been fully served upon expiration of parole, which shall be announced to the public.

Article 86. If, during the probation period for parole, a criminal element commits any further crime, the parole is to be revoked and the punishment is to be executed for the punishment that has not been executed for the former crime and the punishment imposed for the latter crime decided according to the stipulations of Article 71 of this law.

If a criminal who is granted parole is discovered to have committed, before the judgment is

pronounced, other crimes for which no punishment is imposed, the parole shall be revoked and a combined punishment for several crimes shall be given according to the provisions of Article 70 of this Law.

Where a convict released on parole violates any provision of laws, administrative regulations or the relevant department of the State Council on parole supervision and management during parole, if it does not constitute a new crime, his parole shall be revoked under statutory procedures, and he shall be taken into custody to serve his remaining term of sentence.

Section 8. Limitation

Article 87. Crimes are not to be prosecuted where the following periods have elapsed:

(1) in cases where the maximum legally-prescribed punishment is fixed-term imprisonment of less than five years, where five years have elapsed;

(2) in cases where the maximum legally-prescribed punishment is fixed-term imprisonment of not less than five years and less than ten years, where ten years have elapsed.

(3) in cases where the maximum fixed-term imprisonment is not less than ten years, where fifteen years have elapsed.

(4) in cases where the maximum legally-prescribed punishment is life-imprisonment or death, where twenty Years have elapsed. If it is considered that a crime must be prosecuted after twenty years, the matter must be submitted to the Supreme People's Procuratorate for approval.

Article 88. No limitation on the period for prosecution is to be imposed in cases where, after the people's procuratorates, public security organs, or state security organs have filed to investigate or after the people's courts have decided to hear the cases, the criminal element escapes from investigation or adjudication.

No limitation on the period for prosecution is to be imposed in cases where, after the victims filed charges within the period for prosecution, the people's court, people's procuratorates, or public security organs refused to file for investigation as they should.

Article 89. The period for prosecution is counted as commencing on the date of the crime; if the criminal act is of a continuous or continuing nature, it is counted as commencing on the date the criminal act is completed.

If any further crime is committed during the period for prosecution, the period for prosecution of the former crime is counted as commencing on the date of the latter crime.

Chapter V Other Provisions

Article 90. In situations where the autonomous areas inhabited by ethnic groups cannot completely apply the stipulations of this law, the people's congresses of the autonomous regions or of the provinces may formulate alternative or supplementary provisions based upon the political, economic, and cultural characteristics of the local ethnic groups and the basic principles of the stipulations of this law, and these provisions shall go into effect after they have been submitted to and approved by the National People's Congress Standing Committee.

Article 91. The term "public property" in this law refers to the following property:

- (1) property owned by the state;
- (2) property owned collectively by the laboring masses;
- (3) public donations to be used for aiding the poor and other public services, or property of special funds.

Private property that is being managed, used or transported by state organs, state-owned corporations, enterprises, collective enterprises, and people's organizations is to be treated as public property.

Article 92. The term "citizens' private property" in this law refers to the following property:

- (1) citizens' lawful income, savings, houses and other means of livelihood;
- (2) means of production that are under individual or family ownership according to law;
- (3) lawful property of independent businesses and private enterprises;
- (4) shares, stocks, securities and other property that are under individual ownership according to law.

Article 93. The term "state personnel" in this law refers to all personnel of state organs.

Personnel engaged in public service in state-owned corporations, enterprises, institutions, and people's organizations; and personnel which state organs, state-owned corporations, enterprises, and institutions assign to engage in public service in non state-owned corporations, enterprises, institutions, and social organizations; as well as other working personnel engaged in public service according to the law, are to be treated as state personnel.

Article 94. The term "judicial personnel" in this law refers to personnel engaged in the functions of investigating, prosecuting, adjudicating, supervising and controlling offenders.

Article 95. The term "serious injury" in this law refers to any one of the following injuries:

- (1) injuries resulting in loss of the use of a person's limbs or disfigurement;
- (2) injuries resulting in loss of the use of a person's hearing, sight, or functions of any other organ; or
- (3) other injuries that cause grave harm to a person's physical health.

Article 96. The phrase "violating state stipulations" in this law refers to violation of laws and decisions formulated by the National People's Congress or the National People's Congress Standing Committee; and administrative measures prescribed in administrative ordinance and regulations formulated by the State Council; as well as decisions and decrees the State Council promulgated.

Article 97. The term "ringleader" in this law refers to a criminal element who plays the role of organizing, planning or directing a criminal group or a crowd assembled to commit a crime.

Article 98. The phrase "To be handled only upon complaint" in this law refers to handling a case only when the victim files a complaint. If the victim is unable to file a complaint because of coercion or intimidation, a people's procuratorate and the victim's close relatives may also file the complaint.

Article 99. Such phrases as "not less than," "not more than" and "within" in this law all include

the given figure.

Article 100. When people join the military, or seek employment, those who received criminal punishments according to law shall factually report to the relevant units the punishments they had received and may not conceal them.

Whoever is given a penalty lighter than imprisonment of 5 years for a crime committed under the age of 18 shall be exempted from the reporting obligation as mentioned in the preceding paragraph.

Article 101. The General Provisions of this law are applicable to other laws and decrees with stipulations for criminal punishments, but other laws having special stipulations are exceptions.

Part II Special Provisions

Chapter I Crimes of Endangering National Security

Article 102. Whoever colludes with foreign states in plotting to harm the motherland's sovereignty, territorial integrity and security is to be sentenced to life imprisonment or not less than ten years of fixed-term imprisonment.

Whoever commits the crimes in the preceding paragraph in collusion with institutions, organization, or individuals outside the country shall be punished according to the stipulations in the preceding paragraph.

Article 103. Whoever organizes, plots, or acts to split the country or undermine national unification, the ringleader, or the one whose crime is grave, is to be sentenced to life imprisonment or not less than ten years of fixed-term imprisonment; other active participants are to be sentenced to not less than three but not more than 10 years of fixed-term imprisonment; and other participants are to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, control, or deprivation of political rights.

Whoever instigates to split the country and undermine national unification is to be sentenced to not more than five years of fixed-term imprisonment, criminal detention, control, or deprivation of political rights; ringleaders or those whose crimes are grave are to be sentenced to not less than five years of fixed-term imprisonment.

Article 104. Whoever organizes, plots, or carries out armed rebellion, or armed riots, the ringleaders, or those whose crimes are grave, are to be sentenced to life imprisonment, or not less than 10 years of fixed-term imprisonment; the active participants are to be sentenced from not less than three to not more than 10 years of fixed-term imprisonment; and other participants are to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, control, or deprivation of political rights.

Whoever instigates, coerces, lures, and bribes state personnel, members of the armed forces, people's police or people's militia to carry out armed rebellion or armed riot are to be heavily punished according to the stipulations in the preceding paragraph.

Article 105. Whoever organizes, plots, or acts to subvert the political power of the state and overthrow the socialist system, the ringleaders or those whose crimes are grave are to be sentenced to life imprisonment, or not less than 10 years of fixed-term imprisonment; active

participants are to be sentenced from not less than three years to not more than 10 years of fixed-term imprisonment; other participants are to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, control, or deprivation of political rights.

Whoever instigates the subversion of the political power of the state and overthrow the socialist system through spreading rumors, slandering, or other ways are to be sentenced to not more than five years of fixed-term imprisonment, criminal detention, control, or deprivation of political rights; the ringleaders and those whose crimes are grave are to be sentenced to not less than five years of fixed-term imprisonment.

Article 106. Whoever colludes with institutions, organizations, or individuals outside the country and commits crimes stipulated in Articles 103, 104, and 105 of this chapter are to be heavily punished according to the stipulations in the articles.

Article 107. Where any domestic or overseas institution, organization or individual provides financial support for the commission of a crime as provided for in Article 102, 103, 104 or 105 of this Chapter, the directly liable person shall be sentenced to imprisonment of not more than 5 years, criminal detention, control or deprivation of political rights; or if the circumstances are serious, be sentenced to imprisonment of not less than 5 years.

Article 108. Whoever defects to the enemy and turns traitor is to be sentenced to not less than three years and not more than ten years of fixed-term imprisonment; when the circumstances are serious or when it is a case of leading a group of armed personnel, people's police, or militia to defect to the enemy and turn traitor, the sentence is to be not less than ten years of fixed-term imprisonment or life imprisonment.

Article 109. A state functionary who, in the course of performing his official duties, leaves his post without permission and flees this country or flees when he is already outside this country shall be sentenced to imprisonment of not more than 5 years, criminal detention, control or deprivation of political rights; or if the circumstances are serious, be sentenced to imprisonment of not less than 5 years but not more than 10 years.

A state functionary knowing any national secret, who flees this country or flees when he is already outside this country, shall be given a heavier penalty according to the provision of the preceding paragraph.

Article 110. Whoever commits any of the following acts of espionage and endangers national security is to be sentenced to not less than 10 years of fixed-term imprisonment or life imprisonment; when the circumstances are relatively minor, the sentence is to be not less than three years and not more than ten years of fixed-termed imprisonment:

- (1) Joining an espionage organization or accepting a mission assigned by it or its agent; or
- (2) Pointing out bombing or shelling targets to the enemy.

Article 111. Whoever steals, secretly gathers, purchases, or illegally provides state secrets or intelligence for an organization, institution, or personnel outside the country is to be sentenced from not less than five years to not more than 10 years of fixed-term imprisonment; when circumstances are particularly serious, he is to be sentenced to not less than 10 years of fixed-term imprisonment, or life sentence; and when circumstances are relatively minor,

he is to be sentenced to not more than five years of fixed-term imprisonment, criminal detention, control, or deprivation of political rights.

Article 112. Whoever supplies arms and ammunition or other military materials to an enemy during war time is to be sentenced to not less than 10 years of fixed-term imprisonment or life imprisonment; and when the circumstances are relatively minor, he will be sentenced a fixed-term imprisonment from not less than three years to not more than 10 years.

Article 113. When one commits the aforementioned crimes in this chapter that endanger national security -- except those stipulated in the second clause of Article 103, and Articles 105, 107 and 109 -- and has incurred particularly serious harms to the country and the people, and the circumstances are particularly vile, he may be sentenced to death.

Whoever commits the crimes in this chapter may also be punished by having his property confiscated.

Chapter II Crimes of Endangering Public Security

Article 114. Whoever commits arson, breaches dikes, causes explosions, spreads pathogen of infectious diseases, poisonous or radioactive substances or other substances, or uses other dangerous means to endanger public security, but causes no serious consequences, shall be sentenced to fixed-term imprisonment of no less than three years but no more than ten years.

Article 115. Whoever commits arson, breaches dikes, causes explosions, spreads pathogens of infectious diseases, poisonous or radioactive substances or other substances, or uses other dangerous means to have inflicted any serious injury or death on people or caused heavy losses of public or private property, shall be sentenced to fixed-term imprisonment of no less than ten years, life imprisonment or death.

Whoever commits the crimes in the preceding paragraph negligently is to be sentenced to not less than three years to not more than seven years of fixed-term imprisonment; or not more than three years of fixed-term imprisonment, or criminal detention, when circumstances are relatively minor.

Article 116. Whoever sabotages trains, motor vehicles, streetcars, ships, or airplanes in a manner sufficient to threaten the overturning or destruction of these trains, motor vehicles, streetcars, ships, or airplanes is to be sentenced to not less than three years and not more than ten years of fixed-term imprisonment, in cases when serious consequences have not been caused.

Article 117. Whoever sabotages railroads, bridges, tunnels, highways, airports, waterways, lighthouses or signs, or conducts other destructive activities in a manner sufficient to threaten the overturning or destruction of trains, motor vehicles, streets, ships or airplanes, is to be sentenced to not less than three years and not more than ten years of fixed-term imprisonment in cases where serious consequences have not been caused.

Article 118. Whoever endangers public security by sabotaging electric power, gas or other combustible or explosive equipment is to be sentenced to not less than three years and not more than ten years of fixed-term imprisonment in cases where serious consequences have

not been caused.

Article 119. Whoever causes serious consequences by sabotaging means of transportation, transportation equipment, electric power or gas equipment, or combustible or explosive equipment is to be sentenced to not less than ten years of fixed-term imprisonment, life imprisonment, or death.

Whoever commits the crime in the preceding paragraph negligently is to be sentenced to not less than three years but not more than seven years of fixed-term imprisonment; or not more than three years of fixed-term imprisonment, or criminal detention if circumstances are relatively minor.

Article 120. Whoever organizes or leads a terrorist organization shall be sentenced to imprisonment of not less than ten years or life imprisonment and a forfeiture of property; whoever actively participates in a terrorist organization shall be sentenced to imprisonment of not less than three years but not more than ten years in addition to a fine; and other participants shall be sentenced to imprisonment of not more than three years, criminal detention, surveillance or deprivation of political rights and may be fined in addition.

Whoever commits the crime as provided for in the preceding paragraph and also commits murder, explosion, kidnapping or any other crime shall be punished according to the provisions on the joinder of penalties for plural crimes.

Article 120 (I): Any individual who provides financial support to a terrorist organization or conducts terrorist activities, or provides training on terrorist activities shall be sentenced to imprisonment of not more than five years, criminal detention, surveillance or deprivation of political rights in addition to a fine; or if the circumstances are serious, be sentenced to imprisonment of not less than five years in addition to a fine or forfeiture of property.

Whoever knowingly recruits, trains or transports any member workforce for any terrorist organization, for conducting any terrorist activities or for any terrorist activities shall be punished in accordance with the provisions of the preceding paragraph.

Where an entity commits a crime as provided for in the preceding two paragraphs, a fine shall be imposed on the entity, and the directly responsible person in charge and other directly liable persons shall be punished in accordance with the provisions of paragraph 1.

Article 120(II): Whoever falls under any of the following circumstances shall be sentenced to imprisonment of not more than five years, criminal detention, surveillance or deprivation of political rights in addition to a fine; or be sentenced to imprisonment of not less than five years in addition to a fine or forfeiture of property if the circumstances are serious.

- (1) Preparing lethal weapons, hazardous articles or other tools for conducting terrorist activities.
- (2) Organizing training on terrorist activities or actively participating in training on terrorist activities.
- (3) Contacting any overseas terrorist organization or person for the purpose of conducting terrorist activities.
- (4) Making a plan or any other preparation for conducting terrorist activities.

Whoever commits any other crime while committing a crime as provided for in the preceding paragraph shall be convicted and punished according to the provisions on the crime with the heavier penalty.

Article 120(III) : Whoever advocates terrorism or extremism or instigates terrorist activities by way of preparing or distributing any book, audio or video materials or any other article advocating terrorism or extremism or by instructing or issuing information shall be sentenced to imprisonment of not more than five years, criminal detention, surveillance or deprivation of political rights in addition to a fine; or if the circumstances are serious, be sentenced to imprisonment of not less than five years in addition to a fine or forfeiture of property.

Article 120(IV): Whoever, by using extremism, instigates or coerces the public to sabotage the implementation of the marriage, judicial, education, social management or any other system determined in national laws shall be sentenced to imprisonment of not more than three years, criminal detention or surveillance in addition to a fine; be sentenced to imprisonment of not less than three years but not more than seven years in addition to a fine if the circumstances are serious; or be sentenced to imprisonment of not less than seven years in addition to a fine or forfeiture of property if the circumstances are especially serious.

Article 120(V): Whoever forces anyone else to wear the costume or symbol that advocates terrorism or extremism in a public place by means of violence or coercion, etc. shall be sentenced to imprisonment of not more than three years, criminal detention or surveillance in addition to a fine.

Article 120(VI): Whoever illegally holds any book, audio or video materials or any other article while obviously aware that it advocates terrorism or extremism shall, if the circumstances are serious, be sentenced to imprisonment of not more than three years, criminal detention or surveillance in addition to a fine, or be sentenced to a fine only.

Article 121. Whoever hijacks an airplane through violence, coercion, or other means is to be sentenced to not less than 10 years of fixed-term imprisonment or life imprisonment; or death if the hijacking causes serious injuries, death, or serious destruction of the airplane.

Article 122. Whoever hijacks a ship or motor vehicle through violence, coercion, or other means is to be sentenced to not less than five years but not more than 10 years of fixed-termed imprisonment; or not less than 10 years of fixed-term imprisonment, of life imprisonment, if the hijacking causes serious consequences.

Article 123. Whoever uses violence on personnel on an in-flight airplane and endangers flying safety is to be sentenced to not more than five years of fixed-termed imprisonment or criminal detention in case no serious consequences have been caused; or not less than five years of fixed-term imprisonment if serious consequences have been caused.

Article 124. Whoever sabotages radio and television broadcasting facilities, public telecommunications facilities, and endangers public safety is to be sentenced to not less than three years but not more than seven years of fixed-term imprisonment; or not less than seven years of fixed-term imprisonment if serious consequences have been caused.

Whoever commits the crime in the preceding paragraph negligently is to be sentenced to

not more than seven years of fixed-term imprisonment; or not more than three years of fixed-term imprisonment or criminal detention in case the circumstances are relatively minor.

Article 125. Whoever illegally manufactures, trades, transports, mails, or stocks up guns, ammunition, or explosives is to be sentenced to not less than three years but not more than 10 years of fixed-term imprisonment; or not less than 10 years of imprisonment, life imprisonment, or death if the consequences are serious.

Whoever illegally manufactures, trades, transports or stores pathogens of infectious diseases, poisonous or radioactive substances or other substances, thereby endangering public security, shall be punished in accordance with the provisions in the preceding paragraph.

If a unit commits the crime in the preceding two paragraphs, the unit will be fined, and its direct person in charge and other persons in charge are to be punished according to the regulations in the first paragraph.

Article 126. Any enterprises which are legally designated or determined to manufacture or sell guns, violate the regulations governing gun management by performing one of the following acts, the units are to be fined and personnel who are in charge and directly responsible together with other personnel who are directly responsible are to be sentenced to not more than five years of fixed-term imprisonment; when the consequences are serious, to not less than five years and not more than ten years of fixed-term imprisonment ; when the consequences are particularly serious, to not less than 10 years of fixed-term imprisonment or life imprisonment:

(1) for the purpose of illegal sale, manufacture or allocation guns whose numbers exceed quotas or whose varieties do not meet the regulations;

(2) for the purpose of illegal sale, manufacture guns without a number, or with an overlapped number, or with a fake number;

(3) illegally sell guns or sell guns manufactured for export inside the territory .

Article 127. Whoever steals or forcibly seizes any gun, ammunition or explosive, or steals or forcibly seizes pathogens of infectious diseases, poisonous or radioactive substances or other substances, thereby endangering public security, shall be sentenced to fixed-term imprisonment of no less than three years but no more than ten years; if the circumstances are serious, he shall be sentenced to fixed-term imprisonment of no less than ten years, life imprisonment or death.

Whoever robs any gun, ammunition or explosive, or robs pathogens of infectious diseases, poisonous or radioactive substances or other substances, thereby endangering public security, or steals or forcibly seizes any gun, ammunition or explosive from State organs, members of the armed forces, the police or the people's militia, shall be sentenced to fixed-term imprisonment of no less than ten years, life imprisonment or death.

Article 128. Whoever violates the regulations governing gun management by owning or unlawfully possessing, guns and ammunition is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, or control; when the circumstances are

serious, to not less than three years and not more than seven years of fixed-term imprisonment.

Any personnel who are provided with official-use guns who illegally lease or lend the guns are to be punished in accordance with the previous paragraph.

Any personnel who are provided with official-use guns who illegally lease or lend the guns, thereby causing serious consequences are to be punished in accordance with the first paragraph.

Any units committing such crimes as stated in the second and third paragraph, are to be fined and personnel who are in charge and directly responsible are to be punished in accordance with the regulation of the first paragraph.

Article 129. Any personnel who are provided with official-use guns who lose the guns without reporting the loss in a timely fashion, thereby causing serious consequences are to be sentenced to not more than three years of fixed-term imprisonment or criminal detention.

Article 130. Whoever illegally carries guns, ammunition, controlled knives and tools, articles of an explosive, combustible, radioactive, poisonous or corrosive nature into a public place or public transportation vehicle, thereby endangering public safety, is to be sentenced, when the circumstances are serious, to not more than three years of fixed-term imprisonment, detention, or control when the circumstances are serious.

Article 131. Any aviation personnel who violate the rules and regulations thereby causing major air accidents and serious consequences are to be sentenced to not more than three years of fixed-term imprisonment or detention; when causing the crash of an airplane or the death of personnel are to be sentenced to not less than three years and not more than seven years of fixed-term imprisonment.

Article 132. Any railway staff and workers who violate the rules and regulations thereby giving rise to accidents affecting the safety of railway operation are to be sentenced to not less than three years of fixed-term imprisonment or criminal detention; when the consequences are particularly serious, to not less than three years and not more than seven years of fixed-term imprisonment.

Article 133. Whoever violates traffic and transportation laws and regulations thereby giving rise to major accidents involving severe injuries, deaths, or great losses of public and private properties are to be sentenced to not more than three years of fixed-term imprisonment; when fleeing the scene after an traffic and transportation accident or under other particularly odious circumstances, to not less than three years and not more than seven years of fixed-term imprisonment; when running away causes a person's death, to not less than seven years of fixed-term imprisonment.

Article 133(I): Whoever drives a motor vehicle on a road under any of the following circumstances shall be sentenced to criminal detention in addition to a fine.

- (1) Racing a motor vehicle on a road with execrable circumstances.
- (2) Driving a motor vehicle on a road while intoxicated.
- (3) Engaging in the school bus business or passenger transport and carrying passengers by

loading much more than the fixed number of passengers, or driving the vehicle by seriously exceeding the prescribed speed.

(4) Transporting any hazardous chemical in violation of the provisions on the safety administration of hazardous chemicals, which endangers public safety.

The motor vehicle owner or manager who is directly liable for the conduct as mentioned in item (3) or (4) of the preceding paragraph shall be punished in accordance with the provisions of the preceding paragraph.

Whoever commits any other crime while committing a crime as mentioned in the preceding two paragraphs shall be convicted and punished according to the provisions on the crime with the heavier penalty.

Article 134. Where anyone violates the provisions concerning the safety management in production or operations and thus causes any serious casualty or any other serious consequences, he shall be sentenced to fix-term imprisonment of not more than three years or detention. If the circumstances are extremely severe, he shall be sentenced to fix-term imprisonment of not less than 3 years but not more than 7 years.

Where anyone forces any other person to conduct risky operations by violating the relevant provisions so that any serious casualty or any other serious consequence is caused, he shall be sentenced to fix-term imprisonment of not more than five years or detention. If the circumstances are extremely severe, he shall be sentenced to fix-term imprisonment of five years or more.

Article 135. Where the facilities or conditions for safe work fail to meet the relevant provisions of the state so that any serious casualty or any other serious consequence is caused, the persons-in-charge who are held to be directly responsible and other directly liable persons shall be sentenced to fixed-term imprisonment of not more than three years or detention. If the circumstances are particularly severe, he shall be sentenced to fix-term imprisonment of not less than three years but not more than seven years.

Article 135 (I): Where, any of the provisions concerning safety management is violated in the holding of large-scale activities of the masses so that any serious casualty or any other serious consequence is caused, the persons-in-charge who are held to be directly responsible and other directly liable persons shall be sentenced to fixed-term imprisonment of not more than three years or detention. If the circumstances are particularly severe, they shall be sentenced to fixed-term imprisonment of not less than three years but not more than seven years.

Article 136. Whoever violates the regulations on the control of articles of an explosive; combustible, radioactive, poisonous or corrosive nature, thereby giving rise to a major accident in the course of production, storage, transportation or use and causing serious consequences, is to be sentenced to not more than three years of fixed-term imprisonment or criminal detention; when the consequences are particularly serious, the sentence is to be not less than three years and not more than seven years of fixed-term imprisonment.

Article 137. When construction, design, working, and engineering supervision units violate

the state's regulations by reducing the quality standard of the projects, thereby giving rise to a major safety accident, those who are directly responsible are to be sentenced to not more than five years of fixed-term imprisonment or criminal detention, in addition to fine; when the consequences are particularly serious, the sentence is to be not less than five years and not more than ten years of fixed-term imprisonment, in addition to fine.

Article 138. When school buildings or educational and teaching facilities are obviously known to be dangerous but measures are not taken or reports are not made in a timely fashion, thereby giving rise to a major accident, those who are directly responsible are to be sentenced to not more than three years of fixed-term imprisonment or criminal detention; when the consequences are particularly serious, the sentence is to be not less than three years and not more than seven years of fixed-term imprisonment.

Article 139. When rules of fire prevention and control are violated and the notification, given by a supervision organ of fire prevention and control, to take corrective measures are refused, thereby giving rise to severe consequences, those who are directly responsible are to be sentenced to not more than three years of fixed-term imprisonment or criminal detention; when the consequences are particularly serious, the sentence is to be not less than three years and not more than seven years of fixed-term imprisonment.

Article 139 (I): Where, after any safety accident occurs, the person who is obliged to report it fails to report it or makes a false report so that the rescue of the accident is affected and if the circumstances are severe, he shall be sentenced to fixed-term imprisonment of not more than three years or detention. If the circumstances are extremely severe, he shall be sentenced to fixed-term imprisonment of not less than three years but not more than seven years.

Chapter III Crimes of Undermining the Order of Socialist Market Economy

Section 1. Crimes of Manufacturing and Selling Fake and Shoddy Goods

Article 140. Any producer or seller who mixes up or adulterates products, passes fake imitations for genuine, sells seconds at best quality price, or passes unqualified products as qualified ones, with a sale amount of not less than 50,000 yuan and not more than 200,000 yuan, is to be sentenced to not more than two years of fixed-term imprisonment or criminal detention and may in addition or exclusively be sentenced to a fine of not less than 50 percent and not more than 200 percent of the sale amount; when the sale amount is not less than 200,000 yuan and not more than 500,000 yuan, is to be sentenced to not less than two years and not more than seven years of fixed-term imprisonment and may in addition be sentenced to a fine of not less than 50 percent and not more than 200 percent of the sale amount; when the sale amount is not less than 500,000 yuan and not more than 2 million yuan, is to be sentenced to not less than seven years and may in addition be sentenced to a fine of not less than 50 percent and not more than 200 percent of the sale amount; when the sale amount is not less than two million yuan, is to be sentenced to 15 years of fixed-term imprisonment or life imprisonment and may in addition be sentenced to a fine of not less than 50 percent and not more than 200 percent of the sale amount or confiscation of

property.

Article 141. Whoever produces or sells bogus drugs shall be sentenced to imprisonment of not more than 3 years or criminal detention and a fine; if any serious damage is caused to the people's health or there is any other serious circumstance, shall be sentenced to imprisonment of not less than 3 years but not more than 10 years and a fine; or if any human death is caused or there is any other especially serious circumstance, shall be sentenced to imprisonment of not less than 10 years, life imprisonment or death penalty and a fine or forfeiture of property.

The fake medicines referred to in this article mean those fake medicines as well as those medicines and non-medicines that fall into such a category as to be dealt with as fake medicines in accordance with the regulations of the "Law of the PRC Governing the Management of Pharmaceutical Products."

Article 142. Whoever produces, sells inferior medicines, thereby causing severe harm to human health is to be sentenced to not less than three years and not more than ten years of fixed-term imprisonment and may in addition be sentenced to a fine of not less than 50 percent and not more than 200 percent of the sale amount; when the consequences are particularly serious, the sentence is to be not less than ten years of fixed-term imprisonment and may in addition be sentenced to a fine of not less than 50 percent and not more than 200 percent of the sale amount or confiscation of property.

The inferior medicines referred to in this article mean those inferior pharmaceutical products that fall into the category of inferior medicines in accordance with the regulations of the "Law of the PRC Governing the Management of Pharmaceutical Products."

Article 143. Whoever produces or sells food not up to the food safety standards which may cause any serious food poisoning accident or any other serious food-borne disease shall be sentenced to imprisonment of not more than 3 years or criminal detention and a fine; if any serious damage is caused to the people's health or there is any other serious circumstance, shall be sentenced to imprisonment of not less than 3 years but not more than 7 years and a fine; or if there are especially serious consequences, shall be sentenced to imprisonment of not less than 7 years or life imprisonment and a fine or forfeiture of property.

Article 144. Whoever mixes poisonous or harmful non-food raw materials into food produced or sold or knowingly sells food mixed with poisonous or harmful non-food raw materials shall be sentenced to imprisonment of not more than 5 years and a fine; if any serious damage is caused to the people's health or there is any other serious circumstance, shall be sentenced to imprisonment of not less than 5 years but not more than 10 years and a fine; or if any human death is caused or there is any other especially serious circumstance, shall be punished according to the provisions of Article 141 of this Law.

Article 145. Whoever produces medical apparatuses and instruments or medical hygiene materials that are not up to the national or industrial standards for safeguarding human health or sells such things while clearly knowing the fact, and if it is serious enough to endanger human health, shall be sentenced to fixed-term imprisonment of not more than

three years or criminal detention and shall also be fined not less than half but not more than two times the sales revenue; if it causes serious harm to human health, he shall be sentenced to fixed-term imprisonment of not less than three years but not more than 10 years and shall also be fined not less than half but not more than two times the sales revenue; if the consequence is especially serious, he shall be sentenced to fixed-term imprisonment of not less than 10 years or life imprisonment, and shall also be fined not less than half but not more than two times the sales revenue or be sentenced to confiscation of property.

Article 146. Whoever produces electrical appliances, pressure containers, explosive and combustible products that do not conform with the standards of the state and the trade aiming to protect the human safety and property or other products that do not conform with such standards or knowingly sells the above-mentioned products thereby giving rise to serious consequences is to be sentenced to not more than five years of fixed-term imprisonment and may in addition be sentenced to a fine of not less than 50 percent and not more than 200 percent of the sale amount; when the consequences are particularly serious, the sentence is to be not less than five years of fixed-term imprisonment and may in addition be sentenced to a fine of not less than 50 percent and not more than 200 percent of the sale.

Article 147. Whoever produces fake insecticides, fake animal-use medicines, fake chemical fertilizers or knowingly sells insecticides, animal-use medicines, chemical fertilizers and seeds which are fake or are no longer effective or any producer or seller who passes unqualified insecticides, animal-use medicines, chemical fertilizers and seeds as qualified ones, thereby giving rise to relatively large losses in production is to be sentenced to not more than three years of fixed-term imprisonment or criminal detention and may in addition or exclusively be sentenced to a fine of not less than 50 percent and not more than 200 percent of the sale amount; when causing grave losses in production, is to be sentenced to not less than three years and not more than seven years of fixed-term imprisonment and may in addition be sentenced to a fine of not less than 50 percent and not more than 200 percent of the sale amount; when causing particularly grave losses in production, is to be sentenced to not less than seven years of fixed-term imprisonment or life imprisonment or confiscation of property.

Article 148. Production of cosmetics that fails to meet hygienic standards or knowingly selling such cosmetics that cause serious consequences shall be punished with imprisonment or criminal detention of less than three years, and a fine of over 50 percent but less than 100 percent of the sales amount.

Article 149. The production and selling of products prescribed under Articles 141 to 148 of this Section that does not constitute an offense under these articles but with sales amount exceeding 50,000 yuan, shall be convicted and punished according to provisions under Article 140 of this Section.

The production and selling of products prescribed under Articles 141 and 148 of this Section that constitutes an offense under these articles and Article 140, shall be convicted and punished under provisions carrying a heavier penalty.

Article 150. Units violating provisions between Articles 140 and 148 of this Section shall be punished with a fine, with personnel directly in charge and other directly responsible personnel being punished according to provisions under the respective articles.

Section 2. Smuggling Offenses

Article 151. Whoever smuggles any weapon, ammunition, nuclear materials or counterfeit currencies shall be sentenced to imprisonment of not less than seven years in addition to a fine or forfeiture of property; if the circumstances are especially serious, be sentenced to life imprisonment and a forfeiture of property; or if the circumstances are minor, be sentenced to imprisonment of not less than three years but not more than seven years in addition to a fine.

Whoever smuggles cultural relics, gold, silver or any other noble metal whose export is prohibited by the state or smuggles rare animals whose import and export are prohibited by the state or products made thereof shall be sentenced to imprisonment of not less than 5 years but not more than 10 years and a fine; if the circumstances are especially serious, shall be sentenced to imprisonment of not less than 10 years or life imprisonment and a forfeiture of property; or if the circumstances are minor, shall be sentenced to imprisonment of not more than 5 years and a fine.

Whoever smuggles rare plants or products made thereof or other goods or articles whose import and export are prohibited by the state shall be sentenced to imprisonment of not more than 5 years or criminal detention and a fine or be sentenced to a fine only; or if the circumstances are serious, shall be sentenced to imprisonment of not less than 5 years and a fine.

Where an entity commits a crime as provided for in this Article, the entity shall be sentenced to a fine, and its directly responsible person and other directly liable persons shall be punished according to the provisions of this Article.

Article 152. Smuggling obscene movies, video tapes, audio tapes, pictures, books and journals, and other obscene articles for profit or dissemination shall be punished with imprisonment of more than three years but less than ten years with fine; for offenses of a serious nature to over ten years of imprisonment or life imprisonment, with fine or forfeiture of property; for offenses of a less serious nature to imprisonment or criminal detention or restraint of less than three years, and with fine.

Whoever transports overseas solid, liquid or gaseous waste into the territory of China by evading supervision and control of the Customs shall, if the circumstance is serious enough, be sentenced to fixed-term imprisonment of not more than five years and shall also, or shall only, be fined; if the circumstance is serious, he shall be sentenced to fixed-term imprisonment of not less than five years and shall also be fined.

Where an entity commits any crime as mentioned in the preceding two paragraphs, it shall be fined, and the person in-charge and other persons who are held to be directly responsible shall be punished in accordance with the provisions in the preceding two paragraphs.

Article 153. Whoever smuggles goods or articles other than those as mentioned in Articles

151, 152 and 347 shall be punished in light of the graveness of the crime according to the following provisions:

(1) Whoever smuggles goods or articles to evade a relatively large amount of tax payable, or smuggles again after having been given administrative punishment twice for smuggling within a year, shall be sentenced to imprisonment of not more than 3 years or criminal detention and a fine of not less than the evaded amount of tax payable but not more than five times the evaded amount of tax payable.

(2) Whoever smuggles goods or articles to evade a huge amount of tax payable or with any other serious circumstance shall be sentenced to imprisonment of not less than 3 years but not more than 10 years and a fine of not less than the evaded amount of tax payable but not more than five times the evaded amount of tax payable.

(3) Whoever smuggles goods or articles to evade an especially huge amount of tax payable or with any other especially serious circumstance shall be sentenced to imprisonment of not less than 10 years or life imprisonment and a fine of not less than the evaded amount of tax payable but not more than five times the evaded amount of tax payable or a forfeiture of property.

Units committing offenses under the preceding paragraph shall be punished with a fine, with personnel directly in charge and other directly responsible personnel being sentenced to imprisonment or criminal detention of less than three years; and, for cases of a serious nature, to imprisonment of over three years and less than 10 years; and -- for cases of an extraordinary serious nature -- to imprisonment of over 10 years.

For smuggling cases not being detected for several occasions, fines should be based on an accumulation of all evaded taxes of such goods and articles.

Article 154. The following smuggling cases that constitute an offense under provisions of this section shall be convicted and sentenced according to provisions under Article 153 of this law:

(1) without the approval of the Customs and before settling defaulted taxes, sale for profit in China of bonded goods approved for import for the purposes of processing, assembly, and compensated trade, including raw and processed materials, parts, finished products, and equipment; and

(2) without the approval of the Customs and before settling defaulted taxes, sale for profits in China of goods and articles with reduced import duties or tax exemption.

Article 155. Whoever commits any of the following acts shall be deemed as having committed the crime of smuggling and shall be punished in accordance with the relevant provisions of this Section:

(1) directly and illegally purchasing from smugglers articles the import of which is forbidden by the State; or directly and illegally purchasing from smugglers other smuggled goods and articles in relatively large quantities; or

(2) transporting, purchasing or selling in inland seas, territorial waters, boundary rivers or boundary lakes articles which are forbidden by the State from import and export; or

transporting, purchasing or selling, without legal certificates and in relatively large quantities, goods or articles which are restricted by the State from import and export.

Article 156. Whoever colludes with smugglers by supplying them with loans, funds, accounts, invoices, proofs, or such conveniences as transportation, safe-keeping, and mailing services, shall be regarded and punished as smuggling accomplices.

Article 157. Whoever provides armed escort for smuggling shall be given a heavier penalty according to paragraph 1, Article 151 of this law.

Whoever resorts to violence and threatening measures while resisting Customs detection shall be punished for smuggling and obstructing state organ personnel from enforcing their lawful duties provided under Article 277 of this law, and shall be punished for all offenses committed.

Section 3. Offenses Against Company and Enterprise Management Order

Article 158. Using forged certifications to apply for company registration or using other fraudulent means to falsely declare registered capital with intent to deceive company registration departments, where the registered capital so falsely declared is large in figures with serious consequences or of a severe nature, shall be punished by imprisonment or criminal detention of less than three years, with a fine or a separately imposed fine of over 1 percent but less than 5 percent of the falsely declared registered capital.

Units committing offenses under the preceding paragraph shall be punished with a fine, with personnel directly in charge and other directly responsible personnel being punished with imprisonment or criminal detention of less than three years.

Article 159. Company promoters, shareholders who, in violation of provisions under the Company law, fail to pay up with currency notes, provide actual property, or transfer property rights; or falsely claim to have paid up the capital; or withdraw their capital upon registration of company, where the amount involved is large with serious consequences or of a serious nature, shall be punished with imprisonment or criminal detention of less than five years, with a fine or a separately imposed fine of over 2 percent but less than 10 percent of the amount of capital so falsely claimed to have been paid up or so withdrawn.

Units committing offenses under the preceding paragraph shall be punished with a fine, with personnel directly in charge and other directly responsible personnel being punished with imprisonment or criminal detention of less than five years.

Article 160. Concealment of material facts or fabrication of major fraudulent contents in share-soliciting prospectuses, share-subscription applications, and bond solicitation by companies and enterprises for the purpose of issuing shares or company or enterprise bonds shall, in cases involving large amounts, with serious consequences, or of a serious nature, be punished with imprisonment or criminal detention of less than five years, with a fine or a separately imposed fine of over 1 percent and less than 5 percent of the illegally raised capital.

Units committing offenses under the preceding paragraph shall be punished with a fine, with personnel directly in charge and other personnel directly responsible being punished with

imprisonment or criminal detention of less than five years.

Article 161. Where any company or enterprises which is obliged to disclose information to its shareholders or the general public provides any false financial and accounting statements or conceals any important facts in such statements or fails to disclose any other important information that shall be disclosed according to law so that the interests of the shareholders or any other person are severely injured, or where there are other severe circumstances, the persons-in-charge who are held to be directly responsible and other directly liable persons shall be sentenced to fixed-term imprisonment of not more than three years or detention, and/or shall be fined 20,000 yuan up to 200,000 yuan.

Article 162. Personnel directly in charge and other directly responsible personnel of a company or an enterprise that, during its liquidation process, conceal property or make false entries in its balance sheet or asset list, or distribute company or enterprise assets before repaying debts that seriously hurt the interests of creditors and other people, shall be punished with imprisonment or criminal detention of less than five years, with a fine or a separately imposed fine of over 20,000 yuan but less than 200,000 yuan.

Article 162 (I) Whoever conceals or deliberately destroys financial vouchers, financial account books or financial statements, if the circumstances are serious, shall be sentenced to fixed-term imprisonment of less than five years or criminal detention, and/or be imposed a fine not less than 20,000 yuan but not more than 200,000 yuan.

Where a unit commits the crime as mentioned in the preceding paragraph, it shall be imposed a fine, and the persons who are directly in charge or persons who are directly responsible for the offence shall be punished according to the preceding paragraph.

Article 162 (II): Where any company or enterprise transfers or disposes of its properties by means of concealing its properties or undertaking fabricated debts or by any other means or goes through false bankruptcy so that the interests of the creditors or any other person are severely injured, the persons-in-charge who are held to be directly responsible and other directly liable persons shall be sentenced to fixed-term imprisonment of not more than five years or detention, and/or shall be fined 20,000 yuan up to 200,000 yuan.

Article 163. Where any of the employees of any company or enterprise or any other entity exerts any property by taking advantage of his position or accepts any money or property of any other person so as to seek any benefits for such person, and if the amount is considerably large, he shall be sentenced to fixed-term imprisonment of not more than five years or detention. If the amount is huge, he shall be sentenced to fixed-term imprisonment of less than five years, and his properties may be confiscated.

Where any of the employees of any company or enterprise or any other entity violates the relevant provisions of the state by taking advantage of his position to accept kickbacks or commissions in any disguise and keeps them for himself, he shall be penalized according to the preceding paragraph.

Where anyone who is engaged in public services in any state-owned company, enterprise or any other state-owned entity or anyone is delegated by any state-owned company or

enterprise or any other state-owned entity to any non-state-owned company or enterprise or any other entity to engage in public services commits any of the acts as described in either of the preceding paragraphs shall be convicted and penalized according to Articles 185 and 186 of the present Law.

Article 164. Whoever gives any property to a staff member of a company, an enterprise or any other entity for any illicit benefit shall be sentenced to imprisonment of not more than three years or criminal detention in addition to a fine if the amount of property is relatively large; or be sentenced to imprisonment of not less than three years but not more than ten years in addition to a fine if the amount of property is huge.

Whoever gives any property to a functionary of a foreign country or an official of an international public organization for any improper commercial benefit shall be punished according to the provision of the preceding paragraph.

Where an entity commits a crime as provided for in the preceding two paragraphs, a fine shall be imposed on it, and its directly responsible person and other directly liable persons shall be punished according to the provision of paragraph 1 of this Article.

A briber who voluntarily confesses to his bribery before a criminal investigation on him is opened may be given a mitigated penalty or be exempted from penalty.

Article 165. Directors and managers of state-owned companies or enterprises who, in order to gain illegal benefits, make use of their job opportunity to conduct for themselves or others business similar to that conducted by companies or enterprises to which they attach, shall, in cases involving a large amount, be punished with imprisonment or criminal detention for less than three years, with a fine or a separately imposed fine, for cases involving extraordinarily large amounts, with imprisonment of over three years but less than seven years, and with fine.

Article 166. Work personnel in state-owned companies, enterprises, or institutions, who use their job opportunity to commit the following acts that seriously hurt state interests, shall be punished with imprisonment or criminal detention of less than three years, with a fine or a separately imposed fine; for cases that cause extraordinary huge losses to state interests, with imprisonment of over three years and less than seven years, and with fine:

- (1) offering profitable business conducted by their own units to their relatives and friends for operation;
- (2) buying merchandise from units operated and managed by their relatives and friends at a price apparently higher than market price or selling merchandise to units operated and managed by their relatives and friends at a price apparently lower than market price; or
- (3) buying substandard merchandise from units operated and managed by their relatives and friends.

Article 167. People directly in charge of state-owned companies, enterprises, or institutions who are defrauded because of serious irresponsibility during the process of signing or fulfilling contracts and thus cause great damage to national interests shall be sentenced to not more than three years in prison or criminal detention. If they cause especially serious

damage to national interests, they shall be sentenced to not less than three years and not more than seven years in prison.

Article 168. Where an employee of a state-run company or enterprise is seriously irresponsible or abuses the office, causing its bankruptcy or serious losses to the state-owned company or enterprise, and causing heavy losses to the interests of the state, he shall be sentenced to fixed-term imprisonment of not more than three years or criminal detention; where the losses to the interests of the state is extremely heavy, he shall be sentenced to fix-term imprisonment of not less than three years but not more than seven years.

Where an employee of a state-owned institution commits the crime as mentioned in the preceding paragraph, causing heavy losses to the interests of the state, he shall be punished according to the preceding paragraph.

Where an employee of a state-owned company, enterprise or institution commits the crimes as mentioned in the preceding two paragraphs out of irregularities for favoritism, he shall be given a heavier punishment according to the first paragraph of this article.

Article 169. People directly in charge of state-owned companies or enterprises or higher competent departments who cause great damage to national interests by practicing favoritism and converting state-owned assets into low-value stocks or selling them at a low price shall be sentenced to not more than three years in prison or criminal detention. They shall be sentenced to not less than three years and not more than seven years in prison if they cause especially serious damage to national interests.

Article 169 (I): Where any director, supervisor or senior manager of any listed company goes against his fiduciary duty to the company and takes advantage of his position to manipulate the listed company in any of the following circumstances so that the listed company suffers from any serious loss, he shall be sentenced to fixed-term imprisonment of not more than three years or detention, and/or shall be fined. If the listed company thus suffers from extremely serious losses, he shall be sentenced to fixed-term imprisonment of not less than three years but not more than seven years, and shall be fined:

- (1) Providing any fund, commodity, service or any other asset gratuitously to any other entity or individual;
- (2) Providing or accepting any fund, commodity, service or any other asset under obviously unfair terms;
- (3) Providing any fund, commodity, service or any other asset to any entity or individual who obviously does not have the ability of repayment;
- (4) Providing any guarantee to any entity or individual who obviously does not have the ability of repayment, or providing guarantee to any other entity or individual without justifiable reasons;
- (5) Waiving any credit or undertaking any debt without justifiable reasons;
- (6) Injuring the interests of the listed company by any other means. “(

Where the controlling shareholder or actual controller of a listed company instigates any of

the directors, supervisors, or senior managers of the listed company to conduct any of the acts as described in the preceding paragraph, it or he shall be penalized according to the preceding paragraph.

If the controlling shareholder or actual controller of the listed company that commits the crime as described in the preceding paragraph is an entity, a fine shall be imposed upon the entity and the persons-in-charge who are held to be directly responsible and other directly liable persons shall be penalized according to the first paragraph herein.

Section 4. The Crimes of Undermining the Order of Financial Management

Article 170. Whoever counterfeits currencies shall be sentenced to imprisonment of not less than three years but not more than ten years in addition to a fine; or if there is any of the following circumstances, be sentenced to imprisonment of not less than ten years or life imprisonment in addition to a fine or forfeiture of property:

- (1) Being a ringleader of a currency-counterfeiting ring.
- (2) The amount of counterfeit currencies is especially large.
- (3) Any other especially serious circumstance.

Article 171. Whoever sells or buys a substantial amount of counterfeit money or transports it with the full knowledge that it is counterfeit shall be sentenced to not more than three years in prison or criminal detention. In addition, he or she shall be fined not less than 20,000 yuan and not more than 200,000 yuan. If the amount involved is large, he or she shall be sentenced to not less than three years and not more than 10 years in prison. In addition, he or she shall be fined not less than 50,000 yuan and not more than 500,000 yuan. If the amount is especially huge, he or she shall be sentenced to not less than 10 years in prison or life imprisonment. In addition, he or she shall be fined not less than 50,000 yuan and not more than 500,000 yuan or have his or her property confiscated.

Employees of banks or other financial institutions who buy counterfeit money or take advantage of their positions to trade counterfeit money for real currency shall be sentenced to not less than three years and not more than 10 years in prison. In addition, they shall be fined not less than 20,000 yuan and not more than 200,000 yuan. If the amount involved is large or if the circumstances are serious, they shall be sentenced to not less than 10 years in prison or life imprisonment. In addition, they shall be fined not less than 20,000 yuan and not more than 200,000 yuan or have their property confiscated. If the circumstances are not so serious, they shall be sentenced to not more than three years in prison or criminal detention.

They shall be fined, additionally or exclusively, not less than 10,000 yuan and not more than 100,000 yuan. Whoever counterfeits money and sells or transports the counterfeit money shall be convicted and given stiff punishment in accordance with the provisions in Article 170 of this law.

Article 172. Whoever knowingly possesses or uses a substantial amount of counterfeit money shall be sentenced to not more than three years in prison or criminal detention. He or she shall be fined, additionally or exclusively, not less than 10,000 yuan and not more

than 100,000 yuan. If the amount involved is large, he or she shall be sentenced to not less than three years and not more than 10 years in prison. In addition, he or she shall be fined not less than 20,000 yuan and not more than 200,000 yuan. If the amount is especially large, he or she shall be sentenced to not less than 10 years in prison. In addition, he or she shall be fined not less than 50,000 yuan and not more than 500,000 yuan or have his or her property confiscated.

Article 173. Whoever alters a substantial amount of money shall be sentenced to not more than three years in prison or criminal detention. He or she shall be fined, additionally or exclusively, not less than 10,000 yuan and not more than 100,000 yuan. If the amount is large, he or she shall be sentenced to not less than three years and not more than 10 years in prison. In addition, he or she shall be fined not less than 20,000 yuan and not more than 200,000 yuan.

Article 174. Whoever establishes, without the approval of the competent authorities of the state, a commercial bank, securities exchange, futures exchange, futures brokering company, insurance company or other financial institutions, he shall be sentenced to fixed-term imprisonment of not more than three years or criminal detention, and/or shall be imposed a fine of not less than 20,000 yuan but not more than 200,000 yuan; if the circumstances are serious, he shall be sentenced to fix-term imprisonment of not less than three years but not more than ten years, and/or shall be imposed a fine of not less than 50,000 yuan but not more than 500,000 yuan.

Whoever forges, alters or transfers the permit for operation or other documents of approval of a commercial bank, securities exchange, futures exchange, futures brokering company, insurance company or other financial institutions, he shall be punished according to the preceding paragraph.

Where a unit commits the crimes as mentioned in the preceding two paragraphs, it shall be imposed a fine, and the persons who are directly in charge or who are directly responsible for the offence shall be punished according to the first paragraph of this article.

Article 175. Whoever illegally obtains credit funds from a financial institution and relends them to other people at a high interest rate with the aim of making a profit shall be sentenced to not more than three years in prison or criminal detention, if the amount of illegal proceeds is substantial. In addition, he or she shall be fined a sum not less than 100 percent and not more than 500 percent as high as the amount of illegal proceeds. If the amount involved is large, he or she shall be sentenced to not less than three years and not more than seven years in prison. In addition, he or she shall be fined a sum not less than 100 percent and not more than 500 percent as high as the amount of illegal proceeds.

If the crime mentioned in the preceding paragraph is committed by a unit, the unit in question shall be fined, and the individual directly in charge of it and other people who are directly responsible shall be sentenced to not more than three years in prison or criminal detention.

Article 175 (1): Where anyone obtains by fraudulent means any loan, acceptance of any instrument, letter of credit, letter of guarantee, etc. from any bank or any other financial

institution so that any serious loss is caused to the bank or financial institution or any other serious consequence has resulted, he shall be sentenced to fixed-term imprisonment of not more than three years or detention, and/or shall be fined. If the loss caused to the bank or any other financial institution is extremely large or if there is any other extremely serious circumstance, he shall be sentenced to fixed-term imprisonment of not less than three years but not more than seven years, and shall be fined.

Where any entity commits the crime as described in the preceding paragraph, it shall be fined, and the persons-in-charge who are held to be directly responsible and other directly liable persons shall be penalized according to the preceding paragraph.

Article 176. Whoever takes deposits from people illegally or in disguised form and disrupts financial order shall be sentenced to not more than three years in prison or criminal detention. He or she shall be fined, additionally or exclusively, not less than 20,000 yuan and not more than 200,000 yuan. If the amount involved is large or if the circumstances are otherwise serious, he or she shall be sentenced to not less than three years and not more than 10 years in prison. In addition, he or she shall be fined not less than 50,000 yuan and not more than 500,000 yuan.

If the crime mentioned in the preceding paragraph is committed by a unit, the unit in question shall be fined, and the individual directly in charge of it and other people who are directly responsible shall be punished in accordance with the provisions in the preceding paragraph.

Article 177. Whoever forges or alters financial bills in any of the following ways shall be sentenced to not more than five years in prison or criminal detention. He or she shall be fined, additionally or exclusively, not less than 20,000 yuan and not more than 200,000 yuan. If the circumstances are serious, he or she shall be sentenced to not less than five years and not more than 10 years in prison. In addition, he or she shall be fined not less than 50,000 yuan and not more than 500,000 yuan. If the circumstances are especially serious, he or she shall be sentenced to not less than 10 years in prison or life imprisonment. In addition, he or she shall be fined not less than 50,000 yuan and not more than 500,000 yuan or have his or her property confiscated:

- (1) Forging or altering bank drafts, cashier's checks, and checks;
- (2) Forging or altering documents authorizing collection of payments, remittance documents, certificates of deposit, and other account-settlement documents;
- (3) Forging or altering letters of credit or accompanying documents;
- (4) Forging credit cards.

If the crimes mentioned in the preceding paragraph are committed by a unit, the unit in question shall be fined, and the individual directly in charge of it and other people who are directly responsible shall be punished in accordance with the provisions in the preceding paragraph.

Article 177 (I) Under any of the following circumstances, anyone who disrupts the management of credit cards shall be sentenced to fixed-term imprisonment of not more than three years or criminal detention or deprivation of political rights, and shall be concurrently

or separately fined 10, 000 yuan up to 100, 000 yuan; if the sum involved is huge or if there are other serious circumstances, he shall be sentenced to fixed-term imprisonment of 3 up to 10 years and shall be concurrently fined 20,000 yuan up to 200,000 yuan:

(1) knowingly holding or transporting a relatively large number of counterfeited credit cards or blank credit cards;

(2) unlawfully holding a relatively large number of others' credit cards;

(3) having obtained credit cards by using false identity certification;

(4) selling, selling, providing others with counterfeited credit cards or obtaining credit cards by using false identity certification.

Anyone who steals, buys or illicitly supplies information of others' credit cards shall be punished in accordance with the preceding paragraph.

Any employee of a bank or of any other financial institution who violates any of the crimes as described in the second paragraph by taking the advantage of his position shall be given a heavier punishment.

Article 178. Whoever forges or alters treasury bonds or other negotiable securities issued by the state involving a substantial amount of money shall be sentenced to not more than three years in prison or criminal detention. He or she shall be fined, additionally or exclusively, not less than 20,000 yuan and not more than 200,000 yuan. If the amount is large, he or she shall be sentenced to not less than three years and not more than 10 years in prison. In addition, he or she shall be fined not less than 50,000 yuan and not more than 500,000 yuan. If the amount is especially large, he or she shall be sentenced to not less than 10 years in prison or life imprisonment. In addition, he or she shall be fined not less than 50,000 yuan and not more than 500,000 yuan or have his or her property confiscated.

Whoever forges or alters share certificates or company and enterprise bonds involving a substantial amount of money shall be sentenced to not more than three years in prison or criminal detention. He or she shall be fined, additionally or exclusively, not less than 10,000 yuan and not more than 100,000 yuan. If the amount is large, he or she shall be sentenced to not less than three years and not more than 10 years in prison. In addition, he or she shall be fined not less than 20,000 yuan and not more than 200,000 yuan.

If the crimes mentioned in the preceding two paragraphs are committed by a unit, the unit in question shall be fined, and the individual directly in charge of it and other people who are directly responsible shall be punished in accordance with the provisions in the preceding two paragraphs.

Article 179. Whoever issues shares or company and enterprise bonds involving a large amount of money without the permission of relevant state departments shall be sentenced to not more than five years in prison or criminal detention if the consequences are serious or if the circumstances are otherwise serious. He or she shall be fined, additionally or exclusively, a sum not less than 1 percent and not more than 5 percent of the illegally raised funds.

If the crime mentioned in the preceding paragraph is committed by a unit, the unit in question

shall be fined, and the individual directly in charge of it and other people who are directly responsible shall be sentenced to not more than five years in prison or criminal detention.

Article 180. Whoever has inside information on securities or futures transactions or illegally obtains inside information on securities or futures transactions, and prior to the release of the information that involves the issuance of securities or securities or futures transactions or other information that has a material effect on the transaction price of securities or futures, buys or sells the said securities, engages in the futures transaction related to the inside information, leaks the said information, or explicitly or implicitly advises others to engage in the aforesaid transaction activities shall, if the circumstances are serious, be sentenced to fixed-term imprisonment not more than five years or criminal detention, and/or be fined 1 to 5 times the illegal gains; or if the circumstances are extremely serious, shall be sentenced to fixed-term imprisonment not less than five years but not more than ten years, and be fined 1 to 5 times the illegal gains.

Where a unit commits the crime as mentioned in the preceding paragraph, it shall be imposed a fine, and the persons who are directly in charge or who are directly responsible for the offence shall be sentenced to fix-term imprisonment of not more than five years or criminal detention.

The range of inside information and the insiders shall be determined in accordance with the laws and administrative regulations.

Where any practitioner of a stock exchange, a futures exchange, a securities company, a futures brokerage company, a fund management company, a commercial bank, an insurance company or any other financial institution or any staff member of the relevant regulatory department or industry association uses any undisclosed information obtained by taking advantage of his position other than the inside formation to engage in the securities or futures transaction activities related to the said information or explicitly or implicitly advise others to engage in the relevant transaction activities in violation of the relevant provisions, and the circumstances are serious, he shall be punished under paragraph 1.

Article 181. Whoever fabricates and spreads false information to adversely affect stock or futures exchange transactions, disrupt the stock or futures exchange market shall, if the consequences are serious, be sentenced to fixed-term imprisonment of not more than five years or criminal detention, and/or be imposed a fine of not less than 10,000 yuan but not more than 100,000 yuan.

Any employee of a stock exchange, futures exchange, securities company or futures brokering company or any member of a securities association or futures association or department for the administration of securities or futures who deliberately provides false information or forges, alters or destroys transaction records in order to cajole investors into buying or selling securities or futures contracts and thus serious consequences have resulted, shall be sentenced to fixed-term imprisonment of not more than five years or criminal detention, and/or shall be imposed a fine of not less than 10,000 yuan but not more than 100,000 yuan; if the circumstances are extremely serious, he shall be sentenced to

fixed-term imprisonment of not less than five years but not more than 10 years, and/or shall be imposed a fine of not less than 20,000 yuan but not more than 200,000 yuan.

Where a unit commits the crime as mentioned in the preceding two paragraphs, it shall be imposed a fine, and the persons who are directly in charge or who are directly responsible for the crime shall be sentenced to fix-term imprisonment of not more than five years or criminal detention.

Article 182. Where any of the following circumstances arises, and if the circumstances are serious, the person who manipulates the securities or futures market shall be sentenced to fixed-term imprisonment of not more than five years or detention, and/or shall be fined. If the circumstances are extremely serious, he shall be sentenced to fixed-term imprisonment of not less than five years but not more than 10 years, and shall be fined:

- (1) Manipulating the trading prices of securities or futures or the trading volume of securities or futures by concentrating independently or by collusion the advantages in capital or the advantages in shareholding or positions or the advantage in information so as to carry out colluded or continuous transactions;
- (2) Colluding with any other person to carry out securities or futures transactions with each other according to the time, price or ways as agreed to in advance so that the trading prices or volumes of securities or futures are affected;
- (3) Making securities transactions among the accounts under the actual control of his own or taking himself as the object of trading of futures agreements so that the trading prices or volumes of securities or securities are affected;
- (4) Manipulating the securities or futures markets by any other means.

Where any entity commits the crime as described in the preceding paragraph, a fine shall be imposed upon the entity, and the persons-in-charge who are held to be directly responsible any other liable persons shall be penalized according to the preceding paragraph.

Article 183. Personnel of insurance companies who take advantage of their office to intentionally make false claims on insured incidents which have not occurred to defraud insurance indemnity are to be sentenced and punished in accordance with the stipulations of Article 271 of this law.

Personnel of state-owned insurance companies and personnel delegated by state-owned insurance companies to perform official duties in non-state-owned insurance companies who commit an act mentioned in the preceding paragraph are to be sentenced and punished in accordance with the stipulations in Article 382 and Article 383 of this law.

Article 184. Personnel of banks or other monetary institutions who ask others for money or goods, or illegally accept money or goods from others in activities of monetary business and seek benefits for others, or accept rebate or service charges for themselves under various pretexts in violation of state stipulations are to be sentenced and punished in accordance with the stipulations of Article 163 of this law.

Personnel of state-owned monetary institutions and personnel delegated by state-owned

monetary institutions to perform official duties in non-state-owned monetary institutions who commit an act mentioned in the preceding paragraph are to be sentenced and punished in accordance with the stipulations in Article 385 and Article 386 of this law.

Article 185. Any employee of a commercial bank, securities exchange, futures exchange, securities company, futures brokering company, insurance company or of any other banking institution who, by taking advantage of his position, misappropriates money belonging to the unit or any client shall be convicted and punished according to Article 272 of this Law.

If any employee of a State-owned commercial bank, stock exchange, futures exchange, securities company, futures brokering company, insurance company or other banking institution or any person who is assigned by a state-owned commercial bank, stock exchange, futures exchange, securities company, futures brokering company, insurance company or other banking institution to an institution that is not owned by the state to engage in public service commits the act as mentioned in the preceding paragraph, he shall be convicted and punished according to the provisions in Article 384 of this Law.

Article 185 (I): Where any commercial bank, stock exchange, futures exchange, securities company, futures brokering company, insurance company, or any other financial institution violates its fiduciary duty, unlawfully utilizes the funds or any other entrusted property of its clients, and if the circumstances are serious, a fine shall be imposed upon the entity, and the persons-in-charge who are held to be directly responsible as well as other directly liable persons shall be sentenced to fixed-term imprisonment of not more than three years or detention, and shall be fined 30,000 yuan up to 300,000 yuan. If the circumstances are extremely serious, they shall be sentenced to fixed-term imprisonment of not less than three years but not more than ten years, and shall be fined 50,000 yuan up to 500,000 yuan.

Where any public fund management institution such as a social security fund management institution or housing accumulation fund management institution, or any insurance company, insurance asset management company, or securities investment fund management company violates any of the state provisions in its use of funds, the persons-in-charge who are held to be directly responsible and other directly liable persons shall be penalized according to the preceding paragraph.

Article 186. Where any of the employees of any bank or any other financial institution grants any loan by violating the relevant provisions of the state and the sum is huge or any serious loss has resulted, he shall be sentenced to fixed-term imprisonment of not more than five years or detention, and shall be fined 10,000 yuan up to 100,000 yuan. If the sum is extremely huge or extremely serious losses have resulted, he shall be sentenced to fixed-term imprisonment of more than five years, and shall be fined 20,000 yuan up to 200,000 yuan.

Where any employee of any bank or any other financial institution violates the relevant provisions of the state to grant loans to any of his relatives, he shall be penalized according to the preceding paragraph.

Institutions that commit a crime mentioned in the preceding two paragraphs are to be

sentenced to a fine, and personnel in charge directly responsible for the crime and other personnel directly responsible for the crime are to be punished in accordance with the stipulations in the preceding two paragraphs.

The scope of related people is determined in accordance with "The Law of Commercial Banks of the People's Republic of China" and other monetary laws and regulations concerned.

Article 187. Where any employee of any bank or any other financial institution accepts the money of any client without writing it into the accounts, and if the sum is huge or if any serious loss has resulted, he shall be sentenced to fixed-term imprisonment of not more than five years, and shall be fined 20,000 yuan up to 200,000 yuan. If the sum is extremely huge or the losses are extremely serious, he shall be sentenced to fixed-term imprisonment of five years or more, and shall be fined 50,000 yuan up to 500,000 yuan.

Institutions which commit a crime mentioned in the preceding paragraph is to be sentenced to a fine, and personnel in charge directly responsible for the crime and other personnel directly responsible for the crime are to be punished in accordance with the stipulations in the preceding paragraph.

Article 188. Where any employee of any bank or any other financial institution violates the relevant provisions when issuing any letter of credit, letter of guarantee, instrument, certificate of deposit, certification of credit, etc. to any other person, and if the circumstances are serious, he shall be sentenced to fixed-term imprisonment of not more than five years or detention. If the circumstances are extremely severe, he shall be sentenced to fixed-term imprisonment of five years or more.

Institutions which commit a crime mentioned in the preceding paragraph are to be sentenced to a fine, and personnel in charge directly responsible for the crime, or other personnel directly responsible for the crime are to be punished in accordance with the stipulations of the preceding paragraph.

Article 189. Personnel of banks or other monetary institutions who, in handling bills, accept, make payment for, or stand guarantee for, bills which are issued in violation of the Negotiable Instruments Law, thus causing serious losses, are to be sentenced to not more than five years of fixed-term imprisonment or criminal detention; when the losses are especially serious, the sentence is to be not less than five years of fixed-term imprisonment.

Institutions that commit a crime mentioned in the preceding paragraph are to be sentenced to a fine, and personnel in charge directly responsible for the crime and other personnel directly responsible for the crime are to be punished in accordance with the stipulations in the preceding paragraph.

Article 190. Companies, enterprises or other organizations, should they, in violation of state stipulations, deposit foreign exchange outside of the country without authorization or illegally transfer foreign exchange out of the country, if the amount is relatively huge, the organization shall be imposed a fine whose amount ranges from 5% to 30% of the evaded foreign exchange amount and the directly responsible executives and other directly responsible

people shall be imposed a less than five year term of imprisonment or detention. If the amount is huge or there are other serious offenses, the organization shall be imposed a fine whose amount ranges from 5% to 30% of the evaded foreign exchange amount, and the directly responsible executives and other directly responsible people shall be imposed a more than five year term of imprisonment.

Article 191. Where anyone who obviously knows that any incomes are obtained from any drug-related crime, organizational crime of any gangland, terrorist crime, crime of smuggling, crime of corruption or bribery, crime of disrupting the financial management order, crime of financial fraud, etc. as well as the proceeds generated therefrom, yet commits any of the following acts for the purpose of disguising or concealing the origin or nature thereof, the incomes obtained from the commission of the aforementioned crimes as well as the proceeds generated therefrom shall be confiscated, and the offender shall be sentenced to fixed-term imprisonment of not more than five years or detention, and/or shall be imposed a fine of 5% up to 20% of the amount of laundered money. If the circumstances are serious, he shall be sentenced to fixed-term imprisonment of not less than five years but not more than ten years, and shall be imposed a fine of 5% up 20% of the amount of laundered money:

- (1) Providing any capital account;
- (2) Assisting the transfer of property into cash, financial instruments, or negotiable securities;
- (3) Assisting the transfer of capital by means of transfer accounts or any other means of settlement;
- (4) Assisting the remit of funds to overseas;
- (5) Disguising or concealing the origin or nature of any crime-related income or the proceeds generated therefrom by any other means.

Where an entity commits the crime as mentioned in the preceding paragraph, it shall be fined, and any of the persons who are directly in charge and the other persons who are directly responsible for the crime shall be sentenced to fixed-term imprisonment of no more than five years or criminal detention; if the circumstances are serious, any of them shall be sentenced to fixed-term imprisonment of no less than five years but no more than ten years.

Section 5. Crimes of Financial Fraud

Article 192. Whoever for the purpose of illegal possession illegally raises funds by fraudulent means, if the amount is quite big, is to be sentenced to not more than five years of fixed-term imprisonment or criminal detention, and to a fine of not less than 20,000 yuan and not more than 200,000 yuan; when the amount is enormous or other circumstances are serious, the sentence is to be not less than five years and not more than 10 years of fixed-term imprisonment, and a fine of not less than 50,000 yuan and not more than 500,000 yuan; when the amount is especially enormous or other circumstances are especially serious, the sentence is to be not less than 10 years of fixed-term imprisonment or life imprisonment, and a fine not less than 50,000 yuan and not more than 500,000 yuan or confiscation of property.

Article 193. Whoever for the purpose of illegal possession commits any of the following acts

to defraud the banks or other monetary institutions of loans, if the amount is quite big, is to be sentenced to not more than five years of fixed-term imprisonment or criminal detention, and a fine of not less than 20,000 yuan and not more than 200,000 yuan; when the amount is enormous or other circumstances are serious, the sentence is to be not less than five years and not more than 10 years of fixed-term imprisonment and a fine of not less than 50,000 yuan and not more than 500,000 yuan; when the amount is especially enormous or other circumstances are especially serious, the sentence is to be not less than 10 years of fixed-term imprisonment or life imprisonment, and a fine of not less than 50,000 yuan and not more than 500,000 yuan, or confiscation of property:

- (1) cooking up false reasons for importing funds or projects;
- (2) using false economic contracts;
- (3) using false certificates;
- (4) using false property right certificates for guarantee or making duplicate guarantee exceeding the value of the mortgaged goods; and
- (5) defrauding loans by other means.

Article 194. Whoever commits any of the following acts to carry out fraudulent activities with financial bills, if the amount is quite big, is to be sentenced to not more than five years of fixed-term imprisonment or criminal detention, and to a fine of not less than 20,000 yuan and not more than 200,000 yuan; when the amount is enormous, or other circumstances are serious, the sentence is to be not less than five years and not more than 10 years of fixed-term imprisonment, and a fine of not less than 50,000 yuan and not more than 500,000 yuan; when the amount is especially enormous or other circumstances are especially serious, the sentence is to be not less than 10 years of fixed-term imprisonment or life imprisonment and a fine of not less than 50,000 yuan and not more than 500,000 yuan, or confiscation of property:

- (1) knowingly using forged, altered drafts, cashier's checks, and checks;
- (2) knowingly using voided drafts, cashier's checks, checks;
- (3) uttering other people's drafts, cashier's checks, checks;
- (4) signing a dud check or a check with signature different from the specimen one;
- (5) issuing drafts or cashier's checks without guaranteed funds, or making false records in issuing drafts or cashier's checks to defraud money and goods.

Whoever uses forged and altered documents of authority for collection, remittance documents, bank certificates of deposit, and other bank documents of settlement is to be punished in accordance with the stipulations of the preceding paragraph.

Article 195. Whoever uses one of the following ways for fraudulent activities with letters of credit is to be sentenced to not more than five years of fixed-term imprisonment or criminal detention, and a fine of not less than 20,000 yuan and not more than 200,000 yuan; when the amount is enormous or other circumstances are serious, the sentence is to be not less than five years and not more than 10 years of fixed-term imprisonment, and a fine of not less than 50,000 yuan and not more than 500,000 yuan; when the amount is especially enormous

or other circumstances are especially serious, the sentence is to be not less than 10 years of fixed-term imprisonment or life imprisonment, and a fine of not less than 50,000 yuan and not more than 500,000 yuan or confiscation of property:

- (1) using forged or altered letters of credit or bills and documents attached;
- (2) using voided letters of credit;
- (3) obtaining letters of credit by fraud; and
- (4) carrying out fraudulent activities with letters of credit in other ways.

Article 196. Anyone who commits fraud by means of a credit card in any of the following ways shall, if the amount involved is relatively large, be sentenced to fixed-term imprisonment of not more than 5 years or criminal detention and shall be concurrently or separately fined 20,000 yuan up to 200,000 yuan; if the sum involved is huge, or if there are other serious circumstances, he shall be sentenced to fixed-term imprisonment of 5 up to 10 years and shall be concurrently fined 50,000 yuan up to 500,000 yuan; if the sum involved is extremely huge, or if there are other extremely serious circumstances, he shall be sentenced to fixed-term imprisonment of not less than 10 years or life imprisonment and shall be concurrently fined 50,000 yuan up to 500,000 yuan or be sentenced to confiscation of all personal property:

- (1) using a forged credit card or using a credit card obtained by using false identity certification;
- (2) using an invalidated credit card;
- (3) illegally using another's credit card; or
- (4) overdrawing with ill intentions.

The phrase "overdrawing with ill intentions" as mentioned in the preceding paragraph means that a credit card holder who, for the purpose of illegal possession, overdraws beyond the limited amount or beyond the time limit and refuses to repay the overdrawn amount after the bank that issues the card demands him to do so.

Anyone who steals a credit card and uses it shall be convicted and punished in accordance with the provisions in Article 264 of this Law.

Article 197. Whoever uses a relatively substantial amount of forged or altered treasury bills or other negotiable securities issued by the state to engage in fraudulent activities shall be sentenced to not more than five years of fixed-term imprisonment or criminal detention and be fined no more than 200,000 yuan but no less than 20,000 yuan; when the amount is large and other serious circumstances are involved, the sentence shall be no more than 10 years but no less than five years of fixed-term imprisonment and a fine of no more than 500,000 yuan but no less than 50,000 yuan; and when the amount is extraordinarily large and other especially serious circumstances are involved, the sentence shall be life imprisonment or no less than 10 years of fixed-term imprisonment and a fine of no more than 500,000 yuan but no less than 50,000 yuan, or confiscation of property.

Article 198. Fraudulent insurance activities falling under any one of the following circumstances shall, for cases involving relatively large amounts be punished with

imprisonment or criminal detention of less than five years, with a fine of over 10,000 yuan but less than 100,000 yuan; for cases involving large amounts, or of a serious nature, with imprisonment of over five years but less than 10 years, with a fine of over 20,000 yuan but less than 200,000 yuan; for cases involving extraordinarily large amounts, or of a serious nature, with imprisonment of over 10 years, with a fine of over 20,000 yuan but less than 200,000 yuan, or with forfeiture of property:

- (1) policy holder intentionally fabricates insurance object to deceive insurance money;
- (2) policy holder, the insured, or the beneficiary fabricates false causes to insurance incident or inflate the extent of loss to deceive insurance money;
- (3) policy holder, the insured, or the beneficiary fabricate non-existing insurance incident to deceive insurance money;
- (4) policy holder, the insured, or the beneficiary intentionally create an insurance incident with property loss to deceive insurance money; or
- (5) policy holder or the beneficiary intentionally causes the death, injury, or sickness of the insured to deceive insurance money.

Acts falling under preceding Paragraphs (4) and (5) which constitute other crimes shall be punished for all offenses committed.

Units violating Paragraph (1) shall be punished with a fine, with personnel directly in charge and other directly responsible personnel being punished with imprisonment or criminal detention of less than five years; for cases involving large amounts, or of a serious nature, with imprisonment of over five years but less than 10 years; for cases involving extraordinarily large amounts, with imprisonment of over five years but less than 10 years; or, in cases involving an extraordinary large amount, or of a serious nature, with imprisonment of over 10 years.

Appraisers, certifiers, and property valuers, who intentionally provide false evidence to abet others to commit fraud, shall be punished as insurance fraudulence accomplices.

Article 199 Deleted according to Amendment (IX) to the Criminal Law of the People's Republic of China

Article 200. Where an entity commits a crime as provided for in Article 192, 194 or 195 of this Section, a fine shall be imposed on it, and the directly responsible person and other directly liable persons shall be sentenced to imprisonment of not more than 5 years or criminal detention and may be sentenced to a fine in addition; if the amount involved is huge or there is any other serious circumstance, shall be sentenced to imprisonment of not less than 5 years but not more than 10 years and a fine; or if the amount involved is especially huge or there is any other especially serious circumstance, shall be sentenced to imprisonment of not less than 10 years or life imprisonment and a fine.

Section 6. Offenses Against Tax Collection and Management

Article 201. Where any taxpayer files false tax returns by cheating or concealment or fails to file tax returns, and the amount of evaded taxes is relatively large and accounts for more than 10 percent of payable taxes, he shall be sentenced to fixed-term imprisonment not

more than three years or criminal detention, and be fined; or if the amount is huge and accounts for more than 30 percent of payable taxes, shall be sentenced to fixed-term imprisonment not less than three years but not more than seven years, and be fined.

Where any withholding agent fails to pay or fails to pay in full the withheld or collected taxes by cheating or concealment, and the amount is relatively large, he shall be punished under the preceding paragraph.

Where either of the acts described in the preceding two paragraphs is committed many times without punishment, the amount shall be calculated on an accumulated basis.

Where any taxpayer who committed the act as described in paragraph 1 has made up the payable taxes and paid the late fine after the tax authority sent down the notice of tax recovery according to law, and has been administratively punished, he shall not be subject to criminal liability, except one who has been criminally punished in five years for evading tax payment or has been, twice or more, administratively punished by the tax authorities.

Article 202. Using violence or threatening means to refuse payment of tax shall be punished with imprisonment or criminal detention of less than three years, with a fine of over 100 percent but less than 500 percent of the amount of taxes so refused to pay; for cases of a serious nature, with imprisonment of over three years but less than seven years, with a fine of over 100 percent but less than 500 percent of the amount of taxes so refused to pay.

Article 203. Taxpayers who fail to settle payable taxes, or transfer or conceal property resulting in tax organs being unable to recover the owed taxes of over 10,000 yuan but less than 100,000 yuan, shall be punished with imprisonment or criminal detention of less than three years, with a fine or a separately imposed fine of over 100 percent and less than 500 percent of the unsettled amount; if the amount in question exceeds 100,000 yuan, with imprisonment of over three years but less than seven years, with a fine of over 100 percent but less than 500 percent of the unsettled amount.

Article 204. Using false export reports or other fraudulent means to defraud state export tax refunds involving a relatively large amount shall be punished with imprisonment or criminal detention of less than five years, with a fine of over 100 percent but less than 500 percent of the defrauded tax refund; for cases involving large amounts or of a serious nature, with imprisonment of over five years but less than 10 years, with a fine of over 100 percent but less than 500 percent of the defrauded tax refund; for cases involving extraordinarily large amounts, or of a especially serious nature with imprisonment of over 10 years or life imprisonment, with a fine of over 100 percent but less than 500 percent of the defrauded tax refund, or with forfeiture of property.

Tax payers using the fraudulent means mentioned in preceding paragraph to deceptively reclaim their paid taxes shall be convicted and punished according to provisions of Article 201, with those who deceptively claim more than what they have paid, being punished according to provisions of the preceding paragraph.

Article 205. Falsely issuing exclusive value-added tax invoices or other invoices to defraud export tax refunds or to off set taxes shall be punished with imprisonment or criminal

detention of less than three years, with a fine of over 20,000 yuan and less than 200,000 yuan; for cases involving relatively large amounts of falsely reported taxes, or of a serious nature, with imprisonment of over three years and less than 10 years, with a fine of over 50,000 yuan but less than 500,000 yuan; for cases involving large amounts of falsely reported taxes, or of a more serious nature, with imprisonment of over 10 years or life imprisonment, with a fine of over 50,000 yuan but less than 500,000 yuan, or with forfeiture of property.

Units committing offenses under this article shall be punished with a fine, with personnel directly in charge or other directly responsible personnel being punished with imprisonment of criminal detention of less than three years; for cases involving relatively large amounts of taxes, or with a serious nature, with imprisonment of over three years but less than ten years; for cases involving large amounts of taxes, or of a especially serious nature, with imprisonment of over 10 years or life imprisonment.

Falsely issuing exclusive value-added tax invoices or other invoices to defraud export tax refunds or to off set taxes refers to any false issuance intended for others or himself, or letting others falsely issue for him, or induce others to falsely issue.

Article 205(1): Whoever falsely issues any invoice other than those as mentioned in Article 205 of this Law shall be sentenced to imprisonment of not more than 2 years, criminal detention or control and a fine if the circumstances are serious; or be sentenced to imprisonment of not less than 2 years but not more than 7 years and a fine if the circumstances are especially serious.

Where an entity commits the crime as provided for in the preceding paragraph, a fine shall be imposed on it, and its directly responsible person and other directly liable persons shall be punished according to the provision of the preceding paragraph.

Article 206. Forging or selling forged exclusive value- added tax invoices shall be punished with imprisonment or criminal detention of or restriction for less than three years, with a fine of over 20,000 yuan but less than 200,000 yuan; for cases involving relatively large quantities, or of a serious nature, with imprisonment of over three years and less than 10 years, with a fine of over 50,000 yuan but less than 500,000 yuan; for cases involving large quantities or of a especially serious nature, with imprisonment of over ten years or life imprisonment, with a fine of over 50,000 yuan but less than 500,000 yuan, or with forfeiture of property.

Units committing offenses under this article shall be punished with a fine, with personnel directly in charge or other directly responsible personnel being punished with imprisonment or criminal detention, or restriction for less than three years; for cases involving relatively large quantities or of a serious nature, with imprisonment of over three years but less than 10 years; for cases involving large quantities or of a especially serious nature, with imprisonment of over 10 years or life imprisonment.

Article 207. Committing illegal sale of exclusive value-added tax invoices shall be punished with imprisonment or criminal detention, or restriction for less than three years, with a fine

over 20,000 yuan but less than 200,000 yuan.; for cases involving relatively large quantities, with imprisonment over three years but less than 10 years, with a fine of over 50,000 yuan but less than 500,000 yuan; for cases involving large quantity with imprisonment of over 10 years or life imprisonment, with a fine of over 50,000 yuan but less than 500,000 yuan, or with forfeiture of property.

Article 208. Illegal purchase of exclusive value-added tax invoices or forged exclusive value-added tax invoices shall be punished with imprisonment or criminal detention of less than five years, with a fine or a separately imposed fine of over 20,000 yuan and less than 200,000 yuan.

Falsely issuing or reselling illegally purchased exclusive value-added tax invoices or forged exclusive value-added tax invoices shall be convicted and punished respectively under Articles 205, 206, and 207 of this law.

Article 209. Forging or manufacturing without authority or selling or manufacturing without authority other invoices usable for defrauding export tax refunds or offsetting taxes shall be punished with imprisonment or criminal detention and restriction for less than three years, with a fine of over 20,000 yuan but less than 200,000 yuan; for cases involving large quantities, with imprisonment of over three years but less than seven years, with a fine of over 50,000 yuan but less than 500,000 yuan; for cases involving extraordinarily large quantities, with imprisonment of over seven years, with a fine of over 50,000 yuan but less than 500,000 yuan, or with forfeiture of property.

Forging or manufacturing without authority or selling other invoices manufactured without authority, which have not been mentioned in the preceding paragraph, shall be punished with imprisonment or criminal detention of, or restriction for less than two years, with a fine of over 10,000 yuan but less than 50,000 yuan; for cases of a serious nature, with imprisonment of over two years and less than seven years, with a fine of over 50,000 yuan and less than 500,000 yuan.

Illegal sale of other invoices usable for defrauding export tax refunds or offsetting taxes shall be punished according to the first paragraph.

Illegal sale of other invoices not mentioned in the third paragraph shall be punished according to the second paragraph.

Article 210. Theft of exclusive value-added tax invoices or other invoices usable in defrauding export tax refunds or offsetting taxes, shall be convicted and punished according to Article 264 of this law.

Obtaining by fraudulent means exclusive value-added tax invoices or other invoices usable in defrauding export tax refunds or offsetting taxes shall be convicted and punished according to Article 266 of this law.

Article 210(I): Whoever knowingly holds counterfeit invoices shall be sentenced to imprisonment of not more than 2 years, criminal detention or control and a fine if the quantity is relatively large; or be sentenced to imprisonment of not less than 2 years but not more than 7 years and a fine if the quantity is huge.

Where an entity commits the crime as provided for in the preceding paragraph, a fine shall be imposed on it, and its directly responsible person and other directly liable persons shall be punished according to the provision of the preceding paragraph.

Article 211. Units committing offenses under Articles 201, 203, 204, 207, 208, and 209 of this section shall be punished with fines, with personnel directly in charge and other directly responsible personnel being punished according to these articles, respectively.

Article 212 Fines and forfeitures of property imposed against offenders convicted under Articles 201 through 205 of this section should not be enforced until the tax authorities have recovered the taxes in question and the export tax refunds so defrauded.

Section 7. Infringement of Intellectual Property Rights

Article 213. Using an identical trademark on the same merchandise without permission of its registered owner shall, if the case is of a serious nature, be punished with imprisonment or criminal detention of less than three years, with a fine, or a separately imposed fine; for cases of a more serious nature, with imprisonment of over three years and less than seven years, and with fine.

Article 214. Knowingly selling merchandise under a faked trademark with a relatively large sales volume shall be punished with imprisonment or criminal detention of less than three years, with a fine or a separately imposed fine; in cases involving a large sales volume, with imprisonment of more than three years but less than seven years, and with fine.

Article 215. Forging or manufacturing without authority or selling or manufacturing without authority other's registered trademarks or identifications shall, for cases of a serious nature, be punished with imprisonment or criminal detention, or restriction for less than three years, with a fine or a separately imposed fine; for cases of a especially serious nature, with imprisonment of over three years and less than seven years, and with fine.

Article 216. Whoever counterfeits other people's patents, and when the circumstances are serious, is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, and may in addition or exclusively be sentenced to a fine.

Article 217. Whoever, for the purpose of reaping profits, has committed one of the following acts of copyright infringement and gains a fairly large amount of illicit income, or when there are other serious circumstances, is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, and may in addition or exclusively be sentenced to a fine; when the amount of the illicit income is huge or when there are other particularly serious circumstances, he is to be sentenced to not less than three years and not more than seven years of fixed-term imprisonment and a fine:

- (1) copy and distribute written, musical, movie, televised, and video works; computer software; and other works without the permission of their copyrighters;
- (2) publish books whose copyrights are exclusively owned by others;
- (3) duplicate and distribute audiovisual works without the permission of their producers;
- (4) produce and sell artistic works bearing fake signatures of others.

Article 218. Whoever, for the purpose of reaping profits, knowingly sells the duplicate works

described in Article 217 of this Law, and gains a huge amount of illicit income, is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, and may in addition or exclusively be sentenced to a fine.

Article 219. Whoever engages in one of the following activities which encroaches upon commercial secrets and brings significant losses to persons having the rights to the commercial secrets is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, and may in addition or exclusively be sentenced to a fine; or is to be sentenced to not less than three years and not more than seven years of fixed-term imprisonment and a fine, if he causes particularly serious consequences:

(1) acquire a rightful owner's commercial secrets via theft, lure by promise of gain, threat, or other improper means;

(2) disclose, use, or allow others to use a rightful owner's commercial secrets which are acquired through the aforementioned means;

(3) disclose, use, or allow others to use, in violation of the agreement with the rightful owner or the rightful owner's request of keeping the commercial secrets, the commercial secrets he is holding.

Whoever acquires, uses, or discloses other people's commercial secrets, when he knows or should know that these commercial secrets are acquired through the aforementioned means, is regarded as an encroachment upon commercial secrets.

The commercial secrets referred to in this article are technical information and operation information that are unknown to the public, can bring economic profits to their rightful owners, are functional, and are kept as secrets by their rightful owners.

The rightful owners referred to in this Article are owners of the commercial secrets and users who have the permission of the owners.

Article 220. When a unit commits the crimes stated in Article 213 through Article 219, it is to be sentenced to a fine; its directly responsible person in charge and other personnel of direct responsibility should be punished in accordance with the stipulations respectively stated in these Articles of this section.

Section 8. Crimes of Disrupting Market Order

Article 221. Whoever fabricates and spreads falsified information to impair other people's commercial reputation and commodity reputation, and causes significant losses to others or if there are other serious circumstances, is to be sentenced to not more than two years of fixed-term imprisonment, criminal detention, and may in addition or exclusively be sentenced to a fine.

Article 222. Where, in violation of the state regulations, an advertisement owner, advertising agency, or advertisement carrier gives false publicity by taking the advantage of advertising a commodity or service, and when the circumstances are serious, he shall be sentenced to not more than two years of fixed-term imprisonment, criminal detention, and may in addition or exclusively be sentenced to a fine.

Article 223. Where bidders submit tenders in collusion and harm the interests of persons

inviting tenders or other bidders, and when the circumstances are serious, they shall be sentenced to not more than three years of fixed-term imprisonment, criminal detention, and may in addition or exclusively be sentenced to a fine.

Where bidders and persons inviting tenders harm the legitimate interests of the state, collectives, and the public by colluding in the bidding, they are to be punished in accordance with the stipulations stated in the preceding paragraph.

Article 224. Whoever, for the purpose of illegal possession, uses one of the following means during signing or executing a contract to obtain property and goods of the opposite party by fraud, and when the amount of money is relatively large, is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, and may in addition or exclusively be sentenced to a fine; or be sentenced to not less than three years and not more than 10 years of fixed-term imprisonment and a fine, if the amount of money is huge or there are other serious circumstances; or be sentenced to more than 10 years of fixed-term imprisonment or life imprisonment and a fine or confiscation of property, if the amount of money is particularly huge or there are other particularly serious circumstances:

- (1) sign a contract in the name of a made-up unit or under somebody else's name;
- (2) use forged, altered, or invalid negotiable instruments or other false certificates of property rights as guaranties;
- (3) fulfill small-amount contracts or partially fulfill the contract, instead of actually fulfilling the contract, to inveigle the opposite party into continuing to sign and fulfill the contract;
- (4) go into hiding after receiving goods, payment, advance payment, or property as guaranty from the opposite party;
- (5) defraud the opposite party's property through other means.

Article 224 (I): Whoever organizes or leads the pyramid selling activities to cheat the participants of property and disturb the economic and social order, in which, in the name of marketing commodities, providing services or any other business operation, the participants are required to obtain the qualification for participation by paying fees, purchasing commodities or services or any other means, the participants are classified into different levels according to a certain order, the calculation of remunerations or kickbacks to participants is directly or indirectly dependent on the number of persons recruited, and the participants are induced to continue or coerced into continuing recruiting others to participate, shall be sentenced to fixed-term imprisonment not more than five years or criminal detention, and be fined; or if the circumstances are serious, shall be sentenced to fixed-term imprisonment not less than five years, and be fined.

Article 225. Whoever, in violation of the state stipulations, has one of the following illegal business acts, which disrupts the market order and when the circumstances are serious, is to be sentenced to not more than five years of fixed-term imprisonment, criminal detention, and may in addition or exclusively be sentenced to a fine not less than 100 percent and not more than 500 percent of his illegal income and, where the circumstances are particularly serious, be sentenced to not less than five years of fixed-term imprisonment and a fine not

less than 100 percent and not more than 500 percent of his illegal income or the confiscation of his property:

- (1) engage in the monopoly business or monopolized commodities stipulated in laws and administrative regulations, or other commodities whose purchase and sale are controlled, without permission;
- (2) purchase and sell import-export licenses, certificates of origin, and operation permits or approved documents stipulated by other laws and administrative regulations;
- (3) illegally operating the business of securities, futures or insurance, or illegally engaging in fund payment and settlement business, without the approval of the relevant competent departments of the state;
- (4) conduct other illegal business activities that seriously disrupt the market order.

Article 226. Whoever commits any of the following acts by violence or threat shall be sentenced to imprisonment of not more than 3 years or criminal detention and/or a fine if the circumstances are serious; or be sentenced to imprisonment of not less than 3 years but not more than 7 years and a fine if the circumstances are especially serious:

- (1) Forcing any other person to purchase or sell commodities;
- (2) Forcing any other person to provide or accept services;
- (3) Forcing any other person to participate in or withdraw from a bidding or audition;
- (4) Forcing any other person to transfer or acquire stocks or bonds of a corporation or enterprise or any other asset; or
- (5) Forcing any other person to participate in or withdraw from a certain business operation.

Article 227. Whoever forges or profiteers from forged train and ship tickets, stamps, or other valuable coupons, which involve a relatively large amount of money, is to be sentenced to not more than two years of fixed-term imprisonment, criminal detention or control, and may in addition or exclusively be sentenced to a fine not less than 100 percent and not more than 500 percent of the amount of the coupons; or, if a huge amount is involved, to not less than two years and not more than seven years of fixed-term imprisonment and a fine not less than 100 percent and not more than 500 percent of the amount of the coupons.

Whoever profiteers from train and ship tickets, when the circumstances are serious, is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention or control, and may in addition or exclusively be sentenced to a fine of not less than 100 percent and not more than 500 percent of the amount of the coupons.

Article 228. Whoever, for the purpose of seeking personal gain, violates the laws and regulations on land management by illegally transferring and profiteering from land use rights and when the circumstances are serious, is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, or may in addition or exclusively be sentenced to a fine of not less than five percent and not more than 20 percent of the money gained from illegally transferring or profiteering from land use rights or, when the circumstances are particularly serious, is to be sentenced to not less than three years and not more than seven years of fixed-term imprisonment and a fine of not less than five percent

and not more than 20 percent of the money gained from illegally transferring or profiteering from land use rights.

Article 229. Where a person of intermediary organizations, who is in charge of asset assessment and examination, certificate examination, accounting, auditing, legal services, and other duties, intentionally provides false certificates, and when the circumstances are serious, he is to be sentenced to not more than five years of fixed-term imprisonment or criminal detention, and a fine.

Where a person stated in the preceding paragraph extorts money and goods from others or illegally accepts money and goods from others to commit the aforementioned crime, and when the circumstances are serious, he is to be sentenced to not more than five years of fixed-term imprisonment or criminal detention, and a fine.

Where a person stated in the first paragraph of this article is seriously irresponsible and causes serious consequences by issuing certificates greatly inconsistent with the facts, he is to be sentenced to not more than three years of fixed-term imprisonment or criminal detention, and may in addition or exclusively be sentenced to a fine.

Article 230. Whoever violates the rules of the law on import-export commodity inspection by avoiding commodity inspection and, without authorization, selling and using imported goods or exporting exported goods without having them gone through inspection by commodity inspection authorities as required, and when the circumstances are serious, is to be sentenced to not more than three years of fixed-term imprisonment or criminal detention, and may in addition or exclusively be sentenced to a fine.

Article 231. Where a unit commits the crimes stated in Article 221 through Article 230 of this section, it should be sentenced to a fine and its directly responsible person in charge and other directly responsible personnel be punished according to the stipulations in these articles.

Chapter IV Crimes of Infringing Upon the Rights of the Person and the Democratic Rights of Citizens

Article 232. Whoever intentionally kills another is to be sentenced to death, life imprisonment or not less than 10 years of fixed-term imprisonment; when the circumstances are relatively minor, he is to be sentenced to not less than three years and not more than 10 years of fixed-term imprisonment.

Article 233. Whoever negligently causes the death of another is to be sentenced to not less than three years and not more than seven years of fixed-term imprisonment; when the circumstances are relatively minor, he is to be sentenced to not more than three years of fixed-term imprisonment. Where this Law has other stipulations, matters are to be handled in accordance with such stipulations.

Article 234. Whoever intentionally injures the person of another is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, or control.

Whoever commits the crime in the preceding paragraph and causes a person's serious injury is to be sentenced to not less than three years and not more than 10 years of fixed-term

imprisonment; if he causes a person's death or causes a person's serious deformity by badly injuring him with particularly ruthless means, he is to be sentenced to not less than 10 years of fixed-term imprisonment, life imprisonment, or death. Where this Law has other stipulations, matters are to be handled in accordance with such stipulations.

Article 234(I): Whoever organizes others to sell human organs shall be sentenced to imprisonment of not more than 5 years and a fine; or if the circumstances are serious, be sentenced to imprisonment of not less than 5 years and a fine or forfeiture of property.

Whoever removes any other person's organ without such other person's consent, removes any organ of a person under the age of 18 or forces or deceives any other person into donating any organ shall be convicted and punished according to the provisions of Articles 234 and 232 of this Law.

Whoever removes a dead person's organ against the person's will before his death or removes a dead person's organ against the will of the person's near relatives in violation of the provisions of the state provided that there is no consent from the person before his death shall be convicted and punished according to the provision of Article 302 of this Law.

Article 235. Whoever negligently injures another and causes him serious injury is to be sentenced to not more than three years of fixed-term imprisonment or criminal detention. Where this law has other stipulations, matters are to be handled in accordance with such stipulations.

Article 236. Whoever, by violence, coercion or other means, rapes a woman is to be sentenced to not less than three years and not more than 10 years of fixed-term imprisonment.

Whoever has sexual relations with a girl under the age of 14 is to be deemed to have committed rape and is to be given a heavier punishment.

Whoever rapes a woman or has sexual relations with a girl involving one of the following circumstances is to be sentenced to not less than 10 years of fixed-term imprisonment, life imprisonment, or death:

- (1) rape a woman or have sexual relations with a girl and when the circumstances are odious;
- (2) rape several women or have sexual relations with several girls;
- (3) rape a woman in a public place and in the public;
- (4) rape a woman in turn with another or more persons;
- (5) cause the victim serious injury, death, or other serious consequences.

Article 237. Whoever, by violence, coercion or other means, forces or molests any other person or humiliates a woman shall be sentenced to imprisonment of not more than five years or criminal detention.

Whoever assembles a crowd to commit, or commits in a public place, the crime as provided for in the preceding paragraph, or has any other execrable circumstance shall be sentenced to imprisonment of not more than five years.

Whoever molests a child shall be given a heavier penalty according to the provisions of the preceding two paragraphs.

Article 238. Whoever unlawfully detains another or deprives him of his freedom of the person by any other means is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, control, or deprivation of political rights. In circumstances where beating or humiliation are involved, a heavier punishment is to be given.

Whoever commits one of the crimes in the preceding paragraph and causes a person's serious injury is to be sentenced to not less than three years and not more than 10 years of fixed-term imprisonment; when he causes a person's death, he is to be sentenced to not less than 10 years of fixed-term imprisonment; when he causes a person disability or death by violent means, he is to be punished in accordance with the stipulations in Article 234 and Article 232 of this law.

Whoever unlawfully detains or takes somebody into custody for the purpose of demanding the payment of a debt is to be given a punishment in accordance with the stipulations stated in the two preceding paragraphs.

Where an employee of a state organ abuses his authority to commit any of the three aforementioned crimes, he is to receive a heavier punishment in accordance with the stipulations stated in the three preceding paragraphs.

Article 239. Whoever abducts another person for extortion or abducts another person as a hostage shall be sentenced to fixed-term imprisonment not less than ten years or life imprisonment, and be fined or be sentenced to confiscation of property; or if the circumstances are less serious, shall be sentenced to fixed-term imprisonment not less than five years but not more than ten years, and be fined.

Whoever commits the crime as provided for in the preceding paragraph and kills the abducted person, or intentionally injures the abducted person, causing serious injury or death of the abducted person shall be sentenced to life imprisonment or death penalty and forfeiture of property.

Whoever steals an infant for extortion shall be punished under the preceding two paragraphs.

Article 240. Those abducting and trafficking women or children are to be sentenced to 5 to 10 years in prison plus fine. Those falling into one or more of the following cases are to be sentenced to 10 years or more in prison or to be given life sentences, in addition to fines or confiscation of property. Those committing especially serious crimes are to be sentenced to death in addition to confiscation of property.

- (1) Primary elements of rings engaging in abducting and trafficking women or children;
- (2) those abducting and trafficking more than three women and/or children;
- (3) those raping abducted women;
- (4) those seducing, tricking, or forcing abducted women into prostitution, or those selling abducted women to others who in turn force them into prostitution;
- (5) those kidnapping women or children using force, coercion, or narcotics, for the purpose of selling them;
- (6) those stealing or robbing infants or babies for the purpose of selling them;
- (7) those causing abducted women or children, or their family members, to serious injuries

or death, or causing other grave consequences;

(8) those selling abducted women or children to outside the country.

Abducting and trafficking women or children refers to abducting, kidnapping, buying, selling, transporting, or transshipping women or children.

Article 241. Those buying abducted women or children are to be sentenced to three years or fewer in prison, or put under criminal detention or surveillance.

Those buying abducted women and forcing them to have sex with them are to be convicted and punished according to stipulations of article 236.

Those buying abducted women or children and illegally depriving them of or restricting their physical freedom, or injuring or insulting them, are to be convicted and punished according to relevant stipulations of this law.

Those buying abducted women or children and committing crimes stipulated in paragraphs two and three of this article are to be punished for committing more than one crime.

Those buying and selling abducted women or children are to be convicted and punished according to article 240 of this law.

Whoever buys an abducted woman or child without maltreating the abducted child or obstructing the rescue of the woman or child may be given a lighter penalty; and may be given a lighter or mitigated penalty if he or she does not obstruct the abducted woman's return to the place where she comes from in her own will.

Article 242. Those using force or coercion to obstruct workers of state organs from rescuing bought women or children are to be convicted and punished according to article 277 of this law.

Primary elements who lead other people to obstruct workers of state organs from rescuing bought women or children are to be sentenced to five years or fewer in prison or put under criminal detention. Other elements who use force or coercion are to be punished according to paragraph one of this article.

Article 243. Those fabricating stories to frame others or in an attempt to subject others to criminal investigation, if the case is serious, are to be sentenced to three years or fewer in prison, or put under criminal detention or surveillance. Those causing serious consequences are to be sentenced to three to 10 years in prison.

Workers of state organs committing crimes stipulated in the above paragraph are to be severely punished.

Stipulations in the above two paragraphs do not apply to those who do not deliberately frame others but accuse others by mistake, or who report others' crimes not conforming to the facts.

Article 244. Whoever forces any other person to work by violence, threat or restriction of personal freedom shall be sentenced to imprisonment of not more than 3 years or criminal detention and a fine; or if the circumstances are serious, be sentenced to imprisonment of not less than 3 years but not more than 10 years and a fine.

Whoever knowingly recruits or transports a workforce for any other person to commit the act as mentioned in the preceding paragraph or otherwise assists in forcing any other person to

work shall be punished according to the provision of the preceding paragraph.

Where an entity commits a crime as provided for in the preceding two paragraphs, a fine shall be imposed on it, and its directly responsible person and other directly liable persons shall be punished according to the provision of paragraph 1 of this Article.

Article 244(I): Where an employer, in violation of the laws and regulations on labor administration, hires minors under the age of 16 to conduct extremely intensive physical labor, work at high altitudes or work under the well or work under an explosive, flammable, radioactive or poisonous environment, if the circumstance is serious, the persons who are held to be directly responsible shall be sentenced to fixed-term imprisonment of not more than three years or criminal detention, and shall also be fined; if the circumstance is especially serious, the persons who are held to be directly responsible shall be sentenced to fixed-term imprisonment of not less than three years but not more than seven years, and shall also be fined.

In case any employer that commits any act mentioned in the preceding Paragraph and causes an accident still commits any other crime, it shall be punished in accordance with the provisions on combined punishment for two and more crimes.

Article 245. Those illegally physically searching others or illegally searching others' residences, or those illegally intruding into others' residences, are to be sentenced to three years or fewer in prison, or put under criminal detention.

Judicial workers committing crimes stipulated in the above paragraph by abusing their authority are to be severely punished.

Article 246. Those openly insulting others using force or other methods or those fabricating stories to slander others, if the case is serious, are to be sentenced to three years or fewer in prison, put under criminal detention or surveillance, or deprived of their political rights.

Those committing crimes mentioned above are to be investigated only if they are sued, with the exception of cases that seriously undermine social order or the state's interests.

Where the victim files a complaint with the people's court on the commission of the conduct as provided for in paragraph 1 through the information network, but it is indeed difficult to provide evidence, the people's court may require the public security authority to provide assistance.

Article 247. Judicial workers who extort a confession from criminal suspects or defendants by torture, or who use force to extract testimony from witnesses, are to be sentenced to three years or fewer in prison or put under criminal detention. Those causing injuries to others, physical disablement, or death, are to be convicted and severely punished according to articles 234 and 232 of this law.

Article 248. Supervisory and management personnel of prisons, detention centers, and other guard houses who beat or physically abuse their inmates, if the case is serious, are to be sentenced to three years or fewer in prison or put under criminal detention. If the case is especially serious, they are to be sentenced to three to 10 years in prison. Those causing injuries to injuries, physical disablement, or death, are to be convicted and severely punished

according to article 234 and 232 of this law.

Supervisory and management personnel who order inmates to beat or physically abuse other inmates are to be punished according to stipulations in the above paragraph.

Article 249. Those provoking ethnic hatred or discrimination, if the case is serious, are to be sentenced to three years or fewer in prison, put under criminal detention or surveillance, or deprived of their political rights. If the case is especially serious, they are to be sentenced to three to 10 years in prison.

Article 250. Persons directly responsible for publishing materials that discriminate or insult minority nationalities, if the case is serious and results in grave consequences, are to be sentenced to three years or fewer in prison, or put under criminal detention or surveillance.

Article 251. Workers of state organs who illegally deprive citizens' right to religious beliefs or who encroach on minority nationalities' customs or habits, if the case is serious, are to be sentenced to two years or fewer in prison or put under criminal detention.

Article 252. Those infringing upon the citizens right of communication freedom by hiding, destroying, or illegally opening others' letters, if the case is serious, are to be sentenced to one year or less in prison or put under criminal detention.

Article 253. Postal workers who open, hide, or destroy mail or telegrams without authorization are to be sentenced to two years or less in prison or put under criminal detention.

Those committing crimes stipulated in the above paragraph and stealing money or other articles are to be convicted and severely punished according to article 264 of this law.

Article 253 (I): Whoever sells or provides any citizen's personal information in violation of the relevant provisions of the state shall, if the circumstances are serious, be sentenced to imprisonment of not more than three years or criminal detention in addition to a fine or be sentenced to a fine only; or be sentenced to imprisonment of not less than three years but not more than seven years in addition to a fine if the circumstances are especially serious.

Whoever sells or provides to any other person any citizen's personal information obtained in the course of performing functions or providing services in violation of any relevant provisions of the state shall be given a heavier penalty in accordance with the provisions of the preceding paragraph.

Whoever illegally obtains any citizen's personal information by stealing or other methods shall be punished in accordance with the provisions of paragraph 1.

Where an entity commits any crime as provided for in the preceding three paragraphs, the entity shall be sentenced to a fine, and its directly responsible person in charge and other directly liable persons shall be punished according to the provisions of the applicable paragraph.

Article 254. Workers of state organs who abuse their authority by retaliating against or framing accusers, petitioners, critics, or informants, in the name of conducting official business, are to be sentenced to two years or less in prison or put under criminal detention. If the case is serious, they are to be sentenced to two to seven years in prison.

Article 255. Leaders of companies, enterprises, institutions, offices, or other organizations who persecute and retaliate against accountants or statisticians who perform their duty according to law and boycott acts that violate the accounting law and statistics law, if the case is serious, are to be sentenced to three years or fewer in prison or put under criminal detention.

Article 256. In electing deputies to the people's congresses at all levels or leaders of state organs, those who undermine the elections or obstruct voters and deputies from freely exercising their right to vote or be elected by using force, coercion, deception, bribe; by falsifying election documents; by making a false report on the numbers of ballots; or by using other means, if the case is serious, are to be sentenced to three years or fewer in prison, put under criminal detention, or deprived of their political rights.

Article 257. Those using force to interfere in others' freedom of marriage are to be sentenced to two years or fewer in prison or put under criminal detention.

Those committing crimes stipulated in the above paragraph and causing others to die are to be sentenced to two to seven years in prison.

Those committing crimes stipulated in the first paragraph of this article are to be investigated only if they are sued.

Article 258. Those who have a spouse and get married again, or who marry someone whom they know has a spouse, are to be sentenced to two years or fewer in prison or put under criminal detention.

Article 259. Those who live together with or marry someone whom they know is the spouse of an active duty service member are to be sentenced to three years or fewer in prison or put under criminal detention.

Those who use their authority or subordinate relationship to seduce the wives of active duty servicemen for illicit sexual relations by resorting to coercion are to be convicted and punished according to article 236 of this law.

Article 260. Those mistreating their family members, if the case is serious, are to be sentenced to two years or less in prison, or put under criminal detention or surveillance.

Those committing crimes stipulated in the above paragraph and causing the victims to severe injuries or death are to be sentenced to two to seven years in prison.

The crime as provided for in paragraph 1 shall not be handled unless an accusation is filed, except when the victim is unable to file an accusation or fails to file an accusation due to coercion or intimidation.

Article 260(1): Whoever who has the duty to ward or nurse a juvenile, an elder person, a sick person, or a disabled person maltreats the person under his or her guardianship or nursing with execrable circumstances shall be sentenced to imprisonment of not more than three years or criminal detention.

Where an entity commits the crime as provided for in the preceding paragraph, a fine shall be imposed on it, and its directly responsible person in charge and other directly liable persons shall be punished in accordance with the provisions of the preceding paragraph.

Whoever commits any other crime while committing a crime as mentioned in paragraph 1 shall be convicted and punished according to the provisions on the crime with the heavier penalty.

Article 261. Those who have the obligation but refuse to support those who are aged, young, sick, or do not have the ability to live independently, if the case is serious, are to be sentenced to five years or fewer in prison or put under criminal detention or surveillance.

Article 262. Those abducting minors under 14 years of age from their family or guardians are to be sentenced to five years or less in prison or put under criminal detention.

Article 262 (I): Where anyone organizes any disabled person or any minor below the age of 14 by force or coercion to beg, he shall be sentenced to fixed-term imprisonment of not more than three years or detention, and shall be fined. If the circumstances are serious, he shall be sentenced to fixed-term imprisonment of not less than three years not more than seven years, and shall be fined.

Article 262 (II):Whoever organizes minors to commit theft, fraud, snatch, extortion or any other activity in violation of the public security administration shall be sentenced to fixed-term imprisonment not more than three years or criminal detention, and be fined; or if the circumstances are serious, shall be sentenced to fixed-term imprisonment not less than three years but not more than seven years, and be fined.

Chapter V The Crime of Encroaching on Property

Article 263. Those robbing public or private property using force, coercion, or other methods are to be sentenced to three to 10 years in prison in addition to fine. Those falling in one or more of the following cases are to be sentenced to 10 years or more in prison, given life sentences, or sentenced to death, in addition to fines or confiscation of property:

- (1) those intruding into others' houses to rob;
- (2) those committing robbery on public transportation vehicles;
- (3) those robbing banks or other financial institutions;
- (4) those committing several robberies or robbing large amounts of money or other properties;
- (5) those causing serious injuries to or death while robbing;
- (6) those committing robbery posing as servicemen or policemen;
- (7) those committing robbery using guns;
- (8) those robbing materials for military use, or materials for fighting disasters or relieving disaster victims.

Article 264. Whoever steals a relatively large amount of public or private property, commits thefts many times, commits a burglary or carries a lethal weapon to steal or pick pockets shall be sentenced to imprisonment of not more than 3 years, criminal detention or control and/or a fine; if the amount involved is huge or there is any other serious circumstance, shall be sentenced to imprisonment of not less than 3 years but not more than 10 years and a fine; or if the amount involved is especially huge or there is any other especially serious circumstance, shall be sentenced to imprisonment of not less than 10 years or life

imprisonment and a fine or forfeiture of property.

Article 265. Those stealing others' communication lines or reproducing others' telecommunication codes for the purpose of making profits, or those using telecommunication equipment or facilities knowing that they are stolen or reproduced are to be convicted and punished according to article 264 of this law.

Article 266. Those defrauding relatively large amounts of public or private money and property are to be sentenced to three years or fewer in prison or put under criminal detention or surveillance, in addition to fines; or are to be fined. Those defrauding large amounts of money and property or having involvement in other serious cases are to be sentenced to three to 10 years in prison, in addition to fines. Those defrauding extraordinarily large amounts of money and property or involving in especially serious cases are to be sentenced to 10 years or more in prison or given life sentences, in addition to fines or confiscation of property. If cases are governed by other stipulations of this law, those stipulations shall apply.

Article 267. Whoever seizes public or private property, or commits robbery for two times or more shall, if the amount involved is relatively large, be sentenced to imprisonment of not more than three years, criminal detention or surveillance in addition to a fine or be sentenced to a fine only; if the amount involved is huge or there is any other serious circumstance, shall be sentenced to imprisonment of not less than three years but not more than ten years in addition to a fine; or if the amount involved is especially huge or there is any other especially serious circumstance, shall be sentenced to imprisonment of not less than ten years or life imprisonment in addition to a fine or forfeiture of property.

Whoever commits the crime with a lethal weapon is to be convicted and punished according to the regulations in Article 263 of this law.

Article 268. In cases where a crowd is assembled to seize public or private property, and the amount involved is quite large and the other circumstances are serious, ringleaders and other active participants are to be sentenced to not more than three years of fixed-term imprisonment, criminal detention or control, in addition to a fine; and the sentence is to be not less than three years and not more than 10 years, in addition to a fine, when the amount involved is huge and the other circumstances are particularly serious.

Article 269. Whoever commits the crimes of theft, fraud, or forcible seizure, and uses violence, or threats to use violence, at the scene in order to conceal booty, resist arrest or destroy criminal evidence, is to be convicted and punished in accordance with Article 263 of this Law.

Article 270. Whoever illegally takes over another person's property in the latter's custody, and the amount involved is relatively large, and refuses to return it, is to be sentenced to not more than two years of fixed-term imprisonment, criminal detention, or a fine; when the amount involved is huge and the other circumstances are serious, the sentence is to be not less than two years but not more than five years of fixed-term imprisonment, in addition to a fine.

Whoever illegally takes over someone's property which the latter forgets to pick up, or the

property someone had buried, and the amount involved is relatively large, and refuses to return it, is to be punished according to the preceding paragraph.

The crimes in this article will not be prosecuted unless a complaint is filed.

Article 271. In cases where a person of a company, enterprise, or any unit, takes over the unit's property by taking advantage of his office, and the amount involved is quite large, he is to be sentenced to not more than five years of fixed-term imprisonment, or criminal detention; when the amount involved is huge, the sentence is to be not less than five years, and may be in addition to confiscation of property.

When personnel engage in public service in state-owned corporations, enterprises, or other state-owned units; or when personnel of these corporations, enterprises and units assigned to engage in public service in nonstate-owned corporations, enterprises, or other units themselves as stated in the preceding paragraph, they are to be convicted and punished according to regulations in Articles 382 and 383 of this law.

Article 272. When personnel of companies, enterprises, and other units, who take advantage of their offices to misappropriate their units' funds for their own use or for lending to others, and the amounts involved are relatively large and have not been returned for a period of over three months; or, when the period is shorter than three months but the amounts involved are quite large and the money is used for unlawful profit-making activities, they are to be sentenced to not more than three years of fixed-term imprisonment or criminal detention; those who misappropriate huge amounts of their units' funds, or those whose misappropriations are large and who refuse to return them are to be sentenced to not less than three years but not more than 10 years of fixed-term imprisonment.

Personnel engaged in public service in state-owned corporations, enterprises and other state-owned units, and personnel state-owned corporations, enterprises and other state-owned units assigned to engage in public service at non state-owned corporations, enterprises and other units as stated in the preceding paragraph are to be convicted and punished according to the regulations in Article 384 of this Law.

Article 273. Those directly responsible for misappropriating state funds and materials allocated for disaster relief, emergencies, flood control, allowances for disabled servicemen and the families of revolutionary martyrs and servicemen, aid-the-poor programs, resettlement, and social relief, when the circumstances are serious and have caused major damage to the interests of the state and the people, are to be sentenced to not more than three years of fixed-termed imprisonment or criminal detention; when the circumstances are particularly serious, the sentence is to be not less than three years but not more than seven years of fixed-term imprisonment.

Article 274. Whoever extorts a relatively large amount of public or private property or extorts public or private property many times shall be sentenced to imprisonment of not more than 3 years, criminal detention or control and/or a fine; if the amount involved is huge or there is any other serious circumstance, shall be sentenced to imprisonment of not less than 3 years but not more than 10 year and a fine; or if the amount involved is especially huge or there is

any other especially serious circumstance, shall be sentenced to imprisonment of not less than 10 years and a fine.

Article 275. Whoever intentionally destroys public or private property and the amount involved is quite large and the other circumstances are serious is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, or a sentence of a fine; when the amount involved is huge and the other circumstances are particularly serious, the sentence is to be not less than three years but not more than seven years of fixed-term imprisonment.

Article 276. Whoever destroys machinery or equipment, cruelly injures or slaughters draft animals, or uses other means to sabotage production or operation, with the purpose of giving vent to spite, seeking revenge, or for other personal motives, is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, or control; when the circumstance is serious, the sentence is to be not less than three years but not more than seven years of fixed-term imprisonment.

Article 276(l): Whoever evades payment of a relatively large amount of labor remunerations by transferring property or escaping and hiding or refuses to pay a relatively large amount of labor remunerations though capable, and still refuses to pay even after being ordered by the relevant government department to pay, shall be sentenced to imprisonment of not more than 3 years or criminal detention and/or a fine; and if there are serious consequences, shall be sentenced to imprisonment of not less than 3 years but not more than 7 years and a fine. Where an entity commits the crime as provided for in the preceding paragraph, a fine shall be imposed on it, and its directly responsible person and other directly liable persons shall be punished according to the provision of the preceding paragraph.

Whoever commits an act as mentioned in the preceding two paragraphs without serious consequences but pays labor remunerations before a public prosecution is instituted and assumes the corresponding compensatory liability according to law may be given a mitigated penalty or exempted from penalty.

Chapter VI Crimes of Disrupting the Order of Social Administration

Section 1. Crimes of Disrupting Public Order

Article 277. Whoever uses violence or threat to obstruct state personnel from discharging their duties is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, or control; or a sentence of a fine.

Whoever uses violence or threats to obstruct National People's Congress deputies, or local people's congress deputies, from discharging their lawful deputy duties is to be punished according to the preceding paragraph.

Whoever, in the event of a natural disaster or an emergency, uses violence or threats to obstruct Red Cross personnel from discharging their lawful responsibilities is to be punished according to the first paragraph.

Whoever intentionally obstructs the state's security or public security organs from carrying out their security assignments, and has caused serious consequences even though no

violence or threat is used is to be punished according to the first paragraph.

Whoever attacks by violence any policeman who is performing his or her functions in accordance with the law shall be given a heavier penalty in accordance with the provisions of paragraph 1.

Article 278. Whoever instigates the masses to use violence to resist the enforcement of state laws and administrative regulations is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, control, or deprivation of political rights; when serious consequences have been caused, the sentence is to be not less than three years but not more than seven years of fixed-term imprisonment.

Article 279. Whoever poses as state organ personnel to cheat and bluff is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, control, or deprivation of political rights; when the circumstances are serious, the sentence is to be not less than three years but not more than 10 years of fixed-term imprisonment.

Whoever poses as a people's police to cheat and bluff is to be heavily punished in accordance with the preceding paragraph.

Article 280. Whoever forges, alters, trades in, steals, forcibly seizes or destroys any official document, certificate or seal of a state authority shall be sentenced to imprisonment of not more than three years, criminal detention, surveillance or deprivation of political rights in addition to a fine; or if the circumstances are serious, be sentenced to imprisonment of not less than three years but not more than ten years in addition to a fine.

Whoever forges a seal of any company, enterprise, public institution or people's organization shall be sentenced to imprisonment of not more than three years, criminal detention, surveillance or deprivation of political rights in addition to a fine.

Whoever forges, alters or trades in any citizen's identification card, passport, social security card, driver's license or any other certificate that may be used to prove identity in accordance with the law shall be sentenced to imprisonment of not more than three years, criminal detention, surveillance or deprivation of political rights in addition to a fine; or if the circumstances are serious, be sentenced to imprisonment of not less than three years but not more than seven years in addition to a fine.

Article 280(l): Whoever uses any forged, altered or uses without authority any other person's identification card, passport, social security card, driver's license or any other certificate that may be used to prove identity in the activities that require the provision of identity certificate according to the provisions of the state shall, if the circumstances are serious, be sentenced to criminal detention or surveillance in addition to a fine or be sentenced to a fine only.

Whoever commits any other crime while committing a crime as mentioned in the preceding paragraph shall be convicted and punished according to the provisions on the crime with the heavier penalty.

Article 281. Whoever illegally produces, purchases or sells standard police uniforms, license plates of motor vehicles, or other special signs, police tools, and the consequences are serious, is to be sentenced to not more than three years of fixed-term imprisonment, criminal

detention, or control; and may also be sentenced to a fine, additionally or exclusively.

When a unit commits the crimes stated in the preceding paragraph, the unit is to be fined, and its persons in charge and other who are directly responsible are to be punished according to the regulations in the preceding paragraph.

Article 282. Whoever illegally acquires state secrets by stealing, secretly gathering, and purchasing is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, control, or deprivation of political rights; when the circumstances are serious, the sentence is to be not less than three years but not more than seven years of fixed-term imprisonment.

Whoever possesses documents, information, or other articles which are top secret or classified information of the state, and refuses to state their origins or use, is to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, or control.

Article 283. Whoever illegally produces or sells special espionage devices or eavesdropping or secret photographing devices shall be sentenced to imprisonment of not more than three years, criminal detention or surveillance in addition to a fine or be sentenced to a fine only; or be sentenced to imprisonment of not less than three years but not more than seven years in addition to a fine if the circumstances are serious.

Where an entity commits the crime as provided for in the preceding paragraph, a fine shall be imposed on it, and its directly responsible person in charge and other directly liable persons shall be punished in accordance with the provisions of the preceding paragraph.

Article 284. Whoever illegally uses special monitoring or photographing equipment and causes grave consequences is to be sentenced to not more than two years of fixed-term imprisonment, criminal detention, or control.

Article 284(1): Whoever organizes cheating in a national examination prescribed by law shall be sentenced to imprisonment of not more than three years or criminal detention in addition to a fine or be sentenced to a fine only; or if the circumstances are serious, be sentenced to imprisonment of not less than three years but not more than seven years in addition to a fine.

Whoever provides any cheating device or any other assistance for anyone else to commit the crime as mentioned in the preceding paragraph shall be punished in accordance with the provisions of the preceding paragraph.

Whoever illegally sells or provides test questions or answers as prescribed in paragraph 1 for the purpose of cheating in the test shall be punished in accordance with the provisions of paragraph 1.

Whoever takes on behalf of anyone else or enables anyone else to take on behalf of him- or herself an examination prescribed in paragraph 1 shall be sentenced to criminal detention or surveillance in addition to a fine or be sentenced to a fine only.

Article 285. Whoever violates state regulations and intrudes into computer systems with information concerning state affairs, construction of defense facilities, and sophisticated science and technology is to be sentenced to not more than three years of fixed-term

imprisonment or criminal detention.

Whoever, in violation of the state provisions, intrudes into a computer information system other than that prescribed in the preceding paragraph or uses other technical means to obtain the data stored, processed or transmitted in the said computer information system or exercise illegal control over the said computer information system shall, if the circumstances are serious, be sentenced to fixed-term imprisonment not more than three years or criminal detention, and/or be fined; or if the circumstances are extremely serious, shall be sentenced to fixed-term imprisonment not less than three years but not more than seven years, and be fined.

Whoever provides special programs or tools specially used for intruding into or illegally controlling computer information systems, or whoever knows that any other person is committing the criminal act of intruding into or illegally controlling a computer information system and still provides programs or tools for such a person shall, if the circumstances are serious, be punished under the preceding paragraph.

Where an entity commits any crime as provided for in the preceding three paragraphs, the entity shall be sentenced to a fine, and its directly responsible person in charge and other directly liable persons shall be punished according to the provisions of the applicable paragraph.

Article 286. Whoever violates states regulations and deletes, alters, adds, and interferes in computer information systems, causing abnormal operations of the systems and grave consequences, is to be sentenced to not more than five years of fixed-term imprisonment or criminal detention; when the consequences are particularly serious, the sentence is to be not less than five years of fixed-term imprisonment.

Whoever violates state regulations and deletes, alters, or adds the data or application programs installed in or processed and transmitted by the computer systems, and causes grave consequences, is to be punished according to the preceding paragraph.

Whoever deliberately creates and propagates computer virus and other programs which sabotage the normal operation of the computer system and cause grave consequences is to be punished according to the first paragraph.

Where an entity commits any crime as provided for in the preceding three paragraphs, the entity shall be sentenced to a fine, and its directly responsible person in charge and other directly liable persons shall be punished according to the provisions of paragraph 1.

Article 286(l): Any network service provider that fails to perform the information network security management obligation as prescribed in any law or administrative regulation and refuses to make corrections after being ordered by the regulatory authority to take correction measures shall be sentenced to imprisonment of not more than three years, criminal detention or surveillance in addition to a fine or be sentenced to a fine only under any of the following circumstances.

- (1) Causing the spread of a large amount of illegal information.
- (2) Causing the leakage of users' information, with serious consequences.

(3) Causing the loss of criminal case evidence, with serious circumstances.

(4) Any other serious circumstance.

Where an entity commits the crime as provided for in the preceding paragraph, a fine shall be imposed on it, and its directly responsible person in charge and other directly liable persons shall be punished in accordance with the provisions of the preceding paragraph.

Whoever commits any other crime while committing a crime as mentioned in the preceding two paragraphs shall be convicted and punished according to the provisions on the crime with the heavier penalty.

Article 287. Whoever uses a computer for financial fraud, theft, corruption, misappropriation of public funds, stealing state secrets, or other crimes is to be convicted and punished according to relevant regulations of this law.

Article 287(I): Whoever commits any of the following conducts by using the information network shall, if the circumstances are serious, be sentenced to imprisonment of not more than three years or criminal detention in addition to a fine or be sentenced to a fine only.

(1) Establishing a website or a communication group mainly for committing fraud, teaching on how to commit a crime, producing or selling any prohibited or controlled article, or committing any other illegal or criminal activity.

(2) Issuing any information on the production or sale of drugs, guns, obscene articles, or any other prohibited or controlled article or any other illegal or criminal conduct.

(3) Issuing any information for committing fraud or any other illegal or criminal activity.

Where an entity commits any crime as provided for in the preceding paragraph, the entity shall be sentenced to a fine, and its directly responsible person in charge and other directly liable persons shall be punished in accordance with the provisions of paragraph 1.

Whoever commits any other crime while committing a crime as mentioned in the preceding two paragraphs shall be convicted and punished according to the provisions on the crime with the heavier penalty.

Article 287(II): Whoever, while obviously aware that any other person is committing a crime by using an information network, provides Internet access, server custody, network storage, communication transmission or any other technical support, or provides advertising, payment settlement or any other assistance for the crime shall, if the circumstances are serious, be sentenced to imprisonment of not more than three years or criminal detention in addition to a fine or be sentenced to a fine only.

Where an entity commits any crime as provided for in the preceding paragraph, the entity shall be sentenced to a fine, and its directly responsible person in charge and other directly liable persons shall be punished in accordance with the provisions of paragraph 1.

Whoever commits any other crime while committing a crime as mentioned in the preceding two paragraphs shall be convicted and punished according to the provisions on the crime with the heavier penalty.

Article 288. Whoever, in violation of the provisions of the state, installs or uses any radio station (transmitter) without approval, or occupies frequencies without approval to disrupt

the radio communication order shall, if the circumstances are serious, be sentenced to imprisonment of not more than three years, criminal detention or surveillance in addition to a fine or be sentenced to a fine only; or be sentenced to imprisonment of not less than three years but not more than seven years in addition to a fine if the circumstances are especially serious.

When a unit commits the crimes stated in the preceding paragraph, the unit is to be fined, and its persons in charge and others who are directly responsible are to be punished according to the preceding paragraph.

Article 289. Whoever causes a person's injury, disability or death as result of assembling a crowd for "beating, smashing and looting" is to be convicted and punished according to regulations in Articles 234 and 232 of this law. In cases where public or private property is destroyed or forcibly taken and carried away, ringleaders, in addition to the ordering of restitution of compensation, are to be convicted and punished according to Article 263 of this law.

Article 290. Where a crowd is assembled to disrupt the public order and serious circumstances are caused so that the process of work, production, business, teaching, scientific research or medical services is disrupted, and if any serious loss is caused, the ringleaders shall be sentenced to imprisonment of not less than three years but not more than seven years; and other active participants shall be sentenced to imprisonment of not more than three years, criminal detention, surveillance or deprivation of political rights.

Assembling crowds to attack state organs, thus disrupting their operations and causing serious losses, the ringleaders are to be sentenced to not less than five years but not more than 10 years of fixed-term imprisonment; and other active participants are to be sentenced to not less than five year of fixed-term imprisonment, criminal detention, control, or deprivation of political rights.

Two paragraphs are added as paragraphs 3 and 4: "Whoever disrupts the work order of any state authority for two times or more and refuses to make corrections after being given an administrative penalty shall be sentenced to imprisonment of not more than three years, criminal detention or surveillance if there are serious consequences.

Whoever organizes or provides financial support to any other person to illegally assemble for two times or more to disrupt the public order and serious circumstances are caused shall be punished in accordance with the provisions of the preceding paragraph.

Article 291. In cases where a crowd is assembled to disturb order at stations, wharves, civil aviation stations, market places, public parks, theaters, exhibitions, sports grounds or other public places, or a crowd is assembled to block traffic or undermine traffic order, or resist or obstruct state security administration personnel who are carrying out their functions according to law, when the circumstances are serious, ringleaders are to be sentenced to not more than five years of fixed-term imprisonment, criminal detention, or control.

Article 291(I): Whoever spreads mendacious pathogens of infectious diseases, explosives, poisonous or radioactive substances or other substances, or fabricates terrorist information

on threats of explosion, biochemical threats or radioactive threats, or, while clearly knowing that the terrorist information is fabricated, intentionally disseminate such information, thus seriously disrupting public order, shall be sentenced to fixed-term imprisonment of no more than five years, criminal detention or public surveillance; if he causes serious consequences, he shall be sentenced to fixed-term imprisonment of no less than five years.

Whoever makes up any false information on the situation of any risk, epidemic disease, disaster or emergency and spreads such information on the information network or any other media, or knowingly spreads the aforesaid false information on the information network or any other media, which seriously disrupts the public order, shall be sentenced to imprisonment of not more than three years, criminal detention or surveillance; and if serious consequences have resulted, shall be sentenced to imprisonment of not less than three years but not more than seven years.

Article 292. In cases where a crowd is assembled to have brawls, ringleaders and other active participants are to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, or control. In especially serious cases, those law offenders are to be sentenced to more than 10 years of fixed-term imprisonment, and in addition be sentenced to a fine and confiscation of their properties.

Those who violate hunting law and regulations and use tools and methods which are forbidden to be used in no- hunting zones or periods and thus damage the source of wild animals and if the situation is serious are to be sentenced to not more than five years of fixed-term imprisonment or criminal detention or control, and in addition be sentenced to a fine.

Article 342. Whoever, in violation of the regulations on land administration, unlawfully occupies cultivated land, forestland or other land used for agriculture, and change the use of the occupied land, if the area involved is relatively large and a large area of such land is damaged, shall be sentenced to fixed-term imprisonment of not more than five years or criminal detention and shall also, or shall only be fined.

Article 343. Whoever, in violation of the Mineral Resources Law, engages in mining without a mining permit, enters a mining area under state planning, a mining area of great value to the national economy or a mining area of any other person to engage in mining without approval, or engages in mining of a special mineral which is subject to protective excavation according to the state provisions without approval shall be sentenced to imprisonment of not more than 3 years, criminal detention or control and/or a fine if the circumstances are serious; or if the circumstances are especially serious, be sentenced to imprisonment of not less than 3 years but not more than 7 years and a fine.

Those who violate the stipulations of Mineral Resources Law and use destructive mining methods to tap mineral resources and have caused serious damages to mineral resources are to be sentenced to not more than five years of fixed-term imprisonment or criminal detention, and in addition be sentenced to a fine.

Article 344. Whoever, in violation of the provisions of the state, illegally fells or destroys precious trees or other plants subject to key protection of the state, or illegally purchases, transports, processes or sells precious trees or other plants subject to key protection of the state or the products processed therefrom, shall be sentenced to fixed-term imprisonment of not more than three years, criminal detention or public surveillance, and shall also be fined; if the circumstance is serious, he shall be sentenced to fixed-term imprisonment of not less than three years but not more than seven years and shall also be fined.

Article 345. Whoever stealthily fells trees or other woods, if the amount involved is relatively large, shall be sentenced to fixed-term imprisonment of not more than three years, criminal detention or public surveillance and shall also, or shall only, be fined; if the amount involved is huge, he shall be sentenced to fixed-term imprisonment of not less than three years but not more than seven years and shall also be fined; if the amount involved is especially huge, he shall be sentenced to fixed-term imprisonment of not less than seven years and shall also be fined.

Whoever, in violation of the provisions of the Forestry Law, arbitrarily fells trees or other woods, if the amount involved is relatively large, shall be sentenced to fixed-term imprisonment of not more than three years, criminal detention or public surveillance and shall also, or shall only, be fined; if the amount involved is huge, he shall be sentenced to fixed-term imprisonment of not less than three years but not more than seven years and shall also be fined.

Whoever illegally purchases or transports trees or woods, which he knows are felled stealthily or arbitrarily, if the circumstance is serious, shall be sentenced to fixed-term imprisonment of not more than three years, criminal detention or public surveillance and shall also, or shall only, be fined; if the circumstance is especially serious, he shall be sentenced to fixed-term imprisonment of not less than three years but not more than seven years and shall also be fined.

Whoever stealthily or arbitrarily fells trees or woods in any nature reserve at the national level shall be given a heavier punishment.

Article 346. If a unit commits the crimes stipulated in Article 338 to 345, the unit will be sentenced to a fine, while the leading person with direct responsibility and other personnel directly responsible for such violations are to be punished in accordance with the stipulations of related articles.

Section 7. Crimes of Smuggling, Trafficking, Transporting and Manufacturing Drugs

Article 347. Those who commit the crimes of smuggling, trafficking, transporting and manufacturing drugs, regardless of the quantity of drugs, shall be investigated for their criminal responsibility and punished according to the Criminal Law.

Those who smuggle, traffic, transport or manufacture drugs with one of the following conditions are to be punished by 15 years of fixed-term imprisonment, life imprisonment or death sentence, and, in addition, confiscation of their properties:

- (1) Smuggling, trafficking, transporting or manufacturing opium with a quantity of more than 1,000 grams [ke 0344], heroin or methylaniline [jia ji ben bing an 3946 1015 0058 0014 5143] with a quantity of more than 50 grams or other narcotics with a large quantity;
- (2) The principal leaders of criminal groups engaged in smuggling, trafficking, transporting and manufacturing drugs;
- (3) Those who use arms to cover up smuggling, trafficking, transporting and manufacturing drugs;
- (4) Those who use violence to resist inspection, detention or arrest in serious situation; and
- (5) Those who take part in organized international drug trafficking activities.

Those who smuggle, traffic, transport or manufacture opium with a quantity less than 1,000 grams but more than 200 grams, those who smuggle, traffic, transport or manufacture heroin or methylaniline with a quantity less than 50 grams but more than 10 grams, and those who deal with other drugs in large quantity are to be sentenced to more than seven years of fixed-term imprisonment and, in addition, be sentenced to a fine.

Those who smuggle, traffic, transport or manufacture opium with a quantity less than 200 grams, those who smuggle, traffic, transport or manufacture heroin or methylaniline with a quantity less than 10 grams, or those who deal with a small quantity of other drugs are to be sentenced to less than three years of fixed-term imprisonment, detention or control, and, in addition, be sentenced to a fine. In more serious cases, those law offenders are to be sentenced to more than three years but less than seven years of fixed-term imprisonment and, in addition, be sentenced to a fine.

Units which commit the crimes as stated in (2), (3) and (4) above are to be penalized with a fine. Their leading personnel directly responsible for those acts and other directly responsible personnel are to be punished in accordance with the above sections of this article.

Those who utilize or urge youngsters to engage in smuggling, trafficking, transporting or manufacturing drugs or selling drugs to youngsters are to be punished in a heavier manner. As to those who commit crimes repeatedly, the quantities of drugs involved in smuggling, trafficking, transporting and manufacturing will be combined in the judgment for sentencing.

Article 348. Those who illegally hold more than 1,000 grams of opium or more than 50 grams of heroin or methylaniline or large quantities of other drugs are to be sentenced to more than seven years of fixed-term imprisonment or life imprisonment and, in addition, be sentenced to a fine. Those who illegally hold more than 200 grams but less than 1,000 grams of opium or hold more than 10 grams of heroin but less than 50 grams of methylaniline or hold a large quantity of other drugs are to be sentenced to less than three years of fixed-term imprisonment or detention or control and, in addition, be sentenced to paying a fine. In serious cases, the law offenders are to be sentenced to more than three years but less than

seven years of fixed-term imprisonment and, in addition, be sentenced to paying a fine.

Article 349. Those who provide cover for criminals who have engaged in smuggling, trafficking, transporting and manufacturing drugs and those who hide, move or conceal drugs and properties of criminals are to be sentenced to less than three years of fixed-term imprisonment, detaining or control. In serious cases, they are to be sentenced to more than three years but less than 10 years of fixed-term imprisonment.

Anti-drug smuggling personnel or other workers of state organs who shield or harbor criminal elements who smuggle, sell, transport, or make drugs, are to be severely punished according to stipulations of the above paragraph.

Those who conspire with others in advance to commit crimes stipulated in the above two paragraphs of this article are to be handled as accomplices of smuggling, trafficking, transporting, or making drugs.

Article 350. Whoever, in violation of the provisions of the state, illegally produces, trades in, transports or carries into or out of China acetic anhydride, ethyl ether, chloroform, or other raw materials or auxiliary materials for manufacturing drugs shall be sentenced to imprisonment of not more than three years, criminal detention or surveillance in addition to a fine if the circumstances are relatively serious; if the circumstances are serious, be sentenced to imprisonment of not less than three years but not more than seven years in addition to a fine; or if the circumstances are especially serious, be sentenced to imprisonment of not less than seven years in addition to a fine or forfeiture of property.

Whoever, being obviously aware that someone else is manufacturing drugs, produces, trades in or transports the articles as provided for in the preceding paragraph for the said person shall be punished as an accomplice to the crime of drug manufacturing.

Units committing crimes stipulated in the above two paragraphs are to be fined, and their persons directly in charge and other personnel directly responsible for the case are to be punished according to stipulations of the above two paragraphs.

Article 351. Illegal growing of opium poppy, marijuana, or other kinds of plants from which drugs are extracted is to be forcibly eliminated. Those falling in one or more of the following cases are to be sentenced to five years or fewer in prison or put under criminal detention or surveillance, in addition to fine:

- (1) Those growing more than 500 but fewer than 3,000 opium poppy plants, or those growing relatively large numbers of other kinds of plants from which drugs are extracted;
- (2) those who grow again after their cases have been settled by a public security organ;
- (3) those refusing and resisting elimination of their crops.

Those illegally growing more than 3,000 opium poppy plants or large numbers of other kinds of plants from which drugs are extracted are to be sentenced to five years or more in prison, in addition to paying a fine or having their property confiscated.

Those illegally growing opium poppy plants or other kinds of plants from which drugs are extracted but voluntarily wiping them out before reaping them may be exempted from punishment.

Article 352. Those illegally selling, buying, transporting, hand carrying, or those who are illegally in possession of non-sterilized seeds or saplings of opium poppy or other kinds of plants from which drugs are extracted, if the amounts are relatively large, are to be sentenced to three years or fewer in prison or put under criminal detention or surveillance, in addition to paying a fine; or are to be fined.

Article 353. Those who lure, instigate, or trick others into taking or injecting drugs are to be sentenced to three years or fewer in prison or put under criminal detention or surveillance, in addition to fine. If the case is serious, they are to be sentenced to three to seven years in prison in addition to paying a fine.

Those forcing others to take or inject drugs are to be sentenced to three to 10 years in prison in addition to paying a fine.

Those luring, instigating, tricking, or forcing minors into taking or injecting drugs are to be severely punished.

Article 354. Those harboring others who take or inject drugs are to be sentenced to three years or fewer in prison or put under criminal detention or surveillance, in addition to paying a fine.

Article 355. Personnel who produce, transport, manage, or use according to law narcotics or drugs for mental sickness under the state's control and who, in violation to the state's regulations, provide those who take or inject drugs with addictive narcotics or drugs for mental sickness that are under the state's control are to be sentenced to three years or fewer in prison or put under criminal detention, in addition to fine. If the case is serious, they are to be sentenced to three to seven years in prison in addition to paying a fine. Those providing addictive narcotics or drugs for mental sickness that are under the state's control to criminal elements engaging in smuggling or trafficking drugs or, with the purpose of making profits, to those taking or injecting drugs, are to be convicted and punished according to article 347 of this law.

Units committing crime stipulated in the above paragraph are to be fined, and their persons directly in charge and other personnel directly responsible for the case are to be punished according to stipulations of the above paragraph.

Article 356. Those who have been convicted of smuggling, trafficking, transporting, or making drugs, or who are illegally in possession of drugs, and who again commit the crime stipulated in this section, are to be severely punished.

Article 357. Drugs as mentioned in this law refer to opium, heroin, ice, morphine, marijuana, cocaine, and other addictive narcotics and drugs for mental sickness that are under the state's control.

The amounts of drugs are to be calculated according to the verified amounts of drugs smuggled, sold, transported, or made, or the amounts illegally in possession, and are not to be calculated in terms of the pureness of the drugs.

Section 8. The Crime of Organizing, Forcing, Seducing, Harboring, or Introducing Prostitution

Article 358. Whoever organizes or forces anyone else into prostitution shall be sentenced to imprisonment of not less than five years but not more than ten years in addition to a fine; or be sentenced to imprisonment of not less than ten years or life imprisonment in addition to a fine or forfeiture of property if the circumstances are serious.

Whoever organizes or forces any juvenile into prostitution shall be given a heavier penalty in accordance with the provisions of the preceding paragraph.

Whoever commits the crime in the preceding two paragraphs and also commits murder, injuring, rape, kidnapping or any other crime shall be punished according to the provisions on the joinder of penalties for plural crimes.

Whoever recruits or transports persons for an organizer of prostitution or otherwise assists in organizing prostitution shall be sentenced to imprisonment of not more than five years in addition to a fine; or if the circumstances are serious, be sentenced to imprisonment of not less than five years but not more than ten years in addition to a fine.

Article 359. Those harboring prostitution or seducing or introducing others into prostitution are to be sentenced to five years or fewer in prison or put under criminal detention or surveillance, in addition to paying a fine. If the case is serious, they are to be sentenced to five years or more in prison in addition to a fine.

Those seducing young girls under 14 years of age into prostitution are to be sentenced to five years or more in prison in addition to a fine.

Article 360. Those engaging in prostitution or visiting a whorehouse knowing that they are suffering from syphilis, clap, or other serious venereal diseases are to be sentenced to five years or fewer in prison or put under criminal detention or surveillance, in addition to having to pay a fine.

Article 361. Personnel of hotels, restaurants, entertainment industry, taxi companies, and other units who take advantage of their units' position to organize, force, seduce, harbor, or introduce others to prostitution are to be convicted and punished according to articles 358 and 359 of this law.

Main persons in charge of the aforementioned units who commit crimes stipulated in the above paragraph are to be severely punished.

Article 362. Personnel of hotels, restaurants, entertainment industry, taxi companies, or other units who inform law offenders and criminals while public security personnel are checking prostitution and whorehouse visiting activities, if the case is serious, are to be convicted and punished according to article 310 of this law.

Section 9. The Crime of Producing, Selling, or Disseminating Obscene Materials

Article 363. Those producing, reproducing, publishing, selling, or disseminating obscene materials with the purpose of making profits are to be sentenced to three years or fewer in prison or put under criminal detention or surveillance, in addition to paying a fine. If the case is serious, they are to be sentenced to three to 10 years in prison in addition to having to pay a fine. If the case is especially serious, they are to be sentenced to 10 years or more in prison or given life sentence, in addition to a fine or confiscation of property.

Those providing others with international standard book numbers [ISBN] for publishing obscene books or magazines are to be sentenced to three years or fewer in prison or put under criminal detention or surveillance, in addition to having to pay a fine; or are to be fined. Those providing others with ISBNs knowing that they are going to use them for publishing obscene books or magazines are to be punished according to the above stipulations.

Article 364. Those disseminating obscene books, magazines, films, audio or video products, pictures, or other kinds of obscene materials, if the case is serious, are to be sentenced to two years or fewer in prison or put under criminal detention or surveillance.

Those organizing the broadcasting or showing of obscene motion pictures, video films, or other kinds of audio or video products are to be sentenced to three years or fewer in prison or put under criminal detention or surveillance, in addition to having to pay a fine. If the case is serious, they are to be sentenced to three to 10 years in prison in addition to paying a fine.

Those producing or reproducing and organizing the broadcasting or showing of obscene motion pictures, video tapes, or other kinds of audio or video products are to be severely punished according to stipulations in paragraph two of this article.

Those broadcasting or showing obscene materials to minors under 18 years of age are to be severely punished.

Article 365. Those organizing an obscene performance are to be sentenced to three years or fewer in prison or put under criminal detention or surveillance, in addition to paying a fine. If the case is serious, they are to be sentenced to three to 10 years in prison in addition to having to pay a fine.

Article 366. Units committing crimes stipulated in articles 363, 354, or 365 of this section are to be fined, and their main persons directly in charge and other personnel directly responsible for the case are to be punished according to stipulations of respective articles.

Article 367. Obscene materials mentioned in this law refer to erotic books, magazines, motion pictures, video tapes, audio tapes, pictures, and other obscene materials that graphically describe sexual intercourse or explicitly publicize pornography.

Scientific products about physiological or medical knowledge are not obscene materials.

Literary and artistic works of artistic value that contain erotic contents are not regarded as obscene materials.

Chapter VII Crimes of Endangering the Interests of National Defense

Article 368. Those who use methods of violence or threat to obstruct military personnel from carrying out their duties in accordance with the law are to be sentenced to not more than three years of fixed-term imprisonment, or criminal detention or control and may, in addition, be sentenced to a fine.

Those who intentionally obstruct military actions of the armed forces and cause serious consequences are to be sentenced to not more than five years of fixed-term imprisonment or criminal detention.

Article 369. Whoever sabotages weapons or equipment, military installations or military telecommunications shall be sentenced to fixed-term imprisonment of not more than three

years or criminal detention or public surveillance; whoever sabotages major weapons or equipment, military installations or military telecommunications shall be sentenced to fixed-term imprisonment of 3 up to 10 years; if the circumstances are especially serious, he shall be sentenced to fixed-term imprisonment of not less than 10 years, life imprisonment or death penalty.

Any one who commits a crime as described in the preceding two paragraphs and causes serious consequences due to negligence shall be sentenced to fixed-term imprisonment of not more than three years or criminal detention; if the consequences are extremely serious, he shall be sentenced to fixed-term imprisonment of 3 up to 7 years.

He who commits a crime as mentioned in the preceding two paragraphs during wartime shall be given a heavier punishment.

Article 370. Those who knowingly supply unqualified weapons and equipment and other military facilities to armed units are to be sentenced to not more than five years fixed-term imprisonment or criminal detention. In serious cases, those law offenders are to be sentenced to more than five years but less than 10 years of fixed-term imprisonment. In especially serious cases, those law offenders are to be sentenced to more than 10 years of fixed-term imprisonment, life imprisonment or death.

Those who commit the above-mentioned crimes and cause serious consequences due to negligence are to be sentenced to not more than three years of fixed-term imprisonment or criminal detention. Those who commit above-mentioned crimes and cause especially serious consequences due to negligence are to be sentenced to more than three years but less than seven years of fixed-term imprisonment.

If a unit commits crimes noted in section one of this article, the unit will be sentenced to a fine. Leading personnel of the unit having direct responsibility and other personnel directly responsible for the crimes are to be punished in accordance with section one of this article.

Article 371. The principal leaders of those who assemble a crowd to charge military forbidden zones and seriously disrupt order in military forbidden zones are to be sentenced to more than five years but less than 10 years of fixed-term imprisonment. Other active participants are to be sentenced to not more than five years of fixed-term imprisonment, criminal detention or control or deprivation of political rights.

The principal leaders of those who assemble a crowd to seriously disrupt order in military administrative zones, hamper operation in the military administrative zones and cause serious losses are to be sentenced to more than three years but less than seven years of fixed-term imprisonment. Other active participants are to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, control or deprivation of political rights.

Article 372. Those who pose as military personnel and engage in cheating and bluffing are to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, control or deprivation of political rights. In serious cases, those law offenders are to be sentenced to more than three years but less than 10 years of fixed-term imprisonment.

Article 373. Those who instigate military personnel to escape from the unit to which they

belong or knowingly employ those escaped military personnel are to be sentenced to not more than three years of fixed-term imprisonment, criminal detention or control if the situation is serious.

Article 374. Those who play favoritism and commit irregularities in conscription work or receive and deliver unqualified enlisted men are to be sentenced to not more than three years of fixed-term imprisonment or criminal detention if the situation is serious. Those law offenders are to be sentenced to more than three years but less than seven years fixed-term imprisonment if the consequences are especially serious.

Article 375. Those who forge, alter, buy or sell, steal or rob documents, certificates and seals of armed units are to be sentenced to not more than three years of fixed-term imprisonment, criminal detention, control or deprivation of political rights. If the situation is serious, those law offenders are to be sentenced to more than three years but less than 10 years of fixed-term imprisonment.

Whoever illegally produces, buys, or sells uniforms of the armed forces shall, if the circumstances are serious, be sentenced to fixed-term imprisonment not more than three years, criminal detention or public surveillance, and/or be fined.

Whoever forges, steals, buys, sells, or illegally provides or uses license plates of vehicles or other special signs of the armed forces shall, if the circumstances are serious, be sentenced to fixed-term imprisonment not more than three years, criminal detention or public surveillance, and/or be fined; or if the circumstances are extremely serious, shall be sentenced to fixed-term imprisonment not less than three years but not more than seven years, and be fined.

Where any entity commits the crime in paragraph 2 or 3, it shall be fined, and the direct liable person in charge and other directly liable persons shall be punished under the applicable paragraph.

Article 376. Reserve service personnel who refuse or evade conscription or military training in times of war are to be sentenced to not more than three years of fixed-term imprisonment or criminal detention if the situation is serious.

Citizens who refuse or evade conscription in times of war are to be sentenced to not more than two years of fixed-term imprisonment if the situation is serious.

Article 377. Those who intentionally provide false enemy information and thus cause serious consequences are to be sentenced to more than three years but less than 10 years of fixed-term imprisonment. Those whose acts cause especially serious consequences are to be sentenced to more than 10 years of fixed-term imprisonment or life imprisonment.

Article 378. Those who create rumors and undermine the morale of the armed forces are to be sentenced to not more than three years of fixed-term imprisonment, criminal detention or control. In serious cases, those law offenders are to be sentenced to more than three years but less than 10 years of fixed-term imprisonment.

Article 379. Those who knowingly provide shelter, properties and things for escaped military personnel in times of war are to be sentenced to not more than three years of fixed-term

imprisonment or criminal detention if the situation is serious.

Article 380. Units which refuse or intentionally delay military orders for supplies in times of war are to be sentenced to a fine. The principal leading responsible personnel and other persons directly responsible for the crimes are to be sentenced to not more than five years of fixed-term imprisonment or criminal detention. In serious cases, those law offenders are to be sentenced to more than five years of fixed-term imprisonment.

Article 381. Those who refuse military expropriation or requisition in times of war are to be sentenced to more than three years of fixed-term imprisonment or criminal detention if the situation is serious.

Chapter VIII Graft and Bribery

Article 382. State personnel who take advantage of their office to misappropriate, steal, swindle or use other illegal means to acquire state properties constitute the crime of graft.

Those who are entrusted by state organs, state companies, state enterprises, state undertakings and mass organizations to administer and operate state properties but take advantage of their office to misappropriate, steal, swindle or use other illegal means to acquire state properties also constitute the crime of graft.

Those who collaborate with those personnel as listed in the aforementioned two paragraphs and join the crime are considered as committing a joint crime.

Article 383. Whoever commits the crime of corruption shall be punished in light of the graveness of the crime according to the following provisions:

(1) If the amount involved in the corruption is relatively large or there is any other relatively serious circumstance, the convict shall be sentenced to imprisonment of not more than three years or criminal detention in addition to a fine.

(2) If the amount involved in the corruption is huge or there is any other serious circumstance, the convict shall be sentenced to imprisonment of not less than three years but not more than ten years in addition to a fine or forfeiture of property.

(3) If the amount involved in the corruption is especially huge or there is any other especially serious circumstance, the convict shall be sentenced to imprisonment of not less than ten years or life imprisonment in addition to a fine or forfeiture of property; or if the amount involved is especially huge and especially material losses have been caused to the interests of the state or the public, the convict shall be sentenced to life imprisonment or death penalty and a forfeiture of property.

Whoever has committed repeatedly crimes of corruption without being punished shall be punished based on the accumulative amount involved in the crimes of corruption.

Whoever commits a crime as mentioned in paragraph 1, and before a public prosecution is filed, truthfully confesses his or her crime, shows sincere repentance and actively returns the illegally obtained money to avoid or reduce the occurrence of losses, if there is any circumstance as set forth in item (1), may be given a lighter or mitigated penalty or be exempt from penalty; or if there is any circumstance as set forth in item (2) or (3), may be given a lighter penalty.

Where a convict who commits a crime as mentioned in paragraph 1 and falls under any circumstance as set forth in item (3) is sentenced to death with a reprieve, the people's court may, in light of the circumstances of the crime committed, decide to commute the sentence to life imprisonment upon expiration of the two-year period, sentence the convict to life imprisonment, and shall not offer commutation or parole.

Article 384. State personnel who take advantage of their office and misappropriate public funds for personal use or illegal activities or misappropriate large amounts of public funds without returning the money within three months are guilty of the crime of embezzlement and are to be sentenced to not more than five years of fixed-term imprisonment or criminal detention. In serious cases, those offenders are to be sentenced to more than five years of fixed-term imprisonment. Those who misappropriate a large amount of public funds without returning the money are to be sentenced to more than 10 years of fixed-term imprisonment or life imprisonment.

Those who misappropriate funds for relief of natural disasters, flood prevention, preferential treatment to military dependents, helping the poor and aid supplies for personal use are to be punished in a severe manner.

Article 385. State personnel who take advantage of their office to demand money and things from other people or if they illegally accept money and things from other people and give favors to the latter are guilty of the crime of bribery.

State personnel in their economic operation accept various kinds of kickback and handling fees for their personal use in violation of state provisions also guilty of the crime of bribery and are to be punished accordingly.

Article 386. Whoever commits the crime of accepting bribes is to be punished on the basis of Article 383 of this law according to the amount of bribes and the circumstances. A heavier punishment shall be given to whoever demands a bribe.

Article 387. State organs, state-owned companies, enterprises, institutions, and people's organizations which exact or illegally accept articles of property from other people and try to obtain gain for other people shall be sentenced to a fine if the circumstances are serious; moreover, their personnel who are directly in charge and other personnel who are directly held responsible for the crime are to be sentenced to not more than five years of fixed-term imprisonment or to criminal detention.

In economic activities, should the units listed in the preceding paragraph secretly accept, outside the account, kickback or service charges of various types, they are to be punished as having accepted a bribe on the basis of the provisions in the preceding paragraph.

Article 388. State functionaries who help trustors to seek illegitimate gain, exact or accept articles of property from trustors by taking advantage of the facilities created by their authority of office or position, or through the action related to the post of other state functionaries, shall be dealt with according to the crime of accepting bribes.

Article 388 (I):Where any close relative of a state functionary or any other person who has a close relationship with the said state functionary seeks any improper benefit for a requester

for such a benefit through the official act of the said state functionary or through the official act of any other state functionary by using the advantages generated from the authority or position of the said state functionary, and asks or accepts property from the requester for such a benefit, and the amount is relatively large or there is any other relatively serious circumstance, he shall be sentenced to fixed-term imprisonment not more than three years or criminal detention, and be fined; if the amount is huge or there is any other serious circumstance, shall be sentenced to fixed-term imprisonment not less than three years but not more than seven years, and be fined; or if the amount is extremely huge or there is any other extremely serious circumstance, shall be sentenced to fixed-term imprisonment not less than seven years, and be fined or be sentenced to confiscation of property.

Where any state functionary who has left his position, any close relative of him or any other person who has a close relationship with him commits the act as prescribed in the preceding paragraph by using the advantages generated from the former authority or position of the said state functionary, he shall be convicted and punished under the preceding paragraph.

Article 389. An act of giving state functionaries articles of property in order to seek illegitimate gain shall be considered a crime of offering bribes.

In economic activities, whoever gives articles of property to state functionaries in violation of state provisions, when the amount is fairly large, or gives a kickback or service charges of various types to state functionaries in violation of state provisions is to be dealt with as committing the crime of offering bribes.

Whoever gives articles of property to state functionaries due to extortion but receives no illegitimate gain shall not be considered as committing the crime of offering bribes.

Article 390. Whoever commits the crime of offering bribes shall be sentenced to imprisonment of not more than five years or criminal detention in addition to a fine; whoever seeks any illicit benefit by means of offering bribes and the circumstances are serious or causes any serious loss to the national interest shall be sentenced to imprisonment of not less than five years but not more than ten years in addition to a fine; or if the circumstances are especially serious, or any especially serious loss has been caused to the national interest, shall be sentenced to imprisonment of not less than ten years or life imprisonment in addition to a fine or forfeiture of property.

The briber who actively confesses to his or her crime before being prosecuted may be given a lighter or mitigated penalty. Whoever commits a relatively minor crime and plays a crucial role in resolving an important case or has any major meritorious performance may be given a lighter penalty or be exempt from penalty.

Article 390(1): Whoever, for the purpose of seeking illicit benefits, offers bribe to any close relative of an employee of a state functionary or any other person who has a close relationship with the said employee of the state authority, or any dismissed employee of a state authority or any of his or her close relatives or any other person who has a close relationship with the said employee shall be sentenced to imprisonment of not more than three years or criminal detention in addition to a fine; if there is any serious circumstance or

any serious loss has been caused to the national interest, shall be sentenced to imprisonment of not less than three years but not more than seven years in addition to a fine; or if there is any other especially serious circumstance or any especially serious loss has been caused to the national interest, shall be sentenced to imprisonment of not less than seven years but not more than ten years in addition to a fine.

Where an entity commits any crime as provided for in the preceding paragraph, the entity shall be sentenced to a fine, and its directly responsible person in charge and other directly liable persons shall be sentenced to imprisonment of not more than three years or criminal detention in addition to a fine.

Article 391. Whoever offers property to any state authority, state-owned company, enterprise, public institution or people's organization for the purpose of seeking illicit benefits or offers commission or handling charges in any name in violation of the provisions of the state in economic exchanges shall be sentenced to imprisonment of not more than three years or criminal detention in addition to a fine.

Whichever unit commits the crime mentioned in the preceding paragraph is to be sentenced to a fine, and the responsible persons who are directly in charge of the unit or other personnel who are held directly responsible for the crime shall be punished on the basis of the preceding paragraph.

Article 392. Whoever introduces bribery to any employee of a state authority shall be sentenced to imprisonment of not more than three years or criminal detention in addition to a fine if the circumstances are serious.

Before prosecution, if the person introducing bribery to state functionaries takes the initiative to admit his/her crime, he or she may receive a lighter punishment or be exempted from punishment.

Article 393. Where any entity offers bribes for the purpose of seeking illicit benefits or offers commission or handling charges to any employee of a state authority in violation of the provisions of the state shall, if the circumstances are serious, be sentenced to a fine, and the directly responsible person in charge and other directly liable persons shall be sentenced to imprisonment of not more than five years or criminal detention in addition to a fine. Whoever owns the illegal income obtained from bribery shall be convicted and punished in accordance with the provisions of Articles 389 and 390 of this Law.

Article 394. State functionaries who accept gifts in the course of carrying out official duties at home or in intercourse with foreign countries but who fail to turn over the gifts to the state in accordance with state provisions, when the amount is fairly large, shall be punished in accordance with the crimes stated in Article 382 and Article 383 of this law.

Article 395. Where the property or expenditure of any state functionary obviously exceeds his legitimate income, and the difference is huge, he shall be ordered to explain the sources. If he fails to do so, the difference shall be determined as illegal income, and he shall be sentenced to fixed-term imprisonment not more than five years or criminal detention; or if the difference is extremely huge, shall be sentenced to fixed-term imprisonment not less

than five years but not more than ten years. The difference of the property shall be recovered. State functionaries who have savings deposits in foreign countries must declare their deposits according to state provisions. Those who hide their deposits of this nature by not declaring them are to be sentenced to not more than two years of fixed-term imprisonment or to criminal detention; when the circumstances are not serious, they shall be given administrative punishment by the unit to which they belong or by a competent organ of a higher level according to the circumstance.

Article 396. State organs, state-owned companies, enterprises, business units, and mass organizations which violate state regulations by privately distributing state assets to groups of individuals in the name of the units, where the amounts involved are fairly large, the principal personnel directly responsible and other personnel with direct responsibility shall be sentenced to not more than three years of fixed-term imprisonment or criminal detention, and may in addition or exclusively be sentenced to a fine; and when huge amounts are involved, not less than three years and not more than seven years of fixed-term imprisonment, and may in addition be sentenced to a fine.

Judicial organizations and administrative and law enforcement organizations which violate state stipulations by privately distributing to groups of individuals fines and confiscated goods that should be turned over to the higher authorities, shall be punished in accordance with the stipulations of the preceding paragraph.

Chapter IX Crimes of Dereliction of Duty

Article 397. State personnel who abuse their power or neglect their duties, causing great losses to public property and the state's and people's interests, shall be sentenced to not more than three years of fixed-term imprisonment or criminal detention; and when the circumstances are exceptionally serious, not less than three years and not more than seven years of fixed-term imprisonment. Where there are separate stipulations under this law, these stipulations shall be followed.

State personnel who practice favoritism and commit irregularities and the crimes mentioned in the preceding paragraph shall be sentenced to not more than five years of fixed-term imprisonment or criminal detention, and when the circumstances are exceptionally serious, not less than five years and not more than 10 years of fixed-term imprisonment. Where there are separate stipulations under this law, these stipulations shall be followed.

Article 398. State personnel who violate the stipulations of the Law of Protection of State Secrets and intentionally or negligently reveal state secrets, and when the circumstances are serious, shall be sentenced to not more than three years of fixed-term imprisonment or criminal detention; and when the circumstances are exceptionally serious, not less than three years and not more than seven years of fixed-term imprisonment.

Non-state personnel who commit the crime mentioned in the preceding paragraph shall be punished in consideration of the circumstances and in accordance with the stipulations of the preceding paragraph.

Article 399. Any judicial officer who, by bending the law for selfish ends or twisting the law

to serve his friends and relatives, subjects any person he knows to be innocent to investigation for criminal responsibility, intentionally protects any person he knows to be guilty from investigation for criminal responsibility, intentionally runs counter to the facts and law to render judgments that abuse the law in criminal proceedings shall be sentenced to fixed-term imprisonment of not more than five years or criminal detention; if the circumstance is serious, he shall be sentenced to fixed-term imprisonment of not less than five years but not more than 10 years; if the circumstance is especially serious, he shall be sentenced to fixed-term imprisonment of not less than 10 years.

Whoever, in civil or administrative proceedings, intentionally runs counter to the facts and law to render judgments that abuse the law, if the circumstance is serious, shall be sentenced to fixed-term imprisonment of not more than five years or criminal detention; if the circumstance is especially serious, he shall be sentenced to fixed-term imprisonment of not less than five years but not more than 10 years.

Whoever, in the enforcement of any judgment or ruling, seriously neglects his duty or abuses his authority and fails to adopt judicial protective measures or perform statutory enforcement duties, or illegally adopts judicial protective measures or mandatory enforcement measures, if any heavy loss thus occurs to the interests of the parties involved or others, shall be sentenced to fixed-term imprisonment of not more than five years or criminal detention; if any especially heavy loss thus occurs to the interests of the parties involved or others, he shall be sentenced to fixed-term imprisonment of not less than five years but not more than ten years.

Any judicial officer, who takes any bribe and commits any act mentioned in the preceding three paragraphs, which also constitutes a crime as provided for in Article 385 of this Law, shall be convicted and punished in accordance with the provisions for a heavier punishment.

Article 399 (1): Where anyone who undertakes the duties of arbitration according to law intentionally goes against the facts or law and makes any wrongful ruling in the process of arbitration, he shall be sentenced to fixed-term imprisonment of not more than three years or detention. If the circumstances are extremely serious, he shall be sentenced to fixed-term imprisonment of not less than three years but not more than seven years.

Article 400. Judicial work personnel who release without authority crime suspects, accused persons, or criminals from custody shall be punished with imprisonment or criminal detention of less than five years; or -- for cases of a serious nature -- with imprisonment of over five years and less than 10 years; or -- for cases of an extraordinary serious nature -- with imprisonment of over 10 years.

Judicial work personnel who, because of serious irresponsibility, cause the escape of crime suspects, accused persons, or criminals from custody resulting in severe consequences, shall be punished with imprisonment or criminal detention of less than three years; or -- for cases causing extraordinary serious consequences -- with imprisonment of over three years and less than 10 years.

Article 401. Judicial work personnel who, because of favoritism and malpractice, offer

commutation, parole, or out-of-prison enforcement for offenses that fail to meet requirements of such commutation, parole, or out-of-prison enforcement, shall be punished with imprisonment or criminal detention of less than three years; or -- for cases of a serious nature -- with imprisonment of over three years and less than seven years.

Article 402. Administrative law enforcement personnel who, because of favoritism and malpractice, fail to refer cases to judicial organs for establishing criminal liabilities under the law, shall -- in cases of a serious nature -- be punished with imprisonment or criminal detention of less than three years; or -- where serious consequences have been caused -- with imprisonment of over three years and less than seven years.

Article 403. State organ work personnel under relevant competent state departments, who, because of favoritism, malpractice, and abuse of powers, approve or register the incorporation or registration of companies that fail to meet conditions required by law, or approve their applications for issuance of shares or bonds, or listing resulting in serious losses to public property and interests of the state and the people, shall be punished with imprisonment or criminal detention of less than five years.

Personnel directly in charge of a department of a higher level that forcibly order registration organs or their work personnel to commit acts of the preceding paragraph shall be punished according to provisions of the preceding paragraph.

Article 404. Work personnel of tax organs, who, because of favoritism and malpractice, fail to impose or impose less mandatory taxes resulting in serious losses of state revenues, shall be punished with imprisonment or criminal detention of less than five years; or -- in cases causing extraordinary serious losses -- with imprisonment of over five years.

Article 405. Work personnel of tax organs, who, in violation of provisions under the law and administrative rules, cause great losses to state interests in handling work relating to sale of invoices, tax offsetting, and export tax refund as a result of favoritism and malpractice, shall be punished with imprisonment or criminal detention of less than five years; or -- in cases causing extraordinary serious losses to state interests -- with imprisonment of over five years. Other state organ work personnel, who, in violation of state stipulations, practice favoritism and malpractice in work relating to export tax refunds, including provision of customs declaration bills for export goods, and verification and cancellation of exchange earnings through export, resulting in serious losses to state interests, shall be punished according to the provisions of the preceding paragraph.

Article 406. Work personnel of state organs, who, because of serious irresponsibility, have been deceived in the course of entering or executing agreements, resulting in serious losses to state interests, shall be punished with imprisonment or criminal detention of less than three years; or -- for cases causing extraordinary serious losses to state interests -- with imprisonment of over three years and less than seven years.

Article 407. Work personnel of departments in charge of forest industry, who, in violation of provisions under the Forest Law, issue logging licenses in excess of approved annual quotas or indiscriminately issue logging licenses, shall -- in cases of a serious nature that cause

severe damages to forests -- be punished with imprisonment or criminal detention of less than three years.

Article 408. Work personnel of state organs in charge of environmental protection and supervision, whose serious irresponsibility has resulted in serious consequences, including severe environmental pollution that causes serious damages to public and private property or human casualties, shall be punished with imprisonment or criminal detention of less than three years.

Article 408(I): Where a state functionary with food safety supervision and management functions abuses his powers or neglects his duties, if any serious food safety accident or other serious consequence is caused, he shall be sentenced to imprisonment of not more than 5 years or criminal detention; or if any especially serious consequence is caused, be sentenced to imprisonment of not less than 5 years but not more than 10 years.

Where the crime as provided for in the preceding paragraph is committed by the state functionary by making falsehood for personal gains, a heavier penalty shall be imposed on him.

Article 409. Government work personnel of public health administrative departments engaging in the prevention and treatment of infectious diseases, whose serious irresponsibility has resulted in the communication and spread of infectious diseases, shall - - in cases of a serious nature --be punished with imprisonment or criminal detention of less than three years.

Article 410. State organ work personnel, who practice favoritism and malpractice, violate land management rules, and abuse powers in illegally approving land acquisition and occupation, or illegally leasing out land use rights at a price lower than market value, shall - - in cases of a serious nature -- be punished with imprisonment or criminal detention of less than three years; or -- for cases causing extraordinary heavy losses to state or collective interests -- with imprisonment of over three years and less than seven years.

Article 411. Customs work personnel who practice favoritism and malpractice in conniving smuggling, shall, -- for cases of a serious nature-- be punished with imprisonment or criminal detention of less than five years; or -- for cases of an extraordinary serious nature -- be punished with imprisonment of over five years.

Article 412. Work personnel with state commercial inspection departments or organizations, who practice favoritism and malpractice and forge inspection results, shall be punished with imprisonment or criminal detention of less than five years; or -- for cases of a serious nature -- with imprisonment of over five years and less than 10 years.

Work personnel mentioned in the preceding paragraph, who, because of serious irresponsibility, fail to inspect goods requiring inspection, or delay inspection and issuance of certificates, or wrongly issue certificates resulting in serious losses to state interests, shall be punished with imprisonment or criminal detention of less than three years.

Article 413. Quarantine personnel with animal and plant quarantine organs, who practice favoritism and malpractice in forging quarantine results, shall be punished with imprisonment

or criminal detention of less than five years; or -- in cases with serious consequences -- with imprisonment of over five years and less than 10 years.

Work personnel mentioned in the preceding paragraph, who, because of serious irresponsibility, fail to carry out quarantine on goods requiring quarantine, or delay quarantine and issuance of certificates, or wrongly issue certificates resulting in serious losses to state interests, shall be punished with imprisonment or criminal detention of less than three years.

Article 414. State organ work personnel charged with the responsibility of establishing liabilities of criminal acts relating to the sale of fake and shoddy merchandise, who practice favoritism and malpractice and fail to perform their duties under the law, shall -- in cases of a serious nature -- be punished with imprisonment or criminal detention of less than five years.

Article 415. State organ work personnel charged with the responsibility of handling passports, visas, and other exit/entry documents, who knowingly grant exit/entry documents to personnel attempting to cross state (border) lines illegally; or state organ work personnel of frontier defense or customs, who knowingly let go personnel who try to cross state (border) lines illegally, shall be punished with imprisonment or criminal detention of less than three years; or -- in cases of a serious nature -- with imprisonment of over three years and less than seven years.

Article 416. State organ personnel charged with the responsibility of rescuing abducted or kidnapped women and children, who fail to act at the request of the abducted or kidnapped women or children or members of their family or at information received from members of the public, resulting in serious consequences, shall be punished with imprisonment or criminal detention of less than five years.

State organ work personnel with rescue responsibility, who take advantage of their duties to obstruct rescue operations, shall be punished with imprisonment of over two years and less than seven years; or -- for less serious cases -- with imprisonment or criminal detention of less than two years.

Article 417. State organ personnel charged with the responsibility of investigating and banning criminal activities, who send secret information or tip off criminal elements, or provide facility to help them evade punishment, shall be punished with imprisonment or criminal detention of less than three years; or -- in cases of a serious nature -- with imprisonment of over three years and less than 10 years.

Article 418. State organ work personnel who practice favoritism and malpractice in recruiting government functionaries or students, shall -- in cases of a serious nature -- be punished with imprisonment or criminal detention of less than three years.

Article 419. State personnel who cause damage to or loss of precious cultural relics through serious irresponsibility shall be sentenced to not more than three years in prison or criminal detention if the circumstances are serious.

Chapter X Crimes of Violation of Duty by Military Personnel

Article 420. Acts by military personnel of endangering national and military interests in violation of their duties which are punishable by law are considered crimes in violation of duty by military personnel.

Article 421. Those who endanger military operations in defiance of orders in wartime shall be sentenced to not less than three years and not more than 10 years in prison. If they cause major losses in combat or battle, they shall be sentenced to not less than 10 years in prison, life imprisonment, or death.

Article 422. Those who endanger military operations by deliberately concealing military information, providing false military information, refusing to relay military orders, or relaying false military orders shall be sentenced to not less than three years and not more than 10 years in prison. If they cause major losses in combat or battle, they shall be sentenced to not less than 10 years in prison, life imprisonment, or death.

Article 423. Those who care for nothing but their own lives on the battleground and lay down their arms and surrender to the enemy of their own accord shall be sentenced to not less than three years and not more than 10 years in prison. If the circumstances are serious, they shall be sentenced to not less than 10 years in prison or life imprisonment.

Those who work for the enemy after their surrender shall be sentenced to not less than 10 years in prison, life imprisonment, or death.

Article 424. Those who flee from battle shall be sentenced to not more than three years in prison. If the circumstances are serious, they shall be sentenced to not less than three years in prison and not more than 10 years in prison. If they cause major losses in combat or battle, they shall be sentenced to not less than 10 years in prison, life imprisonment, or death.

Article 425. Commanders and personnel on duty who cause serious consequences by leaving their posts without permission or by neglecting their duties shall be sentenced to not more than three years in prison or criminal detention. In the event of especially serious consequences, they shall be sentenced to not less than three years and not more than seven years in prison.

Those who commit the crimes mentioned in the preceding paragraph in wartime shall be sentenced to not less than five years in prison.

Article 426. Whoever obstructs any commander or person on duty from performing his or her duties through violence or intimidation shall be sentenced to imprisonment of not more than five years or criminal detention; be sentenced to imprisonment of not less than five years but not more than ten years if the circumstances are serious; or be sentenced to imprisonment of not less than ten years or life imprisonment if the circumstances are especially serious. Whoever commits the crime during wartime shall be given a heavier penalty.

Article 427. Those who cause serious consequences by abusing their powers and directing their subordinates to engage in activities in violation of their duties shall be sentenced to not more than five years in prison or criminal detention. If the circumstances are especially serious, they shall be sentenced to not less than five years and not more than 10 years in

prison.

Article 428. Commanders who cause serious consequences by turning away from battle or acting passively in combat in defiance of orders shall be sentenced to not more than five years in prison. In the event of major losses in combat or battle, or other especially serious circumstances, they shall be sentenced to not less than five years in prison.

Article 429. The commanders of those who cause friendly forces to suffer major losses by not coming to their rescue on the battleground, although they know that they are in imminent danger, are asking for rescue, and can be rescued, shall be sentenced to not more than five years in prison.

Article 430. Those who endanger national and military interests by leaving their posts without permission, fleeing the country, or defecting while outside the country during the course of performing official duties shall be sentenced to not more than five years in prison or criminal detention.

If the circumstances are serious, they shall be sentenced to not less than five years in prison. In the event of desertion by aircraft or on board vessels, or other especially serious circumstances, those involved shall be sentenced to not less than 10 years in prison, life imprisonment, or death.

Article 431. Those who illegally obtain military secrets by stealing, spying, or buying such secrets shall be sentenced to not more than five years in prison. If the circumstances are serious, they shall be sentenced to not less than five years and not more than 10 years in prison. If the circumstances are especially serious, they shall be sentenced to not less than 10 years in prison.

Those who steal, spy, or buy military secrets for overseas institutions, organizations, or personnel, and illegally provide such secrets to them shall be sentenced to not less than 10 years in prison, life imprisonment, or death.

Article 432. Those who leak military secrets by design or by accident in violation of laws and regulations on protecting state secrets shall be sentenced to not more than five years in prison or criminal detention if the circumstances are serious. If the circumstances are especially serious, they shall be sentenced to not less than five years and not more than 10 years in prison.

Those who commit the crime mentioned in the preceding paragraph in wartime shall be sentenced to not less than five years and not more than 10 years in prison. If the circumstances are especially serious, they shall be sentenced to not less than 10 years in prison or life imprisonment.

Article 433. Whoever fabricates rumors to mislead people and shake the confidence of the army in wartime shall be sentenced to imprisonment of not more than three years; be sentenced to imprisonment of not less than three years but not more than ten years if the circumstances are serious; or be sentenced to imprisonment of not less than ten years or life imprisonment if the circumstances are especially serious.

Article 434. Those who inflict injuries on themselves to eschew military duties in wartime

shall be sentenced to not more than three years in prison. If the circumstances are serious, they shall be sentenced to not less than three years and not more than seven years in prison.

Article 435. Those who desert their troops in violation of military service laws and regulations shall be sentenced to not more than three years in prison or criminal detention if the circumstances are serious.

Those who commit the crime mentioned in the preceding paragraph in wartime shall be sentenced to not less than three years and not more than seven years in prison.

Article 436. Those who violate regulations on the use of weaponry in circumstances that are so serious as to constitute accidents through negligence that result in serious injuries or deaths or that cause other serious consequences shall be sentenced to not more than three years in prison or criminal detention. If the consequences are especially serious, they shall be sentenced to not less than three years and not more than seven years in prison.

Article 437. Those who cause serious consequences by changing the prescribed ways of using weaponry in violation of weaponry management regulations shall be sentenced to not more than three years in prison or criminal detention. If the circumstances are especially serious, they shall be sentenced to not less than three years and not more than seven years in prison.

Article 438. Those who steal or snatch weaponry or war materiel shall be sentenced to not more than five years in prison or criminal detention. If the circumstances are serious, they shall be sentenced to not less than five years and not more than 10 years in prison. If the circumstances are especially serious, they shall be sentenced to not less than 10 years in prison, life imprisonment, or death.

Those who steal or snatch firearms, ammunition, or explosives shall be punished in accordance with the provisions in Article 127 of this law.

Article 439. Those who illegally sell or transfer military weaponry shall be sentenced to not less than three years and not more than 10 years in prison. In the event of selling or transferring large quantities of weaponry, or other especially serious circumstances, they shall be sentenced to not less than 10 years in prison, life imprisonment, or death.

Article 440. Those who abandon weaponry in defiance of orders shall be sentenced to not more than five years in prison or criminal detention. In the event of abandoning important weaponry or large quantities of weaponry, or other serious circumstances, they shall be sentenced to not less than five years in prison.

Article 441. In the event of failure to promptly report loss of weaponry, or other serious circumstances, those involved shall be sentenced to not more than three years in prison or criminal detention.

Article 442. In the event of selling or transferring military real estate without permission in violation of relevant provisions, and if the circumstances are serious, the people directly responsible shall be sentenced to not more than three years in prison or criminal detention. If the circumstances are especially serious, they shall be sentenced to not less than three years and not more than 10 years in prison.

Article 443. Those who abuse their powers and maltreat their subordinates in vicious circumstances that result in serious injuries or give rise to other serious consequences shall be sentenced to not more than five years in prison or criminal detention. If deaths result, they shall be sentenced to not less than five years in prison.

Article 444. Persons directly responsible for the intentional abandonment of injured or sick servicemen on battlefields, if the case is serious, are to be sentenced to five years or fewer in prison.

Article 445. Those working in medical aid or medical treatment positions during wartime who refuse to save or treat seriously injured or critically sick servicemen when conditions permit them to do so are to be sentenced to five years or fewer in prison or put under criminal detention. If the case results in serious disability, death, or other grave consequences of the injured or sick servicemen, those responsible are to be sentenced to five to 10 years in prison.

Article 446. Those cruelly injuring innocent residents or looting innocent residents' money or other property on military action areas are to be sentenced to five years or fewer in prison. If the case is serious, they are to be sentenced to five to 10 years in prison. If the case is extraordinarily serious, they are to be sentenced to 10 years or more in prison, given a life sentence, or sentenced to death.

Article 447. Those releasing prisoners of war without authorization are to be sentenced to five years or fewer in prison. Those releasing important prisoners of war or many prisoners of war, or those involved in other serious cases, are to be sentenced to five years or more in prison.

Article 448. Those mistreating prisoners of war, if the case is serious, are to be sentenced to three years or fewer in prison.

Article 449. During wartime, convicted servicemen who are sentenced to three years or fewer in prison, who pose no practical dangers, and whose sentence is suspended, are allowed to redeem themselves by good service. If they prove to have done meritorious service, their original sentence may be rescinded and they may not be considered to have committed a crime.

Article 450. This chapter applies to active duty military officers, civilian cadres, soldiers, and cadets with military status of the Chinese People's Liberation Army [PLA]; active duty military officers, civilian cadres, soldiers, and cadets with military status in the Chinese People's Armed Police; and personnel of the reserve force and other personnel carrying out military tasks.

Article 451. Wartime as mentioned in this chapter refers to the time after the state has declared the state of war, troops have been assigned with combat missions, or when the country is suddenly attacked by enemy.

The time during which troops carry out marshal law missions or handle emergency violence is considered wartime.

Supplementary Articles

Article 452. This law will go into effect as of October 1, 1997.

Regulations, supplementary provisions, and decisions made by the National People's Congress Standing Committee that are listed in appendix one of this law have either been included in this law or are no longer applicable; therefore they are to be nullified as of the date when this law goes into effect.

Supplementary provisions and decisions made by the National People's Congress Standing Committee that are listed in appendix two of this law are to be retained. Among them, provisions governing administrative punishment and measures continue to be effective; provisions governing criminal liability have been included in this law and therefore provisions in this law will apply as of the date when this law goes into effect.

Appendix I

The following regulations, supplementary provisions, and decisions, made by National People's Congress Standing Committee, have either been included in this law or are no longer applicable; therefore they are to be nullified as of the date when this law goes into effect

1. PRC Provisional Regulations on Punishing Military Personnel for Violation of Duty;
2. Decision on Severely Punishing Criminals Seriously Undermining the Economy;
3. Decision on Severely Punishing Criminal Elements Seriously Compromising Social Order;
4. Supplementary Provisions on Cracking Down on the Crime of Smuggling;
5. Supplementary Provisions on Cracking Down on the Crime of Corruption or Bribery;
6. Supplementary Provisions on Cracking Down on the Crime of Letting Out State Secrets;
7. Supplementary Provisions on Cracking Down on the Crime of Killing Rare and Endangered Wildlife That Are Selectively Under the State's Protection;
8. Decision on Cracking Down on the Crime of Insulting the PRC National Flag or Emblem;
9. Supplementary Provisions on Cracking Down on the Crime of Robbing Ancient Cultural Ruins or Ancient Tombs;
10. Decision on Punishing Criminal Elements Hijacking Aviation Vehicles;
11. Supplementary Provisions on Cracking Down on the Crime of Counterfeiting Registered Trade Marks;
12. Decision on Cracking Down on the Crime of Producing or Selling Counterfeit or Inferior Commodities;

7. Decision on Cracking Down on the Crime of Undermining the Financial Order;
8. Decision on Cracking Down on the Crime of the Fraudulent Issuance of, Forging, or Illegally Selling Invoices Exclusively for Value-Added Taxes.

18. Civil Procedure Law of the People's Republic of China

(Adopted at the 4th Session of the Seventh National People's Congress on April 9, 1991; amended for the first time in accordance with the Decision on Amending the Civil Procedure Law of the People's Republic of China as adopted at the 30th Session of the Standing Committee of the Tenth National People's Congress on October 28, 2007; and amended for the second time in accordance with the Decision on Amending the Civil Procedure Law of the People's Republic of China as adopted at the 28th Session of the Standing Committee of the Eleventh National People's Congress on August 31, 2012; and amended for the third time in accordance with the Decision on Amending the Civil Procedure Law of the People's Republic of China and the Administrative Litigation Law of the People's Republic of China as adopted at the 28th Session of the Standing Committee of the Twelfth National People's Congress on June 27, 2017)

Part One General Provisions

Chapter 1 Purposes, Scope of Application and Basic Principles

Article 1 The Civil Procedure Law of the People's Republic of China is formulated in accordance with the Constitution and in consideration of civil trial experience and actual circumstances of civil trials in China.

Article 2 The purposes of the Civil Procedure Law of the People's Republic of China are to protect the parties' exercise of procedural rights; ensure that a people's court finds facts, distinguishes right from wrong, applies law correctly and try civil cases in a timely manner; confirm civil rights and obligations; punish violations of civil law; protect the lawful rights and interests of the parties; educate citizens on consciously abiding by law; maintain the social and economic order; and guarantee smooth socialist development.

Article 3 The provisions of this Law shall apply to civil actions accepted by a people's court regarding property or personal relationships between citizens, between legal persons, between other organizations or between citizens and legal persons, citizens and other organizations or legal persons and other organizations.

Article 4 For all civil actions conducted within the territory of the People's Republic of China, this Law must be complied with.

Article 5 Foreign nationals, stateless persons and foreign enterprises and organizations which institute or respond to actions in the people's courts shall have equal procedural rights and obligations as citizens, legal persons and other organizations of the People's Republic of China.

Where the courts of a foreign country impose any restrictions on the civil procedural rights of citizens, legal persons and other organizations of the People's Republic of China, the people's courts of the People's Republic of China shall apply the principle of reciprocity to the civil procedural rights of citizens, enterprises and organizations of such a foreign country.

Article 6 The power to try civil cases shall be exercised by the people's courts.

The people's courts shall try civil cases independently in accordance with law, without interference from any government agency, social group or individual.

Article 7 When trying civil cases, the people's courts must regard facts as the basis and regard law as the yardstick.

Article 8 All parties to a civil action shall have equal procedural rights. When trying civil cases, the people's courts shall provide safeguards and facilitation for all parties to exercise their procedural rights, and apply law equally for all parties.

Article 9 When trying civil cases, the people's courts shall conduct mediation under the principles of free will of the parties and legality; and if mediation fails, shall enter a judgment in a timely manner.

Article 10 When trying civil cases, the people's courts shall apply the collegial bench, disqualification, open trial and "final after two trials" systems in accordance with law.

Article 11 Citizens of all ethnicities shall be entitled to use their native spoken and written languages in civil procedures.

In areas where an ethnic minority is concentrated or several ethnicities cohabit, the people's courts shall conduct trial and publish legal instruments in the spoken and written language commonly used by the local ethnicity or ethnicities.

The people's courts shall provide interpretation for litigation participants who are not familiar with the spoken or written language commonly used by the local ethnicity or ethnicities.

Article 12 When a people's court tries a civil case, the parties shall have the right to debate.

Article 13 In civil procedures, the principle of good faith shall be adhered to.

The parties shall be entitled to dispose of their respective civil rights and procedural rights within the extent as permitted by law.

Article 14 The people's procuratorates shall have the authority to exercise legal supervision over civil procedures.

Article 15 For conduct which infringes upon the civil rights and interests of the state, a collective or an individual, a state organ, a social group, an enterprise or a public institution may support the entity or individual which suffers infringement in instituting an action in a people's court.

Article 16 The people's congresses of ethnical autonomous areas may formulate provisions with necessary changes or supplementary provisions in accordance with the principles of the Constitution and this Law and in consideration of the specific circumstances of the local ethnicity or ethnicities. Such provisions formulated by an autonomous region shall be subject to the approval of the Standing Committee of the National People's Congress. Such provisions formulated by an autonomous prefecture or autonomous county shall be subject to the approval of the standing committee of the people's congress of the corresponding province or autonomous region and be filed with the Standing Committee of the National People's Congress.

Chapter 2 Jurisdiction

Section 1 Hierarchical Jurisdiction

Article 17 The basic people's courts shall have jurisdiction over civil cases as a court of first instance, except as otherwise provided for in this Law.

Article 18 The intermediate people's courts shall have jurisdiction over the following civil cases as a court of first instance:

- (1) Major foreign-related cases.
- (2) Cases which have a major impact within their respective jurisdictions.
- (3) Cases which are under the jurisdiction of the intermediate people's courts as determined by the Supreme People's Court.

Article 19 The higher people's courts shall have jurisdiction over civil cases which have a major impact within their respective jurisdictions as a court of first instance.

Article 20 The Supreme People's Court shall have jurisdiction over the following civil cases as a court of first instance:

- (1) Cases which have a major impact nationwide.
- (2) Cases which the Supreme People's Court deems shall be tried by itself.

Section 2 Territorial Jurisdiction

Article 21 A civil action instituted against a citizen shall be under the jurisdiction of the people's court at the place of domicile of the defendant; or if the defendant's place of domicile is different from his or her place of habitual residence, the civil action shall be under the jurisdiction of the people's court at the place of habitual residence of the defendant.

A civil action instituted against a legal person or any other organization shall be under the jurisdiction of the people's court at the place of domicile of the defendant.

Where the places of domicile or places of habitual residence of several defendants in the same action are located within the jurisdictions of two or more people's courts, both or all of such people's courts shall have jurisdiction over the action.

Article 22 The following civil actions shall be under the jurisdiction of the people's court at

the place of domicile of the plaintiff; or if the plaintiff's place of domicile is different from his or her place of habitual residence, the civil actions shall be under the jurisdiction of the people's court at the place of habitual residence of the plaintiff:

(1) An action regarding a personal relationship instituted against a person who does not reside within the territory of the People's Republic of China.

(2) An action regarding a personal relationship instituted against a person whose whereabouts is unknown or against a person who has been declared missing.

(3) An action instituted against a person who is subject to any compulsory correctional measure.

(4) An action instituted against a person who is incarcerated.

Article 23 An action instituted for a contract dispute shall be under the jurisdiction of the people's court at the place of domicile of the defendant or at the place where the contract is performed.

Article 24 An action instituted for an insurance contract dispute shall be under the jurisdiction of the people's court at the place of domicile of the defendant or at the place where the subject matter insured is located.

Article 25 An action instituted for a negotiable instrument dispute shall be under the jurisdiction of the people's court at the place of payment of the negotiable instrument or at the place of domicile of the defendant.

Article 26 An action instituted for a dispute arising from formation, shareholder eligibility confirmation, profit distribution, dissolution or any other matter of a company shall be under the jurisdiction of the people's court at the place of domicile of the company.

Article 27 An action instituted for a dispute arising from a railway, road, water, air, or multi-mode transportation contract shall be under the jurisdiction of the people's court at the place of departure or destination of transportation or at the place of domicile of the defendant.

Article 28 An action instituted for a tort shall be under the jurisdiction of the people's court at the place where the tort occurs or at the place of domicile of the defendant.

Article 29 An action instituted for damages for a railway, road, water or air transportation accident shall be under the jurisdiction of the people's court at the place where the accident occurs, where the vehicle or vessel first arrives or where the aircraft first lands or at the place of domicile of the defendant.

Article 30 An action instituted for damages for a vessel collision or any other maritime accident shall be under the jurisdiction of the people's court at the place where the collision occurs, where the colliding vessel first arrives or where the vessel at fault is detained or at the place of domicile of the defendant.

Article 31 An action instituted for maritime salvage shall be under the jurisdiction of the people's court at the place of salvage or at the place where the salvaged vessel first arrives.

Article 32 An action instituted for a general average shall be under the jurisdiction of the people's court at the place where the vessel first arrives, where the general average is adjusted or where the voyage ends.

Article 33 The following cases shall be under the exclusive jurisdiction of the people's courts as specified below:

(1) An action instituted for a real estate dispute shall be under the jurisdiction of the people's court at the place where the real estate is located.

(2) An action instituted for a dispute arising from harbor operations shall be under the jurisdiction of the people's court at the place where the harbor is located.

(3) An action instituted for an inheritance dispute shall be under the jurisdiction of the people's court at the place of domicile of the deceased upon death or at the place where the major part of estate is located.

Article 34 Parties to a dispute over a contract or any other right or interest in property may, by a written agreement, choose the people's court at the place of domicile of the defendant, at the place where the contract is performed or signed, at the place of domicile of the plaintiff, at the place where the subject matter is located or at any other place actually connected to the dispute to have jurisdiction over the dispute, but the provisions of this Law regarding hierarchical jurisdiction and exclusive jurisdiction shall not be violated.

Article 35 When two or more people's courts have jurisdiction over an action, the plaintiff may institute an action in one of such people's courts; and if the plaintiff institutes actions in two or more people's courts that have jurisdiction, the people's court which docketed the case first shall have jurisdiction over the action.

Section 3 Jurisdiction Transfer and Specified Jurisdiction

Article 36 Where a people's court discovers that a case accepted is not under its jurisdiction, it shall transfer the case to the people's court having jurisdiction, and the people's court to which the case is transferred shall accept the case. If the people's court to which the case is transferred deems that the transferred case is not under its jurisdiction according to the relevant provisions, it shall report the case to its superior for specified jurisdiction and shall not transfer the case without direction.

Article 37 Where a people's court having jurisdiction is unable to exercise its jurisdiction for any special reasons, its superior shall specify jurisdiction.

Where there is any dispute over jurisdiction between the people's courts, the dispute shall be resolved by the disputing courts through consultations; or if such consultations fail, the disputing courts shall request their common superior to specify jurisdiction.

Article 38 A people's court at a higher level shall have the power to try a first instance civil case under the jurisdiction of a people's court at a lower level. If it is necessary to transfer a first instance civil case under its jurisdiction to a people's court at a lower level for trial, a people's court at a higher level shall file a report with its superior for approval of the transfer. If a people's court at a lower level deems it necessary for a first instance civil case under its jurisdiction to be tried by a people's court at a higher level, it may request the people's court at a higher level to try the case.

Chapter 3 Trial Organization

Article 39 When a people's court tries a first instance civil case, a collegial bench consisting

of judges and jurors or consisting of judges only shall be formed. The members of a collegial bench must be in an odd number.

Civil cases tried under summary procedure shall be tried by a sole judge.

When performing their juror's duties, jurors shall have equal rights and obligations as a judge.

Article 40 When a people's court tries a second instance civil case, a collegial bench consisting of judges only shall be formed. The members of a collegial bench must be in an odd number.

For a case remanded for retrial, the original trial people's court shall form a new collegial bench under the procedure at first instance.

If a case for retrial was originally tried by a court of first instance, a new collegial bench shall be formed under the procedure at first instance; or if the case for retrial was originally tried by a court of second instance or tried directly by a people's court at a higher level, a new collegial bench shall be formed under the procedure at second instance.

Article 41 The president of a people's court or a divisional chief of a people's court shall designate a judge as the presiding judge of a collegial bench; and if the president or divisional chief participates in the trial, the president or divisional chief shall be the presiding judge.

Article 42 When deliberating a case, a collegial bench shall adhere to the rule of majority. Deliberation transcripts shall be prepared and be signed by the members of the collegial bench. The dissenting opinions during deliberations shall be truthfully included in the transcripts.

Article 43 Judges shall handle cases impartially in accordance with law.

Judges shall not accept any treats or gifts from the parties or their litigation representatives. Judges who commit embezzlement, accept bribes, practice favoritism for personal gains or adjudicate by bending the law shall be subject to legal liability; and those suspected of any crime shall be subject to criminal liability in accordance with law.

Chapter 4 Disqualification

Article 44 Under any of the following circumstances, a judge shall voluntarily disqualify himself or herself, and a party shall be entitled to request disqualification of such a judge verbally or in writing:

(1) The judge is a party to a case or is a close relative of a party to a case or a litigation representative thereof.

(2) The judge is an interested party to a case.

(3) The judge has any other relationship with a party to a case or a litigation representative thereof, which may affect the impartial trial of the case.

Where a judge accepts any treat or gift from a party to a case or a litigation representative thereof or meets with a party to a case in violation of legal provisions, a party shall be entitled to require disqualification of such a judge.

A judge who commits any conduct in the preceding paragraph shall be subject to legal liability in accordance with law.

The provisions of the preceding three paragraphs shall also apply to court clerks, interpreters, identification or evaluation experts, and surveyors.

Article 45 To request disqualification, a party shall state reasons and file a request at the beginning of the trial of a case; and a request may also be filed before the end of court debate if a party becomes aware of a reason for disqualification after the trial of a case begins.

Before the people's court decides whether to grant the request for disqualification, the person whose disqualification is requested shall be suspended from participating in the case, unless the case requires that emergency measures be taken.

Article 46 The disqualification of the presiding judge who is the president of a people's court shall be decided by the judicial committee of the people's court; the disqualification of judges shall be decided by the president of a people's court; and the disqualification of other persons shall be decided by the presiding judge.

Article 47 A people's court shall make a decision verbally or in writing on a party's request for disqualification within three days after the request is filed. Against the decision, a party may apply for reconsideration once when receiving the decision. During the period of reconsideration, the person whose disqualification is requested shall not be suspended from participating in the case. A people's court shall make a decision on an application for reconsideration within three days and notify the reconsideration applicant of the decision.

Chapter 5 Primary Litigation Participants

Section 1 Parties

Article 48 Citizens, legal persons and other organizations may act as the parties to civil actions.

The legal representative of a legal person shall participate in an action on behalf of the legal person. The primary person in charge of any other organization shall participate in an action on behalf of the organization.

Article 49 The parties shall be entitled to retain representatives, file a request for disqualification, collect and provide evidence, debate, file a request for mediation, file an appeal, and apply for enforcement.

The parties may consult materials related to the case and copy materials and legal instruments related to the case. The scope of and measures for consulting and copying materials related to a case shall be prescribed by the Supreme People's Court.

The parties must exercise their procedural rights in accordance with law, observe the order of litigation, and execute effective written judgments, rulings and consent judgments.

Article 50 Both sides of a civil action may reach a settlement themselves.

Article 51 The plaintiff may relinquish or modify its claims. The defendant may admit or repudiate the plaintiff's claims and shall have the right to file a counterclaim.

Article 52 A joint action means that one side or both sides of a civil action consist of two or more persons, the subject matter of action for each party is same or is of the same kind and the people's court deems that the disputes of all the parties may be tried concurrently, to

which all the parties agree.

Where the parties on one side of a joint action have common rights and obligations regarding the subject matter of action, the litigation conduct of any of such parties shall bind the rest of such parties if the conduct is recognized by the rest of such parties; or where the parties on one side of a joint action have no common rights and obligations regarding the subject matter of action, the litigation conduct of any of such parties shall not bind the rest of such parties.

Article 53 Where the parties on one side of a joint action is numerous, such parties may recommend a representative or representatives to participate in the action. The litigation conduct of such representatives shall bind all the parties represented; however, to modify or relinquish any claims, admit any claims of the opposing party or reach a settlement, such representatives must obtain a consent from the parties represented.

Article 54 Where the subject matter of action for each party is of the same kind, the parties on one side of an action are numerous, but the exact number of such parties is uncertain when the action is instituted, the people's court may publish a notice to describe the case and claims and notify right holders to register with the people's court within a certain period of time.

The right holders which have registered with the people's court may recommend a representative or representatives to participate in the litigation; and if no representative is recommended, the people's court may determine a representative or representatives in consultation with the right holders which have registered with the people's court.

The litigation conduct of such representatives shall bind all the parties represented; however, to modify or relinquish any claims, admit any claims of the opposing party or reach a settlement, such representatives must obtain a consent from the parties represented.

The judgment or ruling issued by the people's court shall bind all right holders which have registered with the people's court. Such a judgment or ruling shall also apply to actions instituted during the time limitation by rights holders which have not registered with the people's court.

Article 55 For conduct that pollutes environment, infringes upon the lawful rights and interests of vast consumers or otherwise damages the public interest, an authority or relevant organization as prescribed by law may institute an action in a people's court.

Where the people's procuratorate finds in the performance of functions any conduct that undermines the protection of the ecological environment and resources, infringes upon consumers' lawful rights and interests in the field of food and drug safety or any other conduct that damages social interest, it may file a lawsuit with the people's court if there is no authority or organization prescribed in the preceding paragraph or the authority or organization prescribed in the preceding paragraph does not file a lawsuit. If the authority or organization prescribed in the preceding paragraph files a lawsuit, the people's procuratorate may support the filing of a lawsuit.

Article 56 A third party which deems that it has an independent claim regarding the subject

matter of an action between two parties shall have the right to institute an action.

Where a third party does not have an independent claim regarding the subject matter of an action between two parties but is an interested party in law to the outcome of the case, the third party may apply to participate in the action or the people's court may notify the third party to participate in the action. If the third party assumes any civil liability according to the judgment entered by the people's court, the third party shall have the procedural rights and obligations as a party to the action.

Where a third party as mentioned in the preceding two paragraphs fails to participate in an action, which is not attributable to the third party's fault, and there is evidence that an effective judgment, ruling or consent judgment is entirely or partially erroneous and causes damage to the third party's civil rights and interests, the third party may, within six months from the day when the third party knows or should have known that the third party's civil rights and interests have been damaged, institute an action in the people's court which entered the judgment, ruling or consent judgment. If, after trial, the third party's claims are supported, the people's court shall modify or revoke the original judgment, ruling or consent judgment; or if the third party's claims are not supported, the claims shall be dismissed.

Section 2 Litigation Representatives

Article 57 The guardian of a person without competency to participate in an action shall participate in the action on behalf of the person as the person's legal representative. If the legal representatives of a person shift their duty of representation onto each other, the people's court shall specify one of them to participate in the action on behalf of the person.

Article 58 A party or a legal representative may retain one or two persons as litigation representatives.

The following persons may serve as a litigation representative:

- (1) A lawyer or legal service worker at the basic level.
- (2) A close relative or staff member of a party.
- (3) A citizen recommended by the community of or the entity employing a party or recommended by a relevant social group.

Article 59 To participate in an action on behalf of a party or a legal representative, a litigation representative must submit to the people's court a power of attorney, to which the signature or seal of the party or legal representative is affixed.

The power of attorney must state the authorized matters and the extent of authority. To admit, relinquish or modify any claims, reach a settlement, or file a counterclaim or an appeal on behalf of a party or a legal representative, a litigation representative must have a special authorization from the party or legal representative.

Where a citizen of the People's Republic of China who is residing in a foreign country posts a power of attorney or delivers through another person a power of attorney to China, the power of attorney must be authenticated by the embassy or consulate of the People's Republic of China in that country. If there is no such an embassy or consulate in that country, the power of attorney shall be first authenticated by an embassy or consulate of a third

country which has a diplomatic relationship with the People's Republic of China in that country and then be authenticated by the embassy or consulate of the People's Republic of China in the third country or be authenticated by the local patriotic overseas Chinese organization.

Article 60 Where the authority of a litigation representative of a party has changed or has been revoked, the party shall notify the people's court in writing and the people's court shall notify the opposing party of the change or revocation.

Article 61 Lawyers serving as litigation representatives and other litigation representatives shall have the right to investigate and collect evidence and may consult materials related to the case. The scope of and measures for consulting materials related to a case shall be prescribed by the Supreme People's Court.

Article 62 Where a party to a divorce case has appointed a litigation representative, the party shall still appear in court unless the party is unable to express his or her ideas; and if the party is unable to appear in court under special circumstances, the party must submit a written opinion to the people's court.

Chapter 6 Evidence

Article 63 Evidence includes:

- (1) statement of a party;
- (2) documentary evidence;
- (3) physical evidence;
- (4) audio-visual recordings;
- (5) electronic data;
- (6) witness testimony;
- (7) expert opinion; and
- (8) transcripts of survey.

Evidence must be verified before being used as a basis for deciding a fact.

Article 64 A party shall have the burden to provide evidence for its claims.

A people's court shall investigate and collect evidence which a party and its litigation representative are unable to collect for some objective reasons and evidence which the people's court deems necessary for trying a case.

A people's court shall, under statutory procedures, verify evidence comprehensively and objectively.

Article 65 A party shall provide evidence for its claims in a timely manner.

A people's court shall, according to the claims of a party and the circumstances of trial of a case, determine the evidence to be provided by a party and the time limit for provision of evidence. Where it is difficult for a party to provide evidence within the time limit, the party may apply to the people's court for an extension, and the people's court may appropriately extend the time limit upon application of the party. Where a party provides any evidence beyond the time limit, the people's court shall order the party to provide an explanation; and if the party refuses to explain or the party's explanation is not acceptable, the people's court

may, according to different circumstances, deem the evidence inadmissible or adopt the evidence but impose an admonition or a fine on the party.

Article 66 A people's court shall issue receipts for evidentiary materials submitted to the court by a party, indicating the name of evidence, number of pages, number of copies, original or photocopy, time of receipt, and other matters, to which the signatures or seals of the court personnel receiving the same shall be affixed.

Article 67 A people's court shall have the authority to investigate and collect evidence from the relevant entities and individuals, and the relevant entities and individuals shall not refuse such investigation and collection of evidence.

A people's court shall identify the authenticity and examine and determine the validity of documentary evidence provided by the relevant entities and individuals.

Article 68 Evidence shall be presented in court and cross-examined by the parties. Evidence which involves any state secret, trade secret or individual privacy shall be kept confidential, and if it is necessary to present such evidence in court, such evidence shall not be presented in open court.

Article 69 A people's court shall regard legal facts and documents notarized under statutory procedures as a basis for deciding facts, unless there is any evidence to the contrary which suffices to overturn the notarization.

Article 70 The originals as documentary evidence shall be submitted. The originals as physical evidence shall be submitted. If it is difficult to submit the originals, replicas, photographs, copies or extracts may be submitted.

Documentary evidence in a foreign language must be submitted with Chinese versions.

Article 71 The people's court shall identify the authenticity of audio-visual recordings and, in consideration of other evidence in the case, examine and determine whether the audio-visual recordings may serve as a basis for deciding facts.

Article 72 Any entity or individual which knows any circumstances of a case shall have the obligation to testify in court. The person in charge of a relevant entity shall support a witness in testifying.

A person who is unable to appropriately express his or her ideas shall not testify.

Article 73 Upon notice by a people's court, a witness shall testify in court. Under any of the following circumstances, a witness may testify by written testimony, audio-visual transmission technology, audio-visual recordings or any other means as permitted by a people's court:

- (1) The witness is unable to appear in court for health reasons.
- (2) The witness is unable to appear in court for remote residence and travel difficulty.
- (3) The witness is unable to appear in court for a force majeure such as a natural disaster.
- (4) The witness is unable to appear in court for any other justifiable reason.

Article 74 The travel, room and board, and other necessary expenses of a witness for performing his or her obligation of testifying in court, as well as loss of working time, shall be assumed by the losing party. A party which applies for a witness to testify shall advance

the same; or if no party applies and the people's court notifies a witness to testify, the people's court shall advance the same.

Article 75 A people's court shall, in consideration of other evidence in the case, examine and determine whether the statements of a party may serve as a basis for deciding facts.

The deciding of facts of a case by a people's court based on evidence shall not be affected by a party's refusal to provide a statement.

Article 76 A party may apply to the people's court for identification regarding a specialized issue for ascertaining the facts of a case. Where a party applies for identification, the parties on both sides shall determine a qualified identification expert by consultation; or if such consultation fails, the people's court shall specify one for them.

Where no party applies for identification but the people's court deems it necessary to conduct identification regarding a specialized issue, the people's court shall employ a qualified identification expert to conduct identification.

Article 77 An identification expert shall have the right to access the case file needed for conducting identification and, when necessary, may interview a party or a witness.

An identification expert shall issue a written identification opinion and affix his or her signature or seal to the identification document.

Article 78 Where a party raises any objection to an identification opinion or a people's court deems it necessary to require an identification expert to testify in court, the identification expert shall testify in court. If, upon notice by the people's court, the identification expert refuses to testify in court, the identification opinion shall not be used as a basis for deciding facts; and the party which has paid the identification fees may require that the identification fees be refunded.

Article 79 A party may apply to the people's court for notifying a person with expertise to appear in court to offer an opinion regarding an identification opinion issued by an identification expert or regarding a specialized issue.

Article 80 When surveying any physical evidence or a site, the surveyors must produce their credentials issued by a people's court and invite the local grassroots organization or the entity employing a party to send personnel to participate in the survey. The party or an adult family member of the party shall be present; and the survey shall not be affected by the refusal of the party or the adult family member to appear on site.

Upon notice by the people's court, the relevant entities and individuals shall have the obligations to protect the site and assist in the survey.

The surveyors shall prepare transcripts of the process and results of survey, to which the surveyors, the party and the invited participants shall affix their signatures or seals.

Article 81 Where any evidence may be extinguished or may be hard to obtain at a later time, a party may, in the course of an action, apply to the people's court for evidence preservation, and the people's court may also take preservation measures on its own initiative.

Where any evidence may be extinguished or may be hard to obtain at a later time, if the circumstances are urgent, an interested party may, before instituting an action or applying

for arbitration, apply for evidence preservation to a people's court at the place where the evidence is located or at the place of domicile of the respondent or a people's court having jurisdiction over the case.

Other procedures for evidence preservation shall be executed by reference to the relevant provisions of Chapter IX of this Law regarding preservation.

Chapter 7 Periods and Service of Process

Section 1 Periods

Article 82 Periods include statutory periods and periods prescribed by a people's court.

Periods shall be calculated by hour, day, month and year. The beginning hour and day of a period shall not be counted in the period.

If the expiration date of a period falls on a holiday, the first day after the holiday shall be the expiration date of the period.

A statutory period shall not include the time en route. A litigation document posted before the expiration date of a period shall not be regarded as past due.

Article 83 Where a party fails to comply with a period for reasons beyond the party's control or for any other justifiable reasons, the party may apply for an extension of the period within ten days after the impediment is eliminated, and the people's court shall decide whether to permit such an extension.

Section 2 Service of Process

Article 84 Service of process must be accompanied with a service acknowledgement, to which the person to be served shall affix a date of receipt and his or her signature or seal.

The date of receipt affixed to the service acknowledgement by the person to be served shall be the date of service.

Article 85 Process shall be served directly on the person to be served. If the person to be served, who is a citizen, is absent, a cohabiting adult family member of the person to be served shall sign for the service of process. If the person to be served is a legal person or any other organization, the legal representative of the legal person, the primary person in charge of the organization or the employee of the legal person or organization responsible for receiving process shall sign for the service of process. If the person to be served has a litigation representative, the litigation representative may sign for the service of process. If the person to be served has informed the people's court of a designated person to receive process, the designated person shall sign for the service of process.

The date of receipt affixed to the service acknowledgment by the cohabiting adult family member of the person to be served, the employee of the legal person or organization responsible for receiving process, the litigation representative or the designated person to receive process shall be the date of service.

Article 86 Where the person to be served refuses to receive or his or her cohabiting adult family member refuses to receive process, the process server may invite the representatives of relevant grassroots organizations or the entity employing the person to be served to be present, provide an explanation on the refusal, record the cause of refusal and date on the

service acknowledgement, to which the process server and witnesses shall affix their signatures or seals, and drop process at the domicile of the person to be served; and may also drop process at the domicile of the person to be served and record the service of process by photograph, video and other means, and process shall be deemed served.

Article 87 With the consent of the person to be served, a people's court may serve process by fax, email and other means capable of confirming receipt by the person to be served, except a judgment, ruling and consent judgment.

Where a means in the preceding paragraph is adopted, the date when a fax, an email or any other means reaches the specific system of the person to be served shall be the date of service of process.

Article 88 Where direct service of process is difficult, service of process may be entrusted to another people's court or be conducted by post. If process is served by post, the date of receipt stated on the service acknowledgement shall be the date of service.

Article 89 Where the person to be served is in the military service, process shall be served on the person through the political office of the unit at or above the regiment level of the armed force where the person serves.

Article 90 Where the person to be served is incarcerated, process shall be served on the person through the incarceration facility.

Where the person to be served is subject to any compulsory correctional measure, process shall be served on the person through the compulsory correctional facility.

Article 91 The office or entity through which process is served must, immediately after receiving process, deliver the same to the person to be served, the person to be served shall sign for the service of process, and the date of receipt on the service acknowledgement shall be the date of service.

Article 92 Where the whereabouts of the person to be served is unknown or service of process is not possible by other means set out in this Section, process may be served by public announcement. Process shall be deemed served sixty days after the date of public announcement.

The reasons for and the course of service of process by public announcement shall be recorded in the case file.

Chapter 8 Mediation

Article 93 When trying civil cases, a people's court shall, under the principle of free will of the parties, conduct mediation by distinguishing between right and wrong based on clear facts.

Article 94 When a people's court conducts mediation, mediation may be conducted by one judge or by the collegial bench, and mediation shall be conducted on the spot as much as possible.

When a people's court conducts mediation, it may notify by simple means the parties and witnesses to appear in court.

Article 95 When a people's court conducts mediation, it may invite relevant entities and

individuals to provide assistance. The invited entities and individuals shall assist the people's court in mediation.

Article 96 A mediation agreement must be based on the free will of both sides, and the parties shall not be forced to reach a mediation agreement. The content of a mediation agreement shall not violate any legal provisions.

Article 97 When a mediation agreement is reached, the people's court shall prepare a consent judgment. A consent judgment shall state the claims, facts of the case and results of mediation.

The judges and court clerk shall affix their signatures and the people's court shall affix its seal to a consent judgment, which shall be served on both sides.

Once a consent judgment is signed by both sides, it shall become legally binding.

Article 98 A consent judgment of a people's court is not required for mediation agreements reached in the following cases:

- (1) Divorce cases where both parties have reconciled through mediation.
- (2) Adoption cases where an adoptive relationship has been maintained through mediation.
- (3) Cases where performance on the spot is possible.
- (4) Other cases where a consent judgment is not required.

A mediation agreement which does not require a consent judgment shall be recorded in the transcripts and become legally binding immediately after both sides and the judges and court clerk affix their signatures or seals to the transcripts.

Article 99 Where no mediation agreement is reached or one party retracts before a mediation agreement is served on the party, the people's court shall enter a judgment in a timely manner.

Chapter 9 Preservation and Advance Enforcement

Article 100 For a case where, for the conduct of a party or for other reasons, it may be difficult to execute a judgment or any other damage may be caused to a party, a people's court may, upon application of the opposing party, issue a ruling on preservation of the party's property, order certain conduct of the party or prohibit the party from certain conduct; and if no party applies, the people's court may, when necessary, issue a ruling to take a preservative measure.

A people's court may order the applicant to provide security for taking a preservative measure and, if the applicant fails to provide security, shall issue a ruling to dismiss the application.

After accepting an application, a people's court must, if the circumstances are urgent, issue a ruling within 48 hours; and if it rules to take a preservative measure, the measure shall be executed immediately.

Article 101 Where the lawful rights and interests of an interested party will be irreparable damaged if an application for preservation is not filed immediately under urgent circumstances, the interested party may, before instituting an action or applying for arbitration, apply to the people's court at the place where the property to be preserved is

located or at the place of domicile of the respondent or a people's court having jurisdiction over the case for taking preservative measures. The applicant shall provide security and, if the applicant fails to provide security, the people's court shall issue a ruling to dismiss the application.

After accepting an application, a people's court must issue a ruling within 48 hours; and if it rules to take a preservative measure, the measure shall be executed immediately.

Where the applicant fails to institute an action or apply for arbitration in accordance with law within 30 days after the people's court takes a preservative measure, the people's court shall remove preservation.

Article 102 Preservation shall be limited to the extent specified in an application or the property in connection with the case.

Article 103 Property shall be preserved by seizure, impoundment, freezing of account or any other means prescribed by law. After preserving any property, a people's court shall immediately notify the person whose property is preserved.

Property which has already been seized or frozen shall not be repeatedly seized or frozen.

Article 104 Where, in a property dispute case, the respondent has provided security, the people's court shall issue a ruling to remove preservation.

Article 105 Where an application is erroneous, the applicant shall compensate the respondent for any loss incurred from preservation.

Article 106 A people's court may, upon application of a party, issue a ruling on advance enforcement for the following cases:

- (1) Cases to recover support for elderly parents, support for other adult dependants, child support, consolation money or medical expenses.
- (2) Cases to recover labor remuneration.
- (3) Cases requiring advance enforcement under urgent circumstances.

Article 107 For a people's court to issue a ruling on advance enforcement, both of the following conditions shall be met:

- (1) The rights and obligations between the parties are clear, and a denial of advance enforcement will seriously affect the life or business operation of the applicant.
- (2) The respondent is capable of performance.

The people's court may order the applicant to provide security; and if the applicant fails to provide security, shall dismiss the application. If the applicant loses the action, the applicant shall compensate the respondent for any property loss incurred from advance enforcement.

Article 108 Against a ruling on preservation or advance enforcement, a party may apply for reconsideration once. The enforcement of the ruling shall not be suspended during the period of reconsideration.

Chapter 10 Compulsory Measures against Obstruction of Civil Procedures

Article 109 Where a defendant who must appear in court refuses to appear in court without justifiable reasons after being summonsed twice by a people's court, the people's court may summons the defendant by force.

Article 110 Litigation participants and other persons shall abide by court rules.

A people's court may admonish persons who violate court rules, order such persons to leave the court, or impose a fine or detention on such persons.

For persons who clamor in a courtroom, attack a courtroom, or insult, defame, threaten or assault judges, seriously disrupting the order of the courtroom, the people's court shall investigate their criminal liability in accordance with law; or if the circumstances are not serious, impose a fine or detention on them.

Article 111 Where a litigation participant or any other person commits any of the following conduct, the people's court may impose a fine or detention on the litigation participant or person according to the severity of the circumstances; and if suspected of any crime, the litigation participant or person shall be subject to criminal liability in accordance with law.

(1) Forging or destroying any material evidence, which obstructs the trial of the case by the people's court.

(2) Preventing a witness from testifying by violence, threat or bribery or instigating, bribing or coercing any other person to commit perjury.

(3) Concealing, transferring, selling or destroying any seized or impounded property or any inventoried property under the custody of the litigation participant or person as ordered or transferring any frozen property.

(4) Insulting, defaming, falsely incriminating, assaulting or retaliating any judge, primary litigation participant, witness, interpreter, identification expert, surveyor or person assisting in enforcement.

(5) Obstructing judicial personnel from performing their duties by violence, threat or any other means.

(6) Refusing to execute any effective judgment or ruling of a people's court.

Where an entity commits any of the conduct in the preceding paragraph, the people's court may impose a fine or detention on the primary person in charge or directly liable persons of the entity; and if suspected of any crime, such persons shall be subject to criminal liability in accordance with law.

Article 112 Where the parties, maliciously in collusion, attempt to infringe upon the lawful rights and interests of other persons by litigation, mediation or any other means, a people's court shall dismiss their claims and impose a fine or detention on the parties according to the severity of the circumstances; and if suspected of any crime, they shall be subject to criminal liability in accordance with law.

Article 113 Where the party against whom enforcement is sought, maliciously in collusion with other persons, evades performance of obligations determined in a legal instrument by litigation, arbitration, mediation or any other means, a people's court shall impose a fine or detention on them according to the severity of the circumstances; and if suspected of any crime, they shall be subject to criminal liability.

Article 114 Where an entity with an obligation to assist in investigation or enforcement commits any of the following conduct, the people's court may, in addition to ordering the

entity to perform the obligation of assistance, impose a fine on the entity:

(1) The relevant entity refuses or obstructs investigation or collection of evidence by the people's court.

(2) The relevant entity refuses to assist in property inquiry, seizure, freezing, transfer or sale, after receiving a notice of enforcement assistance from the people's court.

(3) The relevant entity refuses to assist in withholding the income of the party against whom enforcement is sought, handling the transfer of a relevant property right certificate, or delivering a relevant bill, certificate or license or any other relevant property, after receiving a notice of enforcement assistance from the people's court.

(4) The relevant entity otherwise refuses to assist in enforcement.

Where an entity commits any of the conduct in the preceding paragraph, the people's court may impose a fine on the primary person in charge or directly liable persons of the entity; and if the entity still fails to perform its obligation to provide assistance, may detain such persons and offer judicial recommendations to the supervisory authority or other relevant authorities regarding disciplinary actions against such persons.

Article 115 The amount of a fine on an individual shall not be more than 100,000 yuan. The amount of a fine on an entity shall not be less than 50,000 yuan but not be more than 1 million yuan.

The period of detention shall not be longer than 15 days.

A people's court shall deliver a detainee to a public security authority for custody. If the detainee admits and corrects his or her wrongdoing during the period of detention, the people's court may decide to discharge the detainee early.

Article 116 A summons by force, a fine or detention must subject to the approval of the president of a people's court.

A warrant shall be issued for a summons by force.

A written decision shall be made to impose a fine or detention. Against such a decision, a party may apply to the people's court at the next higher level for reconsideration once. The enforcement of the decision shall not be suspended during the period of reconsideration.

Article 117 Any compulsory measure against obstruction of civil procedures must be taken upon decision of a people's court. Any entity or individual which recovers a debt by illegally withholding another person against the person's will or illegally seizing another person's property shall be subject to criminal liability in accordance with law or subject to detention or a fine.

Chapter 11 Litigation Expenses

Article 118 A party instituting a civil action shall pay a case acceptance fee according to the relevant provisions. In property cases, a party shall pay other litigation expenses, in addition to a case acceptance fee.

Where it is difficult for a party to pay any litigation expenses, the party may, according to the relevant provisions, apply to the people's court for payment postponement, reduction or waiver.

Procedures for collection of litigation expenses shall be formulated separately.

Part Two Trial Procedure

Chapter 12 Formal Procedure at First Instance

Section 1 Instituting and Accepting an Action

Article 119 An action to be instituted must meet all of the following conditions:

- (1) The plaintiff is a citizen, legal person or any other organization with a direct interest in the case.
- (2) There is a clear defendant.
- (3) There are specific claims, facts and reasons.
- (4) The case is within the scope of civil actions accepted by the people's courts and under the jurisdiction of the people's court in which the action is instituted.

Article 120 A plaintiff shall submit a written complaint to the people's court and provide copies of it according to the number of defendants.

Where it is difficult for a plaintiff to write a complaint, the plaintiff may institute an action verbally, and the people's court shall record it in the transcripts and notify the opposing party.

Article 121 A written complaint shall state:

- (1) the name, gender, age, ethnicity, occupation, employer, domicile and contact methods of the plaintiff; or the name and domicile of a legal person or any other organization and the name, title and contact methods of the legal representative or primary person in charge thereof;
- (2) information on the defendant, including but not limited to name, gender, employer and domicile; and information on a legal person or any other organization, including but not limited to name and domicile;
- (2) claims and supporting facts and reasons; and
- (3) evidence, sources of evidence, and names and domiciles of witnesses.

Article 122 Where mediation is appropriate for the civil dispute involved in an action instituted by a party in a people's court, mediation shall be conducted first, unless the parties refuse mediation.

Article 123 A people's court shall protect the right to sue enjoyed by a party in accordance with law. A people's court must accept an action instituted under Article 119 of this Law. A people's court shall, within seven days, docket a case which meets the conditions for instituting an action and notify the party; or issue a ruling within seven days to refuse to accept an action which fails to meet the conditions for instituting an action, and the plaintiff may appeal against the ruling.

Article 124 A people's court shall handle the following actions according to different circumstances:

- (1) Notifying the plaintiff to file an administrative lawsuit, if the case is within the scope of administrative lawsuits in accordance with the Administrative Litigation Law.
- (2) Notifying the plaintiff to apply to an arbitral institution for arbitration, if, in accordance with law, both parties shall apply for arbitration under a written arbitration agreement reached

between them and are prohibited from instituting an action in a people's court.

(3) Notifying the plaintiff to apply to a relevant authority for settlement of a dispute, if, in accordance with law, the dispute shall be handled by other authorities.

(4) Notifying the plaintiff to institute an action in a people's court having jurisdiction, if the case is not within its jurisdiction.

(5) Notifying the plaintiff to petition for retrial, except for a ruling of a people's court which allows withdrawal of an action, if a party institutes an action again for a case for which a judgment, ruling or consent judgment has come into force.

(6) Refusing to accept an action instituted during a period of prohibition from instituting an action, if, in accordance with law, the action shall not be instituted during a certain period.

(7) Refusing to accept an action instituted by the plaintiff without new developments or new reasons within six months for a divorce case where dissolution of marriage is not granted by a judgment or both parties have reconciled through mediation or for a case where an adoptive relationship is maintained by a judgment or through mediation.

Section 2 Pretrial Preparations

Article 125 A people's court shall, within five days after docketing a case, serve a copy of the written complaint on the defendant, and the defendant shall submit a written statement of defense within 15 days after receiving the complaint. The written statement of defense shall state the name, gender, age, ethnicity, occupation, employer, domicile and contact methods of the defendant; or the name and domicile of a legal person or any other organization and the name, title and contact methods of the legal representative or primary person in charge thereof. The people's court shall, within five days after receiving the written statement of defense, serve a copy of it on the plaintiff.

The defendant's failure to submit a written statement of defense shall not affect the trial of the case by the people's court.

Article 126 After deciding to accept a case, a people's court shall notify the parties, verbally or in a notice of case acceptance or a notice of response to an action, of their relevant procedural rights and obligations.

Article 127 Where a party raises any objection to jurisdiction after a case is accepted by a people's court, the party shall file the objection with the people's court during the period of submitting a written statement of defense. The people's court shall examine the objection. If the objection is supported, the people's court shall issue a ruling to transfer the case to the people's court having jurisdiction; or if the objection is not supported, the people's court shall issue a ruling to dismiss the objection.

Where a party raises no objection to jurisdiction and responds to the action by submitting a written statement of defense, the people's court accepting the action shall be deemed to have jurisdiction, unless the provisions regarding hierarchical jurisdiction and exclusive jurisdiction are violated.

Article 128 The parties shall be notified of the composition of a collegial bench within three days after the composition is determined.

Article 129 Judges must carefully examine case materials and investigate and collect necessary evidence.

Article 130 The personnel assigned by a people's court to conduct investigation shall produce their credentials to the person under investigation.

The investigation transcripts shall be checked by the person under investigation and be signed or sealed by the person under investigation and the investigators.

Article 131 A people's court may, when necessary, entrust investigation to a people's court in a different place.

The entrusting people's court must specify the investigated matters and the investigation requirements. The entrusted people's court may conduct additional investigation on its own initiative.

The entrusted people's court shall complete investigation within 30 days after receiving a letter on entrusted investigation. If the entrusted people's court is unable to complete investigation for certain reasons, it shall notify the entrusting people's court in a letter within the aforesaid period.

Article 132 Where a party who must participate in a joint action fails to participate in the action, the people's court shall notify the party to participate in the action.

Article 133 A people's court shall handle accepted cases according to different circumstances:

(1) Initiating the procedure for urging debt repayment at the court's discretion, if the parties are not in dispute and the prescribed conditions are met for initiating the procedure for urging debt repayment.

(2) Resolving disputes in a timely manner through mediation, if pre-trial mediation is allowed.

(3) Determining the application of summary procedure or formal procedure according to the circumstances of a case.

(4) Clarifying the focus of disputes by requiring the parties to exchange evidence and other means, if it is necessary to hold a court session.

Section 3 Court Trial

Article 134 A people's court shall try civil cases openly, except those involving any state secret or individual privacy or as otherwise provided by law.

Divorce cases and cases involving any trade secret may be tried in camera upon application of the parties.

Article 135 A people's court may, as needed, try civil cases in a circuit manner and on the spot.

Article 136 A people's court shall notify the parties and other litigation participants of the trial of a civil case three days before holding a court session. If the case is to be tried openly, the names of parties, cause of action, and time and location of court session shall be published.

Article 137 Before a court session begins, the court clerk shall check whether the parties and other litigation participants are present and announce court rules.

When a court session begins, the presiding judge shall check the identity of each party,

announce the cause of action, announce the names of judges and court clerk, notify the parties of their relevant procedural rights and obligations, and ask the parties whether they file any requests for disqualification.

Article 138 Court investigation shall be conducted in the following order:

- (1) The parties each present a statement.
- (2) Witnesses are notified of their rights and obligations, witnesses testify, and the statements of absent witnesses are read.
- (3) Documentary evidence, physical evidence, audio-visual recordings, and electronic data are adduced.
- (4) Expert opinions are read.
- (5) Transcripts of survey are read.

Article 139 The parties may adduce new evidence in court.

As permitted by the court, a party may question a witness, identification expert or surveyor. A party's request for reinvestigation, re-identification or resurvey shall be subject to the decision of the people's court.

Article 140 The added claims of a plaintiff, the counterclaim of a defendant, and a third party's claims related to the case may be tried concurrently.

Article 141 Court debate shall be conducted in the following order:

- (1) The plaintiff and the litigation representative thereof present their case.
- (2) The defendant and the litigation representative thereof present their arguments.
- (3) A third party and the litigation representative thereof present their case or their arguments.
- (4) Debate among the parties.

At the end of court debate, the presiding judge shall ask each side's final statement in the order of plaintiff, defendant and third party.

Article 142 After the end of court debate, a judgment shall be entered in accordance with law. Where mediation is possible before a judgment is entered, mediation may be conducted; and if mediation fails, a judgment shall be entered in a timely manner.

Article 143 Where a plaintiff refuses to appear in court without justifiable reasons after being summonsed or leaves the courtroom during a court session without permission from the court, the court may deem that the plaintiff has withdrawn the action; and if the defendant has filed a counterclaim, the court may enter a default judgment.

Article 144 Where a defendant refuses to appear in court without justifiable reasons after being summonsed or leaves the courtroom during a court session without permission from the court, the court may enter a default judgment.

Article 145 Where a plaintiff requests withdrawal of the action before a judgment is pronounced, the people's court shall issue a ruling on whether to grant such a request.

If the people's court decides not to grant the request and the plaintiff refuses to appear in court without justifiable reasons after being summonsed, the people's court may enter a default judgment.

Article 146 Under any of the following circumstances, a court session may be postponed:

- (1) A party or any other litigation participant which must appear in court fails to appear in court for justifiable reasons.
- (2) A party files an unexpected request for disqualification.
- (3) It is necessary to notify a new witness to appear in court, collect new evidence, conduct re-identification or resurvey, or conduct further investigation.
- (4) Other circumstances requiring postponement.

Article 147 The court clerk shall record all court trial activities in transcripts, to which the judges and court clerk shall affix their signatures.

The court transcripts shall be read out in court, and the parties and other litigation participants may be notified to read the court transcripts in court or within five days. If the parties and other litigation participants deem that there are any omissions or errors in the court transcripts regarding their respective statements, they shall be entitled to request supplementation or correction. If no supplementation or correction is permitted, their requests shall be on record.

The parties and other litigation participants shall affix their signatures or seals to the court transcripts. The court transcripts shall record any refusals to affix signatures or seals and be attached to the case file.

Article 148 Whether a case is tried openly or in camera, a people's court shall, without exception, pronounce its judgment publicly.

If a judgment is pronounced in court, a written judgment shall be issued within ten days; or if a judgment is pronounced later on a fixed date, a written judgment shall be issued immediately after pronouncement.

When a judgment is pronounced, the parties must be notified of their right to appeal, the time limit for appeal, and the appellate court.

When a divorce judgment is pronounced, the parties must be notified that neither of them may marry another person before the judgment takes effect.

Article 149 A people's court shall complete the trial of a case under formal procedure within six months after the case is docketed. If an extension of the period is necessary under special circumstances, the period may be extended for six months with the approval of the president of the people's court; and any further extension shall be subject to the approval of the superior of the people's court.

Section 4 Suspension and Termination of an Action

Article 150 Under any of the following circumstances, an action shall be suspended:

- (1) A party dies and it is necessary to wait for his or her successors to indicate whether they will participate in the action.
- (2) A party loses his or her litigation competency and his or her legal representative has not been determined.
- (3) A party which is a legal person or any other organization is terminated and the successors to the rights and obligations of the party have not been determined.
- (4) A party is unable to participate in the action for reasons beyond the party's control.

(5) The action must depend on the results of the trial of another case which has not been concluded.

(6) Other circumstances requiring suspension.

The action shall resume after the cause of suspension is eliminated.

Article 151 Under any of the following circumstances, an action shall be terminated:

(1) The plaintiff dies without successors or all of his or her successors waive their procedural rights.

(2) The defendant dies without estate and without any person which shall assume the defendant's obligations.

(3) In a divorce case, either party dies.

(4) In a case to recover support for elderly parents, support for other adult dependants or child support or to rescind an adoptive relationship, either party dies.

Section 5 Judgments and Rulings

Article 152 A written judgment shall state the results of judgment and reasons for entering the judgment. The content of a written judgment includes:

(1) the cause of action, claims, facts in dispute, and reasons;

(2) the facts found and reasons and the laws applied and reasons in the judgment;

(3) the results of judgment and the assumption of litigation expenses; and

(4) the time limit for filing an appeal and the appellate court.

The judges and court clerk shall affix their signatures and the people's court shall affix its seal to the written judgment.

Article 153 Where a portion of the facts of a case tried by a people's court has been ascertained, the people's court may first enter a judgment regarding such facts.

Article 154 The scope of application of a ruling shall include:

(1) Refusing to accept an action;

(2) Objection to jurisdiction;

(3) Dismissing an action;

(4) Preservation and advance enforcement;

(5) Granting or not granting the withdrawal of an action;

(6) Suspension or termination of an action;

(7) Correcting typos in a written judgment;

(8) Suspension or termination of enforcement;

(9) revoking or not enforcing an arbitration award;

(10) Refusing to enforce a debt instrument with enforceability legally granted by a notary office; and

(11) Other issues to be resolved by a ruling.

A ruling in items (1) to (3) of the preceding paragraph is appealable.

A written ruling shall state the results of ruling and reasons for issuing the ruling. The judges and court clerk shall affix their signatures and the people's court shall affix its seal to a written ruling. A verbal ruling shall be recorded in transcripts.

Article 155 The judgments and rulings of the Supreme People's Court and the judgments and rulings not appealable in accordance with law or not appealed during the prescribed time limit shall be effective judgments and rulings.

Article 156 The public may consult effective written judgments and rulings, except content involving any national secret, trade secret or individual privacy.

Chapter 13 Summary Procedure

Article 157 Where a basic people's court and its detached tribunals try simple civil cases with clear facts, unambiguous rights and obligations and minor disputes, the provisions of this Chapter shall apply.

Where a basic people's court and its detached tribunals try civil cases other than those in the preceding paragraph, the parties may agree on the application of summary procedure.

Article 158 In simple civil cases, the plaintiff may institute an action verbally.

Both sides may appear at the same time before a basic people's court or its detached tribunal for resolution of a dispute. The basic people's court or its detached tribunal may try the case immediately or schedule the trial for another day.

Article 159 When trying simple civil cases, a basic people's court and its detached tribunals may, in simple manners, summon the parties and witnesses, serve process and try cases but shall protect the parties' right to present a statement.

Article 160 Not subject to Articles 136, 138 and 141 of this Law, a simple civil case shall be tried by a sole judge.

Article 161 A people's court which tries a case under summary procedure shall complete the trial of the case within three months after the case is docketed.

Article 162 Where a basic people's court or its detached tribunal tries a simple civil case as described in paragraph 1 of Article 157 of this Law, if the amount of subject matter is lower than 30 percent of the previous year's average annual wages of workers in a province, autonomous region or municipality directly under the Central Government, the adjudication of the basic people's court or detached tribunal shall be final.

Article 163 A people's court which discovers during the trial of a case that the application of summary procedure is not appropriate for the case shall issue a ruling to transfer the case into formal procedure.

Chapter 14 Procedure at Second Instance

Article 164 Against a first instance judgment of a local people's court, a party shall have the right to file an appeal with the people's court at the next higher level within 15 days from the date of service of the written judgment.

Against a first instance ruling of a local people's court, a party shall have the right to file an appeal with the people's court at the next higher level within 10 days from the date of service of the written ruling.

Article 165 An appellant shall submit a written appeal. The written appeal shall include the names of the parties which are natural persons, names of a legal person and its legal representative or names of any other organization and its primary person in charge; the

name of the original trial people's court, case number and cause of action; and the claims in appeal and reasons for appeal.

Article 166 An appellant shall submit a written appeal through the original trial people's court and provide copies of it according to the number of the opposing parties or the representatives of the opposing parties.

Where a party appeals directly to a people's court of second instance, the people's court of second instance shall, within five days, transfer the written appeal to the original trial people's court.

Article 167 The original trial people's court shall, within five days after receiving a written appeal, serve the copies of the written appeal on the opposing parties, and the opposing parties shall, within 15 days after receiving the copies, submit their written statements of defense. The original trial people's court shall, within five days after receiving the written statements of defense, serve the copies of the written statements of defense on the appellant. The trial of the case by a people's court shall not be affected by an opposing party's failure to submit a written statement of defense.

After receiving both the written appeal and the written statements of defense, the original trial people's court shall, within five days, transfer them along with the entire case file and evidence to the people's court of second instance.

Article 168 The people's court of second instance shall review the facts and application of law in relation to the claims in appeal.

Article 169 The people's court of second instance shall form a collegial bench to try an appeal case in a court session. Where, after consultation of the case file, investigation and questioning of the parties, no new fact, evidence or reason is submitted, the collegial bench may decide not to hold a court session if deeming a court session unnecessary.

The people's court of second instance may try an appeal case in its own courtroom or at the place where the case occurred or where the original trial people's court is located.

Article 170 After trial, the people's court of second instance shall handle appeal cases according to the following different circumstances:

(1) Dismissing an appeal and sustaining the original judgment or ruling in the form of a judgment or ruling, if the original judgment or ruling is clear in fact finding and correct in application of law.

(2) Reversing, revoking or modifying the original judgment or ruling in accordance with law in the form of a judgment or ruling, if the original judgment or ruling is erroneous in fact finding or application of law.

(3) Issuing a ruling to revoke the original judgment and remand the case to the original trial people's court for retrial or reversing the original judgment after ascertaining facts, if the original judgment is unclear in finding the basic facts.

(4) Issuing a ruling to revoke the original judgment and remand the case to the original trial people's court, if the original judgment seriously violates statutory procedures, such as omitting a party or illegally entering a default judgment.

Where, after the original trial people's court enters a judgment for a case remanded for retrial, a party appeals the judgment, the people's court of second instance shall not remand the case again for retrial.

Article 171 The people's court of second instance shall, without exception, issue a ruling after trial of an appeal against a ruling of the people's court of first instance.

Article 172 When trying an appeal case, the people's court of second instance may conduct mediation. If a mediation agreement is reached, a consent judgment shall be prepared, to which the judges and court clerk shall affix their signatures and the people's court shall affix its seal. Upon service of the consent judgment, the judgment of the original trial people's court shall be deemed revoked.

Article 173 Where an appellant requests withdrawal of its appeal before the people's court of second instance pronounces its judgment, the people's court of second instance shall issue a ruling on whether to grant such a request.

Article 174 Subject to the provisions of this Chapter, a people's court of second instance shall try appeal cases under the formal procedure at first instance.

Article 175 The judgments and rulings of a people's court of second instance shall be final.

Article 176 A people's court shall complete the trial of an appeal case against a judgment within three months after the appeal is docketed. Any extension of the aforesaid period under special circumstances shall be subject to the approval of the president of the people's court. A people's court shall issue a final ruling for an appeal case against a ruling within 30 days after the appeal is docketed.

Chapter 15 Special Procedures

Section 1 General Provisions

Article 177 The people's courts shall try voter eligibility cases, missing person declaration and death declaration cases, cases of determining civil incompetency or limited civil competency of citizens, cases of determining unclaimed property, cases of confirming mediation agreements and cases of security interest realization in accordance with the provisions of this Chapter. Where this Chapter is silent, the relevant provisions of this Law and other laws shall apply.

Article 178 For cases tried under procedures in this Chapter, the trial results are not appealable. A collegial bench consisting of judges only shall be formed to try a voter eligibility case or a significant or difficult case; and any other case shall be tried by a sole judge.

Article 179 A people's court which discovers during the trial of a case under a procedure in this Chapter that the case involves a dispute over civil rights and interests shall issue a ruling to terminate the special procedure and notify the interested parties that they may institute a separate action.

Article 180 A people's court shall complete the trial of a case under a special procedure within 30 days after the case is docketed or within 30 days after the period of public announcement expires. Any extension of the aforesaid trial period under special circumstances shall be subject to the approval of the president of the people's court. This

article is not applicable to the trial of voter eligibility cases.

Section 2 Voter Eligibility Cases

Article 181 Against an election committee's decision on a petition regarding voter eligibility, a citizen may, five days before the election day, institute an action in the basic people's court at the place where the electoral district is located.

Article 182 After accepting a voter eligibility case, a people's court must complete the trial of the case before the election day.

The plaintiff, the representative of the election committee and the relevant citizen must participate in the trial.

The written judgment of the people's court shall be served on the election committee and the plaintiff before the election day, and the relevant citizen shall be notified.

Section 3 Missing Person Declaration and Death Declaration Cases

Article 183 Where the whereabouts of a citizen has been unknown for two years and an interested party applies for declaration of the citizen to be missing, the application shall be filed with the basic people's court at the place of domicile of the citizen whose whereabouts is unknown.

The written application shall state the fact and time of disappearance and claims, to which a written certificate issued by a public security authority or any other relevant authority regarding the fact that citizen's whereabouts is unknown shall be attached.

Article 184 Where the whereabouts of a citizen has been unknown for four years, has been unknown for involvement in an accident for two years, or has been unknown for involvement in an accident which the citizen cannot survive according to a certificate issued by a relevant authority, if an interested party applies for declaration of the citizen to be dead, the application shall be filed with the basic people's court at the place of domicile of the citizen whose whereabouts is unknown.

The written application shall state the fact and time of the citizen's whereabouts being unknown and claims, to which a written certificate issued by a public security authority or any other relevant authority regarding the fact that the citizen's whereabouts is known shall be attached.

Article 185 After accepting a missing person declaration or death declaration case, a people's court shall issue a public announcement to search for the missing person. The period of public announcement for declaring a person to be missing shall be three months, and the period of public announcement for declaring a person to be dead shall be one year. Where a citizen's whereabouts has been unknown for his or her involvement in an accident which the citizen cannot survive according to a certificate issued by a relevant authority, the period of public announcement for declaring the citizen to be dead shall be three months. Upon expiration of the aforesaid period of public announcement, the people's court shall, according to whether the missing or death of the citizen to be declared has been confirmed as a fact, enter a judgment to declare that the person is missing or dead or enter a judgment to dismiss the application.

Article 186 Where a citizen who has been declared to be missing or dead reappears, the people's court shall, upon application of the citizen or an interested party, enter a new judgment to revoke the original one.

Section 4 Cases of Determining Civil Incompetency or Limited Civil Competency of Citizens

Article 187 For the determination of a citizen's civil incompetency or limited civil competency, an application shall be filed by a close relative of the citizen or any other interested party with the basic people's court at the place of domicile of the citizen.

The written application shall state the facts and basis regarding the citizen's civil incompetency or limited civil competency.

Article 188 After accepting an application, a people's court shall, when necessary, conduct identification of the citizen's civil incompetency or limited civil competency to be determined upon application. If the applicant has provided an expert opinion, the people's court shall examine the expert opinion.

Article 189 Where a people's court tries a case of determining a citizen's civil incompetency or limited civil competency, a close relative, other than the applicant, of the citizen shall serve as the citizen's representative. If the close relatives of the citizen shift their duty of representation onto each other, the people's court shall specify one of them as the representative of the citizen. If the citizen's health status allows, the people's court shall also solicit the opinion of the citizen.

If, upon trial, the people's court holds that the application is supported by facts, it shall enter a judgment to determine that the citizen is a person without civil competency or with limited civil competency; otherwise, it shall enter a judgment to dismiss the application.

Article 190 Upon application of a person who has been determined as a person without civil competency or with limited civil competency or application of his or her guardian, a people's court shall enter a new judgment to revoke the original one if it is evidenced that the cause of the person's civil incompetency or limited civil competency has been eliminated.

Section 5 Cases of Determining Unclaimed Property

Article 191 For the determination of unclaimed property, a citizen, a legal person or any other organization shall file an application with the basic people's court at the place where the property is located.

The written application shall state the kind and quantity of property and the grounds for requesting determination of unclaimed property.

Article 192 After accepting an application, the people's court shall conduct examination and verification and issue a public announcement on claiming the property. If no one claims the property upon one year from the date of public announcement, the people's court shall enter a judgment to determine that the property is unclaimed property and therefore owned by the state or a collective.

Article 193 Where, after any property is determined as unclaimed property in a judgment, the original owner of the property or the successor thereto appears, the original owner or successor may claim the property within the time limitation prescribed in the General

Principles of Civil Law, the people's court shall, after examination and verification, enter a new judgment to revoke the original one.

Section 6 Cases of Confirming Mediation Agreements

Article 194 To apply for judicial confirmation of a mediation agreement, both parties to the mediation agreement shall, in accordance with the People's Mediation Law and other laws, jointly file an application with the basic people's court of the place where the mediation organization is located within 30 days from the effective date of the mediation agreement.

Article 195 After accepting an application, if the application complies with legal provisions upon examination, the people's court shall issue a ruling to affirm the validity of the mediation agreement, and if one party refuses to perform or fails to fully perform the mediation agreement, the opposing party may apply for enforcement to the people's court; or if the application does not comply with legal provisions upon examination, the people's court shall issue a ruling to dismiss the application, and the parties may, through mediation, modify the mediation agreement or reach a new mediation agreement and may also institute an action in a people's court.

Section 7 Cases of Security Interest Realization

Article 196 To apply for realization of a security interest, the security interest holder or any other party entitled to request realization of the security interest shall, in accordance with the Property Law and other laws, file an application with the basic people's court at the place where the property posted as security is located or at the place of registration of the security interest.

Article 197 After accepting an application, if the application complies with legal provisions upon examination, the people's court shall issue a ruling to auction or sell the property posted as security, and the parties may, based on the ruling, apply for enforcement to the people's court; or if the application does not comply with legal provisions, the people's court shall issue a ruling to dismiss the application, and the party may institute an action in a people's court.

Chapter 16 Trial Supervision Procedure

Article 198 Where the president of a people's court at any level discovers any error in any effective judgment, ruling or consent judgment of the court and deems a retrial necessary, the president shall submit it to the judicial committee for deliberation and decision.

Where the Supreme People's Court discovers any error in any effective judgment, ruling or consent judgment of a local people's court at any level or a people's court at a higher level discovers any error in any effective judgment, ruling or consent judgment of a people's court at a lower level, the Supreme People's Court or the court at a higher level shall have the power to directly retry the case or specify a people's court at a lower level to retry the case.

Article 199 A party which deems that an effective judgment or ruling is erroneous may file a petition for retrial with the people's court at the next higher level; and if the parties on one side are numerous or the parties on both sides are citizens, the parties may file a petition for retrial with the original trial people's court. Where a party files a petition for retrial, the

execution of the judgment or ruling shall not be discontinued.

Article 200 Where a petition for retrial filed by a party falls under any of the following circumstances, the people's court shall conduct a retrial:

- (1) There is any new evidence which suffices to overturn the original judgment or ruling.
- (2) The basic facts found in the original judgment or ruling are not evidenced.
- (3) The primary evidence admitted in the original judgment or ruling for finding facts is forged.
- (4) The primary evidence admitted in the original judgment or ruling for finding facts has not been cross-examined.
- (5) For objective reasons, a party is unable to gather any primary evidence necessary for the trial of a case and applies in writing for the people's court to investigate and gather the evidence, but the people's court has not investigated and gathered the evidence.
- (6) There is any erroneous application of law in the original judgment or ruling.
- (7) The composition of the trial organization is illegal or any judge who shall be disqualified in accordance with law fails to be disqualified.
- (8) The legal representative of a person without competency to participate in the action fails to participate in the action on behalf of the person or a party which shall participate in the action fails to participate in the action, which is not attributable to the fault of the party or the litigation representative thereof.
- (9) A party's right to debate is illegally denied.
- (10) A default judgment is entered against a party which has not been summonsed.
- (11) The original judgment or ruling has omitted any claims or exceeded the claims of the parties.
- (12) The legal instrument on which the original judgment or ruling is based has been revoked or modified.
- (13) When trying the case, a judge commits embezzlement, accepts bribes, practices favoritism for personal gains, or adjudicates by bending the law.

Article 201 Where, against an effective consent judgment, a party adduces any evidence that the mediation has violated the principle of free will of the parties or any content of the mediation agreement has violated law, the party may petition for retrial. The people's court shall, upon examination and verification, conduct a retrial.

Article 202 A party shall not file a petition for retrial against an effective judgment or consent judgment which dissolves a marital relationship.

Article 203 A party which petitions for retrial shall submit a written retrial petition and other materials. The people's court shall, within five days after receiving the written retrial petition, serve the copies of the written retrial petition on the opposing parties. The opposing parties shall submit their written opinions within 15 days after receiving the copies of the written retrial petition; and any opposing party's failure to submit a written opinion shall not affect the examination of the petition by the people's court. The people's court may require the petitioner and the opposing parties to provide relevant supplements and may question them on relevant matters.

Article 204 A people's court shall, within three months after receiving a written retrial petition, examine the petition and, if the petition complies with the provisions of this Law, issue a ruling to retry the case; or if the petition does not comply with the provisions of this Law, issue a ruling to dismiss the petition. Where, under special circumstances, an extension of the aforesaid period is necessary, the extension shall be subject to the approval of the president of the people's court.

A case to be retried according to a ruling issued upon petition of a party shall be retried by a people's court at or above the level of an intermediate people's court, except a case to be retried by a basic people's court upon petition as chosen by the parties under Article 199 of this Law. A case to be retried according to a ruling issued by the Supreme People's Court or a higher people's court shall be retried by the court issuing the ruling, and the court issuing the ruling may transfer the case to any other people's court including the original trial people's court for retrial.

Article 205 A party which petitions for retrial shall file a petition for retrial within six months from the effective date of a judgment or ruling; or under the circumstances of item (1), (3), (12) or (13) of Article 200 of this Law, file a petition for retrial within six months from the day when the party knows or should have known.

Article 206 For a case retried according to a decision made under the trial supervision procedure, a ruling shall be issued to suspend the execution of the original judgment, ruling or consent judgment, but suspension of execution is not required for cases to recover support for elderly parents, support for other adult dependants, child support, consolation money, medical expenses, and labor remuneration, among others.

Article 207 For a case to be retried by a people's court under the trial supervision procedure, if the effective judgment or ruling was entered by a court of first instance, the people's court shall retry the case under the procedure at first instance, and the judgment or ruling entered by the people's court is appealable; if the effective judgment or ruling was entered by a court of second instance, the people's court shall retry the case under the procedure at second instance, and the judgment or ruling entered by the people's court shall be immediately effective; or if the case is directly retried by a people's court at a higher level, the people's court at a higher level shall retry the case under the procedure at second instance, and the judgment or ruling entered by the people's court at a higher level shall be immediately effective.

A people's court shall form a new collegial bench to retry a case.

Article 208 Where the Supreme People's Procuratorate discovers that any effective judgment or ruling of a people's court at any level falls under any of the circumstances set out in Article 200 of this Law or any effective consent judgment thereof causes any damage to the national interest or public interest, or a people's procuratorate at a higher level discovers that any effective judgment or ruling of a people's court at a lower level falls under any of the circumstances set out in Article 200 of this Law or any effective consent judgment thereof causes any damage to the national interest or public interest, the Supreme People's

Procuratorate or the people's procuratorate at a higher level shall file an appeal.

Where a local people's procuratorate at any level discovers that any effective judgment or ruling of a people's court at the same level falls under any of the circumstances set out in Article 200 of this Law or discovers that any consent judgment thereof causes any damage to the national interest or public interest, the people's procuratorate may offer procuratorial recommendations to the people's court at the same level and file a report with the people's procuratorate at the next higher level; and may also request the people's procuratorate at the next higher level to file an appeal with the people's court at the corresponding level.

A people's procuratorate at any level shall have the authority to offer procuratorial recommendations to the people's court at the same level regarding violations of law by judges in trial procedures other than the trial supervision procedure.

Article 209 Under any of following circumstances, a party may apply to a people's procuratorate for procuratorial recommendations or appeal:

- (1) A people's court dismisses a petition for retrial.
- (2) A people's court fails to issue a ruling regarding a petition for retrial within the prescribed time limit.
- (3) The judgment or ruling entered after retrial is clearly erroneous.

The people's procuratorate shall, within three months, examine the party's application and make a decision to offer or not to offer procuratorial recommendations or a decision to file or not to file an appeal. The party shall not apply again to the people's procuratorate for offering procuratorial recommendations or filing an appeal.

Article 210 A people's procuratorate may, as necessary for offering procuratorial recommendations or filing an appeal to perform its duty of legal supervision, investigate and verify relevant information from the parties or those who are not parties to a case.

Article 211 For a case where a people's procuratorate files an appeal, the people's court accepting the appeal shall issue a ruling on retrial within 30 days after receiving the written appeal; and under any of the circumstances set out in items (1) to (5) of Article 200 of this Law, may transfer the case to the people's court at the next lower level for retrial unless the case has been retried by the people's court at the next lower level.

Article 212 A people's procuratorate which files an appeal against a judgment, ruling or consent judgment of a people's court shall prepare a written appeal.

Article 213 When a people's court retries a case upon appeal of a people's procuratorate, the people's court shall notify the people's procuratorate to send personnel to be present in court.

Chapter 17 Procedure for Urging Debt Repayment

Article 214 A creditor which requests a debtor to repay money or negotiable securities may apply to the basic people's court having jurisdiction to issue an order for payment if the following conditions are met:

- (1) There are no other debt disputes between the creditor and the debtor.
- (2) The order for payment can be served on the debtor.

The creditor's written application shall state the amount of money or negotiable securities to be repaid and the facts and evidence on which the application is based.

Article 215 After a creditor files an application, the people's court shall, within five days, notify the creditor whether the application is accepted.

Article 216 After accepting an application, the people's court shall examine the facts and evidence provided by the creditor and, if the creditor-debtor relationship is clear and legal, issue an order for payment to the debtor within 15 days after accepting the application; or if the application is not supported, issue a ruling to dismiss the application.

The debtor shall, within 15 days after receiving the order for payment, repay the debt or submit a written objection to the people's court.

If the debtor has neither submitted an objection nor complied with the order for payment during the period prescribed in the preceding paragraph, the creditor may apply to the people's court for enforcement of the order for payment.

Article 217 After receiving a written objection from a debtor, if the objection is supported upon examination, a people's court shall issue a ruling to terminate the procedure for urging debt repayment, and the order for payment shall be automatically invalidated.

Where an order for payment is invalidated, the litigation procedure shall be initiated, unless the party applying for the order for payment disagrees to institute an action.

Chapter 18 Procedure for Announcement to Urge Declaration of Claims

Article 218 The holder of an instrument negotiable by endorsement according to the relevant provisions may, if the instrument is stolen, lost or extinguished, apply to the basic people's court at the place of payment of the instrument for an announcement to urge declaration of claims. The provisions of this Chapter shall also apply to other matters regarding which an announcement to urge declaration of claims may be applied for according to legal provisions. The applicant shall file a written application with the people's court, which shall state the main content of the instrument, such as the face value, issuer, holder and endorser, as well as the grounds and facts for the application.

Article 219 Where a people's court decides to accept an application, the people's court shall, at the same time, notify the drawee to stop payment and, within three days, issue an announcement to urge interested parties to declare their claims. The period of declaration of claims shall be decided by a people's court according to the specific circumstances but shall not be less than sixty days.

Article 220 The drawee shall, upon receiving a notice of stopping payment from a people's court, stop payment until the termination of the procedure for announcement to urge declaration of claims.

During the period of declaration of claims, any transfer of rights under the instrument shall be void.

Article 221 Interested parties shall declare their claims to the people's court during the period of declaration of claims.

After receiving claims from interested parties, the people's court shall issue a ruling to

terminate the procedure for announcement to urge declaration of claims and notify the applicant and the drawee.

The applicant or a claimant may institute an action in the people's court.

Article 222 Where no one declares a claim, the people's court shall enter a judgment according to the application to declare the instrument to be void. The judgment shall be publicly announced, and the drawee shall be notified. From the date of announcement of the judgment, the applicant shall be entitled to require payment from the drawee.

Article 223 Where, for any justifiable reasons, any interested party is unable to declare its claims to the people's court before a judgment is entered, the interested party may, within one year from the day when the interested party knows or should have known the public announcement of the judgment, institute an action in the people's court which entered the judgment.

Part Three Enforcement Procedure

Chapter 19 General Provisions

Article 224 An effective civil judgment or ruling or the property portion of a criminal judgment or ruling shall be enforced by the people's court of first instance or the people's court at the same level as the people's court of first instance at the place where the property under enforcement is located.

Other legal instruments enforced by a people's court as prescribed by law shall be enforced by the people's court at the place of domicile of the party against whom enforcement is sought or at the place where the property under enforcement is located.

Article 225 Where a party or an interested party deems that enforcement has violated any legal provisions, the party or interested party may file a written objection with the people's court in charge of enforcement. Where a party or an interested party files a written objection, the people's court shall examine the written objection within 15 days after receiving it and, if the objection is supported, issue a ruling to revoke or correct enforcement; or if the objection is not supported, issue a ruling to dismiss the objection. Against such a ruling, the party or interested party may apply for reconsideration to the people's court at the next higher level within ten days after the ruling is served.

Article 226 Where a people's court fails to conduct enforcement within six months after receiving a written application for enforcement, the applicant for enforcement may apply for enforcement to the people's court at the next higher level. Upon examination, the people's court at the next higher level may order the original people's court to conduct enforcement within a certain time limit or decide to conduct enforcement by itself or order another people's court to conduct enforcement.

Article 227 Where, during enforcement, a person which is not a party to the case files a written objection regarding the subject matter of enforcement, the people's court shall examine the written objection within 15 days after receiving it and, if the objection is supported, issue a ruling to suspend enforcement against the subject matter; or if the objection is not supported, issue a ruling to dismiss the objection. If the person which is not

a party to the case or a party disagrees on such a ruling and deems that the original judgment or ruling is erroneous, the trial supervision procedure shall apply; or if such disagreement is irrelevant to the original judgment or ruling, the person or the party may institute an action in a people's court within 15 days after the aforesaid ruling regarding objection is served.

Article 228 Enforcement shall be conducted by enforcement personnel.

When taking enforcement measures, the enforcement personnel shall produce their credentials. After completion of enforcement, the enforcement personnel shall prepare enforcement transcripts, to which the relevant persons on the site shall affix their signatures or seals.

A people's court may, as needed, establish an enforcement department.

Article 229 Where the party against whom enforcement is sought or the property under enforcement is in a different place, enforcement may be entrusted to the people's court in the different place. The entrusted people's court must begin enforcement within 15 days after receiving a letter of entrustment and shall not refuse enforcement. After completion of enforcement, the entrusted people's court shall notify in a letter the entrusting people's court of the results of enforcement; or if enforcement cannot be completed within 30 days, the entrusted people's court shall also notify in a letter the entrusting people's court of the status of enforcement.

If the entrusted people's court fails to begin enforcement within 15 days after receiving a letter of entrustment, the entrusting people's court may request the superior of the entrusted people's court to order the entrusted people's court to conduct enforcement.

Article 230 Where, during enforcement, both sides reach a settlement agreement, the enforcement personnel shall record the provisions of the settlement agreement in the enforcement transcripts, to which both sides shall affix their signatures or seals.

Where the applicant for enforcement reaches a settlement agreement as a victim of a fraud or under duress with the party against whom enforcement is sought or a party fails to perform a settlement agreement, the people's court may, upon application of a party, resume the enforcement of the original effective legal instrument.

Article 231 Where, during enforcement, the party against whom enforcement is sought provides security to the people's court, the people's court may, with the consent of the applicant for enforcement, decide to suspend enforcement and decide a period of suspension. If the party against whom enforcement is sought fails to perform its obligations within the aforesaid period, the people's court shall have the power to conduct enforcement against the property posted as security by the party against whom enforcement is sought or the property of any guarantor.

Article 232 Where a citizen as the party against whom enforcement is sought dies, his or her debts shall be repaid with his or her estate. Where a legal person or any other organization as the party against whom enforcement is sought is terminated, the successors to the rights and obligations of the legal person or organization shall perform the obligations of the legal person or organization.

Article 233 Where, after completion of enforcement, the judgment, ruling or any other legal document on which enforcement is based is revoked by a people's court for any errors, the people's court shall issue a ruling on the property which has undergone enforcement to order the party which has acquired the property to return the property; and if the party refuses to return the property, the people's court shall conduct enforcement.

Article 234 The provisions of this Part shall also apply to the enforcement of a consent judgment of a people's court.

Article 235 The people's procuratorates shall have the authority to conduct legal supervision over civil enforcement.

Chapter 20 Application and Transfer for Enforcement

Article 236 The parties must comply with an effective civil judgment or ruling. If a party refuses to comply, the opposing party may apply to the people's court for enforcement, and the judges may also transfer the case to the enforcement personnel for enforcement.

The parties must comply with a consent judgment and other legal instruments enforced by a people's court. If a party refuses to comply, the opposing party may apply to the people's court for enforcement.

Article 237 Where a party refuses to comply with an award rendered by a legally established arbitral institution, the opposing party may apply for enforcement to the people's court having jurisdiction. The people's court accepting the application shall enforce the award.

Where the respondent adduces evidence that the arbitration award falls under any of the following circumstances, the people's court shall, upon examination and verification by a collegial bench, issue a ruling not to enforce the arbitration award:

- (1) The contract between the parties does not include an arbitration clause or the parties have not reached any written arbitration agreement after a dispute arose.
- (2) The matters arbitrated are outside the scope of an arbitration agreement or the arbitral institution has no arbitration power.
- (3) The composition of the arbitration tribunal or the arbitration procedure has violated the statutory procedures.
- (4) The evidence for rendering the award is forged.
- (5) The opposing party withholds any evidence to the arbitral institution, which suffices to affect an impartial award.
- (6) When arbitrating the case, any arbitrator commits embezzlement, accepts bribes, practices favoritism for personal gains, or renders the award by bending the law.

If a people's court holds that the enforcement of an arbitration award is contrary to the public interest, the people's court shall issue a ruling not to enforce the award.

Such a ruling shall be served on both sides and the arbitral institution.

Where an arbitration award is not enforced according to a ruling of a people's court, the parties may, according to a written arbitration agreement reached by them, apply again to an arbitral institution for arbitration or institute an action in a people's court.

Article 238 Where a party fails to comply with a debt instrument with enforceability legally

granted by a notary office, the opposing party may apply to the people's court having jurisdiction for enforcement, and the people's court accepting the application shall conduct enforcement.

If the notarized debt instrument is erroneous, the people's court shall issue a ruling not to enforce the debt instrument and serve a written ruling on both sides and the notary office.

Article 239 The period for applying for enforcement shall be two years. The suspension or interruption of the time limitation for applying for enforcement shall be governed by legal provisions regarding the suspension or interruption of the time limitations for instituting an action.

The period in the preceding paragraph shall begin from the last day of the performance period specified in a legal instrument; begin from the last day of each specified performance period if a legal instrument requires performance in installments; or begin from the effective date of a legal instrument if the legal instrument does not specify a period of performance.

Article 240 Enforcement personnel receiving a written application for enforcement or a letter of transfer for enforcement shall issue a notice of enforcement to the party against whom enforcement is sought and may immediately take enforcement measures.

Chapter 21 Enforcement Measures

Article 241 Where the party against whom enforcement is sought fails to perform obligations determined in a legal instrument as required by a notice of enforcement, the party shall report its current property status and its property status for one year before receiving the enforcement notice. If the party refuses to report or submits a false report, the people's court may, according to the severity of the circumstances, impose a fine or detention on the party which is a natural person or her or her legal representative or the primary person in charge or directly liable persons of the relevant entity.

Article 242 Where the party against whom enforcement is sought fails to perform obligations determined in a legal instrument as required by a notice of enforcement, the people's court shall have the right to inquire the relevant entities about the deposits, bonds, stocks, fund shares and other property of the party against whom enforcement is sought. The people's court shall have the right to seize, freeze, transfer or sell the property of the party against whom enforcement is sought according to different circumstances. The aforesaid property inquiry and seizure, freezing, transfer and sale by the people's court shall not exceed the extent of obligations that the party against enforcement is sought shall perform.

The people's court shall issue a ruling on seizure, freezing, transfer or sale of property, as well as a notice of enforcement assistance, and the relevant entities must assist.

Article 243 Where the party against whom enforcement is sought fails to perform obligations determined in a legal instrument as required by a notice of enforcement, the people's court shall have the right to withhold or withdraw a portion of the party's income corresponding to the party's obligations to be performed. However, the people's court shall ensure that necessary living expenses for the party and his or her dependent family members are retained by the party.

The people's court shall issue a ruling on withholding or withdrawing income, as well as a notice of enforcement assistance, and the entity employing the party, banks, credit unions and other entities engaged in savings must assist.

Article 244 Where the party against whom enforcement is sought fails to perform obligations determined in a legal instrument as required by a notice of enforcement, the people's court shall have the right to seize, impound, freeze, auction or sell a portion of the party's property corresponding to the party's obligations to be performed. However, the people's court shall ensure that necessities of life for the party and his or her dependent family members are retained by the party.

The people's court shall issue a ruling to take a measure in the preceding paragraph.

Article 245 When a people's court seizes or impounds any property, if the party against whom enforcement is sought is a citizen, the people's court shall notify the party or his or her adult family members to appear on the site; or if the party against whom enforcement is sought is a legal person or any other organization, the people's court shall notify its legal representative or primary person in charge to appear on the site. Their refusals to appear on the site shall not affect the enforcement. If the party against whom enforcement is sought is a citizen, the entity employing the citizen or the grassroots organizations at the place where the property is located shall send personnel to the site.

The enforcement personnel must prepare an inventory of the seized or impounded property, to which the persons on the site shall affix their signatures or seals, and a copy of the inventory shall be provided to the party against whom enforcement is sought. If the party against whom enforcement is sought is a citizen, a copy of the inventory may also be provided to his or her adult family members.

Article 246 The enforcement personnel may specify the party against whom enforcement is sought to be responsible for the safekeeping of the seized property. The party against whom enforcement is sought shall assume any losses incurred for the fault of the party against whom enforcement is sought.

Article 247 After any property is seized or impounded, the enforcement personnel shall order the party against whom enforcement is sought to perform obligations determined in a legal instrument during a specified period. If the party against whom enforcement is sought fails to do so within the specified period, the people's court shall auction the seized or impounded property; and if auction is not appropriate or both parties disagree on auction, the people's court may authorize a relevant entity to sell or may directly sell the property. Property prohibited by the state from being sold freely shall be delivered to the relevant entities for purchase at a price prescribed by the state.

Article 248 Where the party against whom enforcement is sought fails to perform obligations determined in a legal instrument and conceals property, the people's court shall have the right to issue a search warrant to search the party, the residence of the party or a place where property may be concealed.

To take the measure in the preceding paragraph, the president of the people's court shall

sign and issue a search warrant.

Article 249 The property, bill or certificate to be delivered as specified in a legal instrument shall be delivered in the presence of both sides as summoned by the enforcement personnel or be delivered through the enforcement personnel, and the party accepting delivery shall sign for it.

Where a relevant entity holds the property, bill or certificate, the entity shall deliver it according to the notice of enforcement assistance from the people's court, and the party accepting delivery shall sign for it.

Where a relevant citizen holds the property, bill or certificate, the people's court shall notify the citizen to surrender it. If the citizen refuses to do so, the people's court shall conduct enforcement.

Article 250 For a compulsory eviction from a building or land, the president of a people's court shall sign and issue a public announcement to order the party against whom enforcement is sought to perform the obligation within a specified period. If the party against whom enforcement is sought fails to do so within the specified period, the enforcement personnel shall conduct enforcement.

When conducting enforcement, if the party against whom enforcement is sought is a citizen, the people's court shall notify the party or his or her adult family members to appear on the site; or if the party against whom enforcement is sought is a legal person or any other organization, the people's court shall notify its legal representative or primary person in charge to appear on the site. Their refusals to appear on the site shall not affect the enforcement. If the party against whom enforcement is sought is a citizen, the entity employing the citizen or the grassroots organizations at the place where the building or land is located shall send personnel to the site. The enforcement personnel shall include enforcement information in the transcripts, to which the persons on the site shall affix their signatures or seals.

The people's court shall assign personnel to transport the property removed from a building as a result of compulsory eviction to a designated location and deliver the property to the party against whom enforcement is sought. If the party against whom enforcement is sought is a citizen, the property may also be delivered to his or her adult family member. Any losses incurred due to refusal to accept delivery shall be assumed by the party against whom enforcement is sought.

Article 251 Where, during enforcement, the formalities for transferring any property right certificate is required, the people's court may issue a notice of enforcement assistance to the relevant entities, and the relevant entities must assist.

Article 252 Where the party against whom enforcement is sought fails to perform any conduct specified in a judgment, ruling or any other legal instrument as required by a notice of enforcement, the people's court may conduct enforcement or authorize a relevant unit or any other person to complete the conduct at the expense of the party against whom enforcement is sought.

Article 253 Where the party against whom enforcement is sought fails to perform any obligation of pecuniary payment during a period specified in a judgment, ruling or any other legal instrument, the party against whom enforcement is sought shall pay double interest for the debt for the period of deferred performance. If the party against whom enforcement is sought fails to perform any other obligation during a period specified in a judgment, ruling or any other legal instrument, the party against whom enforcement is sought shall pay a late fee for deferred performance.

Article 254 Where, after a people's court takes the enforcement measures in Articles 242, 243 and 244 of this Law, the party against whom enforcement is sought is still unable to repay debts, the party against whom enforcement is sought shall continue to perform obligations. Once the creditor discovers that the party against whom enforcement is sought has any other property, the creditor may, at any time, apply to the people's court for enforcement.

Article 255 Where the party against whom enforcement is sought fails to perform obligations determined in a legal instrument, the people's court may take or notify a relevant entity to assist in taking the measure of restricting exit from China, the measure of recording the failure in the credit system, the measure of publishing information on the failure on media and other measures prescribed by law.

Chapter 22 Suspension and Termination of Enforcement

Article 256 Under any of the following circumstances, the people's court shall issue a ruling to suspend enforcement:

- (1) The applicant indicates that enforcement may be deferred.
- (2) A person which is not a party to the case raises any justified objection to the subject matter of enforcement.
- (3) A citizen as one of the parties dies, and it is necessary to wait for his or her successors to succeed to his or her rights or obligations.
- (4) A legal person or any other organization as one of the parties is terminated, and the successors to its rights and obligations have not been determined.
- (5) Other circumstances under which the people's court deems that enforcement shall be suspended.

Enforcement shall be resumed after the circumstances causing suspension have disappeared.

Article 257 Under any of the following circumstances, the people's court shall issue a ruling to terminate enforcement:

- (1) The applicant withdraws the application for enforcement.
- (2) The legal instrument on which enforcement is based has been revoked.
- (3) The citizen as the party against whom enforcement is sought dies, without any estate for enforcement, and no one succeeds to his or her obligations.
- (4) The person entitled to recover support for elderly parents, support for other adult dependants or child support dies.

(5) The citizen as the party against whom enforcement is sought is unable to repay his or her borrowings for living in hardship, has no source of income, and has lost his or her ability to work.

(6) Other circumstances under which the people's court deems that enforcement shall be terminated.

Article 258 A ruling to suspend or terminate enforcement shall be effective immediately after being served on a party.

Part Four Special Provisions on Foreign-Related Civil Procedures

Chapter 23 General Principles

Article 259 The provisions of this Part shall apply to foreign-related civil actions within the territory of the People's Republic of China. Where this Part is silent, other relevant provisions of this Law shall apply.

Article 260 Where there is any discrepancy between an international treaty concluded or acceded to by the People's Republic of China and this Law, the provisions of the international treaty shall prevail, except clauses to which the People's Republic of China has declared reservations.

Article 261 Civil actions instituted against foreign nationals, foreign organizations or international organizations which enjoy diplomatic privileges or immunities shall be governed by the relevant laws of the People's Republic of China and the international treaties concluded or acceded to by the People's Republic of China.

Article 262 When trying foreign-related civil cases, a people's court shall use the spoken and written languages commonly used in the People's Republic of China. Upon request of the parties, interpretation may be provided at the expense of the parties.

Article 263 A foreign national, a stateless person or a foreign enterprise or organization which needs to be represented by a lawyer in instituting or responding to an action in a people's court must retain a lawyer of the People's Republic of China.

Article 264 Where a foreign national, a stateless person or a foreign enterprise or organization without a domicile within the territory of the People's Republic of China needs to be represented by a lawyer or any other person of the People's Republic of China in an action, the power of attorney posted or forwarded from outside the territory of the People's Republic of China is valid only after it has been legalized by a notary office in the home country and authenticated by the Chinese embassy or consulate stationed in that country or has undergone the legalization formalities prescribed in the relevant treaty concluded by the People's Republic of China and that country.

Chapter 24 Jurisdiction

Article 265 Where an action is instituted against a defendant which has no domicile within the territory of the People's Republic of China for a contract dispute or any other property right or interest dispute, if the contract is signed or performed within the territory of the People's Republic of China, the subject matter of action is located within the territory of the People's Republic of China, the defendant has any impoundable property within the territory

of the People's Republic of China, or the defendant has any representative office within the territory of the People's Republic of China, the people's court at the place where the contract is signed or performed, where the subject matter of action is located, where the impoundable property is located, where the tort occurs or where the domicile of the representative office is located may have jurisdiction over the action.

Article 266 Actions instituted for disputes arising from the performance of contracts for Chinese-foreign equity joint ventures, Chinese-foreign contractual joint ventures or Chinese-foreign cooperative exploration and exploitation of natural resources in the People's Republic of China shall be under the jurisdiction of the people's courts of the People's Republic of China.

Chapter 25 Service of Process and Periods

Article 267 A people's court may serve process on a party which has no domicile within the territory of the People's Republic of China in the following manners:

(1) Process is served in the manners specified in the international treaty concluded or acceded to by the home country of the person to be served and the People's Republic of China.

(2) Process is served through diplomatic channels.

(3) If the person to be served is a citizen of the People's Republic of China, service of process may be entrusted to the embassy or consulate of the People's Republic of China stationed in the country where the person to be served resides.

(4) Process is served on a litigation representative authorized by the person to be served to receive service of process.

(5) Process is served on the representative office or a branch office or business agent authorized to receive service of process established by the person to be served within the territory of the People's Republic of China.

(6) Service of process by post is allowed if the law of the home country of the person to be served permits service of process by post, and if, three months after the postmark date, the service acknowledgement is not returned, but based on all circumstances, it may be determined that process has been served, process shall be deemed served on the expiration date of the aforesaid period.

(7) Process is served by fax, email or any other means capable of confirming receipt by the person to be served.

(8) If service of process by the aforesaid means is not possible, process shall be served by public announcement, and process shall be deemed served three months after the date of public announcement.

Article 268 Where a defendant has no domicile within the territory of the People's Republic of China, the people's court shall serve a copy of the written complaint on the defendant and notify the defendant to a written statement of defense within 30 days after receiving the copy of the written complaint. If the defendant applies for an extension of the aforesaid period, the extension shall be subject to the decision of the people's court.

Article 269 A party which has no domicile within the territory of the People's Republic of China shall have the right to appeal against a judgment or ruling of a people's court of first instance within 30 days from the date of service of the written judgment or ruling. The appellee shall submit a written statement of defense within 30 days after receiving a copy of the written appeal. If a party is unable to file an appeal or submit a written statement of defense within the statutory period and applies for an extension of the period, the application shall be subject to the decision of the people's court.

Article 270 The period for a people's court to try a foreign-related civil case shall not be limited by the provisions of Article 149 and 176 of this Law.

Chapter 26 Arbitration

Article 271 Where, for disputes arising from foreign economic and trade activities or international transportation or maritime activities, the parties have included an arbitration clause in the contracts or have reached a written arbitration agreement after a dispute arose to refer such disputes to an international arbitral institution of the People's Republic of China or any other arbitral institution for arbitration, the parties shall not institute an action in a people's court.

If the parties have not included any arbitration clauses in the contracts or have not reached a written arbitration agreement after a dispute arose, the parties may institute an action in a people's court.

Article 272 Where a party applies for a preservation measure, the international arbitral institution of the People's Republic of China shall submit the party's application to the intermediate people's court at the place of domicile of the respondent or at the place where the respondent's property is located.

Article 273 Where an international arbitral institution of the People's Republic of China has rendered an award for a dispute, the parties shall not institute an action in a people court for the dispute. If a party fails to comply with the arbitration award, the opposing party may apply for enforcement of the award to the intermediate people's court at the place of domicile of the respondent or at the place where the respondent's property is located.

Article 274 Where the respondent adduces evidence that an arbitration award of an international arbitral institution of the People's Republic of China falls under any of the following circumstances, a people's court shall, upon examination and verification by a collegial bench, issue a ruling not to enforce the award:

- (1) The contract between the parties does not include an arbitration clause or the parties have not reached any written arbitration agreement after a dispute arose.
- (2) The respondent is not notified to appoint an arbitrator or of the conduct of arbitration procedure or fails to present its case, which is not attributable to the fault of the respondent.
- (3) The composition of the arbitration tribunal or the arbitration procedure is not in conformity with arbitration rules.
- (4) The matters arbitrated are outside the scope of an arbitration agreement or the arbitral institution has no arbitration power.

If a people's court holds that the enforcement of an arbitration award is contrary to the public interest, the people's court shall issue a ruling not to enforce the award.

Article 275 Where an arbitration award is not enforced according to a ruling of a people's court, the parties may, according to a written arbitration agreement reached by them, apply again for arbitration or institute an action in a people's court.

Chapter 27 Judicial Assistance

Article 276 In accordance with an international treaty concluded or acceded to by the People's Republic of China or under the principle of reciprocity, a people's court and a foreign court may request each other to provide judicial assistance in service of process, investigation and collection of evidence and other litigation activities.

If any matter requested by a foreign court for assistance is detrimental to the sovereignty, security or public interest of the People's Republic of China, the people's court shall not grant the request.

Article 277 Judicial assistance shall be requested and provided through the channels prescribed in an international treaty concluded or acceded to by the People's Republic of China; or in the absence of such a treaty, shall be requested and provided through diplomatic channels.

A foreign embassy or consulate to the People's Republic of China may serve process on and investigate and collect evidence from its citizens but shall not violate the laws of the People's Republic of China and shall not take compulsory measures.

Except for the circumstances in the preceding paragraph, no foreign authority or individual shall, without permission from the competent authorities of the People's Republic of China, serve process or conduct investigation and collection of evidence within the territory of the People's Republic of China.

Article 278 The written request of a foreign court for the provision of judicial assistance by a people's court and the annexes thereto shall be accompanied with Chinese versions or versions in other languages specified in the relevant international treaty.

A letter of request and its annexes submitted to a foreign court by a people's court for judicial assistance shall also be appended with the translations in the language of the country or the texts in the language specified in the relevant international treaty.

Article 279 The people's courts shall provide judicial assistance under the procedures prescribed by the laws of the People's Republic of China. If a foreign court requests that judicial assistance be provided in a special manner, it may be provided in the special manner requested, but the special manner requested shall not violate the laws of the People's Republic of China.

Article 280 Where a party applies for enforcement of an effective judgment or ruling of a people's court, if the party against whom enforcement is sought or the property thereof is not within the territory of the People's Republic of China, the applicant may apply directly to the foreign court having jurisdiction for recognition and enforcement or apply to a people's court for the people's court to request recognition and enforcement by the foreign court in

accordance with the provisions of an international treaty concluded or acceded to by the People's Republic of China or under the principle of reciprocity.

Where a party applies for enforcement of an effective arbitration award of an international arbitral institution of the People's Republic of China, if the party against whom enforcement is sought or the property thereof is not within the territory of the People's Republic of China, the applicant shall apply directly to the foreign court having jurisdiction for recognition and enforcement.

Article 281 Where an effective judgment or ruling of a foreign court requires recognition and enforcement by a people's court of the People's Republic of China, a party may apply directly to the intermediate people's court of the People's Republic of China having jurisdiction for recognition and enforcement or apply to the foreign court for the foreign court to request recognition and enforcement by the people's court in accordance with the provisions of an international treaty concluded or acceded to by the People's Republic of China or under the principle of reciprocity.

Article 282 After examining an application or request for recognition and enforcement of an effective judgment or ruling of a foreign court in accordance with an international treaty concluded or acceded to by the People's Republic of China or under the principle of reciprocity, a people's court shall issue a ruling to recognize the legal force of the judgment or ruling and issue an order for enforcement as needed to enforce the judgment or ruling according to the relevant provisions of this Law if the people's court deems that the judgment or ruling does not violate the basic principles of the laws of the People's Republic of China and the sovereignty, security and public interest of the People's Republic of China. If the judgment or ruling violates the basic principles of the laws of the People's Republic of China or the sovereignty, security or public interest of the People's Republic of China, the people's court shall not grant recognition and enforcement.

Article 283 Where an arbitration award of a foreign arbitral institution requires recognition and enforcement by a people's court of the People's Republic of China, a party shall apply directly to the intermediate people's court at the place of domicile of the party against whom enforcement is sought or at the place where the property thereof is located, and the people's court shall process the application in accordance with an international treaty concluded or acceded to by the People's Republic of China or under the principle of reciprocity.

Article 284 This Law comes into force on the date of issuance, and the Civil Procedure Law of the People's Republic of China (for Trial Implementation) shall be repealed simultaneously.

19. Administrative Litigation Law of the People's Republic of China

(Adopted at the 2nd session of the Seventh National People's Congress on April 4, 1989; and amended for the first time in accordance with the Decision of the Standing Committee of the National People's Congress on Amending the Administrative Litigation Law of the People's Republic of China adopted at the 11th session of the Standing Committee of the

Twelfth National People's Congress on November 1, 2014; and amended for the second time in accordance with the Decision on Amending the Civil Procedure Law of the People's Republic of China and the Administrative Litigation Law of the People's Republic of China as adopted at the 28th Session of the Standing Committee of the Twelfth National People's Congress on June 27, 2017)

Chapter I General Provisions

Article 1 To ensure the impartial and timely trial of administrative cases by the people's courts, settle administrative disputes, protect the lawful rights and interests of citizens, legal persons, and other organizations, and oversee administrative agencies' exercise of power according to the law, this Law is developed in accordance with the Constitution.

Article 2 A citizen, a legal person, or any other organization which deems that an administrative action taken by an administrative agency or any employee thereof infringes upon the lawful rights and interests of the citizen, legal person, or other organization shall have the right to file a complaint with a people's court in accordance with this Law.

The term “administrative action” as mentioned in the preceding paragraph includes administrative actions taken by an organization empowered by a law, regulation, or rule.

Article 3 The people's courts shall protect the right of a citizen, a legal person, or any other organization to file a complaint, and accept, according to the law, administrative cases that shall be accepted.

Administrative agencies and the employees thereof may not interfere with or impede the acceptance of administrative cases by the people's courts.

The person in charge of an administrative agency against which a complaint is filed shall appear in court to respond to the complaint, or, if he or she is unable to appear in court, authorize a relevant employee of the administrative agency to appear in court.

Article 4 The people's courts shall independently exercise judicial power over administrative cases, without any interference by any administrative agency, social group, or individual.

The people's courts shall establish administrative divisions for the trial of administrative cases.

Article 5 The people's courts shall try administrative cases based on facts according to the law.

Article 6 In the trial of administrative cases, the people's courts shall examine the legality of administrative actions.

Article 7 In the trial of administrative cases, the people's courts shall apply the collegial bench, disqualification, open trial, and “final after two levels of trial” rules according to the law.

Article 8 In administrative litigation, the parties shall have equal legal status.

Article 9 Citizens of all ethnicities shall have the right to use the spoken and written languages of their respective ethnicities in administrative litigation.

In an area where an ethnic minority is concentrated or several ethnicities cohabit, the people's courts shall conduct trial and publish legal instruments in the spoken and written languages commonly used by the local ethnicity or ethnicities.

The people's courts shall provide interpretation for litigation participants who are not familiar with the spoken and written languages commonly used by the local ethnicity or ethnicities.

Article 10 In administrative litigation, the parties shall have the right to debate.

Article 11 The people's procuratorates shall have the authority to exercise legal supervision over administrative litigation.

Chapter II Scope of Cases Accepted

Article 12 The people's courts shall accept the following complaints filed by citizens, legal persons, or other organizations:

(1) A complaint against any administrative punishment, such as administrative detention, suspension or revocation of a license or permit, ordered suspension of production or business, confiscation of illegal income, confiscation of illegal property, a fine, or a warning.

(2) A complaint against any administrative compulsory measure, such as restriction of personal freedom or seizure, impoundment, or freezing of property, or administrative enforcement.

(3) A complaint against an administrative agency's denial of, or failure to respond within the statutory period to, an application for administrative licensing or any other administrative licensing decision made by the administrative agency.

(4) A complaint against an administrative agency's decision to confirm the ownership or the right to use any natural resource, such as land, mineral resources, water, forest, hill, grassland, wasteland, tidal flat, or sea area.

(5) A complaint against a decision on expropriation or requisition or a decision on compensation for expropriation or requisition.

(6) A complaint against an administrative agency's refusal to perform, or failure to respond to an application for the administrative agency to perform, its statutory duties and responsibilities in respect of protecting personal rights, property rights, and other lawful rights and interests.

(7) A complaint claiming that an administrative agency has infringed upon the plaintiff's autonomy in business management, right in the contractual operations on rural land, or right in operations on rural land.

(8) A complaint claiming that an administrative agency has abused its administrative power to preclude or restrict competition.

(9) A complaint claiming that an administrative agency has illegally raised funds or apportioned expenses or illegally required performance of other obligations.

(10) A complaint claiming that an administrative agency has failed to pay consolation money, minimum subsistence, or social insurance benefits according to the law.

(11) A complaint claiming that an administrative agency has failed to perform according to the law or as agreed upon, or illegally modified or rescinded, an agreement, such as a government concession agreement or a land and building expropriation compensation agreement.

(12) A complaint claiming that an administrative agency has otherwise infringed upon

personal rights, property rights, or other lawful rights and interests.

In addition to those as set out in the preceding paragraph, the people's courts shall accept administrative cases which may be filed as prescribed by laws and regulations.

Article 13 The people's courts shall not accept complaints filed by citizens, legal persons, or other organizations against the following:

- (1) Actions taken by the state in national defense and foreign affairs, among others.
- (2) Administrative regulations and rules or decisions and orders with general binding force developed and issued by administrative agencies.
- (3) Decisions of administrative agencies on the rewards or punishments for their employees or the appointment or removal from office of their employees.
- (4) Administrative action taken by an administrative agency as a final adjudication according to the law.

Chapter III Jurisdiction

Article 14 The basic people's courts shall have jurisdiction over administrative cases as courts of first instance.

Article 15 An Intermediate People's Court shall have jurisdiction over the following administrative cases as a court of first instance:

- (1) A case filed against an administrative action taken by a department of the State Council or by a people's government at or above the county level.
- (2) A case handled by the Customs.
- (3) A major or complicated case within its territorial jurisdiction.
- (4) Other cases under the jurisdiction of an Intermediate People's Court as prescribed by the law.

Article 16 A Higher People's Court shall have jurisdiction as a court of first instance over major and complicated administrative cases within its territorial jurisdiction.

Article 17 The Supreme People's Court shall have jurisdiction as a court of first instance over major and complicated administrative cases nationwide.

Article 18 An administrative case shall be under the jurisdiction of the people's court at the place where the administrative agency taking the original administrative action is located. A case that has undergone reconsideration may also be under the jurisdiction of the people's court at the place where the reconsideration agency is located.

With the approval of the Supreme People's Court, a Higher People's Court may determine several people's courts that have jurisdiction over administrative cases across administrative regions.

Article 19 A complaint against an administrative compulsory measure that restricts personal freedom shall be under the jurisdiction of the people's court at the place where the defendant or the plaintiff is located.

Article 20 Administrative litigation involving real property shall be under the jurisdiction of the people's court at the place where the real property is located.

Article 21 Where two or more people's courts have jurisdiction over the same case, the

plaintiff may file a complaint in one of these people's courts. If the plaintiff has filed a complaint in two or more people's courts that have jurisdiction over the case, the people's court that first docketed the case shall have jurisdiction.

Article 22 Where a people's court finds that a case accepted is not under its jurisdiction, it shall transfer the case to the people's court that has jurisdiction over the case, and the people's court to which the case is transferred shall accept the case. If the people's court to which the case is transferred deems that the case is not under its jurisdiction either according to the relevant provisions, it shall report to the people's court at a higher level for designated jurisdiction, and may not transfer the case to another people's court on its own initiative.

Article 23 Where a people's court which has jurisdiction over a case is unable to exercise its jurisdiction for any special reasons, the people's court at a higher level shall designate another court to exercise jurisdiction over the case.

Where any dispute over jurisdiction arises between the people's courts, the dispute shall be resolved by such people's courts through consultation. If such consultation fails, the dispute shall be reported to the common people's court at a higher level of them for the designation of jurisdiction.

Article 24 A people's court at a higher level shall have the power to try administrative cases over which a people's court at a lower level has jurisdiction as a court of first instance.

Where a people's court at a lower level deems that it is necessary for a people's court at a higher level to try an administrative case over which the people's court at a lower level has jurisdiction as a court of first instance or to designate jurisdiction over the case, it may report the case to the people's court at a higher level for decision.

Chapter IV Primary Litigation Participants

Article 25 A person subjected to an administrative action or any other person which is a citizen, a legal person, or any other organization with an interest in the administrative action shall have the right to file a complaint against the administrative action.

If a citizen who has the right to file a complaint is deceased, his or her close relatives may file the complaint.

If a legal person or any other organization which has the right to file a complaint is terminated, the legal person or other organization which succeeds to its rights may file the complaint.

Where the people's procuratorate finds in the performance of functions that any administrative authority assuming supervision and administration functions in such fields as the protection of the ecological environment and resources, food and drug safety, protection of state-owned property, and the assignment of the right to use state-owned land exercises functions in violation of any law or conducts nonfeasance, which infringes upon national interest or public interest, it shall offer procuratorial recommendations to the administrative authority, and urge it to perform functions in accordance with the law. If the administrative authority fails to perform functions in accordance with the law, the people's procuratorate shall file a lawsuit with the people's court in accordance with the law.

Article 26 Where a citizen, a legal person, or any other organization directly files a complaint

with a people's court, the administrative agency taking the alleged administrative action shall be the defendant.

For a case that has undergone reconsideration, if the reconsideration agency's decision sustains the original administrative action, the administrative agency taking the original administrative action and the reconsideration agency shall be co-defendants; or, if the reconsideration agency's decision modifies the original administrative action, the reconsideration agency shall be the defendant.

If the reconsideration agency fails to make a reconsideration decision during the statutory period, and a citizen, a legal person, or any other organization files a complaint against the original administrative action, the administrative agency taking the original administrative action shall be the defendant; or if a complaint is filed against the inaction of the reconsideration agency, the reconsideration agency shall be the defendant.

For an administrative action taken by two or more administrative agencies, the administrative agencies jointly taking the administrative action shall be co-defendants.

For an administrative action taken by an organization as authorized by an administrative agency, the authorizing administrative agency shall be the defendant.

Where an administrative agency is abolished or its powers are modified, the administrative agency that succeeds to such powers shall be the defendant.

Article 27 Where one side or both sides in an administrative case arising from the same administrative action consist of two or more parties, or, where the people's court deems that two or more administrative cases arising from the same type of administrative actions may be concurrently tried upon consent of the parties to such cases, such a procedure is a joinder of proceedings.

Article 28 Where one side in a joinder of proceedings consists of a large number of parties, such parties may elect a representative or representatives from among them to proceed. The conduct of such a representative in the proceedings shall be binding upon all the parties represented; however, to modify or relinquish any claims or admit any claims of the opposing party, such a representative must obtain the consent of the parties represented.

Article 29 Where a citizen, a legal person, or any other organization with an interest in the administrative action alleged in a complaint does not file a complaint against the administrative action, or where a citizen, a legal person, or any other organization has an interest in the outcome of the case, the citizen, legal person, or other organization may, as a third party, file a request for participating in the proceedings or participate in the proceedings as notified by the people's court.

Where a people's court enters a judgment that imposes any obligation on a third party or impairs the rights and interests of the third party, the third party shall have the right to file an appeal according to the law.

Article 30 The legal representative of a citizen without the capacity to litigate shall litigate on behalf of the citizen. If the legal representatives of such a citizen try to shift their representative responsibilities onto each other, the people's court may designate one of

them to litigate on behalf of the citizen.

Article 31 A party or a legal representative may retain one or two persons as litigation representatives.

The following persons may serve as a litigation representative:

- (1) A lawyer, or a legal service worker at the basic level.
- (2) A close relative or staff member of a party.
- (3) A citizen recommended by a party's community or employer or by a relevant social group.

Article 32 Lawyers who represent the parties to a case shall have the right to consult and copy materials related to the case according to the relevant provisions and the right to investigate and collect evidence related to the case from relevant organizations and citizens. Materials which involve any state secret, trade secret, or individual privacy shall be kept confidential according to the law.

The parties and other litigation representatives shall have the right to consult and copy materials related to the court trial, except the portions involving any state secret, trade secret, or individual privacy.

Chapter V Evidence

Article 33 Evidence includes:

- (1) documentary evidence;
- (2) physical evidence;
- (3) audio and video recordings;
- (4) electronic data;
- (5) witness testimony;
- (6) statement of a party;
- (7) opinion of a forensic identification or evaluation expert; and
- (8) survey transcripts and on-site disposition transcripts.

The aforesaid evidence must be verified in court before being used as a basis for finding the facts of a case.

Article 34 The defendant shall have the burden of proof for the administrative action taken, and provide evidence for taking the administrative action and regulatory documents based on which the administrative action was taken.

Where the defendant fails to provide, or provides beyond the prescribed time limit without a good reason, any evidence, it shall be deemed that the evidence does not exist, unless the evidence is provided by a third party because the alleged administrative action involves the lawful rights and interests of the third party.

Article 35 In the course of litigation, the defendant or a litigation representative thereof may not directly collect evidence from the plaintiff, a third party, or a witness.

Article 36 Where the defendant had collected evidence when taking the administrative action, but is unable to provide such evidence for a good reason such as a force majeure, with the permission of the people's court, the time limit for the defendant to provide such evidence may be extended.

Where the plaintiff or a third party provides any ground or evidence that was not provided in the defendant's administrative disposition procedures, with the permission of the people's court, the defendant may provide additional evidence.

Article 37 The plaintiff may provide evidence to prove that the alleged administrative action was taken in violation of the law. The inadmissibility of evidence provided by the plaintiff shall not relieve the defendant from the burden of proof.

Article 38 Where a complaint is filed for the defendant's failure to perform its statutory duties and responsibilities, the plaintiff shall provide evidence to prove that it has filed a request for such performance with the defendant, except under either of the following circumstances:

(1) The defendant shall actively perform its statutory duties and responsibilities as required by its powers.

(2) The plaintiff is unable to provide evidence for a good reason.

In a case of administrative compensation or indemnity, the plaintiff shall provide evidence on the damage caused by the administrative action. If the inability of the plaintiff to provide such evidence is caused by the defendant, the defendant shall have the burden of proof.

Article 39 A people's court shall have the power to require a party to provide evidence or provide additional evidence.

Article 40 A people's court shall have the power to subpoena evidence from the relevant administrative agencies, other organizations, and citizens, but may not, for the purpose of proving the legality of an administrative, subpoena any evidence that had not been collected by the defendant when taking the administrative action.

Article 41 The plaintiff or a third party in a case may apply to the people's court for subpoenaing the following evidence related to the case which the plaintiff or third party is unable to collect independently:

(1) Evidence preserved by a state organ which may be obtained by a subpoena of a people's court.

(2) Evidence which involves any state secret, trade secret, or individual privacy.

(3) Other evidence which the plaintiff or a third party is unable to collect independently for objective reasons.

Article 42 Where any evidence may be extinguished or may be hard to obtain at a later time, a primary litigation participant may file a motion to the people's court for evidence preservation, and the people's court may also take preservation measures on its own initiative.

Article 43 Evidence shall be presented in court and cross-examined by the parties. Evidence involving any state secret, trade secret, or individual privacy may not be presented in an open court.

A people's court shall comprehensively and objectively examine and verify evidence under the statutory procedures. For inadmissible evidence, reasons for inadmissibility shall be stated in the written adjudication.

Illegally obtained evidence may not be used as a basis for finding the facts of a case.

Chapter VI Filing a Complaint and Accepting a Case

Article 44 For administrative cases within the scope of cases accepted by the people's courts, a citizen, a legal person, or any other organization may first apply to the administrative agency for reconsideration, and then file a complaint against the reconsideration decision with a people's court; or directly file a complaint with a people's court.

Where any law or regulation provides that an application for reconsideration shall be filed with the administrative agency before a complaint against the reconsideration decision is filed with a people's court, such a law or regulation shall apply.

Article 45 Against a reconsideration decision, a citizen, a legal person, or any other organization may file a complaint with a people's court within 15 days of receipt of the written reconsideration decision. If the reconsideration agency fails to make a decision during the statutory period, the applicant may file a complaint with a people's court within 15 days of expiry of the reconsideration period, except as otherwise provided for by any law.

Article 46 To directly file a complaint with a people's court, a citizen, a legal person, or any other organization shall file the complaint within six months from the day when the citizen, legal person, or other organization knew or should have known that the administrative action was taken, except as otherwise provided for by any law.

A people's court shall not accept a complaint involving real property filed more than 20 years after the alleged administrative action was taken or a complaint involving any other dispute filed more than five years after the alleged administrative action was taken.

Article 47 Where a citizen, a legal person, or any other organization applies to an administrative agency for its performance of statutory duties and responsibilities in respect of protecting the personal rights, property rights, and other lawful rights and interests of the citizen, legal person, or other organization, and the administrative agency fails to do so within two months of receipt of the application, the citizen, legal person, or other organization may file a complaint with a people's court. Where any law or regulation provides otherwise for the period for an administrative agency to perform its duties and responsibilities, such a law or regulation shall apply.

Where a citizen, a legal person, or any other organization requests an administrative agency to perform its statutory duties and responsibilities in respect of protecting the personal rights, property rights, and other lawful rights and interests of the citizen, legal person, or other organization in case of emergency, and the administrative agency fails to do so, a complaint filed by the citizen, legal person, or other organization shall not be subject to the periods as mentioned in the preceding paragraph.

Article 48 Where a citizen, a legal person, or any other organization delays in filing a complaint during the time limitation for filing a complaint for a force majeure or any other reason not attributable to the citizen, legal person, or other organization, the time of delay shall not be counted in the time limitation for filing a complaint.

Where a citizen, a legal person, or any other organization delays in filing a complaint during the time limitation for filing a complaint under any special circumstances other than those as

mentioned in the preceding paragraph, the citizen, legal person, or other organization may apply for an extension of the time limitation within ten days after the obstacle is eliminated, and the people's court shall decide whether to grant extension.

Article 49 A complaint to be filed shall satisfy the following requirements:

(1) The plaintiff is a citizen, a legal person, or any other organization as mentioned in Article 25 of this Law.

(2) There must be a specific defendant.

(3) There must be specific claims and factual basis for the complaint.

(4) The complaint must fall within the scope of cases accepted by the people's courts and under the jurisdiction of the people's court with which the complaint is filed.

Article 50 The plaintiff shall file a written complaint with a people's court, and provide the copies thereof according to the number of defendants.

Where it is difficult for a plaintiff to write a complaint, the plaintiff may verbally file a complaint, and the people's court shall transcribe the complaint, issue a dated certification in writing, and notify the opposing party.

Article 51 A people's court receiving a complaint shall docket it if it meets the conditions for filing a complaint as set out in this Law.

Where a people's court is unable to determine on the spot whether a complaint meets the conditions for filing a complaint as set out in this Law, the people's court shall receive the complaint, issue a written certification showing the date of receipt, and decide whether to docket the complaint within seven days. If the complaint does not meet the conditions for filing a complaint, the people's court shall enter a ruling not to docket the complaint. The written ruling shall state the reasons for not docketing the complaint. The plaintiff may file an appeal against the ruling.

Where a complaint is incomplete or otherwise erroneous, a people's court shall offer guidance and explanation, and notify the party of all necessary supplements and corrections at one time. Without such guidance and explanation, the people's court may not refuse to receive the complaint on the ground that it fails to meet the conditions for filing a complaint.

Where a people's court refuses to receive a complaint, refuses to issue a written certification after receiving a complaint, or fails to notify a party of all necessary supplements or corrections to a complaint at one time, the party may report it to the people's court at a higher level, which shall order corrective action to be taken by the people's court and take disciplinary action against its directly liable supervising official and other directly liable persons according to the law.

Article 52 Where a people's court neither docketed nor enters a ruling not to docket a complaint, the plaintiff may file a complaint in the people's court at the next higher level. If the people's court at the next higher level deems that the complaint meets the conditions for filing a complaint, it shall docket the complaint and try the case, or designate any other people's court at the lower level to docket the complaint and try the case.

Article 53 Where a citizen, a legal person, or any other organization deems that a regulatory

document developed by a department of the State Council or by a local people's government or a department thereof, based on which the alleged administrative action was taken, is illegal, the citizen, legal person, or other organization may concurrently file a request for review of the regulatory document when filing a complaint against the administrative action. The term “regulatory document” as mentioned in the preceding paragraph does not include administrative rules.

Chapter VII Trial and Judgment

Section 1 General Rules

Article 54 The people's courts shall try administrative cases publicly, except those involving any state secret or individual privacy or as otherwise provided for by any law.

A case involving any trade secret may be tried in camera if a party to the case files a motion for trial in camera.

Article 55 Where a party to a case deems that a judge has an interest in the case or is otherwise related to the case, which may affect the impartial trial of the case, the party shall have the right to request the disqualification of the judge.

Where a judge deems himself or herself to have an interest in the case or be otherwise related to the case, the judge shall request disqualification of himself or herself.

The provisions of the preceding two paragraphs shall also apply to court clerks, interpreters, identification or evaluation experts, and surveyors.

The disqualification of the president of a people's court as the presiding judge shall be decided by the judicial committee of the people's court; the disqualification of judges shall be decided by the president of a people's court; and the disqualification of other persons shall be decided by the presiding judge. Against such a decision, a party may apply for reconsideration once.

Article 56 During litigation, the execution of the alleged administrative action shall not be suspended; however, under any of the following circumstances, a ruling shall be entered to suspend execution:

- (1) The defendant deems it necessary to suspend execution.
- (2) The plaintiff or an interested party files a motion for suspending execution, and the people's court deems that the execution of the alleged administrative action will result in irreparable losses and that its suspension will not damage the national interest or public interest.
- (3) The people's court deems that the execution of the alleged administrative action will cause any major damage to the national interest or public interest.
- (4) The suspension is required by any law or regulation.

Against a ruling to suspend or not to suspend execution, a party may apply for reconsideration once.

Article 57 For a complaint against an administrative agency for its failure to pay, according to the law, any consolation money, minimum subsistence, or social insurance benefits for work-related injury or medical treatment, a people's court may enter a ruling to grant advance

enforcement if the plaintiff files such a motion, the rights and obligations between the parties are clear, and a denial of advance enforcement will seriously affect the subsistence of the plaintiff.

Against a ruling on advance enforcement, a party may apply for reconsideration once. Pending reconsideration, the execution of the ruling shall not be suspended.

Article 58 Where a plaintiff refuses to appear in court without a good reason after being subpoenaed or leaves the courtroom during a court session without the permission of the court, the court may deem that the plaintiff has withdrawn its complaint; and where a defendant refuses to appear in court without a good reason or leaves the courtroom during a court session without the permission of the court, the court may enter a default judgment.

Article 59 Where a litigation participant or any other person commits any of the following conduct, a people's court may, according to the severity of the circumstances, reprimand the person, order the person to sign a personal statement of repentance, impose a fine of not more than 10,000 yuan on the person, or detain the person for no longer than 15 days; and if the conduct constitutes a crime, the offender shall be subject to criminal liability according to the law:

(1) As a person with an obligation to assist in investigation or enforcement, evading or refusing without reasons the performance of such an obligation or obstructing investigation or enforcement after receiving an investigation assistance decision or an enforcement assistance notice from a people's court.

(2) Forging, concealing, or destroying evidence or providing false certification materials to obstruct the trial of a case by a people's court.

(3) Instigating or, by bribery or intimidation, causing any other person to commit perjury, threatening a witness, or preventing a witness from testifying.

(4) Concealing, transferring, selling, destroying, or damaging any seized, impounded, or frozen property.

(5) Causing the plaintiff to withdraw its complaint by deception, intimidation, or any other illegal means.

(6) Obstructing a staff member of a people's court from performing his or her duties by violence, threat, or any other means, or disturbing the order of a people's court by clamoring in a courtroom, attacking a courtroom, or any other means.

(7) Intimidating, insulting, defaming, framing up, assaulting, attacking, or retaliating on a judge or any other staff member of the people's court, a litigation participant, or a person assisting in investigation or enforcement.

For an entity committing any of the conduct as mentioned in the preceding paragraph, a people's court may fine or detain its primary person in charge or directly liable persons in accordance with the preceding paragraph; and if the conduct constitutes a crime, the offender shall be subject to criminal liability according to the law.

Any fine or detention must be subject to the approval of the president of a people's court.

Against such punishment, a party may apply to the people's court at the next higher level for

reconsideration once. Pending reconsideration, the execution of such punishment shall not be suspended.

Article 60 In the trial of an administrative case, a people's court may not conduct mediation, unless the case involves administrative compensation or indemnity or involves an administrative agency's exercise of discretionary power prescribed by any law or regulation.

“Mediation shall be conducted under the principle of free will and legality, without detriment to the national interest, public interest, or lawful rights and interests of others.

Article 61 Where a party to an administrative procedure involving administrative licensing, registration, expropriation, requisition, or an administrative agency's ruling on a civil dispute applies for settling the relevant civil dispute concurrently, the people's court may try the civil dispute case concurrently.

Where, in administrative litigation, the people's court deems it necessary to base the trial of the administrative case upon an adjudication to be made in a civil procedure, it may enter a ruling to suspend the administrative litigation.

Article 62 Where, before a people's court pronounces its judgment or ruling for an administrative case, the plaintiff requests the withdrawal of the case, or the defendant modifies its administrative action and, as a result, the plaintiff agrees to and applies for the withdrawal of the case, the people's court shall enter a ruling on whether to allow the withdrawal.

Article 63 The people's courts shall try administrative cases based on laws, administrative regulations, and local regulations. Local regulations shall be applicable to administrative cases occurring within the respective administrative regions.

For administrative cases in an ethnic autonomous region, the people's courts shall also try such cases based on the regulation on autonomy and the separate regulations of the ethnic autonomous region.

In trying administrative cases, a people's court may refer to administrative rules.

Article 64 Where, in trying an administrative case, a people's court deems that any regulatory document as mentioned in Article 53 of this Law under its review is illegal, such a document shall not be used to determine the legality of the alleged administrative action, and the people's court shall provide the authority developing the document with disposition recommendations.

Article 65 A people's court shall publish effective written judgments and rulings for public inspection, except the parts involving any state secret, trade secret, or individual privacy.

Article 66 In trying an administrative case, if a people's court deems that the supervising official or any directly liable person of an administrative agency has violated any law or discipline, the people's court shall transfer the relevant materials to the supervisory authority, the administrative agency, or the administrative agency at the next higher level; or if it deems that any crime has occurred, the people's court shall transfer the relevant materials to the public security authority or procuratorial authority.

Where a defendant refuses to appear in court without a good reason or leaves the courtroom

during a court session without the permission of the court, a people's court may announce it to the public, and provide the supervisory authority or the administrative agency at the next higher level of the defendant with judicial recommendations on the disciplinary action to be taken against the primary person in charge or directly liable persons of the defendant.

Section 2 Formal Procedure at First Instance

Article 67 A people's court shall, within five days of docketing a complaint, serve a copy of the written complaint on the defendant. The defendant shall, within 15 days of receipt of a copy of the written complaint, provide evidence for taking the alleged administrative action and the regulatory documents based on which the administrative action was taken, and submit a written statement of defense. The people's court shall, within five days of receipt of the written statement of defense, serve a copy thereof on the plaintiff.

The defendant's failure to submit a statement of defense shall not affect the trial of the case by the people's court.

Article 68 To try an administrative case, a people's court shall form a collegial bench consisting of judges or a collegial bench consisting of judges and assessors. The members of a collegial bench shall be in an odd number of three or more.

Article 69 Where the alleged administrative action has been taken under statutory procedures with conclusive evidence and correct application of laws and regulations, or the grounds for the plaintiff's application for the defendant to perform its statutory duties and responsibilities or make payment are unfounded, the people's court shall enter a judgment to dismiss the plaintiff's claims.

Article 70 Where the alleged administrative action falls under any of the following circumstances, a people's court shall enter a judgment to entirely or partially revoke the alleged administrative action, and may enter a judgment to require the defendant to take an administrative action anew:

- (1) Insufficiency in primary evidence.
- (2) Erroneous application of any law or regulation.
- (3) Violation of statutory procedures.
- (4) Overstepping of power.
- (5) Abuse of power.
- (6) Evident inappropriateness

Article 71 Where a people's court enters a judgment to require that the defendant take an administrative action anew, the defendant shall not take an administrative action which is basically the same as the original administrative action based on the same facts and reasons.

Article 72 Where, through trial, a people's court holds that the defendant has failed to perform its statutory duties and responsibilities, it shall enter a judgment to require the defendant to perform its statutory duties and responsibilities during a specified period.

Article 73 Where, through trial, a people's court holds that the defendant has a legal obligation to pay, it shall enter a judgment to require the defendant to perform the payment obligation.

Article 74 Where the alleged administrative action falls under any of the following circumstances, a people's court shall enter a judgment to confirm the illegality of the alleged administrative action but not to revoke it:

(1) An administrative action shall be revoked according to the law, but the revocation will cause any significant damage to the national interest or public interest.

(2) A petty violation of the statutory procedures in taking an administrative action will not have any actual impact on the plaintiff's rights.

Where the alleged administrative action falls under any of the following circumstances, a people's court shall enter a judgment to confirm the illegality of the alleged administrative action, if it is not necessary to revoke it or enter a judgment to require the defendant to perform:

(1) An administrative action is illegal, but there is nothing revocable.

(2) The defendant has modified the original illegal administrative action, but the plaintiff still requests confirmation of the illegality of the original administrative action.

(3) The defendant fails to perform or delays the performance of its statutory duties and responsibilities, and it is meaningless to enter a judgment to require the defendant to perform.

Article 75 Where the alleged administrative action has been taken by a party other than an administrative agency, is baseless, or otherwise seriously and evidently violates the law, a people's court shall enter a judgment to confirm the void of the alleged administrative action if the plaintiff so requests.

Article 76 Where a people's court enters a judgment to confirm the illegality or void of the alleged administrative action, it may concurrently order the defendant to take remedial measures; and, if the plaintiff has sustained losses from the alleged administrative action, order the defendant to assume compensatory liability according to the law.

Article 77 Where an administrative punishment is evidently inappropriate, or any other administrative action is erroneous in determining or recognizing an amount, a people's court may enter a judgment to modify it.

A modification judgment of a people's court may not aggregate the plaintiff's obligations or impair the plaintiff's rights and interests, unless the plaintiffs include any interested party with opposing claims.

Article 78 Where the defendant fails to perform according to the law or as agreed upon or illegally modifies or rescinds an agreement as mentioned in item (11), paragraph 1, Article 12 of this Law, a people's court shall enter a judgment to require the defendant to continue to perform, take remedial measures, or compensate for losses, among others.

Where the defendant legally modifies or rescinds an agreement as mentioned in item (11), paragraph 1, Article 12 of this Law, but fails to provide indemnity as required by the law, the people's court shall enter a judgment to require the defendant to provide indemnity.

Article 79 Where the reconsideration agency and the administrative agency taking the original administrative action are co-defendants in a case, a people's court shall adjudicate concurrently on the reconsideration decision and the original administrative action.

Article 80 Whether a case is tried openly or in camera, a people's court shall, without exception, pronounce its judgment publicly.

If a judgment is pronounced in court at the end of a trial, a written judgment shall be served within ten days; or if the pronouncement of a judgment is scheduled for a later date, a written judgment shall be served immediately after pronouncement.

When a judgment is pronounced, the parties must be informed of their rights to appeal, the period for filing an appeal, and the appellate court.

Article 81 A people's court of first instance shall enter a judgment within six months from the day when a complaint is docketed. Any extension of the aforesaid period as needed under special circumstances shall be subject to the approval of a Higher People's Court. Where a Higher People's Court trying a case as a court of first instance needs to extend the aforesaid period, the extension shall be subject to the approval of the Supreme People's Court.

Section 3 Summary Procedure

Article 82 In trying the following administrative cases, a people's court of first instance may apply the summary procedure if it deems that the facts are clear, the rights and obligations between the parties are clear, and the dispute is minor:

- (1) The alleged administrative action was taken on the spot according to the law.
- (2) The amount involved in the case is not more than 2,000 yuan.
- (3) The case involves the disclosure of open government information.

For administrative cases other than those as mentioned in the preceding paragraph, the summary procedure may be applied with the consent of all parties.

The summary procedure may not apply to a case remanded for retrial or a case retried under the trial supervision procedure.

Article 83 An administrative case to which the summary procedure is applied shall be tried by a sole judge, and be closed within 45 days from the day when the complaint is docketed.

Article 84 Where a people's court discovers during trial that the application of the summary procedure is not appropriate for the case, it shall enter a ruling to try the case under the formal procedure.

Section 4 Procedures at Second Instance

Article 85 Against a judgment of a people's court of first instance, a party shall have the right to file an appeal with the people's court at the next higher level within 15 days of the service of the written judgment. Against a ruling of a people's court of first instance, a party shall have the right to file an appeal with the people's court at the next higher level within 10 days of the service of the written ruling. If the party fails to appeal upon expiry of the aforesaid period, the judgment or ruling of the people's court of first instance shall take effect.

Article 86 A people's court shall form a collegial bench to try an appeal case in court. Where, after reviewing the case file, conducting investigation, and questioning the parties, no new fact, evidence, or ground is submitted, the collegial bench may try the appeal case without holding court if the collegial bench deems it unnecessary.

Article 87 In trying an appeal case, a people's court shall comprehensively review the

judgment or ruling of the people's court conducting the original trial and the alleged administrative action.

Article 88 A people's court trying an appeal case shall enter a final judgment within three months of receipt of a written appeal. Any extension of the aforesaid period as needed under special circumstances shall be subject to the approval of a Higher People's Court. Where a Higher People's Court trying an appeal case needs to extend the aforesaid period, the extension shall be subject to the approval of the Supreme People's Court.

Article 89 A people's court trying an appeal case shall:

- (1) enter a judgment or ruling to dismiss the appeal and sustain the original judgment or ruling, if the original judgment or ruling is clear in fact finding and correct in application of laws and regulations;
- (2) enter its own judgment or ruling, revoke the original judgment or ruling, or enter a modification judgment or ruling according to the law, if the original judgment or ruling is erroneous in fact finding or application of laws and regulations;
- (3) remand the case to the people's court conducting the original trial for retrial or enter its own judgment after fact finding, if the original judgment is unclear in the finding of the basic facts; or
- (4) enter a ruling to revoke the original judgment and remand the case to the people's court conducting the original trial for retrial, if the original judgment omits a party, is a default judgment illegally entered, or otherwise seriously violates the statutory procedures.

Where, after the people's court conducting the original trial enters a judgment for a case remanded for retrial, a party appeals, the people's court of second instance shall not remand the case for retrial again.

Where a people's court trying an appeal case needs to change the original judgment, its own judgment shall also contain a determination regarding the alleged administrative action.

Section 5 Trial Supervision Procedure

Article 90 A party to a case may petition the people's court at the next higher level for retrial if the party deems that the effective judgment or ruling for the case is erroneous, but the execution of the judgment or ruling shall not be suspended.

Article 91 Where a party's petition for retrial falls under any of the following circumstances, a people's court shall conduct retrial:

- (1) A ruling not to docket a complaint or a ruling to dismiss a complaint is erroneous.
- (2) There is any new evidence which suffices to overturn the original judgment or ruling.
- (3) The primary evidence for the fact finding in the original judgment or ruling is insufficient, has not been cross-examined, or is forged.
- (4) There is any erroneous application of laws and regulations in the original judgment or ruling.
- (5) There is any violation of statutory proceedings, which may affect the impartial trial of the case.
- (6) The original judgment or ruling has omitted any claims.

(7) The legal instrument based on which the original judgment or ruling is entered has been revoked or modified.

(8) In trying the case, a judge commits embezzlement, accepts bribes, practices favoritism, makes falsification, or adjudicates by bending the law.

Article 92 Where the president of a people's court at any level discovers that any effective judgment or ruling of the court falls under any of the circumstances as set out in Article 91 of this Law or discovers that any mediation was conducted by the court in violation of the free will principle or any part of an effective consent judgment of the court is in violation of the law, and deems a retrial necessary, the president shall submit the case to the judicial committee of the court for deliberation and decision.

Where the Supreme People's Court discovers that any effective judgment or ruling of a local people's court at any level, or a people's court at a higher level discovers that any effective judgment or ruling of a people's court at a lower level, falls under any of the circumstances as set out in Article 91 of this Law, the Supreme People's Court discovers that any mediation was conducted by a local people's court at any level in violation of the free will principle or any part of an effective consent judgment of a local people's court at any level is in violation of the law, or a people's court at a higher level discovers that any mediation was conducted by a people's court at a lower level in violation of the free will principle or any part of an effective consent judgment of a people's court at a lower level is in violation of the law, the Supreme People's Court or the people's court at a higher level shall have the power to directly retry the case or specify the people's court at a lower level to retry the case.

Article 93 Where the Supreme People's Procuratorate discovers that any effective judgment or ruling of a people's court at any level, or a people's procuratorate at a higher level discovers that any effective judgment or ruling of a people's court at a lower level, falls under any of the circumstances as set out in Article 91 of this Law, or the Supreme People's Procuratorate discovers that any effective consent judgment of a people's court at any level, or a people's procuratorate at a higher level discovers that any effective consent judgment of a people's court at a lower level, is detrimental to the national interest or public interest, the Supreme People's Procuratorate or the people's procuratorate at a higher level shall file an appeal.

Where a local people's procuratorate at any level discovers that any effective judgment or ruling of a people's court at the same level falls under any of the circumstances as set out in Article 91 of this Law or discovers that any effective consent judgment of a people's court at the same level is detrimental to the national interest or public interest, the people's procuratorate may provide the people's court at the same level with procuratorial recommendations, and report such recommendations to the people's procuratorate at the next higher level for recordation; or request that the people's procuratorate at the next higher level file an appeal with the people's court at the same level.

A people's procuratorate at any level shall have the power to provide a people's court at the same level with procuratorial recommendations regarding the violations of the law by judges

in trial procedures other than the trial supervision procedure.

Chapter VIII Enforcement

Article 94 The parties must comply with an effective judgment, ruling, or consent judgment of a people's court.

Article 95 Where a citizen, a legal person, or any other organization refuses to comply with a judgment, ruling, or consent judgment, the administrative agency or a third party may apply to the people's court of first instance for enforcement, or the administrative agency may conduct enforcement according to the law.

Article 96 Where an administrative agency refuses to comply with a judgment, ruling, or consent judgment, the people's court of first instance may take the following measures:

(1) By a notice, requiring a bank to transfer the amount of a fine that shall be refunded or the amount payable from the administrative agency's account.

(2) If the administrative agency fails to comply during a specified period, imposing a fine of 50 to 100 yuan per day on the person in charge of the administrative agency from the expiry date of the specified period.

(3) Issuing a public announcement on the administrative agency's refusal to comply.

(4) Providing the supervisory authority or the administrative agency at the next higher level with judicial recommendations. The authority or agency receiving judicial recommendations shall handle such recommendations according to the relevant provisions, and inform the people's court of the results.

(5) If the administrative agency's refusal to comply with the judgment, ruling, or consent judgment has any adverse social impact, detaining the directly liable supervising official and other directly liable persons of the administrative agency; and if the circumstances are so serious that any crime is constituted, subjecting the offenders to criminal liability according to the law.

Article 97 Where, during the statutory period, a citizen, a legal person, or any other organization neither files a complaint against an administrative action nor complies with an administrative action, the administrative agency may apply to a people's court for enforcement, or conduct enforcement according to the law.

Chapter IX Foreign-Related Administrative Litigation

Article 98 This Law shall apply to administrative litigation conducted by foreign nationals, stateless persons, and foreign organizations in the People's Republic of China, except as otherwise provided for by any law.

Article 99 Foreign nationals, stateless persons, and foreign organizations conducting administrative litigation in the People's Republic of China shall have equal litigation rights and obligations as citizens and organizations of the People's Republic of China.

Where the courts of a foreign country impose any restrictions on the rights of citizens and organizations of the People's Republic of China in administrative litigation, the people's courts shall apply the principle of reciprocity to the rights of citizens and organizations of the foreign country in administrative litigation.

Article 100 Where foreign nationals, stateless persons, and foreign organizations retain lawyers to represent them in administrative litigation in the People's Republic of China, they shall retain lawyers of law firms of the People's Republic of China.

Chapter X Supplementary Provisions

Article 101 Where this Law is silent regarding any period, service of process, property preservation, court session, mediation, suspension of proceedings, termination of proceedings, summary procedure, or enforcement, among others, for administrative cases tried by the people's courts or regarding the supervision by the people's procuratorates over the acceptance, trial, adjudication, and enforcement of administrative cases, the relevant provisions of the Civil Procedure Law of the People's Republic of China shall apply.

Article 102 The people's courts shall collect court costs for the trial of administrative cases. The court costs shall be assumed by the losing party or, if both sides are liable, assumed by both sides. The specific measures for the collection of court costs shall be developed additionally.

Article 103 This Law shall come into force on October 1, 1990.

20. Special Maritime Procedure Law of the People's Republic of China

(Adopted by the thirteenth Session of the Standing Committee of the Ninth People's Congress on December 15, 1999)

Chapter I General Provisions

Article 1 This Law is formulated for the purposes of maintaining the litigation rights, ensuring the ascertaining of facts by the people's courts, distinguishing right from wrong, applying the law correctly, trying maritime cases promptly.

Article 2 Whoever engages in maritime litigation within the territory of the People's Republic of China shall apply the Civil Procedure Law of the People's Republic of China and this Law. Where otherwise provided for by this Law, such provisions shall prevail.

Article 3 If an international treaty concluded or acceded to by the People's Republic of China contains provisions that differ from provisions of the Civil Procedure Law of the People's Republic of China and this Law in respect of foreign-related maritime procedures, the provisions of the international treaty shall apply, except those on which China has made reservations.

Article 4 The maritime court shall entertain the lawsuits filed in respect of a maritime tortious dispute, maritime contract dispute and other maritime disputes brought by the parties as provided for by laws.

Article 5 In dealing with maritime litigation, the maritime courts, the higher people's courts where such courts are located and the Supreme People's Court shall apply the provisions of this Law.

Chapter II Jurisdiction

Article 6 Maritime territorial jurisdiction shall be conducted in accordance with the relevant provisions of the Civil Procedure Law of the People's Republic of China.

The maritime territorial jurisdiction below shall be conducted in accordance with the following provisions:

(1) A lawsuit brought on maritime tortious may be, in addition to the provisions of Articles 19 to 31 of the Civil Procedure Law of the People's Republic of China, under jurisdiction of the maritime court of the place of its port of registry;

(2) A lawsuit brought on maritime transportation contract may be, in addition to the provisions of Articles 82 of the Civil Procedure Law of the People's Republic of China, under jurisdiction of the maritime court of the place of its port of re-transportation;

(3) A lawsuit brought on maritime charter parties may be under jurisdiction of the maritime court of the place of its port of ship delivery, port of ship return, port of ship registry, port where the defendant has its domicile;

(4) A lawsuit brought on a maritime protection and indemnity contract may be under jurisdiction of the maritime court of the place where the object of the action is located, the place where the accident occurred or the place where the defendant has its domicile;

(5) A lawsuit brought on a maritime contract of employment of crew may be under jurisdiction of the maritime court of the place where the plaintiff has its domicile, the place where the contract is signed, the place of the port where the crew is abroad or the port where the crew leaves the ship or the place where the defendant has its domicile;

(6) A lawsuit brought on a maritime guaranty may be under jurisdiction of the maritime court of the place where the property mortgaged is located or the place where the defendant has its domicile; a lawsuit brought on a ship mortgage may also be under jurisdiction of the maritime court in the place of registry port;

(7) a lawsuit brought on ownership, procession, and use, maritime liens of a ship, may be under jurisdiction of the maritime court of the place where the ship is located, the place of ship registry or the place where the defendant has its domicile.

Article 7 The following maritime litigation shall be under the exclusive jurisdiction of the maritime courts specified in this Article:

(1) A lawsuit brought on a dispute over harbour operations shall be under the jurisdiction of the maritime court of the place where the harbour is located;

(2) A lawsuit brought on a dispute over pollution damage for a ship's discharge, omission or dumping of oil or other harmful substances, or maritime production, operations, ship scrapping, repairing operations shall be under the jurisdiction of the maritime court of the place where oil pollution occurred, where injury result occurred or where preventive measures were taken;

(3) A lawsuit brought on a dispute over a performance of a maritime exploration and development contract within the territory of the People's Republic of China and the sea areas under its jurisdiction shall be under the jurisdiction of the maritime court of the place where the contract is performed.

Article 8 Where the parties to a maritime dispute are foreign nationals, stateless persons, foreign enterprises or organizations and the parties, through written agreement, choose the maritime court of the People's Republic of China to exercise jurisdiction, even if the place which has practical connections with the dispute is not within the territory of the People's Republic of China, the maritime court of the People's Republic of China shall also have jurisdiction over the dispute.

Article 9 An application for determining a maritime property as ownerless shall be filed by the parties with the maritime court of the place where the property is located; an application for declaring a person as dead due to a maritime accident shall be filed with the maritime court of the place where the competent organ responsible for handling with the accident or the maritime court that accepts the relevant maritime cases.

Article 10 In the event of a jurisdictional dispute between a maritime court and a people's court, it shall be resolved by the disputing parties through consultation; if the dispute cannot be so resolved, it shall be reported to their common superior people's court for the designation of jurisdiction.

Article 11 When the parties apply for enforcement of maritime arbitral award, apply for recognition and enforcement of a judgement or written order of a foreign court and foreign maritime arbitral award, an application shall be filed with the maritime court of the place where the property subjected to execution or of the place where the person subjected to execution has its domicile. In case of no maritime court in the place where the property subjected to execution or in the place where the person subjected to execution has its domicile, an application shall be filed with the intermediate people's court of the place where the property subjected to execution or of the place where the person subjected to execution has its domicile.

Chapter III Maritime Claims Preservation

Section 1 General Principles

Article 12 Maritime claims mean maritime courts, according to applications of maritime claimants, take compulsory preservation measures against property of persons against whom the claims are brought up in order to ensure the realization of such rights.

Article 13 An application for maritime claims by the parties shall, before bring a lawsuit, be filed with the maritime court of the place where the property subjected to preservation.

Article 14 Maritime claims shall not be bound by procedure jurisdiction agreements or arbitration agreements relating to the said maritime claims between the parties.

Article 15 Where maritime claimants apply for maritime claims, written applications shall be filed with maritime courts. Maritime claims, application reasons, objects subjected to preservation and amounts for guaranty shall be stated in applications.

Article 16 A maritime court may, in accepting a maritime preservation application, order the claimant to provide a guaranty. Where the claimant fails to provide guaranty, his application shall be rejected.

Article 17 After receiving an application, the maritime court must make an order within 48

hours; if the court orders the adoption of maritime preservation measures, the execution thereof shall begin immediately. Where not conforming to the conditions for a maritime preservation, the application shall be rejected.

If the party concerned is not satisfied with the order, he may, within five days from the date of the receipt of the order, apply for reconsideration which could be granted only once. The maritime court shall make a reconsideration decision within five days from the date of the receipt of the reconsideration application. Execution of the order shall not be suspended during the time of reconsideration.

Where the interested party raises objection to the maritime preservation, the maritime court, upon examination and deeming it reasonable, shall cancel the property preservation.

Article 18 If the person against whom the application for maritime preservation is made provides guaranty, or the party has justified reasons for applying cancellation of maritime reservation, the people's court shall cancel the property reservation promptly.

If the maritime claimant fails to bring an action or apply for arbitration according to the arbitration agreement within the time limit specified by this Law, the people's court shall cancel the property reservation or return the guaranty promptly.

Article 19 Where the relevant maritime dispute enters into litigation or arbitration procedure after execution of the maritime preservation, the party may bring an action relating to the maritime claim to the maritime court which has taken maritime claim preservation or other maritime courts having jurisdiction over it, with the exception of signing of a litigation jurisdiction agreement or an arbitration agreement between the parties.

Article 20 If an application for maritime preservation is wrongfully made by a maritime claimant, the claimant shall compensate the person against whom the application is made for any loss incurred from maritime preservation.

Section 2 Arresting or Auction Sale of Ships

Article 21 The following maritime claims may applied for arresting ships:

- (1) the destruction of or damage to the property occurred in the operation of the ship;
- (2) the loss of life or personal injury directly relating to the operation of the ship;
- (3) salvage payment;
- (4) the damage or threat of damage caused by the ship to the environment, seashore or the relevant interested parties; the measures taken for prevention, reduction and elimination of such damage; payment for compensation of such damage; the reasonable cost for the measures taken actually or preparing to take for restoring the environment; loses the third party suffered or will probably suffer due to such damage; and the damage, fees or loses which are similar in nature specified in this Item;
- (5) fees relating to floating, elimination, recycling and destruction of sunken ships, shipwreck, stranded objects, abandoned ships or making them harmless, including fees relating to floating, elimination, recycling and destruction of the objects which still are or were aboard such ships or making them harmless, and fees relating to maintenance of abandoned ships and suppurating the crew members;

- (6) the agreement or use or charter parties of the ship;
- (7) an agreement for carriage of goods or passengers;
- (8) goods (including luggage) on board or loss or damage related thereto;
- (9) general average;
- (10) towage service;
- (11) pilotage service;
- (12) provision of materials or services for operation, management, maintenance and repair of ships;
- (13) ship building, rebuilding, repair, refitting or fitting;
- (14) prescribed fees or fees for ports, canals, wharves, harbors or other waterways;
- (15) wages of ship's crew or other payments, including the repatriation fee and social insurance premium payable for ship's crew;
- (16) expenses paid for a ship or shipowner;
- (17) ship's insurance premium (including mutual insurance membership fee) paid by a shipowner or bareboat charterer, or paid on his behalf;
- (18) the commission, brokerage or agency fee related to a ship paid by the shipowner or bareboat charterer, or paid on his behalf;
- (19) a dispute over ownership or possession of a ship;
- (20) a dispute over use of or profit from a ship between co-owners of the ship;
- (21) a mortgage of a ship or right of the same nature; or
- (22) a dispute arising from a contract for sale of a ship.

Article 22 No application for arrest of a ship may be filed except for the maritime claims as stipulated in Article 21 of this Law; there are exceptions, however, for executing judgments, arbitral awards or other legal documents.

Article 23 If any of the following circumstances exists, a maritime court may arrest the involved ship:

- (1) where the shipowner is held responsible for a maritime claim and is the owner of the ship when the arrest is executed;
- (2) where the bareboat charterer of the ship is held responsible for a maritime claim and is the bareboat charterer or the owner of the ship when the arrest is executed;
- (3) where a maritime claim is entitled to a mortgage of the ship or right of the same nature;
- (4) where a maritime claim relates to ownership or possession of the ship; or
- (5) where a maritime claim is entitled to a maritime lien.

A maritime court may arrest other ships owned by the shipowner, bareboat charterer, time charterer or voyage charterer who is held responsible for a maritime claim, when the arrest is executed, with the exception of the claims related to ownership or possession of the ship. No ship engaging in military or government duties may be arrested.

Article 24 A maritime claimant may not apply to arrest a ship having been arrested for the same maritime claim, except that any of the following circumstances exists:

- (1) where the party who opposes the claim has not provided a sure guarantee;

(2) where the guarantor probably cannot perform his obligation of guarantee wholly or partly;
or

(3) where the maritime claimant agrees to release the arrested ship or return the existing guarantee for justifiable reason; or cannot stop the release of the arrested ship or return of the existing guarantee by justifiable means.

Article 25 For a maritime claimant applying to arrest the involved ship, if the name of the party who opposes the claim cannot be ascertained at once, the filing of his application shall not be affected.

Article 26 A maritime court may issue the relevant departments with a notice for assistance in execution at the same time it issues or cancels an order for arrest of a ship, and the notice shall clearly set forth the scope and content of the assistance in execution and the relevant departments have the obligation to assist in execution. A maritime court may directly dispatch personnel to board the ship for supervision if it deems necessary.

Article 27 After a maritime court orders to impose preservation upon a ship, with consent of the maritime claimant, it may allow the ship to continue the operation by ways of restraining the disposition or mortgage of the ship.

Article 28 The period of arresting a ship for maritime claim preservation shall be 30 days. If a maritime claimant brings a law suit or applies for arbitration within 30 days, and applies for arrest of a ship in the course of the litigation or arbitration, the arrest of the ship shall not be restrained by the period stipulated in the preceding paragraph.

Article 29 If, on the expiration of the period of arresting a ship, the party who opposes the claim fails to provide guarantee, and the ship is not suitable for being arrested longer, the maritime claimant may apply to the maritime court arresting the ship for auction of the ship after bringing a law suit or applying for arbitration.

Article 30 A maritime court shall conduct examination after receiving the application for auction of a ship, and make an order approving or disapproving the auction of the ship.

If a party is not satisfied with the order, he may apply for reconsideration once within five days of the date of receiving the written order. The maritime court shall make a reconsideration decision within five days of receiving the reconsideration application. Execution of the order shall be suspended during the time of reconsideration.

Article 31 Where a maritime claimant, after filing an application for auction of a ship, applies for stopping the auction, whether or not to give a permission shall be ordered by the maritime court. If the maritime court orders to stop the auction of the ship, expenses incurred for auctioning the ship shall be paid by the maritime claimant.

Article 32 A maritime court that orders to auction a ship shall issue a public notice through newspapers or other new media. If a foreign ship is to be auctioned, a public notice shall be issued through newspapers or other news media distributed abroad.

A public notice shall contain the following particulars:

- (1) name and nationality of the ship to be auctioned;
- (2) causes and basis for auction of the ship;

- (3) composition of the ship auction committee;
- (4) time and place for auction of the ship;
- (5) time and place for display of the ship to be auctioned;
- (6) procedure to be undergone for participating in the bidding;
- (7) registered items to be handled for claims; and
- (8) other particulars as required to be publicized.

The period of a public notice for auction of a ship shall not less than 30 days.

Article 33 A maritime court, 30 days prior to auction of the ship, shall issue notices to the registration authorities of the country of registry of the ship to be auctioned, and to the known lienor, mortgagee and owner of the ship.

The contents of the notice contain the name of the ship to be auctioned, time and place for auction of the ship, causes and basis for auction of the ship, and registration of claims.

The notice shall be in writing or take other appropriate forms by which receipt can be confirmed.

Article 34 Auction of a ship shall be executed by a ship auction committee. The ship auction committee shall be composed of three or five persons, that is, execution officers appointed, as well as auctioneers and surveyors engaged by the maritime court.

The ship auction committee organizes appraisal and valuation of the ship; organizes and presides over the auction; signs a letter of confirmation for conclusion of the auction with the bidder; and handles procedures for the transfer of the ship.

The ship auction committee shall be responsible to the maritime court and subject to supervision of the maritime court.

Article 35 Bidders shall register with the ship auction committee within a prescribed time limit. For registration, they shall submit for inspection the identity certificates of themselves, enterprises' legal representatives, or persons-in-charge of other organizations, as well as powers of attorney of agents, and pay a certain amount of bonds for purchase of the ship.

Article 36 A ship auction committee shall display the ship to be auctioned before the auction of the ship, and shall provide facilities for inspecting the ship to be auctioned and relevant data.

Article 37 The vendee shall pay without delay not less than 20 percent of the ship's price after he signs a letter of confirmation, and the remainder of the ship's price shall be settled within seven days of the date of concluding the auction, however, except otherwise agreed upon between the ship auction committee and the vendee.

Article 38 Once the vendee has settled the price in full, the original shipowner shall delivery the ship to the vendee on the basis of the current condition of the ship, at the place of berth of the ship, within a fixed time limit. The ship auction committee shall organize and supervise the delivery of the ship, and sign a letter of confirmation of ship's delivery with the vendee after the delivery of the ship.

After the delivery of the ship is finished, the maritime court shall issue an order releasing the arrest of the ship.

Article 39 After the delivery of the ship, the maritime court shall issue a public notice through newspapers or other news media, announcing that the ship has been auctioned openly and delivered to the vendee.

Article 40 After accepting the ship, the vendee shall undergo formalities for registration of the ship's ownership at the ship registration authorities on the basis of the letter of confirmation for conclusion of auction and relevant data. The original shipowner shall undergo formalities for cancellation of registration of the ship's ownership at the original ship registration authorities. Failure to undergo formalities for cancellation of registration of the ship's ownership by the original shipowner shall not affect the transfer of the ship's ownership.

Article 41 Malicious collusion between bidders makes the auction invalid. Any bidder involved in malicious collusion shall pay expenses for auctioning the ship and compensate losses incurred. The maritime court may impose upon the bidder involved in malicious collusion a fine of not more than ten percent and not less than 30 percent of the highest price offered.

Article 42 In addition to the provisions in this Section, auction shall be governed by the relevant provisions of the Auction Law of the People's Republic of China.

Article 43 Auction of an arrested ship for debt payment during the procedure of execution may be referred to the relevant provisions of this Section.

Section 3 Arrest and Auction of the Goods on Board

Article 44 A maritime claimant may apply to arrest the goods on board for ensuring the fulfillment of his maritime claim.

The goods on board to be arrested on application shall be under ownership of the party who opposes the claim.

Article 45 The value of the goods on board to be arrested on application by a maritime claimant shall be equivalent to the amount of his claim.

Article 46 The period of arresting the goods on board for maritime claim preservation shall be 30 days.

If a maritime claimant brings a law suit or applies for arbitration within 15 days, and applies for arrest of the goods on board in the course of the litigation or arbitration, the arrest of the goods on board shall not be restrained by the period stipulated in the preceding paragraph.

Article 47 If, on the expiration of the period of arresting the goods on board, the party who opposes the claim fails to provide guarantee, and the goods are not suitable for being arrested longer, the maritime claimant may apply to the maritime court arresting the goods on board for auction of the goods after bringing a law suit or applying for arbitration.

For articles which cannot be stored, or are difficult to be stored, or the storage expense may exceed their value, the maritime claimant may apply for auction in advance.

Article 48 A maritime court shall conduct examination after receiving the application for auction of the goods on board, and make an order approving or disapproving the auction of the goods on board.

If a party is not satisfied with the order, he may apply for reconsideration once within five

days of the date of receiving the written order. The maritime court shall make a reconsideration decision within five days of receiving the reconsideration application. Execution of the order shall be suspended during the time of reconsideration.

Article 49 Auction of the goods on board shall be executed by an auction organization composed of execution officers appointed, and auctioneers engaged by the maritime court, or executed by an agency authorized by the maritime court.

Auction of the goods on board, if not covered by the provisions of this Section, shall be referred to the relevant provisions of Section 2 of this Chapter on auction of a ship.

Article 50 Application by a maritime claimant for maritime claim preservation imposed upon fuel and materials used by a ship related to the maritime claim shall be governed by the provisions of this Section.

Chapter IV Maritime Injunction

Article 51 A maritime injunction means any of compulsory measures by which a maritime court, on application by a maritime claimant, orders an act or omission by the party who opposes the claim, in order to protect the lawful rights and interests of the maritime claimant against any infringement.

Article 52 An interested party applying for a maritime injunction before bringing a law suit shall refer to the maritime court at the place where the maritime dispute occurred.

Article 53 A maritime injunction shall not be restrained by a jurisdiction agreement or an arbitration agreement relating to the maritime claim as agreed upon between the parties.

Article 54 A maritime claimant applying for a maritime injunction shall submit a written application to a maritime court. The application shall clearly set forth causes for application with relevant evidence attached thereto.

Article 55 A maritime court accepting an application for a maritime injunction may order the maritime claimant to provide guarantee. If the maritime claimant fails to provide guarantee, the application shall be rejected.

Article 56 To make a maritime injunction, the following conditions shall be fulfilled:

- (1) The claimant has a specific maritime claim;
- (2) There is a need to rectify an act committed by the party who opposes the claim, in violation of the provisions of the law or the stipulations of a contract; and
- (3) In case of emergency, failure to make a maritime injunction immediately will cause damage or expand damage.

Article 57 After accepting the application, a maritime court shall make an order within 48 hours. If an order is made for making a maritime injunction, it shall be executed immediately; if the conditions for a maritime injunction are not fulfilled, an order shall be made to reject the application.

Article 58 If a party is not satisfied with the order, he may apply for reconsideration once within five days of the date of receiving the written order. The maritime court shall make a reconsideration decision within five days of receiving the reconsideration application. Execution of the order shall not be suspended during the time of reconsideration.

If an interested party lodges an objection to a maritime injunction, the maritime court shall order to cancel the maritime injunction if it deems the causes are tenable through investigation.

Article 59 If the party who opposes the claim refuses to obey a maritime injunction, the maritime court may impose a fine or detain him in accordance with the seriousness of the circumstances; if a crime has been constituted, criminal liability shall be investigated according to the law.

A fine on an individual shall not be less than 1,000 yuan and not more than 30,000 yuan . A fine on a unit shall not be less than 30,000 yuan and not more than 100,000 yuan.

The period of detention shall not be longer than 15 days.

Article 60 A maritime claimant wrongfully submitting an application for a maritime injunction shall compensate losses incurred by the party who opposes the claim or an interested party.

Article 61 If no litigation or arbitration procedures start for relevant maritime disputes after the execution of the maritime injunction, the parties may bring a law suit for this maritime claim to the maritime court making the maritime injunction or the other maritime court having jurisdiction, except that a jurisdiction agreement or an arbitration agreement has been concluded between the parties.

Chapter V Maritime Evidence Preservation

Article 62 Maritime evidence preservation means any of compulsory measures by which a maritime court obtains, retains or seals up evidence related to the maritime claim on application by the maritime claimant.

Article 63 An interested party applying for maritime evidence preservation before bringing a law suit shall refer to the maritime court at the place where the evidence to be preserved is located.

Article 64 Maritime evidence preservation shall not be restrained by a jurisdiction agreement or an arbitration agreement relating to the maritime claim as agreed upon between the parties.

Article 65 A maritime claimant applying for maritime evidence preservation shall submit a written application to a maritime court. The application shall clearly set forth the evidence to be preserved on application, the relation between the evidence and the maritime claim and causes for application.

Article 66 A maritime court accepting an application for maritime evidence preservation may order the maritime claimant to provide guarantee. If the maritime claimant fails to provide guarantee, the application shall be rejected.

Article 67 To impose maritime evidence preservation, the following conditions shall be fulfilled:

- (1) The claimant is the party to the maritime claim;
- (2) The evidence to be preserved on application provides proof for the maritime claim;
- (3) The party who opposes the claim is the person related to the evidence to be preserved on application; and

(4) In case of emergency, failure to impose evidence preservation immediately will result in loss or difficulty in obtaining the evidence for the maritime claim.

Article 68 After accepting the application, a maritime court shall make an order within 48 hours. If an order is made for imposing maritime evidence preservation measures, it shall be executed immediately; if the conditions for maritime evidence preservation are not fulfilled, an order shall be made to reject the application.

Article 69 If a party is not satisfied with the order, he may apply for reconsideration once within five days of the date of receiving the written order. The maritime court shall make a reconsideration decision within five days of receiving the reconsideration application. Execution of the order shall not be suspended during the time of reconsideration. If the causes for applying for reconsideration by the party who opposes the claim are tenable, the evidence preserved shall be returned to the party who opposes the claim.

If an interested party lodges an objection to maritime evidence preservation, the maritime court shall order to cancel maritime evidence preservation if it deems the causes are tenable through investigation; if preservation has been imposed, evidence related to the interested party shall be returned to the interested party.

Article 70 A maritime court imposing maritime evidence preservation may seal up the evidence, may obtain reproductions or duplicates, or take photos, conduct tape-recording, make extracts or records of investigation. If really necessary, the original of the evidence shall be obtained.

Article 71 A maritime claimant wrongfully submitting an application for maritime evidence preservation shall compensate losses incurred by the party who opposes the claim or an interested party.

Article 72 If no litigation or arbitration procedures start for relevant maritime disputes after the imposition of maritime evidence preservation, the parties may bring a law suit for the maritime claim to the maritime court imposing maritime evidence preservation or the other maritime court having jurisdiction, except that a jurisdiction agreement or an arbitration agreement has been concluded between the parties

Chapter VI Maritime Guarantee

Article 73 Maritime guarantee includes guarantee involved in procedures provided in this Law such as maritime claim preservation, maritime injunction, maritime evidence preservation.

The guarantee shall be in form of providing cash or surety, establishing mortgage or pledge.

Article 74 A guaranty provided by a maritime claimant shall be delivered to the maritime court; a guaranty provided by the person against whom the application for maritime preservation is made may be delivered to the maritime court, or delivered to the maritime claimant.

Article 75 The modes and quantity of a guaranty provided by a maritime claimant shall be determined by the maritime court. The modes and quantity of a guaranty provided by the person against whom the application for maritime preservation is made shall be determined through consultation between the maritime claimant and the person against whom the

application for maritime preservation is made; if failing such consultation, they shall be determined by a maritime court.

Article 76 Where a maritime claimant requests a person against whom the application for maritime preservation is made to provide guaranty on a maritime claim, the quantity of the guaranty shall equal to the quantity of his creditor's rights, but shall not exceed the value of the preserved property.

The quantity of a guaranty provided by a maritime claimant shall equal to the losses possibly caused to a person against whom the application for maritime preservation is made due to his claim. The specific quantity thereof shall be determined by the maritime court.

Article 77 After a guaranty is provided, the person providing the guaranty may, for any justified reasons, file an application to the maritime court to reduce, modify or cancel the guaranty.

Article 78 Where losses are caused to a person against whom the application for maritime preservation is made due to excessive quantity of the guaranty claimed by a maritime claimant, the maritime claimant shall bear the liability for compensation.

Article 79 The guaranty involved in constituting a limitation fund for maritime claims liability and in advance execution as well as other procedures may be handled by reference to the provisions of this Chapter.

Chapter VII Service

Article 80 In serving a maritime litigation document, the relevant provisions of the Civil Procedure Law of the People's Republic of China are applicable, and the following methods may also be adopted:

(1) to serve on an agent ad litem commissioned by the person on whom the litigation document is to be served.

(2) to serve on a representative office or branch office established in the People's Republic of China by the person on whom the service is to be made or on his business agent;

(3) to serve by employing other appropriate methods by which the receipt can be confirmed.

A legal paper relating to the arrest of a ship may also be served on the captain of the ship involved.

Article 81 If the person who has the obligation of receiving a legal paper refuses to sign and receive the legal paper, the person serving the paper shall record on the receipt the situations. After the person serving the paper and the witness have affixed their signatures or seals to the receipt, the legal paper shall be left at his domicile and the service shall be deemed completed.

Chapter VIII Trial Procedures

Section 1 Provisions on Trying Cases Involving Collision of Ships

Article 82 When a plaintiff brings an action and a defendant files a defence, the Investigation Form of Maritime Accident shall be truthfully completed.

Article 83 When serving a statement of complaint or a defence on any party, the maritime court shall not attach thereto any relevant evidential materials.

Article 84 The parties shall finish the provision of evidence before a court session. After having finished the provision of evidence and issued a note stating the provision of evidence to the maritime court, the parties may apply to consult evidential materials relating to the collision of ships.

Article 85 The parties shall not repudiate their statements in the Investigation Form of Maritime Accident and the evidence they have provided, except that they have new evidence and full reasons which explain that such evidence cannot be provided during the period of providing evidence.

Article 86 The inspection and evaluation of a ship shall be conducted by an institution or individual with authority granted by the State or with professional qualifications. An inspection or evaluation conclusion drawn by an institution or individual without authority granted by the State or without professional qualifications shall not be accepted by the maritime court.

Article 87 A maritime court trying a case involving collision of ships shall conclude the case within one year after placing the case on the docket. Any extension of the period necessitated by special circumstances shall be subject to the approval of the president of the court.

Section 2 Provisions on Trying Cases Involving General Average

Article 88 With respect to a dispute arising from general average, the parties may agree to commission an adjustment institution to have it adjusted, or directly bring an action in the maritime court. When entertaining a dispute arising from general average that has not been adjusted, the maritime court may commission an adjustment institution to have it adjusted.

Article 89 A report of general average adjustment made by an adjustment institution, if the parties do not raise any objections, may be regarded as the basis for contributing liabilities; if the parties raise any objections, the maritime court shall determine to accept them or not.

Article 90 Not being affected by the procedures of an action of general average brought for an identical average accident, the parties may bring an action against the person liable for any non general average losses.

Article 91 An action of non general average brought by the parties for an identical accident in a maritime court entertaining the case involving general average, as well as an action of recourse brought for general average contribution against the person liable, may be tried in combination by the maritime court.

Article 92 The maritime court trying a case involving general average shall conclude the case within one year after placing the case on the docket. Any extension of the period necessitated by special circumstances shall be subject to the approval of the president of the court.

Section 3 Provision on Exercising the Right to Indemnity by Subrogation by a Maritime Insurer

Article 93 Where the occurrence of an insured event is caused by a third party, after having paid insurance indemnity to the insured, the insurer may exercise by subrogation the right

of the insured to demand indemnity against the third party up to the limit of insurance indemnity.

Article 94 When an insurer exercises the right to indemnity by subrogation, if the insured does not bring an action against the third party causing the insured event, the insurer shall, in the name of itself, bring an action against the third party.

Article 95 When an insurer exercises the right to indemnity by subrogation, if the insured has brought an action against the third party causing the insured event, the insurer may request the court entertaining the case to change the party so as to exercise by subrogation the right of the insured to demand indemnity against the third party.

Where the insurance indemnity obtained by the insured can not make up all the losses caused by a third party, the insurer and the insured may, as joint plaintiffs, demand indemnity from the third party.

Article 96 When bring an action or applying to participate in the proceedings in accordance with the provision of Articles 94 and 95 of this Law, an insurer shall submit vouchers certifying the payment of insurance indemnity by the insurer, as well as other documents that ought to be submitted when participating in the proceedings, to the maritime court entertaining the case.

Article 97 With respect to a claim for indemnity against oil pollution damage caused by a ship, the person suffering for the damage may make the claim to the shipowner causing the oil pollution damage, or directly make the claim to the insurer bearing the liability for oil pollution damage of the shipowner or to other person providing financial suretyship.

Where the insurer bearing the liability for oil pollution damage of the shipowner or the other person providing financial suretyship against whom an action is filed, he is entitled to require the shipowner causing the oil pollution damage to participate in the proceedings.

Section 4 Summary Procedures, Procedures for Hastening Debt Recovery and Procedures for Publicizing Public Notice for Assertion of Claims

Article 98 When trying a simple maritime case in which the facts are evident, the rights and obligations clear and the disputes trivial in character, the maritime court may apply the provisions on summary procedures in the Civil Procedure Law of the People's Republic of China.

Article 99 When requesting payment of a pecuniary debt or recovery of negotiable instruments from a debtor on the basis of any maritime causes, a creditor may, if the relevant provisions of the Civil Procedure Law of the People's Republic of China are conformed to, apply to the maritime court that has jurisdiction for an order of payment.

Where a debtor is a foreign national, stateless person, foreign enterprise or organization, but he has domicile, representative office or branch office within the territory of the People's Republic of China and an order of payment can be served, the creditor may apply to the maritime court that has jurisdiction for an order of payment.

Article 100 A holder of a voucher for taking delivery of goods such as a bill of lading may, if the voucher for taking delivery of goods is out of his control or destroyed, apply to the

maritime court of the place where the goods are for publication of public notice for assertion of claims.

Chapter IX Procedures for Constituting a Limitation Fund for Maritime Claims Liability

Article 101 Where limitation of liability is applied according to law after the occurrence of a maritime accident, the shipowner, charter, operator, salvor and insurer may apply to the maritime court to constitute a limitation fund for maritime claims liability.

Where any oil pollution damage is caused by a ship, the shipowner and the insurer of liability or other persons providing financial suretyship shall, for a purpose of obtaining the right to limitation of liability stipulated by law, constitute a limitation fund for maritime claims liability of oil pollution damage with the maritime court.

An application for constituting a limitation fund for liability may be submitted before bring an action or during the proceedings, but it shall be submitted at least before the making of the judgment of first instance.

Article 102 Where an application for constituting a limitation fund for maritime claims liability is to be submitted before bring an action, the parties shall submit it to the maritime court of the place where the accident is occurred, the place where the contract is performed or the place where the ship is arrested.

Article 103 The constitution of a limitation fund for maritime claims liability shall not be restricted by an agreement between the parties on litigation jurisdiction or arbitration.

Article 104 When applying to constitute a limitation fund for maritime claims liability, the applicant shall submit a written application. The application shall specify the quantity of and the reasons for the limitation fund for maritime claims liability, as well as the names, addresses and corresponding methods of the known interested parties, and shall have relevant evidence attached.

Article 105 After entertaining an application for constituting a limitation fund for maritime claims liability, the maritime court shall, within seven days, issue a notice to the known interested parties, and publish a public announcement in newspapers or through other news media.

The notice and public announcement shall include the following contents:

- (1) name of the applicant;
- (2) facts of and reasons for the application;
- (3) matters for which the limitation fund for maritime claims liability is to be constituted;
- (4) matters concerning the undertaking of registration of the creditors' rights;
- (5) other matter that need to be made known.

Article 106 Where an interested party objects the application of an applicant for constituting a limitation fund for maritime claims liability, the party shall, within seven days from the date of the receipt of the notice or within thirty days from the date of the public announcement for those who have not received the notice, raise the objection in written form to the maritime court.

After receiving a written objection submitted by the interested party, the maritime court shall

examine it and make an order within fifteen days. Where the objection is established, it shall order the application of the applicant to be rejected; if the objection is not established, it shall order to approve the applicant to constitute a limitation fund for maritime claims liability.

Where the parties are not satisfied with an order, they may file an appeal within seven days from the date of the receipt of the order. The people's court of second instance shall make an order within fifteen days from the date of the receipt of appeal petition.

Article 107 Where the interested parties do not raise any objections within the prescribed time period, the maritime court shall order to approve the applicant to constitute a limitation fund for maritime claims liability.

Article 108 After an order approving an applicant to constitute a limitation fund for maritime claims liability takes effect, the applicant shall constitute a limitation fund for maritime claims liability with the maritime court.

In constituting a limitation fund for maritime claims liability, the applicant may provide cash, or provide guaranty approved by the maritime court.

The quantity of a limitation fund for maritime claims shall be the sum of such an amount of the limitation of liability for maritime claims, together with the interests therefrom from the date of the occurrence of the accident until the date of the constitution of the fund. Where the fund is constituted in a form of guaranty, the quantity of the guaranty shall be the quantity of the fund together with the interests therefrom during the existence of the fund.

Where the fund is constituted in a form of cash, the date on which the fund reaches the account designated by the maritime court shall be the date of the constitution of the fund.

Where the fund is constituted in a form of guaranty, the date on which the guaranty is accepted by the maritime court shall be the date of the constitution of the fund.

Article 109 After the constitution of a limitation fund for maritime claims, for any maritime disputes, the parties shall bring an action in the maritime court constituting a limitation fund for maritime claims, except that the parties reach an agreement on litigation jurisdiction or arbitration.

Article 110 Where the application for constituting a limitation fund for maritime claims is wrong, the applicant shall indemnify the losses therefrom suffered by the interested parties.

Chapter X Procedures for Registering Creditors' Rights and Repayment of Debt

Article 111 After the publishing of a public announcement of the maritime court concerning the order relating to the compulsory auction of a ship, the creditors shall apply to register the creditors' rights relating to the ship that is to be auctioned within the period of the public announcement. Where no registration is conducted by the expiration of the period of the public announcement, the right to the repayment of debt from the proceeds of the auction of the ship shall be deemed as having been waived.

Article 112 After the publishing of a public announcement concerning the entertaining of an application by the maritime court for constituting a limitation fund for maritime claims, the creditors shall, within the period of the public announcement, apply to register the creditors' rights relating to the maritime accident occurred in specific circumstances. Where no

registration is conducted by the expiration of the period of the public announcement, the creditors' right shall be deemed as having been waived.

Article 113 When applying to register the creditors' rights with a maritime court, the creditors shall submit written applications, and shall provide evidence of creditors' rights.

Evidence of creditors' rights include written judgment, order in writing, conciliation statement, arbitration award and document evidencing creditors' rights, as well as other evidential materials certifying the existence of maritime claims.

Article 114 The maritime court shall examine the application of a creditor; where evidence of creditors' rights is provided, it shall order to approve the registration; where no evidence of creditors' rights is provided, it shall order to reject the application.

Article 115 With respect to the written judgment, order in writing, conciliation statement, arbitration award and document evidencing creditors' rights provided by the creditors to certify the creditors' rights, the maritime court shall, if ascertaining that the above-mentioned documents are true and lawful upon examination, make an order to have them affirmed.

Article 116 Where any other evidence for maritime claims is provided, the creditors shall, after registering the creditors' rights, bring an action for affirming rights in the maritime court entertaining the registration of creditors' rights. Where the parties conclude an arbitration agreement, that shall promptly apply for arbitration.

The judgment and order made by the maritime court on an action for affirming rights shall be legally effective, the parties shall not file an appeal.

Article 117 After trying and affirming the rights, the maritime court shall issue a notice of the creditors' meeting to the creditors, and organize to convene the creditors' meeting.

Article 118 The creditors' meeting may propose through consultation the proceeds of the ship or a plan for the distribution of the limitation fund for maritime claims, and conclude an agreement on the repayment of debt.

The agreement on the repayment of debt shall be legally effective upon the approval by an order of the maritime court.

Where the creditors' meeting fails to conclude an agreement, the maritime court shall, in accordance with the order of the repayment of debt as stipulated in the Maritime Code of the People's Republic of China and other relevant laws, make a written order to determine the proceeds of the ship or the plan for the distribution of the limitation fund for maritime claims.

Article 119 The proceeds of the auction of a ship and the interests therefrom, or the limitation fund for maritime claims and the interests therefrom, shall be distributed simultaneously.

When distributing the proceeds of a ship, the litigation costs ought to be borne by the persons liable, the expenses for preserving and auctioning the ship and distributing the proceeds of ship, and other expenses incurred for the common interests of the creditors, shall be deducted and paid first from the proceeds of the ship.

The remnant after repaying the debt shall be returned to the original shipowner or the person constituting the limitation fund for maritime claims.

Chapter XI Procedures for Publicizing Notice for Assertion of Maritime Liens

Article 120 When a ship is transferred, the transferee may apply to the maritime court for publicizing notice for assertion of maritime liens, so as to urge the persons enjoying maritime liens to promptly claim their rights and to extinguish the maritime liens attached to the ship.

Article 121 Where applying for publicizing notice for assertion of maritime liens, the transferee shall submit its application to the maritime court of the place where the transferred ship is delivered or the place where the transferee has its domicile.

Article 122 When applying for publicizing notice for assertion of maritime liens, an application, the ship transfer contract, the technical information of the ship and other documents shall be submitted to the maritime court. The application shall specify the name of the ship, the facts of and reasons for applying for publicizing notice for assertion of maritime liens.

Article 123 After receiving the application and relevant documents, the maritime court shall examine them and make an order approving or disapproving the application within seven days.

Where the transferee is not satisfied with the order, it may apply for reconsideration which could be granted only once.

Article 124 After the order approving the application takes effect, the maritime court shall publish a public announcement in newspapers or through other news media, so as to urge the persons enjoying maritime liens to promptly claim their rights within the period of publication of the notice.

The period of publication of a notice for maritime liens shall be sixty days.

Article 125 Where a person enjoying maritime liens claims his rights within the period of publication of a notice for maritime liens, he shall undergo registration procedures with the maritime court; where no rights are claimed, the maritime liens shall be deemed as having been waived.

Article 126 Where no one claims the maritime liens by the expiration of the period of publication of a notice for maritime liens, the maritime court shall, in accordance with the application of the parties, make a judgment to declare that no maritime liens are attached to the transferred ship. The contents of the judgment shall be publicly announced.

Chapter XII Supplementary Provisions

Article 127 This Law shall come into force as of July 1, 2000.

21. Resolution of the Standing Committee of the National People's Congress on Comprehensively Tightening Ecological and Environmental Protection and Lawfully Promoting Triumph in the Uphill Battle for Prevention and Control of Pollution

(Adopted at the 4th Session of the Standing Committee of the 13th National People's Congress of the People's Republic of China on July 10, 2018)

At its fourth session, the Standing Committee of the 13th National People's Congress heard and deliberated the report of the Law Enforcement Inspection Group of the Standing Committee of the National People's Congress on the implementation of the Air Pollution

Prevention and Control Law, made by Chairman Li Zhanshu. At the meeting, the work of the law enforcement inspection team was fully affirmed and highly commended, the law enforcement inspection report was unanimously endorsed, and the opinions and recommendations on the implementation of the Atmospheric Pollution Prevention and Control Law and securing a victory in the defense of blue sky were consented to.

It was held in the meeting that the building of ecological civilization was related to the perpetual development of the Chinese nation and the well-being of hundreds of millions of Chinese people. Since the 18th CPC National Congress, the CPC Central Committee with Comrade Xi Jinping as the core has taken the building of ecological civilization as an important part of overall advancement of the overall layout for "economic, political, cultural, social, and ecological progress" and coordinated advancement of the Four-Pronged Comprehensive Strategy, planned the launch of a series of fundamental, pioneering, and long-term work, and promoted the occurrence of historical, transitional, and overall changes in the building of ecological civilization and ecological and environmental protection in terms of practice and understanding. Nevertheless, the building of ecological civilization remains challenged by grim situation, in a critical period in which pressure is superposed and progress has to be made with burden carried, already in a period for a uphill battle to provide more quality ecological products to meet the people's ever-growing needs for a beautiful ecology and environment, and a window period in which there are resources and capabilities to resolve prominent ecological and environmental issues. At the 19th CPC National Congress, a grand blueprint for securing a victory in building a well-off society in an all-round way and securing the great victory for socialism with Chinese characteristics in the new era was formulated, and comprehensive arrangements for strengthening the building of ecological civilization and building a beautiful China were made. Fighting well the uphill battle for prevention and control of pollution is one of the three major battles to secure a victory in building a well-off society in an all-round way and is related to whether the building of a well-off society in an all-round way can be recognized by the people and can withstand historical tests. Our overall goal is to generally improve ecological and environmental quality and significantly reduce the total discharge of major pollutants by 2020. As state power agencies, the people's congresses at all levels and their standing committees shoulder the glorious mission of implementing the decisions and arrangements of the CPC Central Committee in relation to the building of ecological civilization and promoting the comprehensive and effective implementation of the legal system for ecological and environmental protection, and shall capitalize on the characteristics and advantages of the people's congress system, fulfill the duties conferred by the constitution and laws, control pollution by the weapon of law, protect ecology and environment by the power of the rule of law, and contribute to comprehensively strengthening ecological and environmental protection and promoting the tough fight for prevention and control of pollution according to the law. For the aforesaid reasons, a resolution is hereby made as follows:

I. Adhering to the guidance by Xi Jinping Thought on Socialism with Chinese Characteristics

in a New Era, especially Xi Jinping Thought on ecological civilization. Since the 18th CPC National Congress, the CPC Central Committee with Comrade Xi Jinping as the core has been far-sighted and unremittingly explored, profoundly answered the major theoretical and practical questions, such as why should ecological civilization be built, what kind of ecological civilization should be built, and how should ecological civilization be built, and systematically developed Xi Jinping Thought on Ecological Civilization. Xi Jinping Thought on Ecological Civilization is an integral part of Xi Jinping Thought on Socialism with Chinese Characteristics in a New Era and provides powerful guidance for the making of historical achievements and the occurrence of historical changes in the building of ecological civilization and ecological and environmental protection. Xi Jinping Thought on Ecological Civilization, with a focus on outstanding environmental issues which the people most directly experience and made most urgent requirements for, profoundly expounds a series of new ideas, concepts, and views, for example, good ecology represents the prosperity of civilization, humankind harmoniously co-exist with nature, lucid waters and lush mountains are invaluable assets, a good ecology and environment is the most inclusive people's livelihood and well-being, mountains, water, forest, lakes, and grassland are a common community of life, the ecology and environment shall be protected by the most stringent system and the strictest rule of law, the national action for building a beautiful China, and joint planning for the global building of ecological civilization, makes top-level design and comprehensive arrangements for the building of ecological civilization, and is a powerful ideological weapon for us to protect the ecology and environment, promote green development, and build a beautiful China. All state agencies and the whole society shall regard Xi Jinping Thought on Ecological Civilization as the guidance of direction and fundamental principle, consciously integrate economic and social development with the building of ecological civilization, resolutely dispense with the practice of sacrificing the ecology and environment in exchange for economic growth for the time being and in a region, resolutely and well fight the uphill battle for prevention and control of pollution, promote the formation of a new pattern of harmonious development of man and nature in the modernization, continuously meet the needs of the people's ever-growing needs for a beautiful ecology and environment, and accelerate the building of a beautiful China.

II. Adhering to party leadership over the building of ecological civilization. Party leadership is the fundamental political guarantee for strengthening ecological and environmental protection and well fight the tough battle for prevention and control of pollution. Since the 18th CPC National Congress, the CPC Central Committee with Comrade Xi Jinping as the core has accelerated the advancement of the building of the system of top-level design and regimes for ecological civilization, successively issued the Opinions on Accelerating the Advancement of the Building of Ecological Civilization and the Overall Proposal for the Reform of the Ecological Civilization System, developed and implemented more than 40 reform proposals involving the building of ecological civilization, profoundly implemented three major action plans for prevention and control of air, water and soil pollution, and

promoted the continuous improvement of China's ecological and environmental quality. According to the proposal of the CPC Central Committee for amending the Constitution, the 13th National People's Congress passed a constitutional amendment at its first session, to incorporate new development concepts, ecological civilization, and beautiful China, among others, into the fundamental law of the country. In May 2018, the CPC Central Committee convened the National Ecological and Environmental Protection Conference to make further arrangements for strengthening ecological and environmental protection and well fighting the uphill battle for prevention and control of pollution and put forward new requirements. In June, the CPC Central Committee and the State Council issued the Opinions on Comprehensively Strengthening Ecological and Environmental Protection and Resolutely and Well Fighting the Uphill Battle for Prevention and Control of Pollution. All state agencies and their staff shall firmly establish the consciousness of the need to maintain political integrity, think in big-picture terms, follow the leadership core, and keep in alignment, resolutely safeguard the authority and the centralized and unified leadership of the CPC Central Committee with Comrade Xi Jinping as the core, comprehensively implement the decisions and arrangements of the CPC Central Committee, and effectively shoulder the political responsibility for the building of ecological civilization and ecological and environmental protection. Under the centralized and unified leadership of the CPC Central Committee, the leadership of party committees, the dominance by the government, enterprises as main players, and public participation shall be adhered to, cooperation shall be close, forces shall be joined, the responsibility system for leaders in the building of ecological civilization shall be put into practice, the supervisory inspection mechanism for environmental protection shall be improved, both the symptoms and the root causes shall be resolved, policies shall be comprehensively executed, the establishment of an ecological civilization system shall be accelerated, green development shall be comprehensively launched, and the focus shall be on resolving prominent ecological and environmental problems, so as to resolutely and well fight the uphill battle for prevention and control of pollution.

III. Establishing and improving a most stringent and rigorous legal system for ecological and environmental protection. Ecological and environmental protection must rely on the system and the rule of law. The protection and remediation of mountains, water, forest, lakes, and grassland shall be coordinated, the advancement of legislation on ecological and environmental protection shall be accelerated, the system of laws, regulations and regimes on environmental protection shall be improved, and the transition and coordination in the legal system shall be heightened. The development of the Law on Prevention and Control of Soil Pollution shall be hastened, so as to provide legal guarantee for the prevention and control of soil pollution. The amendment of laws, including the law on prevention and control of solid waste pollution of the environment, shall be expedited, the legal system for prevention and control of air, water, and other pollution shall be further improved, laws and regulations covering water, air, noise, residue, light, and other various environmental

pollution factors shall be established and improved, a scientific, rigorous, systematic, and sound system of laws and regimes on prevention and control of pollution shall be developed, ecological and environmental risk in priority regions and valleys shall be closely prevented, and the most stringent legal system shall be used to protect the blue sky and increase green land, so as to resolutely secure a victory in the blue sky defense, focus on well defending the clean water defense, and solidly advance the clean land defense. Laws, regulations, judicial interpretations and regulatory documents on ecological and environmental protection shall be comprehensively reviewed without delay, and those contrary to, disconnected with, or unable to adapt to the law, the spirit of the CPC Central Committee, or the requirements of the era, repealed or amended in a timely manner. The State Council and other relevant parties shall promptly put forward bills relating to amending the law, speed up the formulation or amendment of administrative regulations and departmental regulations supporting laws on ecological and environmental protection, and introduce and continuously improve standards for ecological and environmental protection in a timely manner. Local people's congresses and their standing committees with legislative power shall speed up the formulation and amendment of local regulations on ecological and environmental protection, further clarify and detail the provisions of superordinate laws in light of local conditions, and vigorously explore legislation in the field of ecological and environmental protection prior to the state. The rigidity and authority of the law shall be firmly established, choices, flexibility, and discounts shall never be allowed, nor shall regional protectionism. Filing review shall be strengthened, regulations, rules, and judicial interpretations in violation of superordinate laws shall be corrected in a timely manner, so as to safeguard the unity of the socialist legal system.

IV. Vigorously boosting the comprehensive and effective implementation of the legal system for ecological and environmental protection. The life of the system lies in its implementation, and the authority of the law lies in its operation. The law enforcement inspection under the Atmospheric Pollution Prevention and Control Law has revealed the outstanding problems in the implementation of the law, and proposals for improving the work and perfecting the system have been put forward. Relevant parties shall attach great importance, seriously take corrective action, ensure that all the provisions of the Atmospheric Pollution Prevention and Control Law are effectively implemented, and successfully defend the blue sky by the strictest rule of law. All state agencies shall strictly implement the legal system for ecological and environmental protection and ensure that those having power are responsible, shoulder duties, and are held accountable for negligence of duties. The people's congresses at all levels and their standing committees shall regard the building of ecological civilization as a priority work field, by law enforcement inspection, hearing and deliberating work reports, thematic inquiries, questioning, and other supervisory means, urge relevant parties to seriously implement the laws on ecological and environmental protection, resolve ecological and environmental problems without delay, further increase investment, strengthen scientific and technological support, enhance the capacity building of ecological and environmental

protection teams, especially primary-level teams, and establish and improve a long-term mechanism for control of environmental pollution. It shall be taken as the bottom line that the ecological and environmental quality can "only get better, not deteriorate," governments at all levels and relevant authorities shall be urged to shoulder the political responsibilities for the building of ecological civilization and ecological and environmental protection, the target and responsibility system for environmental protection and the evaluation and assessment system shall be established, improved, and strictly implemented, and accountability shall be strictly enforced, so as to ensure that the responsibility is placed level by level. Enterprises shall be promoted in voluntarily shouldering and fully fulfilling the primary responsibility for protecting the environment and preventing and controlling pollution, the principle that polluters must bear responsibility according to the law shall be put into practice, environmental law enforcement regulation shall be tightened, the establishment and improvement of an administrative law enforcement and criminal justice linkage mechanism for ecological and environmental protection shall be accelerated, the functions and roles of supervisory agencies and judicial agencies shall be leveraged, the civil and administrative public interest litigation system in the field of ecological and environmental protection shall be bettered, and the illegal and criminal activities relating to the ecology and environment shall be severely and toughly punished as legally required. It shall be adhered to that the law must be observed, the law must be strictly enforced, and law-breakers must be held liable, and the law shall become a rigid constraint and an untouchable high-voltage line.

V. Widely mobilizing the people to actively participate in the ecological and environmental protection. Ecological civilization is a common cause jointly participated in, joint built, and shared by the people. Under the leadership of the party, all forces shall be extensively mobilized, policies and forces shall be contributed to by all the people, and prevention and control shall be conducted by the people, so as to fight a people's war for the prevention and control of pollution. Ecological and environmental protection shall be included in the national education system and the training system for party and government leaders, the publicity and dissemination of legal knowledge relating to ecological civilization and scientific knowledge shall be tightened, a simple, moderate, green, and low-carbon lifestyle shall be advocated, the whole society shall be guided in raising the awareness of the rule of law, ecology, environmental protection, and conservation, the statutory obligations of ecological and environmental protection shall be voluntarily fulfilled, ecological ethics and codes of conduct shall be developed, and green lifestyle shall be consciously practiced. The experience of the public shall be taken as an important basis for testing the effectiveness of work and the quality of the environment, the recognition by the public shall be real recognition, and the satisfaction of the public shall be the true satisfaction. The mandatory information disclosure system for ecological and environmental protection shall be bettered, environmental quality and environmental protection targets and responsibilities shall be disclosed to the public according to the law, and the people's right to know, participate and

supervise shall be guaranteed. The public opinion supervision role of various media shall be maximized, prominent ecological and environmental problems shall be revealed, and the progress in the correction shall be reported. Public supervision, reporting and feedback mechanisms and reward mechanisms shall be refined, the lawful rights and interests of informants shall be protected, and the public shall be encouraged to use legal weapons to protect the ecology and environment, so as to create a social atmosphere that advocates ecological civilization and protects the ecology and environment.

All state agencies and the whole society shall be closely united around the CPC Central Committee with Comrade Xi Jinping as the core, guided by Xi Jinping Thought on Socialism with Chinese Characteristics in a New Era, comprehensively strengthen ecological and environmental protection, well fight the uphill battle for prevention and control of pollution, and strive to build a well-off society in an all-round way and comprehensively build a great modern socialist country that is prosperous, powerful, democratic, culturally advanced, harmonious, and beautiful.

Chapter IV Full Texts of Regulations Relevant to Marine Pollution

By the State Council

1. Regulations of the People's Republic of China on Nature Reserves

(Issued by Order No. 167 of the State Council of the People's Republic of China on October 9, 1994; amended for the first time in accordance with the Decision of the State Council on Abolishing and Amending Some Administrative Regulations by the Order No. 588 of the State Council on January 8, 2011; and amended for the second time in accordance with the Decision of the State Council to Amend Certain Administrative Regulations by the Order No. 687 of the State Council on October 7, 2017)

Chapter I: General Provisions

Article 1 These Regulations are formulated with a view to strengthening the construction and management of nature reserves and protecting the natural environment and resources.

Article 2 The nature reserves as referred to in these Regulations mean the areas delimited according to relevant laws for special protection and administration in the areas where typical natural ecological systems, and precious, rare and vanishing wildlife species are naturally concentrated, or in the dry land, water area on the land and sea area where protected objects such as natural traces with special significance are situated.

Article 3 All establishment and management of nature reserves within the territory of the People's Republic of China or the other sea areas under the jurisdiction of the People's Republic of China must be conducted in conformity with these Regulations.

Article 4 The State shall incorporate the development plan of nature reserves into the national economic and social development plans by means of adopting economic and

technological policies and measures favorable to the development of nature reserves.

Article 5 The local economic construction, the production activities and everyday life of local residents shall be properly taken into consideration in the establishment and management of a nature reserve.

Article 6 Nature reserves administrative agencies and their competent administrative departments may accept grants from both domestic and foreign organizations and individuals for the establishment and management of nature reserves.

Article 7 The people's governments at or above the county level shall strengthen leadership in the work of nature reserves.

All units and individuals shall have the obligation to protect the natural environment and resources within nature reserves and have the right to inform against or lodge complaints with the units or individuals who damage or encroach the nature reserves.

Article 8 The State shall institute a system which combines integrated management with separate departmental management for the management of nature reserves.

The competent department of environment protection under the State Council is responsible for the integrated management of the nature reserves throughout the country.

The competent departments of forestry, agriculture, geology and mineral resources, water conservancy, and marine affairs and other departments concerned are respectively responsible for relevant nature reserves under their jurisdiction.

The people's governments of provinces, autonomous regions and municipalities directly under the Central Government shall, according to the specific condition of the locality, decide on the establishment and the responsibilities of the administrative departments of nature reserves in the people's governments at or above the county level.

Article 9 The people's governments at various levels shall give awards to the units or the individuals who have made outstanding contributions to the establishment and management of nature reserves or the related scientific research.

Chapter II: Establishment of Nature Reserves

Article 10 In the areas which meet one of the following requirements, a nature reserve shall be established:

- (1) typical physiographic areas, typical natural ecosystem areas, and those areas where the natural ecosystems have been damaged , but can be restored to the same category of natural ecosystems by proper protection;
- (2) where precious, rare and vanishing wildlife species are naturally concentrated;
- (3) having marine and coastal areas, islands, wetland, inland water bodies, forests, grassland and deserts which are of special protection value;
- (4) natural remains which are of significant scientific or cultural value, such as geological structures, famous karst caves, fossil distribution areas, glaciers, volcanoes, and hot springs;
- (5) other natural areas need to be specially protected upon the approval of the State Council or the people's governments of provinces, autonomous regions or municipalities directly under the Central Government.

Article 11 The nature reserves consist of national and local nature reserves.

National nature reserves include those of typical significance in or out of the country, and those of significant international influence in science, or of special value in scientific research. Local nature reserves include those, other than the national ones, which are of typical significance or with special value in scientific research. Local nature reserves may be managed by local governments at different levels. The specific measures shall be formulated by the competent department of nature reserves under the State Council or by the people's governments of provinces, autonomous regions or municipalities directly under the Central Government according to their specific conditions, and shall be submitted to the competent department of environment protection under the State Council for the record.

Article 12 The establishment of a national nature reserve requires an application from the people's government of the province, autonomous region or municipality directly under the Central Government where the proposed nature reserve is located or from the competent department of nature reserves under the State Council. After the appraisal by the national nature reserves appraisal committee, the competent department of environment protection under the State Council shall coordinate with relevant department to provide appraisal comments on the application and then submit it to the State Council for its approval.

The establishment of a local nature reserve requires an application from the people's government of the county, autonomous county, municipality or autonomous prefecture where the proposed nature reserve is located, or the competent department of nature reserves in the people's government of the relevant province, autonomous region or municipality directly under the Central Government. After the appraisal by local nature reserves appraisal committee, the competent department of environment protection administration in the people's government of the province, autonomous region or municipality directly under the Central Government shall coordinate with relevant departments to provide appraisal comments on the application and then submit it to the people's government of the province, autonomous region or the municipality directly under the Central Government for its approval, and meanwhile submit it to the competent department of environment protection under the State Council and the relevant competent department of nature reserves under the State Council for the record.

The establishment of a nature reserve involving more than two administrative regions, requires an application from the people's governments of relevant regions after their consultations. Then the application shall go through the same procedures as described in the preceding two paragraphs.

The establishment of a maritime nature reserve must be approved by the State Council.

Article 13 To apply for the establishment of nature reserves, an application form for a nature reserve establishment shall be filled out and submitted for approval according to the relevant provisions of the State.

Article 14 The ranges and boundaries of nature reserves shall be determined by the people's governments responsible for the approval of the establishment. The boundaries of nature

reserves shall be marked and announced.

Proper consideration shall be given to the integrity and suitability of the protected objects and to the needs of local economic construction, and production activities and the daily life of local residents while determining the ranges and boundaries of nature reserves.

Article 15 The cancellation of a nature reserve or any change or adjustment made in its nature, range or boundaries shall be subject to the approval of the people's government which approved the establishment of the nature reserve.

No units or individuals may be allowed to move the landmarks of nature reserves without authorization.

Article 16 Nature reserves shall be named in the following ways:

National nature reserves: the name of the location where the nature reserve is situated is added before the "National Nature Reserve".

Local nature reserves: the name of the location where the nature reserve is situated is added before the "Local Nature Reserve".

If a nature reserve has any special protected object, the name of the object may be added following the name of the location where the nature reserve is situated.

Article 17 The competent department of environment protection administration under the State Council shall, together with the competent administrative department of nature reserves under the State Council, draw up a plan for the development of national nature reserves based upon the investigation and evaluation of the natural environment and resources of the whole country. After the overall balance by the competent planning department under the State Council, the plan shall be submitted to the State Council for its approval and implementation.

The nature reserves administrative organ or competent administrative department of a particular nature reserve shall work out construction plans for nature reserves, which shall be included in the national, local or departmental investment plans according to stipulated procedures, and put the plan into effect.

Article 18 Nature reserves may be divided into three parts: the core zone, buffer zone and experimental zone.

The intact natural ecological systems and the areas where precious rare and vanishing wildlife species are concentrated within nature reserves shall be delimited as the core zone into which no units or individuals are allowed to enter. No scientific research activities are allowed in this zone except for those approved according to Article 27 of these Regulations. Certain amount of area surrounding the core zone may be designated as the buffer zone, where only scientific research and observation are allowed.

The area surrounding the buffer zone may be designated as the experimental zone, where activities such as scientific experiment, educational practice, visit, tourism and the domestication and breeding of precious, rare and vanishing wildlife species may be carried out.

A certain amount of area surrounding the nature reserve may be designated as the outer

protection area, when the people's government which approved the establishment of the nature reserve considers necessary.

Chapter III: Management of Nature Reserves

Article 19 The competent department of environment protection administration under the State Council shall organize the relevant administrative departments of nature reserves under the State Council to formulate the technical regulations and criteria for the management of nature reserves all over the country.

The relevant competent administrative departments of nature reserves under the State Council shall formulate the technical regulations for the management of various types of nature reserves according to their division of duties and submit them to the competent department of environment protection administration under the State Council for the record.

Article 20 The competent departments of environment protection administration in the people's governments at or above the county level shall have the right to conduct supervision and inspection on the management of all the nature reserves within their administrative areas. The relevant competent administrative departments of nature reserves in the people's government at or above the county level shall have the right to conduct supervision and inspection on the management of the nature reserves which are under their charge. The units subject to the inspection shall report the situation accurately to them and provide them with necessary information. The inspectors shall keep technological and professional secrets confidential for the units inspected.

Article 21 The competent administrative departments of the nature reserves of the people's governments of provinces, autonomous regions and municipalities directly under the Central Government or the competent administrative department of the nature reserves under the State Council shall be responsible for the management of the national nature reserves. The competent administrative department of nature reserves in the people's governments at or above the county level shall be responsible for the management of the local nature reserves within their administrative areas.

The relevant competent administrative departments of nature reserves shall set up a special management institution in each nature reserve and provide specialized technical staff for the management of the nature reserves.

Article 22 The major functions of management institutions of nature reserves shall be as follows:

- (1) to implement relevant laws, regulations, guidelines and policies formulated by the State on nature conservation;
- (2) to formulate various management regulations so as to exert unified management of the nature reserves;
- (3) to investigate natural resources and place them on file, and organize environmental monitoring to protect the natural environment and resources in the nature reserves;
- (4) to organize or assist relevant departments to make scientific researches on the nature reserves;

(5) to conduct the publicity and education work on nature conservation;

(6) to organize activities such as visiting and sightseeing tour in the nature reserves on the presupposition that the natural environment and resources of the nature reserve are not affected by such activities.

Article 23 The expenses needed for the management of the nature reserves shall be handled by the people's governments at or above the county level where the nature reserves are located. The State shall subsidize the management of national nature reserves appropriately.

Article 24 The public security organ of the region where the nature reserves are located may set up its dispatched agency within the nature reserves to maintain public security if necessary.

Article 25 The units, residents in the nature reserves and the personnel allowed to enter into the nature reserves shall comply with various regulations of administration, and subject themselves to the management institutions of the nature reserves.

Article 26 In nature reserves, such activities as felling, grazing, hunting, fishing, gathering medicinal herbs, reclaiming, burning, mining, stone quarrying and sand dredging, shall be prohibited unless otherwise stipulated by relevant laws and regulations.

Article 27 No one is permitted to enter the core area of a nature reserve. Whoever, as needed for scientific research, must enter the core area to conduct scientific research observation and investigation activities shall submit an application and an activity plan to the management body of the nature reserve in advance to obtain an approval from it; and in the case of entry into the core area of a national nature reserve, the approval shall be obtained from the administrative department in charge of relevant nature reserves of the people's government of the province, autonomous region, or municipality directly under the Central Government.

If it is necessary for the residents living in the core zone of a nature reserve to move out, the local people's government shall make proper arrangement to have them settled down elsewhere.

Article 28 Tourism, production and commercial activities are prohibited in the buffer zone of nature reserves. In the buffer zone of nature reserves, if it is necessary to engage in the nondestructive activities such as scientific research, educational practice and specimen collection for the purpose of teaching or scientific research, an application and activity plan shall be submitted to the management institution of the nature reserves in advance for approval.

Units and individuals who engage in such activities described in the preceding paragraph shall submit a copy of the report of the activity result to the management institution of the nature reserves.

Article 29 For visits and tourist activities conducted in the experimental zone of a nature reserve, the management body of the nature reserve shall prepare a scheme, which shall be consistent with the objectives of management of the nature reserve.

Visits and tourist activities organized in a nature reserve shall be conducted in strict

accordance with the scheme as mentioned in the preceding paragraph, and the management of such activities shall be enhanced; and all entities and individuals entering a nature reserve for visits or tourist activities shall obey the management by the management body of the nature reserve.

The visiting and tourist projects that are not in conformity with the protection guidelines of nature reserves shall be prohibited.

Article 30 Where there is no division of zones within the nature reserves, they shall be managed in accordance with the provisions concerning the core zone or buffer zone in these Regulations.

Article 31 To enter a nature reserve, a foreign national shall submit an activity plan in advance to the management body of the nature reserve to obtain an approval from it; and in the case of entry into a national nature reserve, the approval shall be obtained from the environmental protection, oceanic, fishery, or any other administrative department in charge of relevant nature reserves of the province, autonomous region, or municipality directly under the Central Government according to their respective functions.

All foreign nationals entering a nature reserve shall abide by the laws, regulations, and rules on nature reserves, and shall not collect specimen and conduct other activities in the nature reserve without approval.

Article 32 No production facilities may be built in the core and buffer zones of nature reserves. In the experimental zone, no production facilities that cause environmental pollution or damage to the natural resources or landscape may be built. For other projects to be built in this zone the discharge of pollutants may not exceed the national or local discharge standards. For those facilities already built in the experimental zone of the nature reserves, if the discharge of pollutants exceeds the national or local discharge standards, rectification shall be made within a time limit. Remedial measures shall be adopted to those that the damage has been caused.

The projects constructed in the outer protection zone of nature reserves may not affect the environmental quality inside the nature reserves. If the damage has already been done, rectification shall be made within a time limit.

The decision to make a rectification within the specified time shall be made by the organs specified by relevant laws and regulations. Any enterprises or institutions required to do so shall complete it in time.

Article 33 If any accident or accidental event which causes or may cause pollution or damage in or to the nature reserves, for which the units or individuals who are responsible shall immediately take remedial measures, inform all units or residents that may be endangered and report to the management institutions of nature reserves, the competent departments of environment protection administration and the competent administrative departments of the nature reserves in the locality and wait for disposition. or the municipality directly under the Central Government for final approval.

Chapter IV: Legal Liability

Article 34 Any unit or individual, in violation of these Regulations in one of the following manners shall be ordered by the management institution of the nature reserves to make a correction and may be fined between 100 to 5, 000 yuan according to circumstances of the case:

- (1) moving or doing damage to the landmarks of nature reserves without authorization;
- (2) entering the nature reserves without approval, or failing to meet the requirements of the management institution while being in the nature reserves;
- (3) engaging in scientific research, educational practice and specimen collection in the buffer zone of nature reserves with the approval of the relevant department but failing to submit a copy of the report of their activity results to the management institution of the nature reserves.

Article 35 Any unit or individual who, in violation of these Regulations, is engaged in such activities as felling, grazing, hunting, fishing, gathering medicinal herbs, reclaiming , burning the grass, mining, stone-quarrying and sand dredging, shall be punished according to relevant laws, administrative regulations. Besides, the competent administrative department of nature reserves in the people's government at or above the county level or its authorized management institution of the nature reserves may confiscate the violators' illegal gains, order the violators to stop illegal actions, or to restore to the original state or take other remedial measures within a specified time. Anyone who does damage to the nature reserves, may be fined between 300 to 10, 000 yuan.

Article 36 The management institution of the nature reserves, in violation of these Regulations, refuse the supervision and inspection of the competent department of environment protection administration or the competent administrative department of the nature reserves, or resort to deception during the inspection, shall be fined between 300 to 3, 000 yuan by the competent department of environment protection administration or the competent administrative department of the nature reserves in the people's government at or above the county level.

Article 37 Where the management body of a nature reserve commits any of the following violations of this Regulation, the administrative department in charge of relevant nature reserves of the people's government at or above the county level shall order it to take corrective action during a specified period; and administrative disciplinary action shall be taken against the directly liable persons by the employer of them or by the superior authority:

- (1) It conducts visits or tourist activities without preparing a plan, or the prepared plan is inconsistent with the objectives of management of the nature reserve.
- (2) It offers any visit or tourist project inconsistent with the direction of protection of the nature reserve.
- (3) It conducts visits or tourist activities in nonconformity with the prepared plan.
- (4) It illegally approves any person's entry into the core area of the nature reserve, or illegally approves any foreign national's entry into the nature reserve.
- (5) It otherwise abuses power, neglects duty, practices favoritism, or makes falsification.

Article 38 Anyone who violates these Regulations thus causing losses to the nature reserves

shall be ordered to compensate the losses by the competent administrative department of the nature reserves in the people's government at or above the county level.

Article 39 Anyone who hinders the administrative staff of the nature reserves from performing their duties shall be punished by the public security organ in accordance with the Public Security Administration Punishments Law of the People's Republic of China. If the circumstances are serious enough to constitute a crime, he shall be prosecuted for criminal responsibility according to law.

Article 40 If the violation of these Regulations causes serious pollution or damage to the nature reserves, leading to heavy losses of public or private property or human injuries and deaths that constitutes a criminal offence, the person directly in charge and other persons who are directly responsible for the violation shall be prosecuted for criminal responsibility according to law.

Article 41 Administrative personnel of nature reserves who abuses his power, neglects his duty or engages in malpractices for personal gains to the extent that constitutes a criminal offence shall be prosecuted for criminal responsibility according to law, if the circumstances are not serious enough to constitute a criminal offence, he shall be subject to disciplinary sanctions by the department to which he belongs or the organ at the higher level.

Chapter V: Supplementary Provisions

Article 42 The competent administrative departments of nature reserves under the State Council may, in accordance with these Regulations, formulate the administrative rules for different types of nature reserves.

Article 43 People's governments of provinces, autonomous regions and municipalities directly under the Central Government may, in accordance with these Regulations, formulate measures for their implementation.

Article 44 These Regulations shall enter into force as of December 1, 1994.

2. Regulation on Environmental Impact Assessment of Planning

Chapter I General Provisions

Article 1 For purposes of strengthening the environmental impact assessment of planning, improving the scientificness of planning, preventing environmental pollution and ecological damage from the source and promoting the overall, harmonious and sustainable development of the economy, society and environment, this Regulation is formulated in accordance with the Law of the People's Republic of China on Environmental Impact Assessment.

Article 2 The relevant departments of the State Council, and local people's governments at and above the districted city level and the relevant departments thereof shall make an environmental impact assessment when it organizes the planning of land use, and construction, development and utilization of regions, basins and sea areas (hereinafter referred to comprehensive planning) and relevant special planning of industry, agriculture,

stockbreeding, forestry, energy, water resources, transport, urban construction, tourism and development of natural resources (hereinafter referred to as the special planning).

The concrete scope of planning subject to environmental impact assessment under paragraph 1 of this Article shall be formulated by the environmental protection administrative department jointly with the relevant departments of the State Council, and be executed upon approval of the State Council.

Article 3 The principle of objectiveness, openness and impartiality shall be followed in the environmental impact assessment of planning.

Article 4 The state shall establish an information sharing system for the environmental impact assessment of planning.

The people's governments at and above the county level and the relevant departments thereof shall share the information about the environmental impact assessment of planning.

Article 5 The expenses necessary for the environmental impact assessment of planning shall be integrated into the fiscal budget under the provisions on budget administration, be subject to strict management and accept audit and supervision.

Article 6 Any entity or individual has the right to report to the examination and approval organ of planning, planning preparation organ or environmental protection administrative department any violation of this Regulation or bad impact arising during the execution of planning. The relevant department shall investigate and deal with the case after receipt of the tip-off.

Chapter II Assessment

Article 7 The planning preparation organ shall organize an environmental impact assessment of the planning during the process of formulating the planning.

Article 8 An environmental impact assessment of planning shall include the analysis, forecast and assessment of the following items:

1. the possible overall impact on the ecological system of the relevant regions, basins and sea areas as a result of the execution of planning;
2. the possible long-term impact on the environment and human health as a result of the execution of planning; and
3. the relationship between the economic & social benefits and the environmental benefits, and the relationship between the present interests and the long-term interests from the execution of planning.

Article 9 The relevant criteria on environmental protection and the technical guide and norms on environmental impact assessment shall be observed in the environmental impact assessment of planning.

The technical guide on environmental impact assessment of planning shall be formulated by the environmental protection administrative department of the State Council together with other relevant departments of the State Council. The technical norms on the environmental impact assessment of planning shall be formulated by the relevant department of the State Council according to the technical guide on environmental impact assessment of planning

and a copy thereof shall be sent to the environmental protection administrative department of the State Council for archival purposes.

Article 10 When comprehensive planning is made, a chapter or introduction about the environmental impact shall be prepared according to the possible environmental impact as a result of the execution of planning.

When special planning is made, an environmental impact report shall be prepared before the draft of planning is submitted for examination and approval. A chapter or introduction about the environmental impact shall, in accordance with the provision of paragraph 1 of this Article, be prepared for the directive planning in the special planning.

The term “directive planning” as mentioned in paragraph 2 of this Article refers to a special planning focusing on the strategy of development.

Article 11 A chapter or introduction about the environmental impact shall include:

1. an analysis, forecast and assessment of possible impacts on the environment as a result of the execution of planning, mainly including an analysis of the bearing capacity of resources and environment, analysis and forecast of the bad environmental impact as well as analysis of the environmental coordination with relevant planning;
2. the countermeasures and measures for preventing or mitigating the bad environmental impact, mainly including the policies, administrative or technical measures for preventing or mitigating the bad environmental impact.

In addition to the aforesaid contents, an environmental impact report shall contain conclusions to the environmental impact assessment, mainly including the environmental reasonableness and feasibility of the draft of planning, reasonableness and feasibility of the countermeasures and measures for preventing or mitigating bad environmental impact, and advice on adjustments to the draft of planning.

Article 12 The planning preparation organ shall prepare the chapter or introduction about the environmental impact and the environmental impact report (hereinafter referred to as the environmental impact documents) or organize the technical institution for environmental impact assessment of planning to do so. The planning preparation organ shall be responsible for the quality of the environmental impact documents.

Article 13 As to the special planning which may have bad environmental impact and directly involve the environmental interests of the general public, the planning preparation organ shall, prior to submitting the draft of planning for examination and approval, openly solicit the opinions of the relevant entities, experts and the general public on the environmental impact report through questionnaire, symposia, discussion meetings, hearings, etc., unless it is required to keep it confidential according to law.

If there is any significant difference between the opinions of the relevant entities, experts and the general public and the conclusion to the environmental impact assessment, the planning preparation organ shall make further discussions through discussion meetings, hearings, etc.

The planning preparation organ shall attach to the environmental impact report, which it

submits for examination, a statement about the adoption and rejection of public opinions as well as the reasons therefor.

Article 14 To make significant adjustments or revisions to the execution scope, applicable time limit, scale, structure and layout of the planning already approved, the planning preparation organ shall make a new or supplemental environmental impact assessment under this Regulation.

Chapter III Examination

Article 15 When the planning preparation organ submits a draft of comprehensive planning or a draft of directive planning in the special planning for examination and approval, it shall submit to the examination and approval organ of planning a chapter or introduction about the environmental impact as an integral part of the draft of planning. If it fails to prepare a chapter or introduction about the environmental impact, the examination and approval organ of planning shall require it to prepare the chapter or introduction. If it fails to do so, the examination and approval organ of planning shall disapprove the said draft of comprehensive planning or draft of directive planning.

Article 16 At the time of submitting a draft of special planning for examination and approval, the planning preparation organ shall also submit the environmental impact report to the examination and approval organ of planning for examination. If it fails to prepare the environmental impact report, the examination and approval organ of planning shall require it to prepare it. If it fails to do so, the examination and approval organ of planning shall disapprove the said draft of special planning.

Article 17 As to a special planning subject to the examination and approval of the people's government at or above the districted city level, the environmental protection administrative department thereof shall, prior to the examination and approval, form a review team, which consists of representatives of relevant departments and experts, to examine the environmental impact report. The examination team shall submit written examination opinions.

The measures for the examination of the environmental impact report for a special planning subject to the examination and approval of the relevant department of the people's government at or above the provincial level shall be formulated by environmental protection administrative department of the State Council jointly with the relevant department of the State Council.

Article 18 The experts as members of the review team shall be randomly selected from the name list of experts of corresponding specialties in the database of experts. However, no expert who participates in preparing an environmental impact report shall be a member of the review team of the environmental impact report.

The number of members of experts in the review team shall not be less than 1/2 of the total number of members of the review team. If it is less than 1/2 of the total number of members of the review team, the examination opinions of the review team shall be invalid.

Article 19 The members of the review team shall put forward written examination opinions

on the environmental impact report objectively, impartially and independently. The examination and approval organ of planning, the planning preparation organ or the department which formed the review team shall not interfere with their work.

The examination opinions shall include the following:

1. the genuineness of the fundamental materials and data;
2. the appropriateness of the assessment approach;
3. the reliability of the analysis, forecast and assessment of the environmental impact;
4. the reasonableness and effectiveness of the countermeasures and measures for preventing or mitigating the bad environmental impact;
5. the reasonableness of the statement about the adoption and rejection of the public opinions and the reasons therefor; and
6. the scientificity of the conclusion to the environmental impact assessment.

The examination opinions shall be signed and consented to by 3/4 or more of the members of the review team. If any member of the review team has different opinions, his opinions shall be faithfully recorded and reflected.

Article 20 Under any of the following circumstances, the review team shall put forward opinions on revising and re-examining the environmental impact report:

1. The fundamental materials and data are untrue;
2. The assessment approach selected is improper;
3. The analysis, forecast and assessment of the bad environmental impact is inaccurate and superficial and it is necessary to make further demonstrations;
4. There are severe defects in the countermeasures and measures for preventing or mitigating the bad environmental impact;
5. The conclusion to the environmental impact is ambiguous, unreasonable or wrong;
6. No statement about the adoption and rejection of public opinions and the reasons therefor are attached, or it is obviously unreasonable not to adopt the public opinions; or
7. There are other severe defects or omissions.

Article 21 Under either of the following circumstances, the review team shall put forward an opinion on disapproving the environmental impact report:

1. On the basis of the existing knowledge and technical conditions, it is unable to make a scientific judgment about the extent or range of the bad environmental impact as a result of the execution of planning; or
2. The execution of planning may bring any major environment impact and it is impossible to put forward practical and feasible countermeasures and measures for preventing or mitigating it.

Article 22 The examination and approval organ of planning shall, at the time of examining a draft of special planning, take the conclusion to the environmental impact report and the examination opinions as an important basis for making a decision.

If the examination and approval organ of planning rejects the conclusion to the environmental impact report and the examination opinions, it shall make a written

explanation about the rejection to each item and archive the relevant materials for reference. The relevant entities and experts and the general public may apply for consulting them, excluding those which shall be kept confidential according to law.

Article 23 If a planning which has already been subject to an environmental impact assessment contains a concrete construction project, the conclusion to the environmental impact assessment shall be regarded as an important basis for the environmental impact assessment of the construction project. The contents of the environmental impact assessment of the construction project may be simplified according to the analysis of and discussions about the environmental impact assessment of the planning.

Chapter IV Follow-up Assessment

Article 24 After the execution of the planning with severe environmental impact, the planning preparation organ shall timely organize a follow-up assessment of the environmental impact of planning and report the assessment result to the examination and approval organ of planning and notify the environmental protection administrative department and other relevant departments.

Article 25 The follow-up assessment of the environmental impact of planning shall include:

1. comparative analysis and assessment of the actual environmental impact after the execution of planning and the possible environmental impact forecasted in the documents on environmental impact assessment;
2. analysis and evaluation of the effectiveness of the countermeasures and measures for preventing or mitigating the bad environmental impact which are taken during the execution of planning;
3. public opinions on the environmental impact as a result of the execution of planning; and
4. conclusion to the follow-up assessment.

Article 26 When the planning preparation organ makes a follow-up assessment of the environmental impact of planning, it shall solicit the opinions of the relevant entities, experts and the public through questionnaire, on-site visits, symposia, etc.

Article 27 If major bad environmental impact arises during the execution of planning, the planning preparation organ shall timely put forward improvement measures, report them to the examination and approval organ of planning and notify the environmental protection administrative department and other relevant departments.

Article 28 If the environmental protection administrative department finds that any severe environmental impact arises during the execution of planning, it shall timely make a verification. If the case is verified as true, it shall put forward suggestions to the examination and approval organ of planning on improving the measures or revising the planning.

Article 29 After the examination and approval organ of planning receives a report from the planning preparation organ or suggestions from the environmental protection administrative department, it shall timely organize discussions and take improvement measures or revise the planning according to the discussion result.

Article 30 If the total discharge volume of major pollutants in the area for the execution of

planning exceeds the state or local indicator for the control of total discharge volume, the planning preparation organ shall suspend examining and approving any environmental impact assessment document on a new construction project which will increase the total discharge volume of major pollutants in the aforesaid area for the execution of planning.

Chapter V Legal Liabilities

Article 31 If the planning preparation organ makes falsification or neglects its duties when organizing an environmental impact assessment and causes severe distortion thereof, the directly responsible person-in-charge and other directly liable persons shall be given a sanction according to law.

Article 32 Where an examination and approval organ of planning commits either of the following conducts, the directly responsible person-in-charge and other directly liable persons shall be given a sanction according to law:

1. It approves a draft of comprehensive planning or a draft of directive planning in the special planning without the chapter or introduction about the environmental impact thereof as required by law; or
2. It approves a draft of special planning without an attachment of environmental impact report as required by law, or a draft of special planning about which the environment impact report has not been examined by the review team.

Article 33 If the department, which formed a review team, makes falsification or abuses the powers when organizing the examination of the environmental impact report and causes severe distortion of the environmental impact assessment, the directly responsible person-in-charge and other directly liable persons shall be given a sanction according to law.

If any expert who is a member of the review team makes falsification or neglects his duties during the examination of an environmental impact report and causes severe distortion of the environmental impact assessment, the environmental protection administrative department, which established the database of experts, shall disqualify him from the database of experts and make an announcement. If any of the departments' representatives who act as members of the review team commits either of the aforesaid conducts, he shall be given a sanction according to law.

Article 34 If a technical institution for environmental impact assessment of planning makes falsification or neglects duties and causes severe distortion of the environmental impact assessment documents, the environmental protection administrative department of the State Council shall circulate a notice on criticism and give it a fine of 1 time up to 3 times the amount of fees charged. If any crime is constituted, it shall be subject to criminal liabilities.

Chapter VI Supplementary Provisions

Article 35 The people's government of a province, autonomous region or municipality directly under the Central Government may, in light of the local actualities, require the people's governments at the county level within its administrative area to make an environmental impact assessment of their planning. The concrete measures shall be formulated by the province, autonomous region or municipality directly under the Central Government by

reference to the Law of the People's Republic of China on Environmental Impact Assessment and this Regulation.

Article 36 This Regulation shall come into force as of October 1, 2009.

3. Regulations on the Administration of Construction Project Environmental Protection

(Issued via Order No. 253 of the State Council of the People's Republic of China on November 29, 1998; Revised in accordance with the Decision of the State Council on Amending the Regulation on the Administration of Construction Project Environmental Protection on July 16, 2017)

Chapter I General Provisions

Article 1 These Regulations are formulated with a view to preventing construction projects from generating new pollution and damaging the ecological environment.

Article 2 These Regulations shall be applicable to building of construction projects having impacts on the environment within the territory of the People's Republic of China and other territorial sea areas under the jurisdiction of the People's Republic of China.

Article 3 State standards and local standards for the discharge of pollutants must be complied with in building construction projects that generate pollution; requirements for aggregate control of discharge of major pollutants must be met in areas under aggregate control of discharge of major pollutants.

Article 4 Industrial construction projects should adopt clean production techniques with low energy consumption, low materials consumption and low pollutants generation, rationally exploit natural resources to prevent environmental pollution and ecological damage.

Article 5 Measures must be taken in reconstruction, expansion projects and technological transformation projects to treat original environmental pollution and ecological damage related to the said projects.

Chapter II Environmental Impact Evaluation

Article 6 The state practices the construction project environmental impact evaluation system.

Article 7 The state practices classified control over construction project environmental protection in accordance with the extent of environmental impact of construction projects in pursuance of the following provisions:

(1) a report on environmental impact should be compiled for a construction project that may cause major impact on the environment, giving comprehensive and detailed evaluation of the pollution generated and environmental impact caused by the construction project;

(2) a statement on environmental impact should be compiled for a construction project that may cause light impact on the environment, giving analysis or special-purpose evaluation of the pollution generated and environmental impact caused by the construction project; and

(3) a registration form should be filled out and submitted for a construction project that has slight impact on the environment and necessitates no environmental impact evaluation.

The catalogue for the categorized management of environmental impact assessment of

construction projects shall be developed and published by the environmental protection administrative department of the State Council on the basis of organizing experts to conduct demonstration and soliciting opinions of the relevant departments, industry associations, enterprises and public institutions and the public.

Article 8 The report on construction project environmental impact should contain the following contents:

- (1) an overview of the construction project;
- (2) current state of environment surrounding the construction project;
- (3) analysis and predictions of impacts which may be caused by the construction project on the environment;
- (4) measures for environmental protection and their financial and technical authentication;
- (5) environmental impact economic loss-benefit analysis;
- (6) proposals for environment monitoring of the construction project; and
- (7) conclusions of the environmental impact evaluation.

Contents and formats of the construction project environmental impact statement and environmental impact registration form shall be prescribed by the competent department of environmental protection under the State Council.

Article 9 As to a construction project, for which the environmental impact report or the environmental impact statement is required to be prepared in accordance with the law, the project owner shall, before the commencement of construction, submit the environmental impact report or the environmental impact statement to the environmental protection administrative department with the approval authority for approval. If the environmental impact assessment documents of the construction project have not been examined or approved upon examination by the approval authority in accordance with the law, the project owner shall not commence the construction.

When examining the environmental impact report or the environmental impact statement, the environmental protection administrative department shall focus on the examination of environmental feasibility of the construction project, the reliability of environmental impact analysis, forecast and assessment, the effectiveness of environmental protection measures and the scientificity of environmental impact assessment conclusions, and make the approval decision and notify the project owner of the decision in writing within 60 days of receipt of the environmental impact report or within 30 days of receipt of the environmental impact statement respectively.

The environmental protection administrative department may organize the relevant technical institution to conduct technical assessment of the construction project environmental impact report or the construction project environmental impact statement, and assume the relevant expenses. The technical institution shall be responsible for the technical assessment opinion offered by it, and shall not collect any fee from the project owner and the entity conducting environmental impact assessment.

As to a construction project, for which the environmental impact registration form shall be

completed and reported in accordance with the law, the project owner shall, according to the provisions of the environmental protection administrative department of the State Council, submit the environmental impact registration form to the environmental protection administrative department at the county level at the place where the construction project is located for recordation.

The environmental protection administrative department shall conduct the online approval and recordation of the environmental impact assessment documents and disclose the relevant information online.

Article 10 The competent department of environmental protection administration under the State Council shall be responsible for the examination and approval of the following construction project environmental impact reports, environmental impact statements:

- (1) special-nature construction projects such as nuclear facilities and top-secret projects;
- (2) construction projects transcending the administrative areas of the provinces, autonomous regions and municipalities directly under the Central Government; and
- (3) construction projects subject to the examination and approval of the State Council or the examination and approval of the departments concerned authorized by the State Council.

Limits of authority of examination and approval of the construction project environmental impact reports, environmental impact statements or environmental impact registration forms beside those provided for in the preceding paragraph shall be prescribed by people's governments of the provinces, autonomous regions and municipalities directly under the Central Government.

Where a construction project causes trans-administrative area environmental impact and a dispute arises between the competent departments concerned of environmental protection administration over the conclusions of environmental impact evaluation, the environmental impact report or environmental impact statement shall be submitted to the joint competent department of environmental protection administration at the next higher level for examination and approval.

Article 11 Where a construction project falls under any of the following circumstances, the environmental protection administrative department shall make a decision to disapprove the environmental impact report or the environmental impact statement:

- (1) The type, site selection, layout, or scale, among others, of the construction project fails to conform to any law or regulation on environmental protection or any relevant statutory plan.
- (2) The environmental quality in the region where the construction project is located fails to reach the national or local standard for environmental quality, and the measures to be taken for the construction project fail to meet the management requirements for improving the regional environmental quality.
- (3) The pollution prevention measure taken for the construction project cannot guarantee that pollutant emission reaches the national and local emission standard, or no necessary measures have been taken to prevent and control ecological damage.

(4) In the case of reconstruction, expansion or technological transformation of a project, no effective prevention measure has been put forward with respect to the existing environmental pollution and ecological damage of the project.

(5) The environmental impact report or the environmental impact statement of the construction project has evident misrepresentation of the basic data and significant defects and omissions in content, or the environmental impact assessment conclusion is unspecific and unreasonable.

Article 12 After the environmental impact report or the environmental impact statement of the construction project is approved, if there is any significant change in the project nature, scale and location, production technology adopted, or the measures taken to prevent pollution and ecological damage, the project owner shall submit the environmental impact report or the environmental impact statement of the construction project once again for approval.

Where the construction project commences five or more years after the date of approval of the environmental impact report or the environmental impact statement of the project, the said environmental impact report and environmental impact statement shall be submitted to the original approval authority for reexamination. The original approval authority shall notify in writing the project owner of its examination opinion within ten days of receipt of the environmental impact report or the environmental impact statement of the construction project. If the authority fails to do so within the prescribed time limit, it may be deemed that the aforesaid report and statement have been approved upon examination.

No fee shall be charged for the examination and approval of the environmental impact report and the environmental impact statement of the construction project as well as the recordation of the environmental impact registration form.

Article 13 Construction units may adopt the form of open tender to select the units engaging in the work of environmental impact evaluation for environmental impact evaluation of the construction projects.

No administrative organ shall appoint units engaging in the work of environmental impact evaluation for construction units for environmental impact evaluation.

Article 14 Construction units should, in compiling the environmental impact reports, solicit the views of the units and residents concerned of the locality wherein the construction project is located pursuant to relevant provisions of law.

Chapter III Construction of Environmental Protection Facilities

Article 15 Simultaneous design, simultaneous construction and simultaneous going into operation with the main body project must be realized for matching environmental protection facilities construction which is required for the construction project.

Article 16 The preliminary design of a construction project shall, according to the requirements of environmental protection design standards, contain a chapter on environmental protection, and implement the measures for the prevention and treatment of environmental pollution and ecological damage as well as budgetary estimate for investment

in environmental protection facilities.

The project owner shall include the construction of environmental protection facilities in the construction contract, guarantee the construction process of and funds for environmental protection facilities, and, in the course of project construction, organize the implementation of environmental protection countermeasures mentioned in the environmental impact report or the environmental impact statement and in the approval decision made by the approval authority at the same time.

Article 17 The project owner shall, after the completion of the construction project for which the environmental impact report or environmental impact statement is prepared, according to standards and procedures prescribed by the environmental protection administrative department of the State Council, conduct acceptance check of the constructed supporting environmental protection facilities and prepare the acceptance check report.

The project owner shall, in the course of acceptance check of environmental protection facilities, faithfully examine, monitor and record the construction and debugging of environmental protection facilities of the construction project, and shall not commit fraud.

Except for those that shall be kept confidential in accordance with the provisions of the state, the project owner shall release to the public the acceptance check report in accordance with the law.

Article 18 For construction projects that are built in phases, go into production or are delivered for use in phases, acceptance checks for their corresponding environmental protection facilities should be conducted in phases.

Article 19 The construction project for which the environmental impact report or environmental impact statement is prepared may not be put into production or use until the constructed supporting environmental protection facilities have passed the acceptance check. The facilities that have not undergone or fail to pass the acceptance check shall not be put into production or use.

After the construction project prescribed in the preceding paragraph is put into production or use, the environmental impact post-assessment shall be conducted according to the provisions of the environmental protection administrative department of the State Council.

Article 20 The environmental protection administrative department shall supervise and inspect the design, construction, acceptance check, and operation or use of environmental protection facilities of a construction project, as well as the implementation of other environmental protection measures determined in relevant environmental impact assessment documents.

The environmental protection administrative department shall record the information on violations of environmental laws involving the construction project in social integrity archives, and release to the public the list of violators in a timely manner.

Chapter IV Legal Liability

Article 21 Where a project owner commits any of the following conduct, it shall be punished in accordance with the provisions of the Law of the People's Republic of China on

Environmental Impact Assessment:

(1) The project owner commences the construction project without submitting the environmental impact report or the environmental impact statement for approval or reexamination in accordance with the law.

(2) The project owner commences the construction project when the environmental impact report or the environmental impact statement has not been approved or reexamined.

(3) The environmental impact registration form of the construction project has not been granted recordation in accordance with the law.

Article 22 Where a project owner, in violation of the provisions of this Regulation, fails to implement the measures for the prevention and treatment of environmental pollution and ecological damage as well as budgetary estimate for investment in environmental protection facilities when developing the preliminary design of the construction project, fails to include the construction of environmental protection facilities in the construction contract or fails to conduct the environmental impact post-assessment in accordance with the law, the environmental protection administrative department at or above the county level at the place where the construction project is located shall order the project owner to take corrective action within a prescribed time limit, and impose a fine of not less than 50,000 yuan but not more than 200,000 yuan on it. If the project owner fails to do so, it shall be fined not less than 200,000 yuan but not more than one million yuan.

Where the project owner, in violation of the provisions of this Regulation, fails to organize the implementation of the countermeasures for environmental protection as mentioned in the environmental impact report or the environmental impact statement and in the approval decision made by the approval authority in the course of project construction, the environmental protection administrative department at or above the county level at the place where the construction project is located shall order the project owner to take corrective action within a prescribed time limit, and impose a fine of not less than 200,000 yuan but not more than one million yuan on it; and if the project owner fails to do so, shall order it to cease construction.

Article 23 Where a project owner, in violation of the provisions of this Regulation, puts the construction project into production or use when the supporting environmental protection facilities required to be constructed have not been completed or undergone acceptance check or fail to pass the acceptance check, or commits fraud in the acceptance check of the environmental protection facilities, the environmental protection administrative department at or above the county level shall order the project owner to take corrective action within a prescribed time limit, and impose a fine of not less than 200,000 yuan but not more than one million yuan on it. If the project owner fails to do so, it shall be fined not less than one million yuan but not more than two million yuan. The directly responsible person in charge and other liable persons shall be fined not less than 50,000 yuan but not more than 200,000 yuan. If any significant environmental pollution or ecological damage has been caused, the environmental protection administrative department shall order it to cease production or use,

or to shut down the construction project by reporting it to the people's government with approval authority for approval.

Where the project owner, in violation the provisions of this Regulation, fails to release to the public the report on the acceptance check of environmental protection facilities in accordance with the law, the environmental protection administrative department at or above the county level shall order the project owner to release the report to the public, impose a fine of not less than 50,000 yuan but not more than 200,000 yuan on it, and make an announcement.

Article 24 Where a technical institution charges fees from the project owner or the entity conducting environmental impact assessment in violation of the provisions of this Regulation, the environmental protection administrative department at or above the county level shall order the technical institution to refund the fee collected, and impose a fine of not less than one time but not more than three times the fee collected.

Article 25 Where any entity conducting the environmental impact assessment of a construction project commits fraud in the environmental impact assessment, the environmental protection administrative department at or above the county level shall impose a fine of not less than one time but not more than three times the fee collected by the entity.

Article 26 Any functionary of the competent department of environmental protection administration who indulges in malpractices for selfish gains, abuse of power, negligence of duty that constitute a crime shall be investigated of the criminal liability according to law; where a crime has not been constituted, administrative sanctions shall be imposed according to law.

Chapter V Supplementary Provisions

Article 27 Environmental impact evaluation should be done in compiling construction planning for such regional development as valley development, development zone construction, new urban district construction and old urban district reconstruction. Specific measures shall be worked out separately by the competent department of environmental protection administration under the State Council in conjunction with the competent departments concerned under the State Council.

Article 28 Environmental protection administration of offshore engineering construction projects shall abide by the provisions of the State Council concerning environmental protection administration of offshore engineering.

Article 29 Environmental protection administration of construction projects of military installations shall abide by the relevant provisions of the Central Military Commission.

Article 30 These Regulations come into force as of the date of promulgation.

4. Administrative Regulation on the Prevention and Treatment of the Pollution and Damage to the Marine Environment by Marine Engineering

(Promulgated by the Order No. 475 of the State Council on September 19, 2006; and

amended in accordance with the Decision of the State Council to Amend and Repeal Certain Administrative Regulations on March 1, 2017)

Chapter I General Provisions

Article 1 This Regulation is formulated according to the Marine Environment Protection Law of the People's Republic of China for the purpose of preventing, treating and reducing the pollution and damage to the marine environment by marine engineering construction projects (hereinafter referred to as marine projects), keeping marine ecological balance, and preserving marine resources.

Article 2 This Regulation shall be applicable to the prevention of pollution and damage to the marine environment by marine projects within the marine jurisdiction of the People's Republic of China.

Article 3 The “marine projects” as mentioned in this Regulation refers to the newly built, restructured or expanded projects that are constructed for the exploitation, utilization, protection and restoration of marine resources, and whose main parts are situated along the coastline to the side of the sea, and that specifically include:

- (1) Projects of enclosing or filling in the sea, and marine dike projects;
- (2) Projects of artificial islands, sea and seabed material storage facilities, cross-sea bridges, and seabed tunnels;
- (3) Projects of seabed pipes and seabed electric (optical) cables;
- (4) Projects of marine mineral resources exploration and exploitation, and ancillary works;
- (5) Projects of maritime tidal power stations, wave power stations, stations based on temperature difference, and other marine energy exploitation and utilization projects;
- (6) Projects of large seawater farms, and artificial fish-reefs;
- (7) Such seawater utilization projects as the desalination of salt pans and seawater;
- (8) Maritime entertainment, sports and landscape exploitation projects; and
- (9) Other marine projects as prescribed by the state marine administrative department together with the environmental protection administrative department of the State Council.

Article 4 The state marine administrative department shall be responsible for the supervision over and administration of the environmental protection work on the marine projects across the country, and accept the guidance, coordination and supervision of the environmental protection administrative department of the State Council. The marine administrative department of the people's government at or above the level of coastal county shall be responsible for the supervision over and administration of the environmental protection work on marine projects in the sea areas adjacent to its own administrative area.

Article 5 The site selection and construction of marine projects shall be conducted in line with the zoning of marine functions, planning for the marine environmental protection and national environmental protection standards, and shall not affect the environmental quality of marine functional zones or damage the functions of adjacent sea areas.

Article 6 The state marine administrative department shall distribute the pollutant discharge control volume for the marine projects in key sea areas in light of the total pollutant discharge

control indicator for the marine projects in national key sea areas.

Article 7 Any entity or individual shall be entitled to tip off the pollution to the marine environment or the damage to the marine ecology by marine projects to the marine administrative department.

The marine administrative department that has received the said tip-off shall carry out the investigation, and keep secrets for the tip-off.

Chapter II Environmental Impact Assessment

Article 8 The State implements the environmental impact assessment system to marine projects.

The environmental impact assessment of a marine project shall mainly include the comprehensive analysis, forecast and assessment of the effects of the project to the marine environment and marine resources, corresponding ecological protection measures, as well as the forecast, control or reduction of the effects and damage of the project to the marine environment and marine resources.

An environmental impact report on a marine project shall be formulated according to the technical standards for the environment impact assessment of marine projects and other relevant environmental protection standards. The survey and monitor materials as required by the state marine administrative department shall be used for the formulation of environment impact reports.

Article 9 An environmental impact report on a marine project shall include:

- (1) General information about the project;
- (2) Environmental situation of the sea area where the project is located, and the conditions about the exploitation and utilization of adjacent sea areas;
- (3) Analysis, forecast and assessment of possible impacts of the project to the marine environment and marine resources;
- (4) Analysis and forecast of the impacts of the project to the functions of adjacent sea areas and other exploitation and utilization activities;
- (5) Analysis of the economic profits and losses and environmental risks of the project to the marine environment;
- (6) Environmental protection measures to be adopted, and the economic and technical demonstration thereof;
- (7) Conditions on public participation; and
- (8) Environment impact assessment conclusion.

In case a marine project may damage the seashore ecological environment, the environment impact assessment report shall also include the analysis and assessment of the impacts of the project to the natural reserves alongshore and other land ecological systems.

Article 10 The construction entity for a newly-built, restructured or expanded marine project shall entrust an institution with corresponding environment impact assessment qualification to formulate an environment impact report, and shall report it to the marine administrative department that has the examination and approval power for approval.

The marine administrative department shall, before approving an environmental impact report on a marine project, solicit the opinions from the administrative departments of marine affairs and fishery, and the environmental protection department in the army; and may hold a hearing when necessary. For a project of enclosing or filling in the sea, a hearing shall be held.

Article 11 The environment impact reports on the following marine projects shall be subject to the examination and approval of the state marine administrative department:

- (1) Projects involving state marine rights and interests or national defense security, etc.
- (2) Projects of marine mineral resources exploration and exploitation, and ancillary works;
- (3) Projects of filling in the sea with an area of 50 or more hectares, and projects of enclosing the sea with an area of 100 or more hectares;
- (4) Projects of maritime tidal power stations, wave power stations, stations based on temperature difference, and other marine energy development and utilization projects; and
- (5) Marine projects as examined and approved by the State Council or the relevant departments of the State Council.

Other environment impact reports on marine projects than those as mentioned in the preceding Paragraph shall be subject to the examination and approval of the marine administrative department of the people's government at or above the level of coastal county in light of the limit of power as prescribed by the people's government of the province, autonomous region or municipality directly under the Central Government.

In case a marine project may affect the environment of two or more regions and the relevant marine administrative departments have dispute over the environment impact assessment conclusion, the environment impact report on the said project shall be subject to the examination and approval of their common marine administrative department at the next higher level.

Article 12 The marine administrative department shall, within 60 working days upon receipt of an environment impact report on a marine project, make a decision on whether or not to approve it, and notify the construction entity of the decision in written form.

Where the materials need to be supplemented, the marine administrative department shall notify the construction entity in a timely manner, and the term of approval shall be re-calculated as of the day when all the materials are supplemented.

Article 13 Where, after an environment impact report on a marine project is approved, any major change occurs to the nature, scale, site, production technique of the project or to the environmental protection measures to be adopted, the construction entity shall entrust an institution with corresponding environment impact assessment qualification to formulate a new environment impact report, and report it to the marine administrative department that has originally examined and approved the environment impact report on the said project for approval. Where the construction of a marine project is started after five years from the date when the environment impact report on the project has been examined and approved, the environment impact report on the said project shall, before the construction, be reported to

the marine administrative department that has originally examined and approved the environment impact report on the said project for a new approval.

Article 14 A construction entity may determine an environment impact assessment institution for a marine project by way of bid invitation. No entity or individual may designate any environment impact assessment institution for the marine project.

Article 15 Any institution and its technicians for environment impact assessment of marine projects shall obtain corresponding quality certificate and qualification certificates according to the relevant provisions of the environment protection administrative department of the State Council.

Before the environment protection administrative department of the State Council issues qualification certificates to the environment impact assessment institutions for marine projects, it shall solicit the opinions from the marine administrative department of the State Council.

Chapter III Prevention and Treatment of the Pollution Caused by Marine Projects

Article 16 The environmental protection facilities for a marine project shall be designed, constructed and put into use simultaneously with the main part of the marine project.

Article 17 In the preliminary design of a marine project, an environmental protection chapter shall be formulated, environmental protection measures shall be implemented and the investment for environmental protection shall be generally calculated according to the criteria for environmental protection design and the environment impact report as approved.

Article 18 A construction entity shall, within 30 working days before the marine project is put into operation, apply for the check and acceptance of environmental protection facilities to the marine administrative department that has originally approved the environment impact report on the said project; and in case a marine project is put into trial operation, the construction entity shall, within 60 working days before the marine project is put into trial operation, apply for the check and acceptance of environmental protection facilities to the marine administrative department that has originally approved the environment impact report on the said project.

In case a marine project is constructed and put into operation by stages, the corresponding environmental protection facilities shall be checked and accepted by stages.

Article 19 The marine administrative department shall, within 30 working days upon receipt of an application for the check and acceptance of environmental protection facilities, complete the check and acceptance; and if the facilities are found to be unqualified upon check and acceptance, the marine administrative department shall order the rectification within the prescribed time limit.

Where the supporting environmental protection facilities necessary for a marine project have not been checked and accepted by the marine administrative department or are found to be unqualified upon check and acceptance, the said project shall not be put into operation.

No construction entity may illegally dismantle or leave unused the environmental protection facilities for a marine project.

Article 20 Where a marine project became inconsistent with the environment impact report as approved during the course of construction or operation, the construction entity shall, within 20 working days after the said circumstance appears, organize a follow-up environment impact assessment, and take measures for improvement according to the follow-up assessment conclusion, and submit the follow-up assessment conclusion and the measures for improvement as adopted to the marine administrative department that has originally approved the environment impact report on the said project for archival filing; and the marine administrative department that has originally approved the environment impact report on the said project may also order the construction entity to conduct a follow-up assessment conclusion and take the measures for improvement.

Article 21 Any project of enclosing or filling in the sea shall be rigorously controlled. It is prohibited to enclose or fill in the sea at the natural spawning, breeding and feeding grounds of economic organism or bird habitats.

The fillings for a project of enclosing or filling in the sea shall conform to the relevant environmental protection standards.

Article 22 The construction of a marine project shall not cause the erosion, sludging or damage to the territorial sea base points and their surroundings, or endanger the stability of territorial sea base points.

In the case of the construction of a project of sea dam, cross-sea bridge, marine entertainment, sports and landscape development, effective measures shall be adopted to prevent the erosion or sludging of sea coast.

Article 23 The set-up of pollutant outlets for an offshore sewage disposal project shall conform to the division of marine functions and the plans for marine environmental protection, and shall not damage the functions of adjacent sea areas.

The offshore sewage discharge shall not exceed the discharge standards as prescribed by the Central or local government, and shall not exceed the total pollutant discharge control indicator in the case of a sea area for which the total pollutant discharge control is implemented.

Article 24 A culturist engaged in mariculture shall adopt scientific cultivation method to reduce the pollution to marine environment by baits. Where the marine area is polluted or the marine landscape is seriously damaged due to the mariculture, the culturist shall make restitution and put things in order.

Article 25 A construction entity shall, in the process of constructing or operating a marine solid mineral resources exploration and exploitation project, take effective measures to prevent pollutants from large-scale spread and destruction of marine environment.

Article 26 The marine oil and gas mineral resources exploration and exploitation shall be equipped with water separation facilities, oily wastewater treatment equipment, monitoring devices for oil emission, residual oil and used oil recycling facilities, and waste grinding equipment.

Fixed platforms, mobile platforms, floating oil storage devices, pipelines and other

supporting facilities used in the marine oil and gas mineral resources exploration and exploitation shall conform to the impermeable, leak-proof and anti-corrosion requirements. An operating entity shall conduct regular inspections so as to prevent oil spills.

The “fixed platforms” and “mobile platforms” as mentioned in the preceding Paragraph refers to the drilling vessels, drilling platforms, oil production platforms and other platforms used in the marine oil and gas mineral resources exploration and exploitation.

Article 27 An entity of marine oil and gas mineral resources exploration and exploitation shall purchase the relevant pollution and damage liability insurance.

Article 28 In case blasting operations at sea are necessary for the construction of a marine project, the construction entity shall report it to the marine administrative department before the blasting operations, and the marine administrative department shall timely report it to the administrative departments of marine affairs and fisheries.

Obvious signs and signals shall be set up and effective measures for marine resources protection shall be adopted for the blasting operations at sea. Blasting operations in major fishing waters or other operations that may cause damage to the fishery resources shall not be conducted within the spawning season of major economic fish and shrimps.

Article 29 In case a marine project needs to be demolished or used for other purposes, it shall be reported to the marine administrative department that has originally approved the environment impact report on the said project for approval. In case the demolition or change of uses may significantly affect the environment, an environmental impact assessment shall be carried out.

In case a marine project needs to be abandoned at sea, the part that may cause pollution and damage to the marine environment or affect the exploitation and utilization of marine resources shall be demolished according to the relevant provisions on marine dumping wastes.

When a marine project is demolished, the construction entity shall formulate an environmental protection scheme for demolition, adopt necessary measures, and prevent pollution and damage to the marine environment.

Chapter IV Pollutant Discharge Administration

Article 30 The disposal of pollutants occurred in the marine oil and gas mineral resources exploration and exploitation shall be governed by the following provisions:

- (1) The oily sewage shall not be discharged into the sea directly or upon dilution, it shall be treated in line with the relevant state discharge standards and then be emitted; and
- (2) Plastic products, residual oil, waste oil, oil-based mud, oily garbage and other toxic and harmful residues shall not be discharged directly into the sea or be thrown into the sea, they shall be collectively stored in special containers and be shipped to the land for disposal.

Article 31 It is strictly controlled to add oil into the water-based slurry. Where it is necessary to add oil, it shall be faithfully recorded down, and the types and quantity of the oil to be added shall be reported to the marine administrative department that has originally approved the environment impact report on the said project. It is prohibited to discharge water-based

mud or cuttings whose oil contents are in excess of the standards prescribed by the State.

Article 32 The construction entity shall, after the marine project is put into trial operation or is put into formal operation, accurately record down the conditions about the functioning of pollutant discharge facilities and processing equipment, as well as the discharge and treatment of pollutants, and regularly report them to the marine administrative department that has originally approved the environment impact report on the said project according to the provisions of the state marine administrative department.

Article 33 The marine administrative department of the people's government at or above the county level shall, according to its own power, verify the types and quantity of pollutants discharged by marine projects, and determine the amount of charges for disposing pollutants that should be paid by pollutant dischargers according to the charging rates as determined by the administrative departments of price and finance of the State Council.

A pollutant discharger shall pay the charges for disposing pollutants at a designated commercial bank.

Article 34 In the marine oil and gas mineral resources exploration and exploitation, the automatic pollutants flow monitoring equipment shall be installed to measure the discharge of production sewage, engine emissions and domestic sewage.

Article 35 It is prohibited to discharge oily, acid, lye or toxic sewage or middle or high-level radioactive sewage into the sea, and it is strictly restricted to discharge low-level radioactive sewage. Where the discharge is required, it shall be governed by the State standards for the prevention and treatment of radioactive pollution.

It is strictly restricted to emit the gases containing toxic substances into the atmosphere. Where the emission is required, the said gas should be emitted after purification within the emission standards prescribed by the Central or local government; and the emission of the gases containing toxic substances into the atmosphere shall be governed by the State standards for the prevention and treatment of radioactive pollution.

It is strictly restricted to discharge the sewage containing organics and heavy metals that are not easy to be degraded into the sea; and the discharge of other pollutants shall comply with national or local standards.

Article 36 The charges for disposing sewage paid by marine projects shall be fully incorporated into the budget of treasury, and shall be subject to the separate management of expenditures and incomes, and be all earmarked for the prevention and treatment of pollution to the marine environment. The specific measures therefor shall be formulated by the administrative department of finance together with the state marine administrative department.

Chapter V Prevention and Treatment of Pollution Accidents

Article 37 A construction entity shall, before a marine project is put into formal use, formulate an advanced emergency handling scheme on the prevention and treatment of pollution and damage caused by the marine project, and report it to the marine administrative department that has originally approved the environment impact report on the said project for archival

filing.

Article 38 An advanced emergency handling scheme on the prevention and treatment of pollution and damage caused by the marine project shall include:

- (1) Conditions about the project and the environment and resources of adjacent sea areas;
- (2) Analysis of pollution accident risks;
- (3) Emergency handling facilities; and
- (4) Scheme for dealing with pollution accidents.

Article 39 In case any accident or any other emergency occurred during the construction or operation of a marine project causes or may cause any pollution accident to the marine environment, the construction entity shall immediately report it to the marine administrative department of the people's government at or above the level of coastal county or any other competent administrative department, and take effective measures to reduce or eliminate the pollution, and simultaneously circulate a notice to the entities and individuals that may be endangered.

The marine administrative department of the people's government at or above the level of coastal county or any other competent administrative department shall, upon receipt of the report, timely report it to the people's government at or above the county level and the relevant competent department at the higher level according to the provisions on classification of pollution accidents. The people's government at or above the county level and the relevant competent department shall, in accordance with their respective responsibilities, immediately assign persons to rush to the scene, take effective measures to reduce or eliminate the pollution, and carry out investigation and treatment of pollution accidents.

Article 40 The construction of marine projects within marine natural reserves shall be governed by the State provisions on marine natural reserves.

Chapter VI Supervision and Check

Article 41 The marine administrative department of the people's government at or above the county level shall be responsible for supervision over and check of the prevention and treatment of pollution and damage to the marine environment caused by marine projects, investigate the acts in violation of the laws or regulations on prevention and treatment of marine pollution, and impose punishments.

The personnel for supervision and check of the marine administrative department of the people's government at or above the county level shall carry out supervision and check in strict accordance with the procedures and limit of power as prescribed in the laws or regulations.

Article 42 When the marine administrative department of the people's government at or above the county level checks a marine project on the spot, it shall have the power to adopt the following measures:

- (1) Requiring the entity or individual under check to provide documents, certificates, data and technical materials relating to the environmental protection for consultation or copying;

- (2) Requiring the person in-charge or any other relevant person of the entity under check to explain relevant issues;
- (3) Entering into the work site of the entity under check for monitoring, survey, sampling inspection, photography, and videoing;
- (4) Checking the installation and operation of all kinds of facilities, installations and equipment for environmental protection;
- (5) Ordering offenders to stop illegal activities and to accept investigation and punishments; and
- (6) Requiring offenders to adopt effective measures to prevent aggravation of pollution accidents.

Article 43 The personnel for supervision and check of the marine administrative department of the people's government at or above the county level shall show the law enforcement certificates as prescribed when carrying out law enforcement inspections on the spot. Official aircraft, ships and vehicles for cruise surveillance in the law enforcement inspections shall be clearly marked.

Article 44 Any entity or individual under check shall faithfully provide materials, and shall not refuse or hamper the personnel for supervision and check from legally implementing public duties.

Relevant entities or individuals shall give coordination to the supervision and check of the marine administrative department.

Article 45 The marine administrative department of the people's government at or above the county level shall make administrative punishment decisions on the acts in violation of the laws or regulations on the prevention and treatment of marine pollution; and in case the relevant marine administrative department fails to make administrative punishment decisions according to law, the marine administrative department at the higher level shall order it to make administrative punishment decisions or shall directly make administrative punishment decisions.

Chapter VII Legal Liabilities

Article 46 In case the construction entity of a marine project violates this Regulation by committing either of the following acts, the marine administrative department responsible for examination and approval of the environment impact report on the said project shall order it to stop the construction and operation and to make up formalities within the time limit, and shall impose a fine of 50,000 yuan up to 200,000 yuan on it:

- (1) Illegally constructing the marine project before the environment impact report is approved; or
- (2) Putting the environmental protection facilities for the marine project into use when no application for check and acceptance of such facilities has been filed or such facilities are found to be unqualified upon check and acceptance.

Article 47 In case the construction entity of a marine project violates this Regulation by committing any of the following acts, the marine administrative department responsible for

examination and approval of the environment impact report on the said project shall order it to stop the construction and operation and to make up formalities within the time limit, and shall impose a fine of 50,000 yuan up to 200,000 yuan on it:

(1) The construction entity fails to formulate a new environment impact report and submit it to the marine administrative department that has originally approved the environment impact report on the said project for approval where any major change occurs to the nature, scale, site, production technique of the project or to the environmental protection measures to be adopted;

(2) The construction entity fails to submit an environment impact report to the marine administrative department that has originally approved the environment impact report on the said project for a new approval where the construction of the project is started after five years from the date when the environment impact report has been examined and approved; or

(3) The construction entity fails to make a report to the marine administrative department that has originally approved the environment impact report on the said project for approval or carry out an environmental impact assessment as required where a marine project needs to be demolished or used for other purposes.

Article 48 In case the construction entity of a marine project violates this Regulation by committing either of the following acts, the marine administrative department that has originally approved the environment impact report on the said project shall order it to make correction within the time limit; if it fails to do so, it shall be ordered to stop the operation and be imposed on a fine of 10,000 yuan up to 100,000 yuan:

(1) Illegally demolishing or leaving unused the environmental protection facilities; or

(2) Failing to organize a follow-up environment impact assessment within the prescribed time limit, or failing to take correction measures as required.

Article 49 In case the construction entity of a marine project violates this Regulation by committing either of the following acts, the marine administrative department of the people's government at or above the county level shall order it to stop the construction and operation, and to make restitution; if the construction entity fails to make restitution within the time limit, the marine administrative department may designate an entity with corresponding qualification for restitution, the construction entity shall assume the fees incurred therefrom, as well as a fine of one up to two times of the fees for restitution:

(1) Causing the erosion, sludging or damage to the territorial sea base points and their surroundings; or

(2) Carrying out the construction of marine projects within marine natural reserves.

Article 50 In case a construction entity violates this Regulation by using the fillings for a project of enclosing or filling in the sea that do not conform to the relevant environmental protection standards, the marine administrative department of the people's government at or above the county level shall order it to make correction within the time limit; if it fails to do so, it shall be ordered to stop the construction and operation, and be imposed on a fine of

50,000 yuan up to 200,000 yuan; where a marine environment pollution accident is caused, and a crime is constituted, the person in-charge and others held directly responsible shall be subject to criminal liabilities.

Article 51 In case the construction entity of a marine project violates this Regulation by committing any of the following acts, the marine administrative department that has originally approved the environment impact report on the said project shall order it to make correction within the time limit; if it fails to do so, it shall be imposed on a fine of 10,000 yuan up to 50,000 yuan:

- (1) Failing to report the conditions about the functioning of pollutant discharge facilities and processing equipment or the discharge and treatment of pollutants as required;
- (2) Failing to report the types and quantity of the oil to be added into the water-based slurry as required;
- (3) Failing to report the advanced emergency handling scheme on the prevention and treatment of pollution and damage to the marine environment by the marine project as required;
- (4) Failing to make a report to the marine administrative department before carrying out blasting operations at sea; or
- (5) Failing to set up eye-catching marks and singles as required when carrying out blasting operations at sea.

Article 52 In case a construction entity violates this Regulation by failing to take effective measures to protect marine resources when carrying out blasting operations at sea, the marine administrative department of the people's government at or above the county level shall order it to make correction within the time limit; if it fails to do so, it shall be imposed on a fine of 10,000 yuan up to 100,000 yuan.

In case a construction entity violates this Regulation by carrying out blasting operations in major fishing waters or other operations that may cause damage to the fishery resources within the spawning season of major economic fish and shrimps, the marine administrative department of the people's government at or above the county level shall give it a warning and order it to stop the operation, and impose a fine of 50,000 yuan up to 200,000 yuan on it.

Article 53 In case an entity of marine oil and gas mineral resources exploration and exploitation violates this Regulation by discharging oily sewage into the sea or directly discharging or throwing plastic products, residual oil, waste oil, oil-based mud, oily garbage or other toxic and harmful residues into the sea, the state marine administrative department or its detached office shall order it to make restitution within the time limit, and impose a fine of 20,000 yuan up to 200,000 yuan on it; if the entity fails to do so within the time limit, the state marine administrative department or its detached office may designate an entity with corresponding qualification for restitution, and the entity of marine oil and gas mineral resources exploration and exploitation shall assume the fees incurred therefrom; and where a marine environment pollution accident is caused, and if a crime is constituted, the person

in-charge and others held directly responsible shall be subject to criminal liabilities.

Article 54 In case a culturist engaged in mariculture fails to adopt scientific cultivation methods and causes pollution to the marine environment or seriously damages the marine landscape, the marine administrative department of the people's government at or above the county level shall order it/him to make correction within the time limit; if the culturist fails to do so within the time limit, it/he shall be ordered to stop the cultivation, and be imposed on a fine of one up to two times of the fees for clearing the pollution or restoring the marine landscape.

Article 55 In case a construction entity fails to pay the charge for disposing pollutants according to this Regulation, the marine administrative department of the people's government at or above the county level shall order it to make payments within the time limit; if it fails to do so, it shall be imposed on a fine of two up to three times of the charge for disposing pollutants.

Article 56 In case anyone violates this Regulation by causing pollution and damage to the marine environment, the person liable shall remove the danger and compensate for losses. In case the pollution and damage to the marine environment is caused completely due to the intent or negligence of a third person, the third person shall remove the danger and compensate for losses.

In case any entity violates this Regulation and causes a pollution accident to the marine environment, and if a crime is constituted, the person in-charge and others held directly responsible shall be subject to criminal liabilities.

Article 57 In case any functionary of the marine administrative department violates this Regulation and is under any of the following circumstances, he shall be given an administrative sanction; and if a crime is constituted, he shall be subject to criminal liabilities:

- (1) Failing to examine the environment impact reports on marine projects as prescribed;
- (2) Failing to check and accept environmental protection facilities as required;
- (3) Failing to report, investigate or deal with marine environment pollution accidents as required;
- (4) Failing to collect the charge for disposing pollutants as required; or
- (5) Failing to carry out supervision and check.

Chapter VIII Supplementary Provisions

Article 58 The prevention and treatment of pollution by ships shall be governed by the laws or administrative regulations of the State.

Article 59 This Regulation shall come into force as of November 1, 2006.

5. Regulations of the People's Republic of China Concerning Environmental Protection in Offshore Oil Exploration and Exploitation

(Promulgated by the State Council of the People's Republic of China on December 29, 1983)

Article 1. These Regulations are formulated for the purpose of implementing the Marine Environmental Protection Law of the People's Republic of China so as to prevent pollution

damage to the marine environment by offshore oil exploration and exploitation.

Article 2. These Regulations shall apply to all enterprises, institutions, operators and individuals engaged in offshore oil exploration and exploitation in the sea areas under the jurisdiction of the People's Republic of China, as well as the fixed and mobile platforms and other related installations they use.

Article 3. The competent authority in charge of the environmental protection in offshore oil exploration and exploitation shall be the National Bureau of Oceanography of the People's Republic of China, including its agencies, which is hereinafter referred to as "the Competent Authority".

Article 4. While drawing up an overall development program for an oil (gas) field, an enterprise or operator shall draw up a Marine Environmental Impact Statement and submit it to the Ministry of Urban and Rural Construction and Environmental Protection of the People's Republic of China. The said Ministry shall, in conjunction with the National Bureau of Oceanography and the Ministry of Petroleum Industry, organize an examination of the Statement and take a decision on it in accordance with the provisions concerning environmental protection in state capital construction projects.

Article 5. A Marine Environmental Impact Statement shall consist of the following items:

- (1) The name, geographical location and size of the oil field;
- (2) The natural environment and condition of marine resources in the sea area where the oil field is located;
- (3) The types, composition, quantities and methods of disposal of the wastes that need to be discharged in the course of exploiting the oil field;
- (4) An assessment of marine environmental impacts: the possible effects of offshore oil exploitation on the natural environment and marine resources in the surrounding sea area; their possible effects on marine fisheries, shipping and other offshore activities; and the environmental protection measures proposed to be taken to avoid and mitigate various adverse effects;
- (5) The ultimately unavoidable effects and the extent and causes thereof; and
- (6) Measures to prevent major oil-pollution accidents, including, among others, the preventative organization, personnel, technical equipment, and communication and liaison.

Article 6. An enterprise, institution or operator shall have the ability to meet emergencies with regard to the prevention and control of oil pollution accidents, work out emergency plans, and be provided with oil-recovery facilities as well as oil enclosure and elimination equipment and materials commensurate with the scale of offshore oil exploration and exploitation in which it is engaged.

When chemical dispersant is provided, its trademark and composition shall be reported to Competent Authority for approval.

Article 7. The antipollution equipment for fixed and mobile platforms shall conform to the following requirements:

- (1) There shall be oil-water separators;

- (2) The production platforms shall have equipment for treatment of oily water, and the oil content of the discharged water after treatment through such equipment shall conform to the national discharge standards;
- (3) There shall be monitoring devices for oil discharge;
- (4) There shall be recovery facilities for residual and waste oils;
- (5) There shall be garbage-smashing equipment; and
- (6) The above-mentioned equipment & facilities shall be inspected by the vessels inspection agency of the People's Republic of China, proved to be up to standard, and then granted a certificate of their effectiveness.

Article 8. If the antipollution equipment of a fixed or mobile platform already employed in offshore oil exploration and exploitation in the sea areas under the jurisdiction of the People's Republic of China before March 1, 1983 fails to meet the prescribed requirements, effective measures shall be taken to prevent pollution and to ensure that such equipment meets the prescribed requirements within three years after the promulgation of these Regulations.

Article 9. Each enterprise, institution or operator shall carry insurance or other financial guaranties in respect of civil liabilities for pollution damage.

Article 10. A fixed or mobile platform shall have an Antipollution Record Book printed in a form approved by the Competent Authority.

Article 11. Oily water shall not be discharged, either directly or in diluted form, from any fixed or mobile platform. When the water is discharged after treatment, its oil content must comply with the state standards concerning oily water discharge.

Article 12. Requirements for the control of other wastes are as follows:

- (1) Residual oil, waste oil, oil-based mud, oily garbage, and other noxious liquid or residues shall be recovered and forbidden to be discharged or dumped into the sea;
- (2) The disposal of industrial garbage in large quantities shall be controlled according to provisions concerning marine dumping, and scattered industrial garbage may not be dumped into fishing areas and navigation channels; and
- (3) When it is necessary to dump domestic refuse within 12 nautical miles from the nearest land, it must be smashed into grains with diameters less than 25 mm.

Article 13. When offshore oil exploration and exploitation necessitates dynamite explosion or other operations harmful to fishery resources in important fishing grounds, effective measures shall be taken to keep away from the spawning, breeding and fishing seasons for those fishes and shrimps of major economic value. Such operations shall be reported in advance to the Competent Authority and distinct signs and signals shall be given while operations are carried out.

Upon receiving such a report, the Competent Authority shall promptly inform the relevant units of the location and time of the operations.

Article 14. Offshore oil-storage installations and oil pipelines shall meet the requirements against seepage, leakage and corrosion and be kept in good conditions through regular

inspection so as to prevent oil leakage accidents.

Article 15. In the event of offshore-well testing, the oil and gas shall be thoroughly burned through a burner. Effective measures shall be taken to dispose of the oils and oily mixtures fallen into the sea during the testing and a truthful record be made of such a disposal.

Article 16. In case pollution accidents such as oil spill or leakage occur during operations, the enterprise, institution or operator involved shall take prompt measures to enclose and recover the oil so as to control, mitigate, and eliminate the pollution.

Major oil-pollution accidents involving massive oil spill, oil leakage and/ or blowout shall immediately be reported to the Competent Authority while effective measures are taken to control and eliminate the oil pollution, and the accidents shall be subject to investigation and disposition by the Competent Authority.

Article 17. The use of chemical dispersant shall be controlled in such manners as follows:

(1) When an oil-pollution accident occurs, a small amount of chemical dispersant may be applied to a limited amount of oil which is indeed unrecoverable, provided that recovery measures have been taken;

(2) The amount of chemical dispersant (including its solvent) used once for all shall be separately prescribed by the Competent Authority in accordance with different sea areas and other conditions. The operator shall submit a report to the Competent Authority in pursuance of relevant provisions and may use the chemical dispersant only after permission is granted;

(3) In such an emergency in which the oil spills unlikely to be recovered may cause a fire or present serious threat to the safety of human life and properties whereas, by using chemical dispersant, pollution can be mitigated and the consequences of the accident prevented from expanding, the amount of such dispersant to be used and the relevant procedures for report may be exempt from the restrictions under paragraph (2) of this Article. However, the facts of such an accident and the use of chemical dispersant shall be reported in detail to the Competent Authority after the accident has been dealt with; and

(4) Only the chemical dispersant approved by the Competent Authority may be used.

Article 18. The operator shall make a truthful and detailed account of the following circumstances in the platform's Antipollution Record Book:

(1) The operation of the antipollution equipment and installations;

(2) The treatment and discharge of oily water;

(3) The disposal, discharge and dumping of other wastes;

(4) Oil-pollution accidents involving oil spill, oil leakage, blowout, etc. and their disposition;

(5) The conducting of explosive operations;

(6) The use of chemical dispersant; and

(7) Other matters as may be stipulated by the Competent Authority.

Article 19. Enterprises and operators shall, within the 15 days after each quarter of the calendar year, submit a comprehensive report to the Competent Authority on the antipollution situation and pollution accident of that quarter in a form approved by the latter.

The location of the fixed or mobile platforms shall be notified to the Competent Authority without delay.

Article 20. Functionaries of, and persons designated by, the Competent Authority have the right to board any fixed or mobile platform and any other relevant installation for the purposes of monitoring and inspection, including:

- (1) Collecting various kinds of samples;
- (2) Inspecting the provision, operation and use of the antipollution equipment, installations and materials;
- (3) Checking relevant documents and certificates;
- (4) Inspecting the Antipollution Record Book and relevant operation records and, when necessary, making duplications and extractions thereof and asking the person in charge of the platform to certify that these duplications and extractions are authenticated copies of the originals;
- (5) Inquiring of the concerned persons about pollution accidents; and
- (6) Handling other relevant matters.

Article 21. The public-duty ships of the Competent Authority shall be distinctly marked. In exercising their duties, the functionaries and designated persons shall be dressed in official uniforms and carry identity cards.

The inspected party shall furnish convenience to such public-duty ships, functionaries and designated persons, provide accurate information and state the facts.

Article 22. Entities and individuals claiming compensation on account of pollution damage resulting from offshore oil exploration and exploitation may, pursuant to the provisions of Article 32 of the Environmental Protection Law of the People's Republic of China and Article 42 of the Marine Environmental Protection Law of the People's Republic of China, apply to the Competent Authority to deal with the claim for compensation from the party causing the pollution damage. The injured party shall submit a statement claiming compensation for pollution damages, which shall consist of the following items:

- (1) The time, place and area of and objects affected by, the pollution damage caused by oil exploration and exploitation;
- (2) A list of losses attributable to the pollution damage, including articles, their quantities, unit prices, and the methods of calculation as well as information concerning aquicultural and natural conditions;
- (3) The document of appraisal by relevant scientific institutions or certification by a notary body with regard to the damage; and
- (4) The original document and evidence of the pollution damage, relevant photographs, and other documentary evidence and materials relative to the claim for compensation, which shall be provided as far as possible.

Article 23. When an entity or individual (except those with commercial contracts) considers it necessary to put up a claim for clean-up expenses incurred in the elimination of pollutants

resulting from offshore oil exploration and exploitation and applies to the Competent Authority to deal with the claim, it shall submit to the Authority a statement of claims for such clean-up expenses. The statement shall consist of the following items:

- (1) The time and place of, and objects involved in, each clean-up operation;
- (2) The manpower, machines, tools, vessels and materials used in each clean-up operation, and the quantities, unit prices and their methods of calculation;
- (3) The administrative expenses, transportation expenses, and other expenses involved in organizing such a clean-up operation;
- (4) The effects of, and related information about, the clean-up operation; and
- (5) Other relevant evidences and documents.

Article 24. When an enterprise, institution or operator involved in a pollution damage accident due to force majeure asks to be exempt from compensation liabilities, it shall submit a report to the Competent Authority. Such a report shall verify that the pollution damage has really resulted from one of the causes specified in Article 42 of the Marine Environmental Protection Law of the People's Republic of China and thus failed to be avoided in spite of the prompt and reasonable measures taken.

Article 25. When dealing with a dispute over the compensation liabilities or the sum to be paid for pollution damage from offshore oil exploration and exploitation, the Competent Authority may settle the case through conciliation on the basis of investigation.

In case a party rejects conciliation or contests the conciliation proposals by the Competent Authority, the matter may be dealt with in pursuance of Article 42 of the Marine Environmental Protection Law of the People's Republic of China.

Article 26. An enterprise, institution or operator who has violated the Marine Environmental Protection Law of the People's Republic of China and the present Regulations shall be ordered by the Competent Authority to remedy the pollution damage within a definite time, pay the clean-up expenses incurred in eliminating the pollution, and compensate for the losses sustained by the state, and those who have discharged pollutants in excess of the set standards may be ordered to pay discharge fees.

Article 27. The Competent Authority may, in light of circumstances, give a warning to or impose a fine on any enterprise, institution, operator or individual who have violated the Marine Environmental Protection Law of the People's Republic of China or the present Regulations.

Fines shall be divided into the following categories:

- (1) A fine of no more than Renminbi one-hundred thousand yuan imposed on an enterprise, institution or operator for causing marine environmental pollution.
- (2) A fine of no more than Renminbi five thousand yuan imposed on an enterprise, institution or operator for one of the following unlawful acts:
 - (a) failure to report to the Competent authority on a major oil pollution accident in accordance with relevant rules; and
 - (b) failure to observe the relevant rules in employing chemical dispersant.

(3) A fine of no more than Renminbi one-thousand yuan imposed on an enterprise, institution or operator for one of the following wrongful acts:

- (a) failure to provide an Antipollution Record Book as required;
- (b) making irregular or counterfeit entries in the Antipollution Record Book;
- (c) failure to report or provide information on relevant matters as required; and
- (d) obstructing the above-mentioned functionaries or designated persons in the exercise of their duties.

(4) An appropriate fine imposed on an individual directly liable according to the seriousness of his case.

Article 28. In case a party refuses to accept the sanction decided by the Competent Authority, the matter shall be dealt with in accordance with the provisions of Article 41 of the Marine Environmental Protection Law of the People's Republic of China.

Article 29. The Competent Authority shall commend and reward entities and individuals who, on their own initiative, have reported on, or accused the concealment of pollution damage accidents occurring in oil exploration and exploitation by an enterprise, institution or operator, or have provided evidence in that respect, or have taken measures to mitigate such pollution damage.

Article 30. For the purposes of these Regulations:

- (1) "Fixed and mobile platforms" refers to the drilling vessels, drilling platforms and production platforms, as well as other platforms mentioned in the Marine Environmental Protection Law of the People's Republic of China;
- (2) "Offshore oil exploration and exploitation" refers to such operations as offshore oil exploration, exploitation, production, storage and transportation through pipelines; and
- (3) "Operator" refers to an entity engaged in operations of offshore oil exploration and exploitation.

Article 31. These Regulations shall come into force from the day of promulgation.

6. Administrative Regulation on the Prevention and Control of Pollution Damages to the Marine Environment by Coastal Engineering Construction Projects of the People's Republic of China

(Promulgated by Order 62 of the State Council of the People's Republic of China on June 25, 1990; and amended for the first time according to the Decision of the State Council on Amending the Administrative Regulation on the Prevention and Control of Pollution Damages to the Marine Environment by Coastal Engineering Construction Projects of the People's Republic of China on September 25, 2007; and amended for the second time in accordance with the Decision of the State Council to Amend and Repeal Certain Administrative Regulations on March 1, 2017)

Article 1 To strengthen the environmental protection administration of coastal engineering construction projects, strictly control new pollutions, and protect and improve the marine environment, this Regulation has been made in accordance with the Marine Environment

Protection Law of the People's Republic of China.

Article 2 The coastal engineering construction projects as mentioned in this Regulation shall refer to the engineering construction projects of new construction, reconstruction or expansion, located at or adjacent to the coast, with the body engineering works on the side of the coastline toward the continent, having an impact on the marine environment, including:

1. Harbor, pier, navigation route and coastal airport engineering projects;
2. Shipyards (building or repairing ships);
3. Coastal thermal, nuclear and wind power plants;
4. Coastal material storage facility engineering projects;
5. Coastal mine, chemical, light industry, metallurgical and other industrial engineering projects;
6. Marine discharge engineering projects for handling and treating solid waste, sewage and other pollutants;
7. Large-scale coastal farms;
8. Coast protection engineering works, sand and gravel plants and water conservancy facilities at estuaries;
9. Coastal oil exploration and exploitation engineering projects; and
10. Other coastal engineering projects as set forth by the competent environmental protection authority of the State Council in conjunction with the competent oceanic authority of the state.

Article 3 This Regulation shall apply to all entities and individuals that construct the coastal engineering construction projects within the territory of the People's Republic of China.

The Administrative Regulation on the Prevention of Environmental Pollution by Ship Breaking shall apply to the environmental protection administration of ship breaking yard construction projects.

Article 4 The construction of a coastal engineering construction project shall be in conformity with the requirements of the regional environmental protection planning in the economic zone where it is located.

Article 5 The competent environmental protection authority of the State Council shall be in charge of the national work on the environmental protection of coastal engineering construction projects.

The competent environmental protection authority of a coastal local people's government at or above the county level shall be in charge of the work on the environmental protection of coastal engineering construction projects within its administrative region.

Article 6 A coastal engineering construction project of new construction, reconstruction or expansion shall comply with the provisions of the state on the environmental protection administration of construction projects.

Article 7 The construction employer in a coastal engineering construction project shall develop an environmental impact report (form) according to the law, and submit it to the environmental protection department for approval.

Before approving an environmental impact report (form) for a coastal engineering construction project, the environmental protection department shall consult with the oceanic, maritime, and fishery departments and the military authority for environmental protection. No reclamation of land from the sea shall be allowed at the areas of a natural harbor of a navigation value, the major breeding bases and farms, and the natural spawning, breeding and feeding grounds and major migrating channels of fishes, shrimps, crabs, shellfishes and algae on both sea surface and beach.

Article 8 Compiled according to the relevant provisions, the contents of an environment protection report on a coastal engineering construction project shall also include:

1. Environmental conditions of the locality and sea area nearby;
2. Possible impact on the marine environment during and after construction;
3. Demonstration conclusions of the marine environmental protection measures and technologies and economic feasibility; and
4. Conclusion of the marine environmental impact assessment of a construction project.

The environmental impact form of a coastal engineering construction project shall be filled out by analogy to the preceding paragraph.

Article 9 It shall be prohibited to construct a Chinese-foreign equity joint venture enterprise, Chinese-foreign contractual joint venture enterprise or foreign-funded enterprise that transfers pollution to the sea area or coast of the People's Republic of China; and corresponding measures for the prevention and control of pollution shall be in place for the technologies and equipment imported for a coastal engineering construction project, so as to prevent the transfer of pollution.

Article 10 No coastal engineering construction projects that pollute the environment or ruin the sights shall be constructed in a special marine protection area, marine natural reserve, coastal tourist attraction, salt field reserve, marine bathing beach, major fishery area and other areas that require special protection; and no coastal engineering construction projects that are constructed outside the above areas shall impair the environmental quality of the above areas, except as otherwise provided for by a law or administrative regulation.

Article 11 An entity that conducts the environmental impact assessment of a coastal engineering construction project shall legally acquire the Certificate of Qualification for Environmental Impact Assessment of Construction Project, and conduct the assessment within the extent set forth in this Certificate.

Article 12 When a coastal engineering construction project is completed for inspection and acceptance, the construction project may be formally put into production or service only after the environmental protection facility of the construction project has been inspected and qualified by the competent environment protection authority.

Article 13 According to the project administrative powers, the competent environmental protection authority of the people's government at or above the county level may conduct the on-site inspection of a coastal engineering construction project in conjunction with the relevant authorities, the inspected shall provide true information and materials, and the

inspector shall be responsible for keeping the technical know-how and trade secret of the inspected, except as otherwise provided for by a law or administrative regulation.

Article 14 Where a facility for the discharge of wastewater into a sea area is set up, the self-purification capacity of sea water shall be reasonably utilized, and the location of the outfall shall be properly selected. Where the discharge manner of blind drainage or conduit is adopted, the location of the outfall shall be under the low tide line.

Article 15 In the construction of a harbor or pier, the pollution prevention facilities that are appropriate for its handling capacity and goods types shall be set up.

A harbor, pier for oil or pier for hazardous chemicals shall have emergency response equipment and instruments for major pollution damage accidents.

Where an existing harbor or pier fails to satisfy the requirements in the preceding two paragraphs, the competent environmental protection authority in conjunction with the competent harbor and pier authorities shall order it to set up or have the same above within a time limit.

Article 16 In the construction of a coastal shipyard (building or repairing ships), the facilities for receiving and treating residual and waste oil that are appropriate for its nature and scale shall be set up, including facilities for receiving and treating oil wastewater, for screening, receiving and dissolving oil, for receiving and treating industrial wastewater, for receiving and treating industrial and ship waste, etc.

Article 17 The construction of a coastal nuclear power plant or any other nuclear facility shall be strictly in conformity with the relevant state provisions and standards for the nuclear environment protection and radioactive control.

Article 18 In the construction of a coastal oil depot, the facilities for receiving and treating oil wastewater, for collecting and treating wastewater from depot ground scrub and for accidental emergency response shall be set up; the oil pipeline and storage facilities shall be in conformity with the state provisions on anti-seepage and anti-erosion.

Article 19 In the construction of a coastal mine or in the process of exploitation, mineral separation, transportation, storage, smelting or disposal of tailings, the measures for preventing pollution damages to the marine environment shall be taken according to the relevant provisions.

Article 20 In the construction of a coastal refuse dump or industrial refuse landfill, the preventive dyke and bottom impermeable layer shall be built, and the systems of seepage collection, export and disposal and explosion-proof devices for flammable gas shall be set up.

Article 21 In the repair or construction of a coast protection engineering work or the construction of a water conservancy facility, navigation route or integrated control work at the estuary, the measures for preventing damages to the environment and aquatic product resources shall be taken.

Article 22 In the construction of a coastal engineering construction project, it shall be prohibited to change or ruin the living environment of key wild animals and plants under the

state and local protection. It shall be prohibited to construct a coastal engineering construction project that is likely to pollute or ruin the living environment of key wild animals and plants under protection; where the construction is really necessary, the consent of the competent administrative authority for wild animals and plants shall be acquired, and the construction entity shall be responsible for organize and take such measures as non-local breeding to ensure the continuity of species.

Where the construction of gates or dams at the migrating channels of fishes, shrimps, crabs and shellfishes has a serious effect on the fishery resources, the construction entity shall build fish passage facilities or take other remedial measures.

Article 23 Where a collective-owned entity or individual constructs a breeding project, which is not a basic construction project, within a public-owned water area or sea beach, the construction shall be made within the area as planed by the local people's government at or above the county level.

The occasional sand and gravel extraction by a collective-owned entity or individual for profits shall be made within the area as specified by the local people's government at or above the county level.

Article 24 In an area where mangroves or coral reefs grow, it shall be prohibited to construct a coastal engineering construction project that ruins the ecosystem of mangroves or coral reefs.

Article 25 In the construction of a coastal engineering construction project, the abnormal erosion of coast shall be prevented.

It shall be prohibited to engage in the explosion, sand and gravel extraction, taking of soil or any other activity that endangers the safety of a coast protection facility within the protective bounds of the coast protection facility as provided for by the administrative authority for coast protection facilities. Without the approval of the relevant competent authority empowered by the State Council, it shall be prohibited to occupy or dismantle a coast protection facility.

Article 26 Where a coastal engineering construction project is constructed without an examined and approved environmental impact report (form), a penalty shall be imposed according to Article 79 of the Marine Environment Protection Law of the People's Republic of China.

Article 27 Where the on-site inspection by the competent environmental protection authority is refused or obstructed, or any falsehood is made at the time of inspection, the competent environmental protection authority of the people's government at or above the county level shall impose a penalty according to Article 75 of the Marine Environment Protection Law of the People's Republic of China.

Article 28 Where a coastal engineering construction project is put into production or service when its environmental protection facility is still under construction or fails to satisfy the prescribed requirements, a penalty shall be imposed according to Article 80 of the Marine Environment Protection Law of the People's Republic of China.

Article 29 Where any working staff member of the competent environmental protection

authority abuses powers, commits dereliction of duty or practices favoritism for personal gains, the employing authority or competent superior authority shall impose an administrative discipline on such a member; where a crime is constituted, such a member shall be pursued for criminal liability.

Article 30 This Regulation shall be effective as of August 1, 1990.

7. Regulations of the People's Republic of China on the Dumping of Wastes at Sea

(Promulgated by the State Council of the People's Republic of China on March 6, 1985, and revised for the first time in accordance with the Decision of the State Council on Abolishing and Amending Some Administration Regulations on January 8, 2011, and revised for the second time in accordance with the Decision of the State Council to Amend and Repeal Certain Administrative Regulations on March 1, 2017)

Article 1 These Regulations are formulated for the purpose of implementing the Marine Environmental Protection Law of the People's Republic of China and strictly controlling the dumping of wastes at sea so as to prevent pollution damage to the marine environment, maintain ecological balance, preserve marine resources and promote the marine cause.

Article 2 For the purposes of these Regulations, "dumping" means the disposal of wastes or other matter from vessels, aircraft, platforms or other vehicles at sea; the disposal of vessels, aircraft, platforms or other man-made structures at sea; the disposal at sea of wastes or other matter arising from, or related to the exploration and exploitation of sea-bed mineral resources and offshore processing related thereto.

"Dumping" does not include the discharge of wastes arising from the normal operation of vessels, aircraft, or other vehicles and facilities.

Article 3 The present Regulations shall apply to:

- (1) The dumping of wastes or other matter into the internal sea and the territorial sea, onto the continental shelf and into other sea areas under the jurisdiction of the People's Republic of China;
- (2) The wastes of loading or other matter on land or in the harbours of the People's Republic of China for the purpose of dumping;
- (3) The shipping of wastes or other matter in the internal sea, territorial sea and other sea areas under the jurisdiction of the People's Republic of China for the purpose of dumping;
- (4) The incineration & disposal of wastes or other matter in the sea areas under the jurisdiction of the People's Republic of China.

In case of wastes arising from the offshore oil exploration and exploitation, the Regulations of the People's Republic of China Concerning Environmental Protection in Offshore Oil Exploration and Exploitation shall apply.

Article 4 The competent authority in charge of the dumping of wastes at sea shall be the State Oceanic Administration of the People's Republic of China and its agencies (hereinafter referred to as the Competent Authority).

Article 5 The dumping areas at sea shall be designated by the Competent Authority, in

consultation with the departments concerned on basis of scientific, rational, safety and economical principles, subject to approval by the State Council.

Article 6 An entity which intends to dump wastes at sea shall make an application to the Competent Authority by filling in an application form for dumping wastes as required and submitting this with a test paper on the characteristics and composition of the wastes.

The Competent Authority shall examine and act on the application within two months of the receipt of the application. Permits for the dumping of wastes shall be issued to those whose applications have been approved.

No entities, ships, aircraft, platforms or other vehicles shall be allowed to dump wastes at sea without the approval of the Competent Authority in accordance with law.

Article 7 No wastes of foreign countries shall be allowed to be shipped to the sea areas under the jurisdiction of the People's Republic of China for the purpose of dumping, including the disposal of vessels, aircraft, platforms or other man-made structures at sea. The violators shall be ordered by the Competent Authority to remedy the pollution damage within a definite time, pay clean-up expenses incurred in eliminating the pollution, compensate for the losses and be liable to a fine.

The dumping of wastes which is carried out beyond the sea areas under the jurisdiction of the People's Republic of China, but which has resulted in pollution damage to the sea areas under the jurisdiction of the People's Republic of China, shall be dealt with pursuant to the provisions of Article 17 of the present Regulations.

Article 8 Any vessels or other vehicles which ship wastes through the sea areas under the jurisdiction of the People's Republic of China for the purpose of dumping shall notify the Competent Authority fifteen days before their entry into the sea areas under the jurisdiction of the People's Republic of China and at the same time report the time of their entry and their routes, as well as the names, quantities and composition of the wastes.

Article 9 Vessels and platforms of foreign nationality which intend to dump wastes or other matter arising from, or related to the exploration, exploitation and associated offshore processing of seabed mineral resources shall report to the Competent Authority for approval in accordance with the stipulated procedure.

Article 10 The permit for dumping shall clearly indicate the waste-dumping entity, term of validity, quantities and categories of the wastes, and method of dumping.

The issuance of permits shall be strictly controlled in accordance with the relevant provisions of the present Regulations. The Competent Authority may change or revoke a permit in view of the variation of the marine ecological environment and the development of science and technology.

Article 11 Wastes shall fall into three categories in accordance with factors such as toxicity, harmful substance content, impact upon the marine environment, etc. The criteria governing the classification of wastes shall be established by the Competent Authority. The Annexes to these Regulations may be amended by the Competent Authority in the light of the variation of the marine ecological environment, the development of science and technology and the

need for the preservation of marine environment.

(1) The dumping of wastes or other matter listed in Annex I shall be prohibited (See Annex I). In emergencies when their disposal on land may pose serious danger to human health, such wastes may be dumped in the designated area in a specified way after the dumping is approved by the State Oceanic Administration and an emergency permit is granted.

(2) The dumping of the wastes listed in Annex II requires a prior special permit (See Annex I).

(3) The dumping of the low-toxic and non-toxic wastes not included in Annex I and II requires a prior general permit.

Article 12 The entities which have been permitted to dump wastes at sea shall notify the Competent Authority for verification at the time of loading such wastes.

Verification shall be carried out in accordance with the items recorded in the permit. If the Competent Authority finds the wastes actually loaded do not accord with the items specified in the permit, it shall order the shipping to be stopped. In serious cases, the permit shall be suspended or withdrawn.

Article 13 The Competent Authority shall monitor and supervise the dumping of wastes at sea and, when necessary, send officials to go with the vessel. The dumping entity shall provide facilities for such officials.

Article 14 The entities which have been permitted to dump wastes at sea shall conduct the dumping in a designated area within the time limit and according to the requirements as specified in the permit, fill in the form for recording details of the dumping in good faith and then submit it to the Competent Authority in accordance with the requirement specified in the permit. Waste-dumping vessels, aircraft, platforms or other vehicles shall have distinctive marks and signals, and the details of dumping shall be recorded in the Log Book.

Article 15 Waste-dumping vessels, aircraft, platforms and other vehicles may be exempt from compensation liabilities under the circumstances specified in Article 89 and 91 of the Marine Environmental Protection Law of the People's Republic of China.

If the dumping is not carried out in the area and under the conditions specified by the permit due to urgent need to avert hazards or to save life, the dumping entity shall do its best to avoid or reduce the pollution damage arising from the dumping and report to the Competent Authority after the event as soon as possible. The dumping entity and those who benefit from the emergency aversion of hazards or life salvage shall make compensation for the pollution damage arising therefrom.

As for the pollution damage arising from the wrongful act by a third party, the dumping entity shall present conclusive evidence to the Competent Authority, which, having affirmed the evidence, shall order the third party to be liable for damages.

When the vessels, aircraft, platforms or other vehicles which sail and operate at sea have to be abandoned due to force majeure, the owners shall report to the Competent Authority and the nearby harbour superintendency administration, and shall conduct the salvage and clean-up work as soon as possible.

Article 16 The Competent Authority shall monitor the ocean dumping areas regularly, strengthen management and avoid harmful impacts upon fishery resources and other activities at sea. When a dumping area is found to be no longer suitable for further dumping, the Competent Authority may decide to have it closed.

Article 17 Those who have violated the present Regulations and thus caused pollution damage to the marine environment shall be ordered by the Competent Authority to remedy the pollution damage within a definite time, pay clean-up expenses incurred in eliminating the pollution and compensate the injured party for the losses arising therefrom, and shall be given a warning or be subject to a fine of no more than one hundred thousand yuan (RMB) in light of the seriousness of the case and the degree of the pollution damage arising therefrom.

Article 18 Any entity or individual claiming damages shall submit to the Competent Authority a statement of claims for pollution damages. The statement shall include: the time, place and area of pollution damage, and objects affected, a detailed list of losses, technical appraisal and certification by a notary public, as well as relevant original documents and photos, etc.

Article 19 Upon the completion of the operation, the entity entrusted with the task of cleaning up pollutants shall submit to the Competent Authority as soon as possible a statement of claims for clean-up expenses. The statement shall include: the time and place of the clean-up operation and the manpower, machines, tools, vessels committed, the quantities and unit prices of the materials used in the clean-up operation, the calculation methods employed, the administrative, transportation and other expenses involved in organizing such a clean-up operation, and the effects of and related information about the clean-up operation, as well as other relevant evidences and documents.

Article 20 The criteria of punishment for offences are as follows:

(1) Those who commit one of the following offences shall be given a warning or liable to a fine of no more than two thousand yuan (RMB);

a) Forgery of the waste-testing certificate;

b) Failure to fill in the form for recording the wastes dumping as specified in Article 14 of the present Regulations;

c) Failure to report in time to the Competent Authority and the harbour superintendency administration under the circumstances provided for in Article 15 of the present Regulations.

(2) Where there are obvious discrepancies between the wastes actually loaded and the items indicated in the permit, the violator in serious cases may be levied a fine of no less than two thousand yuan (RMB) and no more than five thousand yuan (RMB) in addition to the suspension and withdrawal of the permit;

(3) Those who dump wastes without notifying the Competent Authority and the harbour superintendency administration for verification in accordance with the provisions of Article 12 of the present Regulations shall be liable to a fine of no less than five thousand yuan (RMB) and no more than twenty thousand yuan (RMB);

(4) Those who commit one of the following offences shall be liable to a fine of no less than twenty thousand yuan (RMB) and no more than one hundred thousand yuan (RMB):

(a) The dumping of wastes without approval;

(b) The dumping of wastes not in accordance with the requirements and in the area as stipulated in the approval, the circumstances specified in Article 15 of the present Regulations being excepted.

Article 21 The persons directly responsible for the pollution damage or possible pollution damage to the marine environment in violation of the present Regulations shall be given a warning or liable to a fine, or both.

The persons directly responsible for heavy losses of property or causing casualties as a result of the pollution damage to the marine environment in violation of the present Regulations shall be prosecuted for their criminal responsibility by judicial organs according to law.

Article 22 In case the party concerned objects to the penalty imposed by the Competent Authority, it may initiate proceedings in the People's Court within fifteen days of the receipt of the penalty notice. If the party does not take the above action before the term expires, nor does it carry out the penalty decision, the Competent Authority shall ask the People's Court to take enforcement measures.

Article 23 Any individual who, on his own initiative, has reported on, or exposed acts in violation of the present Regulations resulting in the pollution damage to the marine environment, or actively provided evidences for such happenings, or has taken effective measures to reduce the pollution damage shall be commended or rewarded.

Article 24 These Regulations shall come into force on April 1, 1985.

ANNEX I:

SUBSTANCES THE DUMPING OF WHICH IS PROHIBITED

1. Wastes containing or ganohalogen compounds, mercury and mercury compounds, cadmium and cadmium compounds, except those which contain a mere trace of the matter listed above and can be rapidly rendered harmless in sea water;
2. High-level radioactive wastes or other high-level radioactive matter;
3. Crude oil and its wastes, refined petroleum products, petroleum distillage residues or any mixtures containing such matter;
4. Netting, ropes, plastics or other artificial synthetic materials, which may float or may remain in suspension in the sea so as to interfere seriously with navigation, fishing and other activities or endanger marine organisms;
5. Sewage sludges and dredged spoils containing matters referred to in paragraphs 1 and 2 of the present Annex.

ANNEX II:

SUBSTANCES WHICH REQUIRE A SPECIAL PERMIT FOR DUMPING

1. Wastes containing significant amounts of matters listed below:
 - (1) Arsenic and its compounds;

- (2) Lead and its compounds;
- (3) Copper and its compounds;
- (4) Zinc and its compounds;
- (5) Organosilicon compounds;
- (6) Cyanides;
- (7) Fluorides;
- (8) Beryllium, chromium, nickel, vanadium and their compounds;
- (9) Pesticides and their by-products not covered in Annex I.

with harmless substance or substances that may be rapidly rendered harmless in sea water being excepted.

2. Wastes containing low-level radioactive matter.

3. Containers, scrap metal or other bulky wastes which are likely to sink to the sea bottom and may present serious obstacles to fishing or navigation.

4. Sewage sludges and dredged spoils containing matters referred to in paragraphs 1 and 2 of the present Annex.

8. Regulation on the Prevention and Control of Vessel-induced Pollution to the Marine Environment

(Promulgated by the Order No. 561 of the State Council of the People's Republic of China on September 9, 2009; revised for the first time as per the Decision of the State Council on Appealing and Amending Some Administrative Regulations on July 18, 2013; revised for the second time as per the Decision of the State Council on Amending Some Administrative Regulations on December 7, 2013; revised for the third time as per the Decision of the State Council on Amending Some Administrative Regulations on July 29, 2014; and revised for the fourth time as per the Decision of the State Council on Amending Some Administrative Regulations on February 6, 2016; amended for the fifth time in accordance with Decision of the State Council to Amend and Repeal Certain Administrative Regulations on March 1, 2017.)

Chapter I General Provisions

Article 1 This Regulation is formulated in accordance with the Marine Environmental Protection Law of the People's Republic of China for the purpose of preventing and controlling the pollution caused by vessels and the relevant operations to the marine environment.

Article 2 This Regulation shall apply to the prevention and control of pollution caused by vessels and the relevant operations to the sea areas of the People's Republic of China.

Article 3 The prevention and control of the pollution caused by vessels and the relevant operations to the marine environment shall observe the principle of giving priority to prevention and combining prevention with control.

Article 4 The transport administrative department under the State Council shall take charge of the prevention and control of the pollution to the marine environment caused by non-

military vessels inside the harbor waters under its jurisdiction and by non-fishing vessels and non-military vessels outside the harbor waters under its jurisdiction.

The maritime administrative institutions shall, in accordance with this Regulation, be responsible for the specific supervision and administration of the prevention and control of the pollution caused by vessels and the relevant operations to the marine environment.

Article 5 The transport administrative department under the State Council shall, under the requirements for prevention and control of the pollution caused by vessels and the relevant operations to the marine environment, organize the preparation of the planning for the construction of the emergency response capacity of preventing and controlling the pollution caused by vessels and the relevant operations to the marine environment, which shall be promulgated and implemented upon approval by the State Council.

The coastal local people's governments at and above the level of cities divided into districts shall, according to the planning for the construction of the emergency response capacity of preventing and controlling the pollution caused by vessels and the relevant operations to the marine environment which is approved by the State Council and in light of the local actualities, organize the preparation of the corresponding planning for the construction of the emergency response capacity of preventing and controlling the pollution caused by vessels and the relevant operations to the marine environment.

Article 6 The transport administrative department under the State Council and the coastal local people's governments at and above the level of cities divided into districts shall establish and improve emergency response mechanisms for preventing and controlling the pollution caused to the marine environment by vessels and relevant operations, and formulate contingency plans for preventing and controlling the pollution caused to the marine environment by vessels and relevant operations.

Article 7 The maritime administrative institutions shall, jointly with the oceanic administrative departments, establish and improve the monitoring and surveillance mechanisms for the pollution caused to the marine environment by vessels and relevant operations according to the requirements for preventing and controlling the pollution caused by vessels and relevant operations to the marine environment so as to strengthen the monitoring and surveillance on the aforesaid pollution.

Article 8 The transport administrative department under the State Council and the coastal local people's governments at and above the level of cities divided into districts shall, in accordance with the planning for the construction of the emergency response capacity of preventing and controlling the pollution caused to the marine environment by vessels and relevant operations, set up professional emergency response contingents and emergency equipment bases, which shall be equipped with special facilities, equipment and instruments.

Article 9 Any entity or individual who finds that any vessel or relevant operations thereof have caused or are likely to cause pollution to the marine environment shall make a prompt report to the closest maritime administrative institution.

Chapter II General Provisions on the Prevention and Control of the Pollution Caused

by Vessels and the Relevant Operations to the Marine Environment

Article 10 The structure, equipment and instruments of a vessel shall conform to the relevant technical requirements of the state for preventing and controlling the vessel-induced pollution to the marine environment and the requirements of the international treaties concluded or acceded to by the People's Republic of China.

The vessels shall, in accordance with the laws, administrative regulations, provisions of the transport administrative department under the State Council and the requirements of the international treaties concluded or acceded to by the People's Republic of China, obtain and carry on board corresponding certificates and documents relating to the prevention and control of vessel-induced pollution to the marine environment.

Article 11 The owners, operators or managers of the vessels of Chinese registry shall, in accordance with the requirements of the transport administrative department under the State Council, establish and improve their management systems for safe operation and for the prevention and control of vessel-induced pollution.

The maritime administrative institutions shall examine the management systems for safe operation and for the prevention and control of vessel-induced pollution, and issue a certificate of compliance and a corresponding vessel safety management certificates to the vessels which have passed the examination.

Article 12 The ports, docks, loading and unloading stations and the entities engaged in building or repair of vessels shall be equipped with the pollution monitoring facilities and pollutant receiving facilities commensurate with the categories of the cargos loaded or unloaded by them, their throughput capacities or their abilities of building or repairing vessels, and shall keep these facilities in good conditions.

Article 13 The ports, docks, loading and unloading stations, and the entities engaged in the building, repair, salvaging, dismantling and other operations of vessels shall formulate management systems for safe operation and pollution prevention and control, and shall, in accordance with the relevant specifications and standards of the state for preventing and controlling the pollution caused to the marine environment by vessels and the relevant operations, be equipped with corresponding equipment and instruments for pollution prevention and control.

The ports, docks, loading and unloading stations, and the entities engaged in the building, repair, salvaging, dismantling and other operations of vessels shall, on a regular basis, check and maintain the equipment and instruments equipped for pollution prevention and control so as to ensure that the equipment and instruments for pollution prevention and control meet the requirements for the prevention and control of the pollution caused to the marine environment by vessels and the relevant operations.

Article 14 The owners, operators or managers of vessels shall formulate contingency plans for preventing and controlling the pollution caused by vessels and the relevant operations to the marine environment, and report them to the maritime administrative institutions for

approval.

The operators of ports, docks and loading and unloading stations, and the relevant operation entities shall make contingency plans for preventing and controlling the pollution caused by vessels and the relevant operations to the marine environment, and report them to the maritime safety administrations and the environmental protection administrative departments for recordation.

The vessels, ports, docks, loading and unloading stations and other relevant operation entities shall, in accordance with the contingency plans, organize drillings on a regular basis and make corresponding records.

Chapter III Discharge and Reception of Vessel Pollutants

Article 15 The vessel garbage, sewage, oily waste water, waste water containing toxic and hazardous substances, waste gas and other pollutants and ballast water discharged by vessels to the ocean within the sea areas of the People's Republic of China shall meet the requirements of the laws, administrative regulations, the international treaties concluded or acceded to by the People's Republic of China, and other relevant standards.

The pollutants which fail to meet the requirements for discharge as prescribed in the preceding paragraph shall be discharged by vessels into the receiving facilities in the ports or be received by the receiving entities of vessel pollutants.

No vessel may discharge vessel pollutants to the marine natural reserves, seashore scenic spots and historic sites, important fishing waters which are delimited pursuant to law and other sea areas which need special protection.

Article 16 The vessels shall make truthful records of the disposal of pollutants in corresponding record books.

The vessels shall keep on board the record books of vessel garbage which have been used up for two years; and shall keep on board for three years the record books of the oily waste water and waste water containing toxic and hazardous substances which have been used up.

Article 17 The receiving entities of vessel pollutants that receive vessel garbage, residual oil, oily waste water, and waste water containing toxic and hazardous substances shall develop operational plans, comply with the relevant operating rules and procedures, and take necessary anti-pollution measures. The receiving entities of vessel pollutants shall report the reception of vessel pollutants to the maritime safety administration as required.

Article 18 When receiving vessel pollutants, the receiving entities of vessel pollutants shall issue pollutant reception certificates to the vessels, which shall be signed by the both parties for confirmation and be kept for at least two years. A pollutant reception certificate shall indicate the names of both operating parties, the starting and ending time and place of operation, and the type and quantity of the pollutants, among others. The pollutant reception certificates shall be kept by the vessels in the corresponding record books.

Article 19 The receiving entities of vessel pollutants shall dispose of the received vessel pollutants in accordance with the relevant provisions of the state on the disposal of pollutants,

and file the information on reception and disposal of vessel pollutants with the maritime administrative institutions monthly for archival purposes.

Chapter IV Prevention and Control of the Pollution Caused by Vessels and the Relevant Operations

Article 20 Those engaged in the clearing and washing of vessel cabins, oil supply and acceptance, loading and unloading, barging, building and repair, salvage, dismantling, packing or filling of cargos with hazardous pollutants, pollution clean-up operations, above-water and underwater construction by using vessels and other operations shall comply with the relevant operating rules, and take necessary measures for safety and pollution prevention and control.

The personnel engaged in the operations as prescribed in the preceding paragraph shall possess relevant professional knowledge and skills of safety and pollution prevention and control.

Article 21 If a vessel fail to meet the requirements for worthiness of cargos with hazardous pollutants, it shall not carry any cargo with hazardous pollutants, and the ports and loading and unloading stations shall not carry out loading operations for the said vessel.

The directory of the cargos with hazardous pollutants shall be announced by the maritime administrative institution of the state.

Article 22 For any vessel carrying cargo with a pollution hazard to enter or exit a port, the carrier, owner of the cargo, or agent thereof shall file an application with the maritime safety administration, and the vessel may enter or exit the port or make a transit stop only after the application is approved.

Article 23 The vessels carrying cargos with hazardous pollutants shall conduct loading and unloading operations at the docks or loading and unloading stations which possess corresponding capabilities of safe loading and unloading and pollutant disposal as announced by the maritime administrative institutions.

Article 24 When delivering any cargo with hazardous pollutants to vessels for carriage, the owner of the cargo or the agent thereof shall ensure that the packaging, signs, etc. of the cargo conform to the relevant provisions on safety and pollution prevention and control, and shall accurately indicate the technical names, serial numbers, categories (nature) and quantities of the cargo, precautions, emergency response measures, etc. in the transport documents.

The cargo with hazardous pollutants of uncertain nature to be delivered by the owner or the agent thereof to vessel for carriage shall, before being delivered to vessel, be subject to hazardous assessment by the entrust the relevant technical institutions, which shall specify the nature of hazard of the cargo and the relevant requirements for safety and pollution prevention and control.

Article 25 Where any maritime administrative institution deems that any cargo with hazardous pollutants delivered to a vessel for carriage has not been declared while they should be, or what is declared is inconsistent with the actual situation, it may, in accordance

with the provisions of the transport administrative department under the State Council, open the container and inspect the cargo, etc.

When the maritime administrative institution inspects any cargo with hazardous pollutants, the owner of the cargo or the agent thereof shall be present and be responsible for moving the cargo, and removing and resealing the package of the cargo. Where the maritime administrative institution deems it necessary, it may directly inspect, re-inspect or extract samples of the cargo, and the relevant entities and individuals shall be cooperative.

Article 26 For any vessel barging bulk liquid cargo with hazardous pollutants, the carrier, the owner of the cargo or the agent thereof shall make an application to the maritime administrative institution, notify the site of operation, and submit the barging operation plan, operation procedures, measures for pollution prevention and control and other materials.

The maritime administrative institution shall, within two workdays upon acceptance of the application, make a decision on approval or disapproval. If it fails to make a decision within two workdays, the time limit may be extended for five more workdays upon approval of the person in charge of the maritime administrative institution.

Article 27 The entities that have legally obtained the qualifications for conducting vessel oil supply and acceptance operations shall file with the maritime administrative institutions. The maritime administrative institutions shall conduct supervision and inspection on the vessel oil supply and acceptance operations, and shall stop the operations of the entities which are found to fail the requirements for safety and pollution prevention and control.

Article 28 The vessel fuel supply entities shall truthfully fill in the fuel supply and acceptance documents, and provide the vessel fuel supply and acceptance documents and samples of fuel to the vessels.

The vessels and the vessel fuel supply entities shall keep the fuel supply and acceptance documents for three years and properly keep the samples of fuel for one year.

Article 29 The sites for vessel building or repair or dismantling of vessels on water shall comply with the environmental functional zoning and marine functional zoning.

Article 30 The entities engaged in dismantling vessels shall, before dismantling a vessel, dispose of the residues and wastes on the vessels, barge out the oil in the oil holds (tanks) and then clear and wash the vessel cabins, conduct an explosion test, etc.

The entities engaged in dismantling vessels shall timely clean up the sites of vessel dismantling and dispose of the pollutants generated from vessel dismantling in accordance with relevant provisions of the state.

It shall be prohibited from dismantling vessels on the beach.

Article 31 Vessels shall be prohibited from transferring hazardous wastes through the internal waters or territorial sea of the People's Republic of China.

If a vessel transfers hazardous wastes through other sea areas of the People's Republic of China, it shall obtain a written approval from the environmental protection administrative department under the State Council beforehand, navigate according to the route designated by the maritime administrative institution, and report the location of the vessel on a regular

basis.

Article 32 If a vessel dumps wastes into the sea, it shall make truthful records of the dumping, and shall, after returning to the port, submit a written report to the maritime administrative institution of the place where the port of departure is located.

Article 33 For the vessels carrying bulk liquid cargoes with hazardous pollutants and other vessels with a gross tonnage of 10,000 tons or more, the operators thereof shall, before conducting operations or entering or exiting ports, conclude an agreement on pollution clean-up operations with the entities having obtained the qualifications for pollution clean-up operations, which shall specify the rights and obligations of pollution clean-up of both parties in case of any vessel-induced pollution accident occurs.

The entities engaged in pollution clean-up operations which have concluded an agreement on pollution clean-up operations with the vessel operators shall, after occurrence of a vessel-induced pollution accident, timely conduct pollution clean-up operations under the agreement on pollution clean-up operations.

Chapter V Emergency Response of Vessel-Induced Pollution Accidents

Article 34 The term “vessel-induced pollution accidents” as mentioned in this Regulation shall refer to the pollution accidents to the marine environment caused by vessels and the relevant operations due to the leakage of oil, oily mixtures, and other toxic and hazardous substances.

Article 35 The vessel-induced pollution accidents shall be classified into the following levels:

1. extraordinarily serious vessel-induced pollution accidents, which shall refer to the vessel pollution accidents wherein the oil spilled is 1,000 tons or more, or the direct economic loss is 200 million yuan or more;
2. serious vessel-induced pollution accidents, which shall refer to the vessel pollution accidents wherein the oil spilled is more than 500 tons but less than 1,000 tons, or the direct economic loss is more than 100 million yuan but less than 200 million yuan;
3. relatively serious vessel-induced pollution accidents, which shall refer to the vessel pollution accidents wherein the oil spilled is more than 100 tons but less than 500 tons, or the direct economic loss is more than 50 million yuan but less than 100 million yuan; and
4. general vessel-induced pollution accidents, which shall refer to the vessel pollution accidents wherein the oil spilled is less than 100 tons, or the direct economic loss is less than 50 million yuan.

Article 36 Where any vessel-induced pollution accident occurs within the sea area under the jurisdiction of the People's Republic of China, or any vessel-induced pollution accident which occurs outside the sea areas of the People's Republic of China has caused or may cause pollution to the sea areas of the People's Republic of China, the vessel shall immediately start the corresponding contingency plan, take measures to control and eliminate the pollution, and report to the nearby maritime administrative institution.

Where a vessel or the relevant operation thereof is found to be likely to cause pollution to the marine environment, the vessel, dock or loading and unloading station shall immediately

take corresponding emergency response measures and report to the relevant maritime administrative institution nearby.

The maritime administrative institution that receives a report shall immediately verify the relevant circumstances, and report to the maritime administrative institution at the next higher level or the transport administrative department under the State Council, and report to the relevant coastal local people's government at and above the level of cities divided into districts at the same time.

Article 37 A report of vessel-induced pollution accident shall include the following:

1. the name, nationality, call sign or serial number of the vessel;
2. the name and address of the owner, operator or manager of the vessel;
3. the time and place of the accident and the relevant meteorological and hydrological conditions;
4. the causes of the accident or the preliminary judgment of the causes of the accident;
5. the type, quantity, loading position and other general situation of the pollutants on the vessel;
6. the degree of pollution;
7. the measures which have been taken or are to be taken for controlling and eliminating the pollution, the information on the control of the pollution and the demand for rescue; and
8. other issues that should be reported as prescribed by the transport administrative department under the State Council.

If any new circumstance occurs after the reporting of a vessel-induced pollution accident, the vessel and relevant entity shall make a supplementary report in a timely manner.

Article 38 In case any extraordinarily serious vessel-induced pollution accident occurs, the State Council shall set up or authorize the transport administrative department under the State Council to set up an accident emergency command institution.

In case any serious vessel-induced pollution accident occurs, the people's government of the relevant province, autonomous region or municipality directly under the Central Government shall, jointly with the maritime administrative institution, set up an accident emergency command institution.

In case any relatively serious vessel-induced pollution accident or general vessel pollution accident, the relevant people's government at the level of city divided into districts shall, jointly with the maritime administrative institution, set up an accident emergency command institution.

The relevant departments and entities shall, under the unified organization and command of the accident emergency command institution, conduct corresponding emergency response work in accordance with the division of work as set down in the contingency plan.

Article 39 Where a vessel is in danger of sinking due to an accident, the crew shall, before leaving the vessel, try their best to close all piping valves of the cargo holds (containers) and oil holds (tanks), and plug the vent holes of the cargo holds (containers) and oil holds (tanks). If a vessel has sunk, the owner, operator or manager of the vessel shall timely report to the

maritime administrative institution the nature, quantity, type, loading position and other information of the vessel fuel, cargos with hazardous pollutants and other pollutants, and timely take measures to eliminate the pollution.

Article 40 In the case of any vessel-induced pollution accident or the sinking of a vessel which is likely to cause pollution to the sea areas of the People's Republic of China, the coastal local people's government at or above the level of a city divided into districts and the maritime administrative institution may, in accordance with the needs of emergency response, expropriate the vessel and facilities, equipment and instruments for pollution prevention and control and other materials of the relevant entities or individuals who shall provide assistance.

The expropriated vessels and facilities, equipment and instruments for pollution prevention and control and other materials shall be returned in a timely manner after use or after the emergency response work is finished. If the vessels and facilities, equipment and instruments for pollution prevention and control and other materials are expropriated or damaged or lost in expropriation, compensation shall be made.

Article 41 In the case of any vessel-induced pollution accident, the maritime administrative institution may take necessary measures, such as clean-up, salvage, towage, pilotage and barging to reduce the pollution damage. The relevant expenses shall be paid by the vessel in question and the relevant operation entities which have caused the pollution to the marine environment.

The vessel which shall pay the expenses as prescribed in the preceding paragraph shall pay off the relevant expenses or provide corresponding financial guarantee before departure.

Article 42 The oil dispersants used for disposing vessel-induced pollution accidents shall conform to the relevant standards of the state.

Chapter VI Investigation and Handling of Vessel-Induced Pollution Accidents

Article 43 The investigation and handling of vessel-induced pollution accidents shall be conducted according to the following provisions:

1. The State Council shall organize or authorize the transport administrative department under the State Council or other departments to organize the investigation and handling of extraordinarily serious vessel-induced pollution accidents;
2. The maritime administrative institution of the state shall organize the investigation and handling of serious vessel-induced pollution accidents; and
3. The maritime administrative institutions of the places where the accidents occur shall organize the investigation and handling of relatively serious vessel-induced pollution accidents and general vessel-induced pollution accidents.

If a vessel-induced pollution accident causes any damage to the fishery, the fishery administrative departments shall participate in the investigation and handling of the accident; and if any damage is caused to the military port waters, the relevant administrative departments of the armed forces shall participate in the investigation and handling of the accidents.

Article 44 In the case of any vessel-induced pollution accident, the department organizing the investigation and handling of the accident or the maritime administrative institution shall timely, objectively and impartially conduct an investigation of the accident, inspect the scene of the accident, examine the vessel in question, inquire the relevant persons, collect evidences, and find out the causes of the accident.

Article 45 The department organizing the investigation and handling of accidents or the maritime administrative institutions may, in accordance with the needs of investigation and handling of accidents, temporarily withhold the corresponding certificates, documents and materials; and where necessary, it may prohibit the vessel from leaving the port or order the vessel to suspend navigation, reroute or stop operations, or even temporarily withhold the vessel in question.

Article 46 When a department organizing the investigation and handling of an accident or a maritime administrative institution makes investigation of an accident, the parties involved in the vessel-induced pollution accident and other relevant personnel shall truthfully report the circumstances and provide relevant materials, and shall not forge, conceal or destroy evidences or hinder the investigation and evidence collection by other means.

Article 47 A department organizing the investigation and handling of an accident or the maritime administrative institution shall, within 20 workdays from the day on which the investigation is completed, produce a Letter of Accident Determination and serve it on the parties concerned.

The Letter of Accident Determination shall bear the basic information of the accident, the cause of the accident, and the responsibilities for the accident.

Chapter VII Compensation for Damages Caused by Vessel-Induced Pollution Accidents

Article 48 The liable persons who cause pollution damage to the marine environment shall eliminate the hazard and compensate for the losses. In case the pollution damage to the marine environment is caused completely by the intentional act or negligence of a third party, the third party shall eliminate the hazard and compensate for the losses.

Article 49 Where pollution damage to the marine environment which is entirely attributable to any of the following circumstances can not be avoided despite prompt adoption of reasonable measures, the relevant parties shall be exempt from liability:

1. war;
2. irresistible natural disaster; or
3. the negligence or other wrongful act of the competent department responsible for the beacons or other navigation aids in performing their duties.

Article 50 The compensation limit for a vessel-induced pollution accident shall be governed by the provisions on the limitation of liability for maritime claims in the Maritime Code of the People's Republic of China. However, if the persistent oil substances in bulk carried by a vessel cause pollution to the sea areas of the People's Republic of China, the compensation limit shall be governed by the provisions of the relevant international treaties concluded or

acceded to by the People's Republic of China.

The term "persistent oil substances" as mentioned in the preceding paragraph shall refer to all persistent hydrocarbon mineral oil.

Article 51 The owner of a vessel navigating within the sea areas of the People's Republic of China shall, in accordance with the provisions of the transport administrative department under the State Council, buy civil liability insurance for vessel-induced oil pollution damages or obtain corresponding financial guarantee, unless it is one carrying non-oil substances with a gross tonnage of less than 1,000 tons.

The amount of civil liability insurance for the vessel-induced oil pollution damages bought or the amount of the financial guarantee obtained by the owner of a vessel shall not be less than the limit of compensation for oil pollution as prescribed in the Maritime Code of the People's Republic of China and the relevant international treaties concluded or acceded to by the People's Republic of China.

Article 52 For any vessel of Chinese registry which has bought civil liability insurance for vessel-induced oil pollution damages or has obtained financial guarantee in accordance with Article 53 of this Regulation, its owner shall apply to the maritime administrative institution of the place where the port of registry is located for a certificate of civil liability insurance for vessel-induced oil pollution damages or a certificate of financial guarantee upon strength of the certificate of registry of the vessel, the insurance contract on civil liability for vessel-induced oil pollution damages or the financial guarantee testimonials.

Article 53 In the case of a vessel-induced oil pollution accident, the necessary expenses incurred in the emergency response or pollution clean-up conducted by the relevant entities under the organization by the state shall first be compensated from the compensation for vessel-induced oil pollution damages.

Article 54 The cargo owner who receives the cargo of seaborne persistent oil substances within the waters of the People's Republic of China or the agent thereof shall pay compensation funds for vessel-induced oil pollution damages.

The specific measures for the collection, use and management of compensation funds for vessel-induced oil pollution damages shall be formulated by the financial department under the State Council jointly with the transport administrative department under the State Council. The state shall set up a management committee of the compensation funds for vessel-induced oil pollution damages to be responsible for handling compensation from the compensation funds for vessel-induced oil pollution damages and other matters. The management committee of the compensation funds for vessel-induced oil pollution damages shall be composed of the relevant administrative organs and the major owners of cargos who pay the compensation funds for vessel-induced oil pollution damages.

Article 55 For the disputes over compensation for vessel-induced pollution accidents, the parties concerned may request the maritime administrative institutions to make mediation, or apply to the arbitration institutions for arbitration, or bring a civil action to the people's court.

Chapter VIII Legal Liabilities

Article 56 Where any vessel or the relevant operation entity violates the provisions of this Regulation, the maritime administrative institution shall order it to make rectifications; if it refuses to make rectifications, the maritime administrative institution may order it to stop operations or compel it to unload the cargos, prohibit the vessel from entering or exiting the port, berthing or making a transit stop, or order the vessel to suspend navigation, reroute, leave the country, or navigate to the designated place.

Article 57 Where, in violation of this Regulation, the structure of a vessel fails to meet the relevant technical requirements of the state for prevention and control of vessel-induced pollution to the marine environment or the requirements of the relevant international treaties, the maritime administrative institution shall impose a fine of 100,000 yuan up to 300,000 yuan upon it.

Article 58 Under any of the following circumstances in violation of this Regulation, the maritime administrative institution shall impose punishment upon the violator in accordance with the relevant provisions of the Marine Environmental Protection Law of the People's Republic of China:

1. the vessel fails to obtain or fails to carry on board the certificates or documents of prevention and control of vessel-induced pollution to the marine environment;
2. the vessel, port, dock, or loading or unloading station fails to be equipped with the equipment and instruments for pollution prevention and control;
3. the vessel discharges to the sea areas any pollutant prohibited from being discharged by this Regulation;
4. the vessel fails to truthfully record the information on the disposal of pollutants;
5. the vessel discharges pollutants to the sea areas beyond the standards; or
6. the dismantling of vessels on water causes pollution damage to the marine environment.

Article 59 Where, in violation of this Regulation, any vessel fails to keep on board the records of disposal of vessel pollutants as required or the records of disposal of vessel pollutants are inconsistent with the quantity of the pollutants generated in the process of operating the vessel, the maritime administrative institution shall impose a fine of 20,000 yuan up to 100,000 yuan upon it.

Article 60 Where, in violation of this Regulation, a receiving entity of vessel pollutants that receives vessel garbage, residual oil, oily waste water, and waste water containing toxic and hazardous substances fails to prepare operational plans, comply with the relevant operating rules and procedures, or take necessary anti-pollution measures, it shall be fined not less than 10,000 yuan nor more than 50,000 yuan by the maritime safety administration; or shall be fined not less than 50,000 yuan nor more than 250,000 yuan if marine environmental pollution has been caused.

Article 61 Where, in violation of this Regulation, a receiving entity of vessel pollutants fails to report the reception of vessel pollutants to the maritime safety administration as required, fails to issue the pollutant reception certificate to the vessel as required, or fails to report the

reception and handling of vessel pollutants to the maritime safety administration for recordation as required, it shall be fined not more than 20,000 yuan by the maritime safety administration.

Article 62 Under any of the following circumstances in violation of this Regulation, the maritime administrative institution shall impose a fine of 2,000 yuan up to 10,000 yuan upon the violator:

1. The vessel fails to keep pollutant reception certificates as required;
2. the vessel fuel supply entity fails to truthfully fill out the documents of fuel supply and acceptance;
3. the vessel fuel supply entity fails to provide the documents of fuel supply and acceptance and the samples of fuel to the vessels as required; or
4. the vessel or the vessel fuel supply entity fails to keep the documents of fuel supply and acceptance and the samples of fuel as required.

Article 63 Under any of the following circumstances in violation of this Regulation, the maritime administrative institution shall impose a fine of 20,000 yuan up to 100,000 yuan upon the violator:

1. the vessel carrying any cargo with hazardous pollutants fails to meet the requirements for worthiness of cargo with hazardous pollutants;
2. the vessel carrying any cargo with hazardous pollutants fails to conduct loading and unloading operations at the docks or loading and unloading stations which possess the corresponding capabilities of safe loading and unloading and disposal of pollutants; or
3. the owner of cargo or the agent thereof fails to conduct hazard assessment on the cargo with uncertain hazardous pollutants as required.

Article 64 Where, in violation of this Regulation, any vessel, without approval of the maritime administrative institution, carries any cargo with hazardous pollutants to enter or exit any port, makes a transit stop, or conducts barging operations, the maritime administrative institution shall impose a fine of 10,000 yuan up to 50,000 yuan upon it.

Article 65 Under any of the following circumstances in violation of this Regulation, the maritime administrative institution shall impose a fine of 20,000 yuan up to 100,000 yuan upon the violator:

1. in case a vessel sinks due to an accident, the owner or operator of the vessel fails to timely report the nature, quantity, type, loading position and other information of the vessel fuel, the cargos with hazardous pollutants and other pollutants to the maritime administrative institution; or
2. in case a vessel sinks due to an accident, the owner or operator of the vessel fails to timely take measures to clean up the vessel fuel, the cargos with hazardous pollutants and other pollutants.

Article 66 Under any of the following circumstances in violation of this Regulation, the maritime administrative institution shall impose a fine of 10,000 yuan up to 50,000 yuan upon the violator:

1. the operator of a vessel carrying any bulk liquid cargo with hazardous pollutants or any other vessel with a gross tonnage of 10,000 tons or more fails to conclude an agreement on pollution clean-up operations as required; or
2. A pollution clean-up operator engages in pollution clean-up in non-compliance with the relevant technical specifications of the state.

Article 67 Where, in the case of any vessel-induced pollution accident which occurs as in violation of this Regulation, the vessel or the relevant operation entity fails to immediately start a contingency plan, the maritime administrative institution shall impose a fine of 20,000 yuan up to 100,000 yuan upon it and a fine of 10,000 yuan up to 20,000 yuan on the directly liable person in charge and other directly liable persons. If the directly liable person in charge or other directly liable persons is a member of the crew, a punishment of temporarily withholding the certificate of competency or other relevant certificates for one month to three months shall be imposed upon him concurrently.

Article 68 Where, in the case of any vessel-induced pollution accident which occurs as in violation of this Regulation, the vessel or the relevant operation entity delays or fails to report the accident, the maritime administrative institution shall impose a fine of 50,000 yuan up to 250,000 yuan upon it and a fine of 10,000 yuan up to 50,000 yuan on the directly liable person in charge and other directly liable persons. If the directly liable person in charge or other directly liable persons is a member of the crew, a punishment of temporarily withholding the certificate of competency or other relevant certificates for three months to six months shall be imposed upon him concurrently. If the vessel or the relevant operation entity conceals any truth in its report or makes a false report, the maritime administrative institution shall impose a fine of 250,000 yuan up to 500,000 yuan upon it and a fine of 50,000 yuan up to 100,000 yuan on the directly liable person in charge and other directly liable persons. If the directly liable person in charge or other directly liable persons is a member of the crew, a punishment of revoking the certificate of competency or other relevant certificates shall be imposed upon him concurrently.

Article 69 Where, in violation of this Regulation, any vessel or entity uses any oil dispersant not up to the standards required by the state, the maritime administrative institution shall impose a fine of 10,000 yuan up to 50,000 yuan upon the vessel or the entity that uses the dispersant.

Article 70 Where, in violation of this Regulation, any party to a vessel-induced pollution accident or any other relevant person fails to truthfully report the situation and provide materials to the department organizing the investigation and handling of the accident or the maritime administrative institution, or forges, conceals or destroys evidences or stands in the way of the investigation and evidence collection by any other means, the maritime administrative institution shall impose a fine of 10,000 yuan up to 50,000 yuan upon him or it.

Article 71 Where, in violation of this Regulation, the owner of a vessel falls under any of the following circumstances, the maritime administrative institution shall order the owner to

make rectifications, and may impose a fine of not more than 50,000 yuan; if the owner refuses to make rectifications, the maritime administrative institution shall impose a fine of 50,000 yuan up to 250,000 yuan:

1. the owner of the vessel navigating within the sea areas of the People's Republic of China fails to buy civil liability insurance for vessel-induced oil pollution damages or fails to obtain corresponding financial guarantee as required; or
2. the amount of civil liability insurance for the vessel-induced oil pollution damages bought or the amount of financial guarantee obtained by the owner of the vessel is less than the compensation limit for oil pollution as prescribed in the Maritime Code of the People's Republic of China and the relevant international treaties concluded or acceded to by the People's Republic of China.

Article 72 Where, as in violation of this Regulation, the cargo owner who receives the cargo of seaborne persistent oil substances within the waters of the People's Republic of China or the agent thereof fails to pay compensation funds for the vessel-induced oil pollution damages as required, the maritime administrative institution shall order it to make rectifications; if it refuses to make rectifications, the maritime administrative institution may stop the loading, unloading or barging operations of the cargo of persistent oil substances it receives within the waters of the People's Republic of China.

If the cargo owner or the agent thereof fails to pay compensation funds for vessel-induced oil pollution damages within the prescribed time limit, it shall pay a late fee of 0.05% of the outstanding amount each day from the due date of payment.

Chapter IX Supplementary Provisions

Article 73 If the international treaties concluded or acceded to by the People's Republic of China have provided for the prevention and control of the pollution caused by vessels and the relevant operations to the marine environment, such provisions shall prevail, except the provisions on which the People's Republic of China has made reservation.

Article 74 The fishery administrative departments of the people's governments at and above the county level shall be responsible for the supervision and administration of the pollution to the marine environment caused by non-military vessels inside the fishing port waters and by the fishing vessels outside the fishing port waters, be responsible for the protection of the ecological environment in the fishing waters, and be responsible for the investigation and handling of the fishery pollution accidents as prescribed in Paragraph 4 of Article 5 of the Marine Environmental Protection Law of the People's Republic of China.

Article 75 The environmental protection departments of the armed forces shall be responsible for the supervision and administration of the pollution caused by military vessels to the marine environment and the investigation and handling of the pollution accidents caused by military vessels.

Article 76 This Regulation shall come into force on March 1, 2010. The Regulation of the People's Republic of China on the Administration of Prevention of Vessel-induced Pollution to the Sea Areas promulgated by the State Council on December 29, 1983 shall be abolished

simultaneously.

9. Regulations on the prevention of environmental pollution by ship recycling

(Omitted, Chinese only)

10. Regulations of the People's Republic of China Governing Survey of Ships and Offshore Installations

(Promulgated by Decree No. 109 of the State Council on February 14, 1993)

Chapter I: General Provisions

Article 1 These Regulations are formulated to ensure that ships, offshore installations and sea-borne cargo containers shall meet the technical requirements for safe navigation and operation, to safeguard the safety of human life and property and to prevent the pollution of marine environment.

Article 2 These Regulations shall apply to:

- (1) ships registered or to be registered in the People's Republic of China (hereinafter referred to as "Chinese flag ships");
- (2) foreign flag ships applying for survey according to these regulations or other relevant provisions issued by the State;
- (3) offshore installations located or to be located in coastal waters of the People's Republic of China (hereinafter referred to as "offshore installations"); and
- (4) sea - borne cargo containers owned by an enterprise as legal person registered in the Peoples Republic of China (hereinafter referred to as "containers").

Article 3 The Register of Shipping of the People's Republic of China (hereinafter referred to as "the Register of Shipping") is the competent authority to carry out surveys of various kinds in accordance with these Regulations.

With the approval of the department in-charge of communications under the State Council, the Register of Shipping may establish ship-survey organizations in major ports and industrial areas.

With the approval of the department in-charge of communications under the State Council and of the people's governments of provinces, autonomous regions or municipalities directly under the Central Government, the departments in-charge of communications under the people's governments of provinces, autonomous regions and municipalities directly under the Central Government may establish local ship-survey organizations in ports in their respective jurisdictions.

Article 4 China Classification Society is a public organization which undertakes classification surveys, certification surveys and surveys related to notary matters of domestic and foreign ships, offshore installations and containers. The Society may conduct statutory surveys on behalf of the Register of Shipping subject to the latter's authorization.

Article 5 In conducting all surveys set forth in these Regulations the principle of safety first and quality first shall be implemented and the development and application of the latest technology shall be encouraged.

Chapter II: Survey of Ships

Article 6 Surveys of ships shall be carried out by the following organizations respectively:

- (1) ship - survey organizations established by the Register of Shipping;
 - (2) local ship- survey organizations established by the departments in charge of communications under the People's governments of provinces, autonomous regions and municipalities directly under the Central Government;
 - (3) ship-survey organizations entrusted, designated, or approved by the Register of Shipping.
- The above - mentioned organizations are hereinafter generally referred to as ship - survey organizations.

Article 7 Owners or operators of Chinese flag ships must apply to a ship - survey organization for:

- (1) construction survey for their ships that are under construction or conversion;
- (2) periodical survey for their ships that are in service;
- (3) initial survey for their foreign flag ships being transferred into Chinese nationality.

Article 8 Important equipment, parts and materials used by Chinese flag ships for safety of navigation at sea and for the prevention of pollution of marine environment shall be subject to surveys by the ship - survey organizations in accordance with the relevant provisions.

Article 9 Chinese flag ships shall be subject to tonnage measurement including gross tonnage and net tonnage measurements, as well as verification and approval of loadlines and passenger quotas by the ship - survey organizations.

Article 10 Owners or operators of foreign mobile drilling units and mobile offshore platforms engaged in offshore drilling and exploration activities in the coastal waters of China must apply to the ship - survey organizations established or designated by the Register of Shipping for:

- (1) survey prior to operation;
- (2) periodical survey during operation.

Article 11 Owners or operators of mobile offshore platforms, floating docks and other giant floating units taken in tow in the coastal waters of China must apply to the ship - survey organizations established or designated by the Register of Shipping for towage survey prior to operation.

Article 12 Owners or operators of Chinese flag ships must apply to the ship-survey organizations for casual survey under one of the following circumstances:

- (1) the seaworthiness of the ship is affected as a result of an accident;
- (2) the purpose of navigational areas of the ship has been changed from those as defined in the certificate;
- (3) the certificate issued by the ship - survey organization is no longer valid;
- (4) The survey is conducted due to the order of the department in charge of maritime safety

or environmental protection.

Owners or operators of foreign flag ships in ports of China must apply to the ship - survey organizations established or designated by the Register of Shipping for temporary survey under sub - paragraph (1) or (4) above.

Article 13 The following Chinese flag ships must apply to China Classification Society for classification survey:

- (1) international shipping service ships;
- (2) sea- going passenger vessels accommodating 100 passengers or more;
- (3) tankers over 1000 deadweight tons;
- (4) ro - ro ships, liquefied gas carriers and bulk chemical carriers;
- (5) other ships which owners or operators apply for the classification thereof.

Article 14 The Ship Survey Organization shall, according to the relevant provisions, issue a corresponding certificate to the ship which has been surveyed up to the standard.

Chapter III: Survey of Offshore Installations

Article 15 With the exception of the provisions of Article 31 of these Regulations, owners or operators of offshore installations must apply to the Ship Survey Organization established or designated by the Register of Shipping for corresponding surveys as follows:

- (1) construction survey for those when under construction or conversion;
- (2) periodical survey for those which are in service;
- (3) Temporary surveys of those whose safety functions are affected by an accident;
- (4) Temporary surveys of those which are required by the department in charge of maritime safety or environmental protection.

Article 16 The ship - survey organization shall, as stipulated, issue a certificate with respect to the offshore installation which has been surveyed up to the standard.

Chapter IV: Survey of Containers

Article 17 Owners or operators of containers must apply to the ship - survey organizations established or designated by the Register of Shipping for respective surveys as follows:

- (1) construction survey for those which are under construction;
- (2) periodical survey for those which are in service.

Article 18 The ship - survey organization shall, as stipulated, issue a certificate to the container which has been surveyed up to the standard.

Chapter V: Survey Administration

Article 19 With the exception of the provisions of Article 31 of these Regulations, the survey system and technical standards of ships, offshore installations and containers shall be formulated by the Register of Shipping, and promulgated for implementation upon the approval of the department in charge of communications under the State Council.

Article 20 Surveyors of the Ship Survey Organization shall be equipped with professional knowledge and survey skills, and shall pass the examination for the same.

Article 21 Necessary and proper facilities shall be made available to surveyors of the organizations concerned by the relevant units when surveys are carried out or technical

investigations and analyses are made by such surveyors with respect to an accident.

Article 22 The Ship Survey Organization shall levy survey fees according to the relevant provisions. The measures for levying the fees shall be formulated by the department in charge of communications under the State Council in conjunction with the department in charge of finance and the department in charge of commodity price under the State Council.

Article 23 Any party concerned who disagrees with the conclusion of the Ship Survey Organization, may appeal to a higher survey body for a resurvey of the case, and may appeal to the Register of Shipping for a further resurvey of the case, where the conclusion of the first review is still unacceptable. The final conclusion shall be made by a group of technical experts organized by the Register of Shipping after undertaking special investigations and assessments of the case.

Article 24 No unit or individual may alter or forge the certificate of survey or arbitrarily alter loadlines determined and marked by the ship - survey organization.

Article 25 The administrative measures concerning the resident representative offices to be established and surveyors assigned by foreign ship - survey organizations to work within the territory of China shall be formulated by the department in charge of communications under the State Council.

Chapter VI: Penalty Provisions

Article 26 The Register of Shipping or its entrusted survey organizations are authorized to withdraw those signed and issued certificates of survey that are altered, found with an arbitrary alteration of the loadlines or obtained through fraudulent acts. The holders of the above-mentioned certificates shall be instructed to take corrective actions and to go through all necessary procedures concerned.

Article 27 Those who forge the certificates of ship survey or arbitrarily alter the loadlines shall be subject to the penalty of criticism by the competent administrative authority through circulars or shall be imposed fines of up to five times the survey fees. If any of the acts constitutes a crime, criminal liabilities shall be investigated according to law by the judicial departments.

Article 28 Any surveyor of the Ship Survey Organization shall be given administrative disciplinary sanctions or revoked the qualification as a surveyor by his/her work unit or higher-level authority when the surveyor is found to have abused his/her power, practiced graft and embezzlement or neglected his/her duties. In serious cases where the acts constitute a crime, criminal liabilities shall be investigated according to law by the judicial department.

Chapter VII: Supplementary Provisions

Article 29 For the purposes of these Regulations:

- (1) "ship" means any displacement or non-displacement ships and craft, hydroplanes, submersibles and diving systems, and mobile drilling units;
- (2) "offshore installations" means any fixed or mobile structures and devices of various kinds above or under water, and fixed platforms;

(3) "coastal waters" means any coastal ports, internal waters, territorial waters and other waters under the jurisdiction of the People's Republic of China.

Article 30 Surveys of auxiliary fishing vessels sailing in international waters shall be conducted according to these Regulations, while survey regulations for all other fishing vessels shall be formulated separately by the department in charge of fishery under the State Council.

Article 31 Provisions on survey of petroleum and natural gas production facilities related to the offshore installations shall be formulated separately by the department in charge of petroleum in conjunction with the department in charge of communications under the State Council.

Article 32 These Regulations shall not be applicable for the following ships:

- (1) ships used for military, public security and sports purposes;
- (2) ships which are not necessary to be registered according to the Registration Regulations.

Article 33 The Ministry of Communications shall be responsible for the interpretation of these Regulations.

Article 34 These Regulations shall become effective as of the date of promulgation.

11. Regulations on the prevention and control of marine pollution caused by land-based sources

(Omitted, Chinese only)

12. Regulation on the Safety Management of Radioactive Waste

Chapter I General Provisions

Article 1 This Regulation is formulated in accordance with the Law of the People's Republic of China on the Prevention and Control of Radioactive Pollution for purposes of strengthening the safety management of radioactive waste, protecting the environment and safeguarding human health.

Article 2 The term "radioactive waste" as mentioned in this Regulation means waste containing radionuclide or contaminated with radionuclide, with the density or specific activity of radionuclide higher than the clearance level determined by the state, and is expected to be no longer used.

Article 3 This Regulation shall apply to activities such as the processing, storage and disposal of radioactive waste and the supervision and management thereof.

The term "processing" as mentioned in this Regulation means activities which change the properties, shape and volume of radioactive waste through means such as purification, concentration, solidification, compression and packaging to transport, store and dispose of radioactive waste in a safe and economical manner.

The term "storage" as mentioned in this Regulation means activities which temporarily place sources of radioactive waste and other solid radioactive waste in facilities specially

built for their maintenance.

The term “disposal” as mentioned in this Regulation means activities which ultimately place sources of radioactive waste and other solid radioactive waste in specially built facilities for no further taking back.

Article 4 The safety management of radioactive waste shall adhere to the principle of reduction, harmlessness, appropriate disposal and permanent safety.

Article 5 The environmental protection administrative department under the State Council shall be uniformly responsible for the safety supervision and administration of radioactive waste throughout the country.

The competent department of nuclear industry and other relevant departments under the State Council shall, in accordance with this Regulation and their respective duties, be responsible for the relevant administration of radioactive waste.

The environmental protection administrative departments and other relevant departments of the local people's governments at the county level and above shall, in accordance with this Regulation and their respective duties, be responsible for the relevant administration of radioactive waste within their respective administrative regions.

Article 6 The state shall subject radioactive waste to classification management.

The radioactive waste shall be divided into high-level radioactive waste, medium-level radioactive waste and low-level radioactive waste based on their characteristics and the extent of potential harm to human health and the environment.

Article 7 The processing, storage and disposal of radioactive waste shall comply with the relevant national standards for the prevention and control of radioactive contamination and the provisions of the environmental protection administrative department under the State Council.

Article 8 The environmental protection administrative department under the State Council shall, jointly with the competent department of nuclear industry and other relevant departments under the State Council, establish a national radioactive waste management information system to realize the sharing of information.

The state shall encourage and support scientific research on and the development and utilization of technology for the safety management of radioactive waste, and promote advanced radioactive waste safety management technology.

Article 9 Any entity or individual shall have the right to report violations of this Regulation to the environmental protection administrative department or any other relevant department of the people's government at the county level or above. A department receiving a report shall investigate and handle the issue in a timely manner and keep confidential the name of the informant. If the violation reported is verified to be true through investigation, the informant shall be rewarded.

Chapter II Processing and Storage of Radioactive Waste

Article 10 An entity operating nuclear facilities shall send the sources of radioactive waste which it has generated and which can not be recycled and can not be returned to the original

production entity or the exporter (hereinafter referred to as the “sources of radioactive waste”) to an entity which has obtained the corresponding license to store solid radioactive waste for centralized storage, or directly send them to an entity which has obtained the corresponding license to dispose of solid radioactive waste for disposal.

An entity operating nuclear facilities shall process the solid radioactive waste it has generated, other than the sources of radioactive waste, and the liquid radioactive waste which can not be discharged through purification, and after turning the two kinds of waste into stable and standardized solid waste, store the said waste by itself, and send it in a timely manner to an entity which has obtained the corresponding license to dispose of solid radioactive waste for disposal.

Article 11 An entity utilizing nuclear technology shall process the liquid radioactive waste it has generated and which can not be discharged through purification, and turn it into solid radioactive waste.

An entity utilizing nuclear technology shall send in a timely manner the sources of radioactive waste and other solid radioactive waste it has generated to an entity which has obtained the corresponding license to store solid radioactive waste for centralized storage, or directly send them to an entity which has obtained the corresponding license to dispose of solid radioactive waste for disposal.

Article 12 An entity specializing in the storage of solid radioactive waste shall meet the following conditions and apply for a license for the storage of solid radioactive waste in accordance with this Regulation:

- (1) have a corporate status;
- (2) have an organization that can guarantee the safe operation of the storage facilities and more than three professional technical personnel for radioactive waste management, radioprotection and environmental monitoring, and among them, there shall be at least one registered nuclear safety engineer;
- (3) have facilities and places to receive and store solid radioactive waste which meet the relevant national standards for the prevention and control of radioactive contamination and the provisions of the environmental protection administrative department under the State Council, and have equipment for the radiation detection, radiation protection and environmental monitoring; and
- (4) have a sound management system and quality assurance system that meets the requirements of nuclear safety supervision and administration, including a quality assurance program, monitoring plans for the running of storage facilities, plans for radiation environmental monitoring, contingency plans, and so forth.

Where an entity operating nuclear facilities uses the storage facilities constructed to support nuclear facilities to store the solid radioactive waste it has generated, it is not required to apply for a storage license. In the case of storing solid radioactive waste generated by another entity, it shall apply for a storage license in accordance with this Regulation.

Article 13 To apply for a license for the storage of solid radioactive waste, an entity shall file

a written application with the environmental protection administrative department under the State Council, and submit certification materials meeting the conditions as prescribed by Article 12 of this Regulation.

The environmental protection administrative department under the State Council shall, within 20 workdays upon acceptance of an application, complete examination, and issue a license and make an announcement if the applicant meets the conditions; and if the applicant fails to meet the conditions, notify the applicant in writing and give reasons.

During the process of examination, the environmental protection administrative department under the State Council shall organize experts to conduct technical appraisal, and solicit the opinions of other relevant departments under the State Council. The time needed for technical appraisal shall be communicated to the applicant in writing.

Article 14 A license for the storage of solid radioactive waste shall include the following:

- (1) the name, address and legal representative of the entity;
- (2) permitted types, scope and scale of activities;
- (3) validity period; and
- (4) the issuing authority, issuance date and serial number of the license.

Article 15 Where an entity storing solid radioactive waste modifies its name, address or legal representative, it shall, within 20 days from the date of registration of the modification, apply to the environmental protection administrative department under the State Council for handling the formalities for the modification of the license.

Where an entity storing solid radioactive waste needs to modify the types, scope and scale of activities as stipulated in the license, it shall, according to the original application procedures, apply to the environmental protection administrative department under the State Council for a new license.

Article 16 A license for the storage of solid radioactive waste shall be valid for 10 years.

Upon the expiration of the validity period of the license, where an entity storing solid radioactive waste needs to continue engaging in storage activities, it shall, 90 days before the expiration of the validity period of the license, apply to the environmental protection administrative department under the State Council for renewal.

The environmental protection administrative department under the State Council shall, before the expiration of the validity period of the license, complete examination, approve renewal if the applicant meets the conditions; and if the applicant fails to meet the conditions, notify the applicant in writing and give reasons.

Article 17 An entity storing solid radioactive waste shall, in accordance with the relevant national standards for the prevention and control of radioactive contamination and the provisions of the environmental protection administrative department under the State Council, store and clear up the sources of radioactive waste and other solid radioactive waste it receives in categories, clear them in a timely manner or send them to an entity which has obtained the corresponding license to dispose of solid radioactive waste for disposal.

An entity storing solid radioactive waste shall establish files on the storage of solid

radioactive waste to truthfully and completely record the issues relevant to storage activities, including the sources, quantity, characteristics, storage location, clearance, and delivery for disposal of the solid radioactive waste the entity stores.

An entity storing solid radioactive waste shall, according to the natural environment of storage facilities and the characteristics of the solid radioactive waste, take necessary protective measures to ensure the integrity of storage facilities and containers and the security of solid radioactive waste during the prescribed storage period, and ensure that the solid radioactive waste can be taken back safely.

Article 18 An entity storing solid radioactive waste shall, according to the monitoring plan for the running of storage facilities and the plan for radiation environmental monitoring, conduct safety inspection of storage facilities, and conduct radiation monitoring of the groundwater, surface water, soil and air surrounding the storage facilities.

An entity storing solid radioactive waste shall truthfully record the monitoring data, and if it discovers any hidden safety danger or that the radionuclide in the surrounding environment exceeds the national standards, it shall immediately identify the reasons, take appropriate preventive measures, and report to the environmental protection administrative department of the people's government of the province, autonomous region or municipality directly under the Central Government of the place where it is located. If a radiation accident is constituted, the entity shall immediately start its emergency plan, make a report and carry out the relevant emergency response according to the Law of the People's Republic of China on the Prevention and Control of Radioactive Pollution and the Regulation on the Safety and Protection of Radioisotopes and Radiation Devices.

Article 19 When sending sources of radioactive waste and other solid radioactive waste to an entity storing or disposing of solid radioactive waste for storage or disposal, the sender shall provide the types, quantity, activity and other information on the solid radioactive waste as well as the original files of sources of radioactive waste, and bear the expenses for storage or disposal according to the relevant provisions.

Chapter III Disposal of Radioactive Waste

Article 20 The competent department of nuclear industry under the State Council shall, jointly with the environmental protection administrative department under the State Council, compile a plan for selection of disposal sites of solid radioactive waste according to the geological, environmental and socioeconomic conditions and the needs for the disposal of solid radioactive waste and on the basis of soliciting the opinions of the relevant departments under the State Council and carrying out environmental impact assessment, and implement the plan after it is approved by the State Council.

The relevant local people's governments shall, according to the plan for selection of disposal sites of solid radioactive waste, provide construction land for the disposal sites of solid radioactive waste and take effective measures to support the disposal of solid radioactive waste.

Article 21 The disposal facilities of solid radioactive waste to be constructed shall keep a

strict security protective distance from residential areas, water source protection areas, arterial roads, factories, enterprises and other places in accordance with the requirements of technical guidelines and standards for the selection of disposal sites of solid radioactive waste, and full research and demonstration shall be conducted on the natural condition of the sites such as geological structure and hydrogeology, and socioeconomic conditions.

Article 22 The construction of the disposal facilities for solid radioactive waste shall meet the plan for selection of disposal sites of solid radioactive waste, and the approval formalities for site selection and a construction permit shall be handled in accordance with law. If the plan for site selection or the technical guidelines or standards for site selection are not met, the site selection or the construction shall not be approved.

The engineering and safety technology research, underground experiments, site selection and construction of deep geological disposal facilities for high-level solid radioactive waste and α solid radioactive waste shall be organized by the competent department of nuclear industry under the State Council.

Article 23 An entity specializing in the disposal of solid radioactive waste shall meet the following conditions and shall apply for a license for the disposal of solid radioactive waste in accordance with this Regulation:

- (1) have a state-owned or state-holding corporate status;
- (2) have the organization and professional and technical personnel that can ensure the safe operation of disposal facilities. An entity disposing of low- and medium-level solid radioactive waste shall have more than 10 professional and technical personnel in terms of radioactive waste management, radiation protection and environmental monitoring, among them, there shall be at least three registered nuclear safety engineers. An entity disposing of high-level solid radioactive waste and α solid radioactive waste shall have more than 20 professional and technical personnel in terms of radioactive waste management, radiation protection and environmental monitoring, among them, there shall be at least 5 registered nuclear safety engineers;
- (3) have facilities and places for receiving and disposing of solid radioactive waste and equipment for radiation detection, radiation protection and environmental monitoring which meet the relevant national standards for the prevention and control of radioactive contamination and the provisions of the environmental protection administrative department under the State Council. The disposal facilities of low- and medium-level solid radioactive waste shall meet the requirements of safety isolation for more than 300 years after closure, and the deep geological disposal facilities of high-level solid radioactive waste and α solid radioactive waste shall meet the requirements of safety isolation for more than 10,000 years after closure;
- (4) have corresponding amount of registered capital. The registered capital of an entity disposing of low- and medium-level solid radioactive waste shall be not less than 30 million yuan, and the registered capital of an entity disposing of high-level solid radioactive waste and α solid radioactive waste shall be not less than 100 million yuan;

(5) have a financial guarantee ensuring that disposal activities can proceed continuously until the expiration of the safety monitoring period; and

(6) have a sound management system and a quality assurance system meeting the requirements of nuclear safety supervision and administration, including a quality assurance program, monitoring plans for the running of disposal facilities, plans for radiation environmental monitoring, contingency plans, and so forth.

Article 24 The examination and approval authority and procedures for the application, modification and renewal of the license for the disposal of solid radioactive waste and the contents and validity period of the license shall be governed by Article 13 to Article 16 of this Regulation.

Article 25 An entity disposing of solid radioactive waste shall, according to the relevant national standards for the prevention and control of radioactive contamination and the provisions of the environmental protection administrative department under the State Council, dispose of the solid radioactive waste it receives.

An entity disposing of solid radioactive waste shall establish files on disposal of solid radioactive waste to truthfully record the issues relevant to the disposal activities such as the sources, quantity, characteristics, and location of storage of solid radioactive waste it has disposed of. The files on disposal of solid radioactive waste shall be kept permanently.

Article 26 An entity disposing of solid radioactive waste shall, according to the monitoring plan for the running of disposal facilities and the plan for radiation environmental monitoring, conduct safety inspection of disposal facilities, and conduct radiation monitoring on the groundwater, surface water, soil and air surrounding the disposal facilities.

An entity disposing of solid radioactive waste shall truthfully record the monitoring data, and if it discovers any hidden safety danger or that the radionuclide in the surrounding environment exceeds the national standards, it shall immediately identify the reasons, take appropriate preventive measures, and report to the environmental protection administrative department and the competent department of nuclear industry under the State Council. If a radiation accident is constituted, it shall immediately start its contingency plan, and make a report and carry out the relevant emergency response according to the Law of the People's Republic of China on the Prevention and Control of Radioactive Pollution and the Regulation on the Safety and Protection of Radioisotopes and Radiation Devices.

Article 27 Where the designated service period of the disposal facilities of solid radioactive waste has expired, or the disposed solid radioactive waste has reached the designated capacity of the facilities, or the geological structures or hydrogeological conditions of the area where the facilities are located have changed significantly, rendering the disposal facilities not suitable for continuous disposal of solid radioactive waste, the closure formalities shall be handled in accordance with law, and permanent markers shall be set up in the designated area.

To close the disposal facilities of solid radioactive waste, the disposal entity shall formulate a safety monitoring plan for disposal facilities and report it to the environmental protection

administrative department under the State Council for approval.

After the disposal facilities of solid radioactive waste are closed according to law, the disposal entity shall, under the approved safety monitoring plan, conduct safety monitoring on the closed disposal facilities. Where an entity disposing of solid radioactive waste is terminated due to bankruptcy, revocation of license or any other reason, the expenses needed for the closure and safety monitoring of disposal facilities shall be borne by the entity providing financial guarantee.

Chapter IV Supervision and Administration

Article 28 The environmental protection administrative departments and other relevant departments under the people's governments at the county level and above shall, in accordance with the Law of the People's Republic of China on the Prevention and Control of Radioactive Pollution and this Regulation, conduct supervision and inspection on the safety of the activities such as the processing, storage and disposal of radioactive waste.

Article 29 When carrying out supervision and inspection, the environmental protection administrative departments and other relevant departments under the people's governments at the county level and above shall have the authority to take the following measures:

- (1) inquire of the legal representative and other relevant persons of the entity under inspection about the relevant information;
- (2) enter the entity under inspection to conduct on-site monitoring, inspection or check;
- (3) consult or make copies of relevant documents, records and other relevant information; and
- (4) require the entity under inspection to submit a relevant explanation of the situation or a follow-up handling report.

The entity under inspection shall provide cooperation, truthfully report the situation, provide necessary information and shall not refuse or obstruct inspection.

The supervision and inspection personnel of the environmental protection administrative departments and other relevant departments of the people's governments at the county level and above shall produce their certificates when carrying out supervision and inspection, and keep confidential the technical and business secrets of the entities under inspection.

Article 30 Entities operating nuclear facilities or utilizing nuclear technology and entities storing or disposing of solid radioactive waste shall, according to the extent of harm of radioactive waste, establish and improve the corresponding level of security protection systems, take appropriate technical preventive measures and personnel preventive measures, and carry out emergency drills for radioactive waste pollution accidents at the appropriate times.

Article 31 Entities operating nuclear facilities or utilizing nuclear technology and entities storing or disposing of solid radioactive waste shall provide training on nuclear and radiation safety knowledge and professional operating techniques to staff members who are directly engaged in the processing, storage or disposal of radioactive waste, and conduct assessment. Only those who pass the assessment may engage in the aforesaid work.

Article 32 Entities operating nuclear facilities or utilizing nuclear technology and entities storing solid radioactive waste shall, in accordance with the requirements of the environmental protection administrative department under the State Council, truthfully report the information including the generation, discharge, processing, storage, clearance and delivery for the disposal of radioactive waste on a regular basis.

An entity disposing of solid radioactive waste shall, prior to March 31 of each year, truthfully report the information including the receipt and disposal of solid radioactive waste and the operation of facilities in the last year to the environmental protection administrative department and the competent department of nuclear industry under the State Council.

Article 33 Sources of radioactive waste and other solid radioactive waste shall be prohibited from being sent to an entity without the corresponding license for storage or disposal or from being disposed of without authorization.

It is prohibited to engage in the storage or disposal of solid radioactive waste without a license or not in accordance with the types, scope, scale and term of activities as stipulated in the license.

Article 34 The import of radioactive waste and radiation-contaminated goods into the territory of the People's Republic of China or the transfer of them through the territory of the People's Republic of China shall be prohibited. The specific measures shall be formulated by the environmental protection administrative department under the State Council jointly with the competent commerce department under the State Council, the General Administration of Customs, and the competent department of entry-exit inspection and quarantine of the state.

Chapter V Legal Liability

Article 35 Where any department bearing the duties of radioactive waste safety supervision and administration and its staff members, in violation of this Regulation, commit any of the following acts, the directly responsible persons in charge and other directly liable persons shall be subject to disciplinary action. The directly responsible persons in charge and other directly liable persons shall be subject to criminal liability according to law if they commit a crime:

- (1) issuing a license for the storage or disposal of solid radioactive waste in violation of this Regulation;
- (2) approving the selection of a site or the construction of disposal facilities which do not meet the site selection plan or the technical guidelines or standards for site selection in violation of this Regulation;
- (3) failing to investigate and punish the violations of this Regulation that they discover;
- (4) asking for or accepting the property of others or seeking other benefits during the process of handling the license for the storage or disposal of solid radioactive waste and carrying out supervision and inspection; or
- (5) any other act of conducting malfeasance for personal gain, abusing power or neglecting duties.

Article 36 Where any entity operating nuclear facilities or utilizing nuclear technology, in

violation of this Regulation, commits any of the following acts, the environmental protection administrative department that examined and approved the project environmental impact assessment document of this entity shall order it to cease the illegal act and make rectifications within a prescribed time limit; and if it fails to make rectifications within the prescribed time limit, designate an entity that has obtained the corresponding license to store or dispose of the radioactive waste on its behalf, and the necessary expenses shall be borne by the entity operating nuclear facilities or utilizing nuclear technology, and a fine of not more than 200,000 yuan may be imposed upon it. If a crime is constituted, the criminal liability shall be pursued according to law:

(1) the entity operating nuclear facilities fails to send the sources of radioactive waste it has generated for storage or disposal or fails to send other solid radioactive waste it has generated for disposal according to the relevant provisions; or

(2) the entity utilizing nuclear technology fails to send the sources of radioactive waste or other solid radioactive waste it has generated for storage or disposal according to the relevant provisions.

Article 37 Where any entity, in violation of this Regulation, commits any of the following acts, the environmental protection administrative department of the people's government at the county level or above shall order it to cease the illegal act and make rectifications within a prescribed time limit, and impose a fine of not less than 100,000 yuan but not more than 200,000 yuan; and if any environmental pollution is caused, order it to take control measures to eliminate the pollution within a prescribed time limit, and if it does not take control measures within the prescribed time limit and still fails to do so after being urged, the environmental protection administrative department may designate an entity with the ability to control pollution to take control measures on its behalf, and the necessary expenses shall be borne by the entity in violation. If any crime is constituted, the criminal liability shall be pursued according to law:

(1) an entity operating nuclear facilities sends sources of radioactive waste to an entity without corresponding license for storage or disposal, or sends other solid radioactive waste to an entity without a corresponding license for disposal, or disposes of them without authorization;

(2) an entity utilizing nuclear technology sends sources of radioactive waste or other solid radioactive waste to an entity without a corresponding license for storage or disposal or disposes of them without authorization; or

(3) an entity storing solid radioactive waste sends sources of radioactive waste or other solid radioactive waste to an entity without a corresponding license for disposal, or disposes of them without authorization.

Article 38 Where any entity, in violation of this Regulation, commits any of the following acts, the environmental protection administrative department of the people's government at the provincial level or above shall order it to suspend production and business or revoke its license, and if there is any illegal income, confiscate the illegal income, and if the illegal

income is more than 100,000 yuan, impose a fine of not less than one time but not more than five times the illegal income, and if there is no illegal income or the illegal income is less than 100,000 yuan, impose a fine of not less than 50,000 yuan but not more than 100,000 yuan. If environmental pollution is caused, the environmental protection administrative department shall order it to take control measures to eliminate the pollution within a prescribed time limit, and if it does not take control measures within the prescribed time limit and still fails to do so after being urged, the department may designate an entity with the ability to control pollution to take control measures on its behalf, and the necessary expenses shall be borne by the entity in violation. If any crime is constituted, the criminal liability shall be pursued according to law:

- (1) engaging in the storage or disposal of sources of radioactive waste or other solid radioactive waste without permission;
- (2) an entity storing or disposing of solid radioactive waste fails to carry out the storage or disposal of sources of radioactive waste or other solid radioactive waste in accordance with the types, scope, scale or term of activities as stipulated in the license; or
- (3) an entity storing or disposing of solid radioactive waste fails to store or dispose of sources of radioactive waste or other solid radioactive waste in accordance with the relevant national standards for the prevention and control of radioactive pollution and contamination and the provisions of the environmental protection administrative department under the State Council.

Article 39 Where an entity storing or disposing of solid radioactive waste fails to establish files for recording the relevant situation in accordance with the relevant provisions or fails to truthfully record the relevant situation in accordance with the relevant provisions, the environmental protection administrative department of the people's government at the provincial level or above shall order it to make rectifications within a prescribed time limit, and impose a fine of not less than 10,000 yuan but not more than 50,000 yuan; and if it fails to make rectifications within the prescribed time limit, impose a fine of not less than 50,000 yuan but not more than 100,000 yuan.

Article 40 Where an entity operating nuclear facilities or utilizing nuclear technology or an entity storing or disposing of solid radioactive waste fails to truthfully report relevant situations in accordance with Article 32 of this Regulation, the environmental protection administrative department of the people's government at the county level or above shall order it to make rectifications within a prescribed time limit, and impose a fine of not less than 10,000 yuan but not more than 50,000 yuan; and if it fails to make rectifications within the prescribed time limit, impose a fine of not less than 50,000 yuan but not more than 100,000 yuan.

Article 41 Where any entity, in violation of this Regulation, refuses or obstructs the supervision and inspection conducted by the environmental protection administrative department or any other relevant department, or practices frauds when undergoing supervision and inspection, the supervision and inspection department shall order it to make

rectifications and impose a fine of not more than 20,000 yuan. If any violation of public security administration is constituted, the public security organ shall impose a public security administration punishment in accordance with law; and if a crime is constituted, the criminal liability shall be pursued.

Article 42 Where an entity operating nuclear facilities or utilizing nuclear technology or an entity storing or disposing of solid radioactive waste fails to give technical training and assessment to relevant staff members in accordance with relevant provisions, the environmental protection administrative department of the people's government at the county level or above shall order it to make rectifications within a prescribed time limit, and impose a fine of not less than 10,000 yuan but not more than 50,000 yuan; and if it fails to make rectifications within the prescribed time limit, impose a fine of not less than 50,000 yuan but not more than 100,000 yuan.

Article 43 Where any entity, in violation of this Regulation, imports radioactive waste or radiation-contaminated goods into the territory of the People's Republic of China or transfers them through the territory of the People's Republic of China, the customs office shall order it to return the radioactive waste or radiation-contaminated goods, and impose a fine of not less than 500,000 yuan but not more than 1 million yuan. If a crime is constituted, the criminal liability shall be pursued according to law.

Chapter VI Supplementary Provisions

Article 44 Safety management of radioactive waste generated by military facilities and equipment shall be governed by Article 60 of the Law of the People's Republic of China on the Prevention and Control of Radioactive Pollution.

Article 45 Safety management of the transportation of radioactive waste, emergency handling of pollution accidents caused by radioactive waste and the prevention and treatment of occupational diseases contracted by employees due to their exposure to radioactive waste in occupational activities shall be governed by the relevant laws and administrative regulations.

Article 46 This Regulation shall come into force on March 1, 2012.

13. Regulations of the People's Republic of China on the Protection of Aquatic Wild Animals

(Approved by the State Council on September 17, 1993 and issued by Order No. 1 of the Ministry of Agriculture on October 5, 1993; revised for the first time in accordance with the Decision of the State Council on Abolishing and Amending Some Administrative Regulations on January 8, 2011; amended for the second time in accordance with the Decision of the State Council on Amending Some Administrative Regulations on December 7, 2013)

Chapter I General Provisions

Article 1 In accordance with the provisions of the Law of the People's Republic of China on the Protection of Wild Animals (hereinafter referred to as the "Law on the Protection of Wild Animals"), these Regulations are developed.

Article 2 For the purpose of these Regulations, aquatic wild animals are rare and endangered aquatic wild animals; and products of aquatic wild animals are any part of aquatic wild animals and their derivatives.

Article 3 Fishery administrative departments under the State Council shall take charge of the administration of national aquatic wild animals.

A fishery administrative department of a local people's government at or above the county level shall take charge of the administration of aquatic wild animals within its administrative region.

The administrative penalty powers of fishery administrative departments as specified in the Law on the Protection of Wild Animals and these Regulations may be exercised by their subordinate fishery supervision and administration institutions.

Article 4 People's governments at or above the county level and their competent departments shall encourage and support scientific research entities and teaching entities to carry out scientific research in aquatic wild animals.

Article 5 Fishery administrative departments and their subordinate fishery supervision and administration institutions shall be entitled to supervise the implementation of the Law on the Protection of Wild Animals and these Regulations, and the inspected entities and individuals shall cooperate therewith.

Chapter II Protection of Aquatic Wild Animals

Article 6 Fishery administrative departments under the State Council and fishery administrative departments under people's governments of all provinces, autonomous regions, and municipalities directly under the Central Government shall regularly organize investigation of aquatic wild animal resources and create files of resources, to provide basis for the development of development plans for aquatic wild animal resources, and development of and adjustment to the directories of aquatic wild animals under State and local priority protection.

Article 7 Fishery administrative departments shall organize various social forces, take effective measures, maintain and improve the living environment of aquatic wild animals, and protect and propagate aquatic wild animal resources.

No entity or individual shall be allowed to damage the waters, places, and living conditions where aquatic wild animals under State priority protection and local priority protection live and breed.

Article 8 All entities and individuals shall be entitled to inform the local fishery administrative departments or their subordinate fishery supervision and administration institutions of or file charges against seizure or damage of aquatic wild animal resources.

Article 9 Any entity or individual that finds any aquatic wild animal that is wounded, gets stranded, or accidentally enters the harbor or the branch of a river and thus land itself in difficulty, shall report the local fishery administrative department or their subordinate fishery supervision and administration institution in a timely manner, and the said department or institution shall take emergency rescue measures; and may require a nearby entity which is

capable of rendering rescue to take emergency rescue measures and report to the fishery administrative department. Aquatic wild animals that have died shall be appropriately handled by fishery administrative departments.

Aquatic wild animals accidentally captured shall be released immediately and unconditionally.

Article 10 Those who suffer losses resulting from protection of aquatic wild animals under State priority protection and local priority protection may require fishery administrative departments of local people's governments to make compensation. Those who have been verified to need compensation through investigation shall be compensated by local people's governments according to relevant provisions of the people's governments of all provinces, autonomous regions, and municipalities directly under the Central Government.

Article 11 Fishery administrative departments under the State Council and people's governments of all provinces, autonomous regions, and municipalities directly under the Central Government shall prescribe natural reserves of aquatic wild animals in regions or waters where aquatic wild animals under State priority protection and local priority protection live and breed, and strengthen the protection administration of aquatic wild animals under State and local priority protection and their living environment. Specific measures shall be otherwise prescribed by the State Council.

Chapter III Administration of Aquatic Wild Animals

Article 12 It is prohibited to capture or murder any aquatic wild animal under State priority protection.

Under any of the following circumstances, anyone who indeed needs to capture aquatic wild animals under State priority protection shall apply for a special permit to capture:

- (1) Where an aquatic wild animal has to be captured for the purpose of scientific exploration and survey of resources.
- (2) Where the origin of an aquatic wild animal has to be obtained from natural waters or places for the purpose of domestication and breeding of an aquatic wild animal under State priority protection.
- (3) Where an aquatic wild animal under State priority protection has to be obtained from natural waters or places for the purpose of undertaking scientific research projects above the provincial level or tasks of medicine production of the State.
- (4) Where an aquatic wild animal under State priority protection has to be obtained from natural waters or places for the purpose of popularization of knowledge about aquatic wild animals or for the purpose of education or exhibition.
- (5) Where an aquatic wild animal has to be captured under other special circumstances.

Article 13 Procedures for applying for a special permit to capture:

- (1) Where the capture of an aquatic wild animal under first class State protection is necessary, the application shall be made to the fishery administrative department under the State Council for a special permit to capture, and attached with the opinions of the fishery administrative department under the people's government of the province, autonomous

region or municipality directly under the Central Government where the applicant's place of residence is located and where the capture is to be carried out.

(2) Where the capture of an aquatic wild animal under second class State protection needs to be carried out in the applicant's own province, autonomous region or municipality directly under the Central Government, the applicant shall apply to the fishery administrative department under the people's government of the province, autonomous region or municipality directly under the Central Government for a special permit to capture, and attached with the opinions of the fishery administrative department under the people's government at the county level where the applicant's residence is located.

(3) Where the capture of an aquatic wild animal under second class State protection needs to be carried out across the borders of different provinces, autonomous regions or municipalities directly under the Central Government, the applicant shall apply to the fishery administrative department under the people's government of the province, autonomous region or municipality directly under the Central Government where the capture has to be carried out for a special permit to capture, attached with the opinions of the fishery administrative department under the people's government of the province, autonomous region or municipality directly under the Central Government where the applicant's residence is located.

Any zoo applying for the capture of an aquatic wild animal under first class State protection shall have the application examined and approved by the construction administrative department under the State Council before it is submitted to the fishery administrative department under the State Council for a special permit to capture. Where the capture of an aquatic wild animal under second class State protection is to be carried out, the application shall be examined and approved by the construction administrative department under the government at the same level before it is submitted to the fishery administrative department under the people's government of the relevant province, autonomous region or municipality directly under the Central Government where the applicant's residence is located for a special permit to capture.

The department responsible for issuing the special permit to capture shall decide to approve or disapprove the application within three months of the receipt of the application.

Article 14 No special permit to capture shall be issued under any of the following circumstances:

(1) Where there are legal non-capture methods available to the applicant to obtain the species of aquatic wild animals under State priority protection or the products thereof or to fulfill the applicant's purpose.

(2) The application for capture made is not in conformity with the relevant provisions of the State, or the applicant's capture gear or capture method is inappropriate, or the season or location for capture is not suitable.

(3) The capture is not appropriate taking into consideration the situation of aquatic wild animal resources.

Article 15 An entity or individual that has obtained a special permit to capture shall observe the stipulations contained therein with respect to the species, quantity, area, time limit, gear and method of capture, in order to prevent aquatic wild animals from accidental injury and their living environment from accidental damage. After capture is completed, the entity or individual shall apply to the fishery administrative department under the people's government at the county level or its subordinate fishery supervision and administration institution for inspection in a timely manner.

The fishery administrative department under the people's government at the county level or its subordinate fishery supervision and administration institution shall conduct supervision and inspection of the capture of aquatic wild animals under State priority protection in the administrative region, and report the supervision and inspection results in a timely manner to the department that approves the capture.

Article 16 Any foreigner conducting scientific investigation, specimen collection, shooting of films, videorecording and other activities related to aquatic wild animals within the territory of China must obtain the approval of the fishery administrative department of the people's government of the province, autonomous region or municipality directly under the Central Government of the place where the aquatic wild animals under special protection by the state are located.

Article 17 Any entity or individual who domesticates and breeds aquatic wild animals under first class State protection shall have a domestication and breeding license issued by the fishery administrative department under the State Council; and any entity or individual who domesticates and breeds aquatic wild animals under second class State protection shall have a domestication and breeding license issued by the fishery administrative department under the people's government of all provinces, autonomous regions, and municipalities directly under the Central Government.

The fishery administrative department may authorize the construction administrative department at the same level to issue a domestication and breeding license if any zoo intends to domesticate and breed aquatic wild animals under State priority protection.

Article 18 It is prohibited to sell or acquire any aquatic wild animals under State priority protection or their products. Any entity or individual that needs to sell, purchase, or utilize aquatic wild animals under first class State protection or their products for the purpose of scientific research, domestication and breeding, exhibition, and other special circumstances shall submit an application to the fishery administrative department under the people's government of the province, autonomous region, and municipality directly under the Central Government, and after the aforesaid department signs its opinions, submit the application to the fishery administrative department under the State Council for approval; and any entity or individual that needs to sell, purchase, or utilize aquatic wild animals under second class State protection or their products shall submit an application to the fishery administrative department of the people's government of the province, autonomous region, and municipality directly under the Central Government, and be subject to the approval thereof.

Article 19 The fishery administrative departments and the administrative departments for industry and commerce under the people's governments at or above the county level shall establish a system of supervision and inspection for the business operation and utilization of aquatic wild animals or their products, and strengthen the supervision and administration of the business operation and utilization of aquatic wild animals or their products.

Transactions of aquatic wild animals or their products in fair markets shall be supervised and administered by the administration departments for industry and commerce and the fishery administrative departments shall offer assistance; while those deal with aquatic wild animals or their products outside fair markets shall be supervised and administered by the fishery administrative departments, the administration departments for industry and commerce, or entities authorized thereby.

Article 20 Any entity or individual that takes aquatic wild animals under State priority protection or their products outside the border of a county shall hold a special permit to capture or a domestication and breeding license, submit an application to the fishery administrative department under the people's government at the county level, and submit the application to the fishery administrative department under the people's government of the province, autonomous region, and municipality directly under the Central Government or an entity authorized thereby for approval. Any zoo that needs to transport aquatic wild animals under State priority protection for the purpose of breeding of animals shall be approved by a construction administrative department at the same level authorized by the fishery administrative department under the people's government of the province, autonomous region, and municipality directly under the Central Government for approval.

Article 21 Transport, railway, civil aviation and postal enterprises shall notify relevant competent departments of handling the aquatic wild animals or their products without legal certification of carriage, and shall not accept them for carriage, receive or send them.

Article 22 Any entity or individual that imports aquatic wild animals shall submit an application to the fishery administrative department under the people's government of the province, autonomous region, and municipality directly under the Central Government, and submit it to the fishery administrative department under the State Council for approval after scientific verification is conducted by a scientific research institution designated by a fishery administrative department under the people's government above the provincial level.

Article 23 Any import or export entity or individual exports aquatic wild animals under State priority protection or their products and imports or exports aquatic wild animals or their products whose import or export is restricted by the international conventions in which China participates shall be subject to the approval of the fishery administrative department under the people's government of the province, autonomous region, and municipality directly under the Central Government where the import or export entity or individual is located, and submit an application to the fishery administrative department under the State Council for approval. Where the import or export is made for trade purpose, the aforesaid procedures shall be undertaken by the entity which has the right to import or export goods.

Any zoo that intends to import or export aquatic wild animals described in the preceding paragraph for the purpose of mutual exchanges shall be subject to the approval and consent of the construction administrative departments under the State Council, before the application has been approved by the fishery administrative department under the State Council.

Article 24 The economic benefits derived from the exhibition of aquatic wild animals or their products and other activities shall be mainly used for the protection of aquatic wild animals.

Chapter IV Awards and Penalties

Article 25 Any entity or individual that has any of the following deeds shall be awarded by the people's government at or above the county level or by fishery administrative department thereunder:

- (1) Where outstanding contribution has been made in the survey, administration of protection, publicity and education, development and utilization of aquatic wild animal resources.
- (2) Where outstanding achievements have been made in the implementation of laws and regulations on the protection of wild animals.
- (3) Where outstanding achievements have been made in the rescue, protection, domestication and breeding of aquatic wild animals.
- (4) Where any act of violation of laws and regulations on the protection of aquatic wild animals has been stopped in a timely manner or has been honored for the prosecution thereof.
- (5) Where outstanding contribution has been made in the investigation and handling of cases of damage to aquatic wild animal resources.
- (6) Where great achievements have been made in the scientific research of aquatic wild animals or remarkable benefits have been obtained in the application and promotion of the results of scientific research.
- (7) Where any entity has been worked in grass-roots entities on the protection and maintenance of aquatic wild animals for five years or more and outstanding achievements have been made.
- (8) Where other special contribution has been made in the administration of the protection of aquatic wild animals.

Article 26 Illegal capture or killing of aquatic wild animals under State priority protection shall be subject to criminal liability in accordance with the relevant provisions of the Criminal Law; if the case is obviously not serious and the damage is minor or the circumstances of the offence are so slight that the offenders do not need to be punished, the fishery administrative department shall confiscate the capture quarries, capture gears and the illegal income obtained therefrom, and revoke the special permit to capture, besides a fine of less than ten times the value of the capture quarries or a fine of less than 10,000 yuan shall be imposed in the case of no capture quarry.

Article 27 Anyone, in violation of the provisions of the laws and regulations on the protection of aquatic wild animals, destroying the main areas where aquatic wild animals under State

priority protection or local priority protection live and breed in nature reserves, shall be imposed a fine in accordance with the provisions of Article 34 of the Law on the Protection of Wild Animals, and the fine shall be less than three times the cost for the restoration thereof.

Article 28 Where anyone in violation of the provisions of the laws and regulations on the protection of aquatic wild animals, sells, purchases, transports or carries aquatic wild animals under State priority protection or local priority protection or their products, such aquatic wild animals and products and his unlawful income obtained therefrom shall be confiscated by the administrative departments for industry and commerce or by the fishery administrative departments authorized thereby, and a fine of less than ten times the value thereof shall be imposed.

Article 29 Anyone forging, selling or transferring a domestication and breeding license shall be imposed a fine of less than 5,000 yuan in accordance with the provisions of Article 37 of the Law on the Protection of Wild Animals. Anyone forging, selling or transferring a special permit to capture or an import or export permit shall be imposed a fine of less than 50,000 yuan in accordance with the provisions of Article 37 of the Law on the Protection of Wild Animals.

Article 30 Where anyone, in violation of the provisions of the laws and regulations on the protection of aquatic wild animals, domesticates or breeds aquatic wild animals under State priority protection without domestication or breeding license or domesticates or breeds the aquatic wild animals under State priority protection beyond those specified in the domestication or breeding license, his unlawful income shall be confiscated by the fishery administrative department, and a fine of less than 3,000 yuan shall be imposed; besides, the species of aquatic wild animals may be concurrently confiscated and the domestication and breeding license may be revoked.

Article 31 Where any foreigner makes scientific investigation, collects specimens or makes films or videos of aquatic wild animals under State priority protection within the territory of China without approval, the data of survey and shooting and the specimens collected by him shall be confiscated by the fishery administrative department, and he may concurrently be imposed a fine of less than 50,000 yuan.

Article 32 Anyone who has committed any of the following acts that do not constitute a crime shall, in accordance with the provisions of the Law of the People's Republic of China on Administrative Penalties for Public Security, be punished:

(1) Refusing or impeding the fishery administration inspectors to fulfill their duty according to the law; or

(2) Stealing, robbing or intentionally damaging instruments, devices or facilities for the protection of aquatic wild animals.

Article 33 The aquatic wild animals or the products thereof confiscated in accordance with the provisions of the laws and regulations on the protection of aquatic wild animals shall be handled according to the provisions of the fishery administrative departments under the State Council.

Chapter V Supplementary Provisions

Article 34 The power to interpret these Regulations shall remain with the fishery administrative departments under the State Council.

Article 35 These Regulations shall come into force on the date of issuance.

14. Detailed Rules for the Implementation of Fisheries Law of the People's Republic of China

(Omitted, Chinese only)

15. Regulation on the Implementation of the Environmental Protection Tax Law of the People's Republic of China

Chapter I General Provisions

Article 1 This Regulation is developed in accordance with the Environmental Protection Tax Law of the People's Republic of China (hereinafter referred to as the “Environmental Protection Tax Law”).

Article 2 The specific scope of “other solid waste” as referred to in the Table of Taxable Items and Amount of Environmental Protection Tax attached to the Environmental Protection Tax Law shall be determined according to the procedures as specified in paragraph 2 of Article 6 of the Environmental Protection Tax Law.

Article 3 “Urban and rural centralized sewage treatment places” as referred to in paragraph 1 of Article 5, and item (3) of paragraph 1 of Article 12 of the Environmental Protection Tax Law means the places that provide the public with domestic sewage treatment services, excluding the places that provide sewage treatment services for enterprises, public institutions and other producers and distributors within industrial parks, development zones and other industry cluster regions, and the sewage treatment places built by enterprises, public institutions and other producers and distributors for their own use.

Article 4 The livestock and poultry farms that reach the scale standards determined by the provincial people's governments and have pollutant discharge outlets shall pay environmental protection tax according to the law. The comprehensive utilization and harmless treatment of livestock and poultry waste conducted according to the law do not fall within the scope of directly discharging pollutants to the environment, and thus shall not be subject to environmental protection tax.

Chapter II Taxation Basis

Article 5 The taxation basis for taxable solid waste shall be determined on the basis of the discharges of solid waste. The discharges of solid waste shall be the balance after deducting the storage quantity, disposal quantity, and comprehensive utilization quantity of taxable solid waste in the current period from the output of taxable solid waste in the current period.

“Storage quantity and disposal quantity of solid waste” as referred to in the preceding paragraph means the quantity of solid waste stored or disposed of at the facilities or places

that meet the national and local environmental protection standards; and the “quantity of comprehensive utilization of solid waste” means the quantity of solid waste utilized in a comprehensive manner in accordance with the requirements for the comprehensive utilization of resources of the development and reform administrative department and the industry and information technology administrative department of the State Council and the national and local environmental protection standards.

Article 6 Where a taxpayer falls under any of the following circumstances, the output of its taxable solid waste in the current period shall be taken as the discharges of solid waste:

- (1) Illegally dumping taxable solid waste.
- (2) Filing false tax returns.

Article 7 The taxable basis for taxable air pollutants and water pollutants shall be determined on the basis of the pollution equivalent converted from pollutant discharges.

Where a taxpayer falls under any of the following circumstances, the output of its taxable air pollutants and water pollutants in the current period shall be taken as the discharges of pollutants:

- (1) Failing to legally install and use automatic monitoring equipment for pollutants, or failing to interconnect automatic monitoring equipment for pollutants with the monitoring equipment of the environmental protection administrative department.
- (2) Destroying or moving or changing without authorization the automatic monitoring equipment for pollutants.
- (3) Tampering with or forging pollutant monitoring data.
- (4) Illegally discharging taxable pollutants through underground pipelines, seepage wells, seepage pits, pouring, or discharging after dilution, or by improperly operating pollution prevention and control facilities or other means.
- (5) Filing false tax returns.

Article 8 Where taxable pollutants are discharged from two or more discharge outlets, the environmental protection tax on the taxable pollutants discharged from each discharge outlet shall be calculated and collected respectively. Where a taxpayer holds a pollutant discharge license, its pollutant discharge outlets shall be determined according to those specified in the pollutant discharge license.

Article 9 Where the monitoring data obtained by a taxpayer that falls under the circumstance as specified in item (2) of Article 10 of the Environmental Protection Tax Law from monitoring pollutants on its own initiative complies with the relevant provisions and monitoring specifications of the state, such data shall be deemed as the monitoring data issued by the monitoring institution as specified in item (2) of Article 10 of the Environmental Protection Tax Law.

Chapter III Tax Reduction and Exemption

Article 10 “Concentration of the taxable air pollutants or water pollutants” as referred to in Article 13 of the Environmental Protection Tax Law means the average of the hourly average concentration of the taxable air pollutants or the average of the daily average

concentration of the taxable water pollutants automatically monitored by the automatic monitoring equipment for pollutants installed and used by a taxpayer in the current month, or the average concentration of taxable air pollutants or taxable water pollutants monitored by the monitoring institution in the current month.

Where environmental protection tax is collected at a reduced rate in accordance with the provisions of Article 13 of the Environmental Protection Tax Law, neither the hourly average concentration of the taxable air pollutants or the daily average concentration of the taxable water pollutants as specified in the preceding paragraph, nor the concentration of the taxable air pollutants or taxable water pollutants monitored each time by the monitoring institution in the current month shall exceed the pollutant discharge standard as prescribed by the state or the local area.

Article 11 Where environmental protection tax is collected at a reduced rate in accordance with the provisions of Article 13 of the Environmental Protection Tax Law, the relevant environmental protection taxes on different taxable pollutants discharged from each discharge outlet shall be calculated respectively.

Chapter IV Tax Collection Administration

Article 12 Tax authorities shall perform the duties of accepting the filing of environmental protection tax returns, comparing tax-related information and organizing the payment of relevant taxes to the state treasury, among others.

Environmental protection administrative departments shall take charge of the monitoring and administration of taxable pollutants according to the law, and develop and improve pollutant monitoring specifications.

Article 13 Local people's governments at or above the county level shall strengthen the leadership of the administration of collection of environmental protection tax, and coordinate and solve major issues arising during the administration of collection of environmental protection tax in a timely manner.

Article 14 The taxation and environmental protection administrative departments of the State Council shall develop the technical standards for tax-related information sharing platforms and the specifications for data collection, storage, transmission, inquiry and use.

Article 15 Environmental protection administrative departments shall, through tax-related information sharing platforms, submit to tax authorities the following information obtained during the supervision and administration of environmental protection:

- (1) Names and unified social credit codes of pollutant discharging entities, pollutant discharge outlets, varieties of pollutants discharged and other basic information.
- (2) Pollutant discharge data of pollutant discharging entities (including pollutant discharges, the concentrations of air pollutants and water pollutants and other data).
- (3) Violations of environmental laws by pollutant discharging entities and administrative penalties thereon.
- (4) Review opinions on the abnormal data materials on the filing of tax returns by any taxpayer or on taxpayers' failure to file tax returns within a prescribed time limit of which the

tax authorities request review.

(5) Other information that shall be submitted as decided through consultation with tax authorities.

Article 16 Tax authorities shall, through the tax-related information sharing platforms, submit the following tax-related information on environmental protection to the environmental protection administrative departments:

(1) Basic information on taxpayers.

(2) Information on filing of tax returns.

(3) Information on payment of taxes into the state treasury, amount of tax relief, taxes in arrears, and doubtful risk points, among others.

(4) Taxpayers' violations of tax laws and the imposition of administrative penalties thereon.

(5) Information on the abnormal data materials on the filing of tax returns by any taxpayer or taxpayers' failure to file tax returns within a prescribed time limit.

(6) Other information that shall be submitted as decided through consultation with environmental protection administrative departments.

Article 17 “Places of discharge of taxable pollutants” as referred to in Article 17 of the Environmental Protection Tax Law means:

(1) the places where the discharge outlets of taxable air pollutants and taxable water pollutants are located;

(2) the place where taxable solid waste is generated; and

(3) the place where taxable noise is produced.

Article 18 Where taxpayers discharge taxable pollutants across regions and tax authorities have disputes over the jurisdiction of tax collection, all parties to the disputes shall settle such disputes through consultation under the principle of being conducive to tax collection administration; and if consensus cannot be reached through consultation, relevant matters shall be reported to their common superior tax authorities for decision-making.

Article 19 Tax authorities shall identify taxpayers based on the information on the pollutant discharging entities submitted by the environmental protection administrative departments according to the law.

Where the corresponding information of a taxpayer is not included in the information on pollutant discharging entities submitted by the environmental protection administrative department, the tax authority shall identify the taxpayer when the taxpayer files environmental protection tax returns for the first time, and submit the relevant information to the environmental protection administrative department.

Article 20 Where an environmental protection administrative department finds the taxable pollutant discharge information declared by a taxpayer or the applicable pollution discharging coefficient and materials balance method is wrong, it shall be notified to the tax authority for handling.

Article 21 Where the pollutant discharge data declared by a taxpayer is inconsistent with the relevant data submitted by the environmental protection administrative department, the

taxation basis for taxable pollutants shall be determined on the basis of the data submitted by the environmental protection administrative department.

Article 22 “The data materials on the filing of tax returns by any taxpayer are abnormal” as referred to in paragraph 2 of Article 20 of the Environmental Protection Tax Law shall include but not be limited to the following circumstances:

(1) The taxable pollutant discharges declared by the taxpayer in the current period are obviously lower than those in the same period of the previous year, without a good reason

(2) The pollutant discharges of a unit product of the taxpayer are obviously lower than those of a taxpayer of the same kind, without a good reason.

Article 23 Tax authorities and environmental protection administrative departments shall provide taxpayers with guidance, training and consultation services related to the payment of environmental protection tax free of charge.

Article 24 Tax authorities shall conduct the tax inspection of environmental protection tax according to the law, and environmental protection administrative departments shall give support thereto.

Article 25 Taxpayers shall, in accordance with the relevant provisions on tax collection administration, properly keep relevant materials on the monitoring and administration of taxable pollutants.

Chapter V Supplementary Provisions

Article 26 This Regulation shall come into force on January 1, 2018. The Regulation on the Administration of Collection and Use of the Funds for Discharge of Pollutants issued by the State Council on January 2, 2003, shall be repealed concurrently.

By the Local People's Congress

16. Regulations on Marine Environmental Protection of Jiangsu Province

(Omitted, Chinese only)

17. Regulations on Administration of Sea Areas of Jiangsu Province

(Omitted, Chinese only)

18. Regulations on Marine Environmental Protection of Shandong Province

(Omitted, Chinese only)

19. Regulations on Environmental Protection of Dalian Municipality

(Omitted, Chinese only)

20. Regulations on Administration of Sea Ranches of Lianyungang Municipality

(Omitted, Chinese only)

21. Regulations on Protection of Coastal Zones of Weihai Municipality

(Omitted, Chinese only)

Chapter V Full Texts of Measures Relevant to Marine Pollution

By the administrative departments of the State Council

1. Measures for the Implementation of the Regulation of the People's Republic of China on the Administration of Environmental Protection for Offshore Oil Exploration and Exploitation

(Issued by Order No. 1 of the State Oceanic Administration on September 20, 1990, and amended in accordance with the Decision of the Ministry of Land and Resources on Amending and Repealing Some Rules (Order No. 64, Ministry of Land and Resources) issued at the first executive meeting of the Ministry of Land and Resources on January 5, 2016)

Article 1 In accordance with the provisions of Article 47 of the Marine Environment Protection Law of the People's Republic of China, these Measures are developed for the purpose of implementing the Regulation of the People's Republic of China on the Administration of Environmental Protection for Offshore Oil Exploration and Exploitation (hereinafter referred to as the “Regulation”).

Article 2 These Measures shall apply to all legal persons, natural persons and other economic entities engaging in oil exploration and exploitation in inland seas, territorial seas and other sea areas under the jurisdiction of the People's Republic of China.

Article 3 The State Oceanic Administration and its local offices are the competent departments for the implementation of these Measures. Local offices include: branches and their subordinate maritime administrations (hereinafter referred to as “competent departments of sea areas”). Marine monitoring stations shall conduct administration according to the authorization of maritime administrations.

The marine administrative organs of coastal provinces, autonomous regions and municipalities directly under the Central Government are the local administrative organs which are authorized by the competent departments to implement these Measures.

Article 4 Those engaging in offshore oil exploration and exploitation in sea areas under the jurisdiction of China shall report the positions and scope of offshore oil exploration and exploitation to the competent departments of sea areas before the operations, and,

according to the content and requirements of the Report Form for Environmental Protection for Offshore Oil Exploration and Exploitation, report the relevant information to the competent departments of sea areas.

Article 5 When offshore oil earthquake exploration operations need to be conducted by using explosive sources or other methods which may damage fishery resources, the plans and operating sea areas shall be reported to the competent departments of sea areas half a month before the operations start, and effective technological measures shall be taken to minimize the damage to or impacts on resources.

Article 6 Offshore oil exploiters shall, while preparing the overall exploitation plans for oil (gas) fields, prepare and report the marine environmental impact statements according to the content as prescribed in Article 5 of the Regulation, and submit the approved marine environmental impact statements to the competent departments of sea areas where they are located.

The operators of the oil (gas) fields under production (including trial production) shall, according to the changes in mining scale and the environmental quality conditions, supplement and improve at appropriate time the environmental impact statements, and submit them to the competent departments for examination.

Article 7 The entities that undertake environmental impact assessment must have the capabilities of engaging in marine environmental impact assessment, and hold Class-A environmental impact assessment certificates.

Article 8 The anti-pollution equipment of fixed and mobile platforms operated in the sea areas under the jurisdiction of China must meet the requirements of Article 7 of the Regulation, and may not be operated until the certificates thereof are verified by the competent departments.

Article 9 In order to prevent and control spilled oil pollution, and reduce pollution damage, the operators engaging in offshore oil exploration and exploitation shall, according to the oil field exploitation scale, and natural environment and resource status of operation waters, develop oil spill emergency plans, and submit them to the competent departments of sea areas for recordation.

Article 10 Oil spill emergency plans shall include:

1. platform operation conditions and the environment and resource status of sea areas;
2. oil spill risk analysis; and
3. oil spill emergency response capacity.

Article 11 Operators shall, according to the exploitation scale and risk analysis of oil fields, among others, be equipped with various appropriate emergency equipment, so as to enable them to be capable of dealing with the oil spill accidents commensurate with the oil field exploitation scale.

Article 12 The discharge of oily wastewater from fixed and mobile platforms and other offshore installations must comply with the relevant national standards issued by the People's Republic of China.

1. The discharge of oily wastewater from cabins, engine rooms and decks shall comply with the Standards for the Discharge of Pollutants from Vessels (GB 3552—83)
2. The discharge of oil extraction industrial wastewater shall comply with the Standards for the Discharge of Oily Wastewater of the Offshore Oil Exploitation Industry (GB 4914—85).
3. Oily wastewater shall not be diluted, or pretreated with oil dispersant injected before being discharged.
4. When the oil extraction industrial wastewater is discharged, sample testing shall be conducted in accordance with the requirements of the Methods for the Analysis of the Oily Wastewater of the Offshore Oil Exploitation Industry, and the testing results shall be recorded in the “Anti-Pollution Record Book.”

Testing and analysis instruments shall be the formal products that have passed the inspection.

Article 13 Before the oil testing in drilling operation, operators shall notify the competent departments of sea areas. During the oil testing, operators shall take effective measures to prevent oil pollution.

Article 14 When water-base mud is used, the injection of oils into water-base mud shall be avoided or reduced as far as possible. If it is necessary to inject oils, the type and quantity of oil shall be recorded in the “Anti-Pollution Record Book.” Before the discharge of oily water-base mud, the competent department of the sea area shall be notified, and the sample of oily water-base mud shall be submitted. The water-base mud whose oil content is more than 10% (in weight) is forbidden to be discharged to the sea. If it is truly difficult to recycle the water-base mud whose oil content is less than 10% (in weight), it may be discharged to the sea with the approval of the competent department of the sea area, but pollution discharge fees shall be paid.

Oily water-base mud is not allowed to be treated with oil dispersant injected before being discharged.

When oil-base mud needs to be used, low-toxicity oil-base mud shall be used; effective technical measures shall be taken to fully separate drilling cuttings from mud; oil-base mud must be recycled and may not be discharged to the sea; the drilling cuttings whose oil content exceeds 15% (in weight) are prohibited from being discharged to the sea. If it is truly difficult to recycle the drilling cuttings whose oil content is less than 15% (in weight), they may be discharged to the sea with the approval of the competent department of the sea area, but pollution discharge fees shall be paid.

The competent departments of sea areas may require operators to provide the samples of drilling mud and drilling cuttings.

Operators shall record the oil content of drilling mud and drilling cuttings, discharge time, discharge volume and other information in the “Anti-Pollution Record Book.”

Article 15 All plastic products (including but not limited to synthetic ropes, synthetic fishing nets and plastic bags) and other wastes (including residual oil, waste oil, oily wastes and their residual liquid and residues, among others) are forbidden to be discharged or discarded

to the sea), and shall be stored in special containers in a centralized manner, and shipped back to the land for disposal.

It is not allowed to incinerate toxic chemical products on platforms and other offshore facilities. The incineration of paper products, cotton-ramie fabrics or wood packaging materials on platforms shall not cause pollution to marine environment.

The particle size of the food wastes jettisoned within 12 sea miles from the nearest land shall be less than 25 mm; and feces discharged within this sea area shall be disinfected and smashed or otherwise treated.

Article 16 Operators shall take effective measures in the links of important production and oil transportation, and strictly abide by operating procedures, so as to avoid oil spill accidents. Various oil storage facilities and oil pipelines shall comply with the seepage-proof, leakage-proof and corrosion prevention requirements.

Article 17 When oil spill accidents occur, operators shall take measures as soon as possible, and cut off spill sources, so as to prevent or control the expansion of spilled oil.

Article 18 Operators shall report all oil spill accidents that occur to the competent departments of sea areas. A report shall mainly include: the time, place and cause of an accident that occurs; the nature, status and quantity of the spilled oil; responsible persons; the sea conditions at the time; measure taken; and handling results. At the same time, such content shall be recorded in the “Anti-Pollution Record Book,” and the quarterly statement C “Report Form for Offshore Oil Pollution Accidents” shall be used and submitted to the competent department of the sea area on a quarterly basis.

Article 19 When any of the following two kinds of oil spill accidents occurs, an operator shall report to the competent department of the sea area within 24 hours.

1. The platform is less than 20 sea miles away from coast, and the oil spill quantity is more than one ton.
2. The platform is more than 20 sea miles away from coast, and the oil spill quantity is more than ten tons.

When any of the following two kinds of oil spill accidents occurs, an operator shall report to the competent department of the sea area within 48 hours.

1. The platform is less than 20 sea miles away from coast, and the oil spill quantity is not more than one ton.
2. The platform is more than 20 sea miles away from coast, and the oil spill quantity is not more than ten tons.

Article 20 The spilled oil at sea surface shall be first recycled by machinery. The use of oil dispersant shall be strictly controlled, and comply with the Provisions on the Use of Chemical Oil Dispersant in Offshore Oil Exploration and Exploitation.

Article 21 After the operations of exploration and oil extraction production are completed, platform drilling rigs, derricks, well piles and other facilities shall not be discarded at will. For the platforms, derricks, well piles and other facilities related to platforms that need to be discarded to the sea, the provisions on offshore waste dumping administration shall apply.

Article 22 All platforms and facilities for operations of offshore oil exploration and exploitation and production shall be provided with “Anti-Pollution Record Book” and “Quarterly Anti-Pollution Statement,” which shall be completed as required and be reported to the competent departments of sea areas on schedule.

Where the platform operating time is less than one quarter, and no operation is to be conducted in this quarter, the operator shall report to the competent department of the sea area within 15 days after the conclusion of the platform operation.

Article 23 Where an operator discharges pollutants to the sea beyond standards, the competent department of the sea area may order it to pay pollution discharge fees. Where the discharge fails to reach the standards for a long time for equipment or technology reasons, the operator shall conduct treatment within a prescribed time limit, and be charged the fees for discharge beyond standards during the period of treatment.

Article 24 For any violation of the Marine Environment Protection Law of the People's Republic of China, the Regulation and these Measures, in accordance with the provisions of Articles 27 and 28 of the Regulation, the competent department of the sea area shall have the right to warn or fine the violator in light of the seriousness of the circumstance and the degree of the harmful impact on the marine environment.

1. Whoever fails to prepare and report a marine environment impact statement in accordance with the provisions of Article 4 of the Regulation and causes marine environmental pollution damage shall be fined 10,000 yuan up to 100,000 yuan.

2. Where an operator conducts any of the following illegal acts, it shall be fined 5,000 yuan up to 10,000 yuan.

(a) It fails to undergo the formalities for recordation of oil spill emergency plans as required.

(b) It fails to be equipped with anti-pollution facilities in accordance with the provisions of Article 7 of this Regulation or the facilities are unqualified.

(c) It fails to dispose of the wastes and oily wastewater in accordance with the provisions of Articles 12, 14 and 15 of these Measures.

3. Where an operator conducts any of the following illegal acts, it shall be fined 1,000 yuan up to 5,000 yuan.

(a) It fails to report an oil spill accident to the competent department of the sea area in accordance with the provisions of Articles 18 and 19 of these Measures.

(b) It fails to use chemical oil dispersant as required.

4. Where an operator conducts any of the following illegal acts, it shall be fined less than 1,000 yuan:

(a) It fails to be equipped with the “Anti-Pollution Record Book” as required.

(b) It alters or forges the “Anti-Pollution Record Book” or makes records in an informal manner.

(c) It fails to report or notify the relevant information as required.

(d) It fails to submit the quarterly anti-pollution statement as required or forges the quarterly anti-pollution statement.

(e) It fails to submit samples to the competent department of the sea area in accordance with the provisions of Article 14 of these Measures.

(f) It refuses to provide the “Anti-Pollution Record Book” to the public functionary implementing the inspection task or to truthfully state the relevant information.

(g) It obstructs or hinders public functionaries' performance of their duties.

Article 25 Where a party refuses to accept a punishment decision, it may apply to the authority at the next higher level over the authority that makes the punishment decision for reconsideration within 15 days from the date of receipt of the punishment notice; and if it refuses to accept the reconsideration decision, it may file a lawsuit in the people's court within 15 days from the date of receipt of the reconsideration decision. A party may also, within 15 days from the date of receipt of a punishment notice, directly file a lawsuit in a people's court. If a party neither applies for reconsideration, nor files a lawsuit in a people's court within the time limit, nor performs the punishment decision, the authority that made the punishment decision may apply to a people's court for enforcement.

Article 26 Where any violation of the Regulation and these Measures causes any heavy loss to the public or private property or any casualty, the directly liable persons shall be investigated by the judicial authority for criminal liability in accordance with the law.

Article 27 Compensation liabilities include:

1. Expenses paid by the victims for depollution and pollution treatment due to the damage to sea water quality or biological resources, among others, resulting from the marine environmental pollution damage caused by operators' behavior.

2. Amount of losses to the economic income of the victims arising from the marine environmental pollution damage caused by operators' behavior, the costs of repair and renewal of the destructed production tools, and the expenses paid by the victims for taking appropriate prevention measures for preventing pollution damage.

3. Costs of investigations conducted to handle the pollution damage accidents triggered by offshore oil exploration and exploitation.

Article 28 The entities and individuals that claim for compensation for suffering offshore oil exploration and exploitation pollution damage may, in accordance with the provisions of Article 22 of the Regulation, submit to the competent departments of sea areas the statements of claims for pollution damage. The entities and individuals participating in depollution operations may, in accordance with the provisions of Article 23 of the Regulation, submit to the competent departments of sea areas the statements of claims for depollution expenses.

The competent departments of sea areas may, at the request of the parties, mediate and settle the disputes over the compensation liabilities and the compensation amount. A party who refuses to accept the mediation and settlement may file a lawsuit in a people's court. A party may also directly file a lawsuit in a people's court. A foreign-related case may also be resolved under the arbitration procedures.

Article 29 The limitation of action for a claim for compensation shall be three years, counted

from the day the victim knows or should have known that it has suffered oil pollution damage. After the conclusion of the settlement of a dispute, the victim may not file a claim for compensation again over the same pollution accident.

Article 30 Where, due to the act of war or irresistible natural disaster, or entirely for the intentional act or fault of a third party, any marine environment pollution damage cannot be avoided even if reasonable measures have been taken in a timely manner, the operator which has an accident may be exempt from the relevant liabilities.

Where a third party is held liable for any pollution damage, the third party shall assume the compensation liabilities.

When an operator files a request for being exempt from compensation liabilities, it shall submit a report to the competent department in accordance with the provisions of Article 24 of the Regulation. After the competent department of the sea area verifies that the operator is eligible for exemption from liabilities, it may make a decision of exempting the operator from compensation liabilities.

Article 31 All entities and individuals that prevent marine pollution during offshore oil exploration and exploitation and have made achievements in protecting marine environment shall be commended and rewarded by the competent departments of sea areas.

Article 32 The following terms in these Measures shall have the following meanings:

1. "Oils" means all kinds of oil and the refined products thereof.
2. "Inland seas" means all the sea areas to the inner side of the territorial sea baseline, including: (1) bays, straits, harbors and firths; (2) the sea areas between the territorial sea baseline and the coast; (3) and the sea areas surrounded by land or in connection with the ocean through a narrow waterway.
3. "Emergency response capability" means the technical equipment and communications capabilities for oil spill emergency response, emergency organizations and their duties, implementation plans, measures for eliminating spilled oil on the sea surface, and personnel training, among others.
4. "Oil spill accidents" means the leakage of crude oil and its refined products under abnormal operating conditions. Oil spill accidents shall be classified by oil spillage into three categories, namely, large, medium and small oil spill accidents. An accident with oil spillage of less than ten tons is a small oil spill accident; an accident with the oil spillage of ten up to 100 tons is a medium oil spill accident; and an accident with the oil spillage of more than 100 tons is a large oil spill accident.

Article 33 The power to interpret these Measures shall remain with the State Oceanic Administration.

Article 34 These Measures shall come into force on the date of issuance.

Note: Before the issuance of the Methods for the Analysis of the Oily Wastewater of the Offshore Oil Exploitation Industry as prescribed in Article 12 of these Measures, the Methods for the Monitoring and Analysis of the Quality of the Wastewater of the Oil Industry shall apply temporarily.

The Provisions on the Use of Chemical Oil Dispersant in Offshore Oil Exploration and Exploitation shall be developed separately by the competent departments.

2. Interim Provisions on Administration over the Abandonment and Disposal of Offshore Oil and Gas Production Facilities

(Omitted, Chinese only)

3. Measures for the Implementation of the Regulations of the People's Republic of China on the Dumping of Wastes at Sea

(Issued through Order No. 2 of the State Oceanic Administration on September 25, 1990; and amended for the first time in accordance with the Decision of the Ministry of Land and Resources on Amending and Repealing Some Rules and Regulations at the 1st executive meeting of the Ministry of Land and Resources on January 5, 2016; and amended for the second time in accordance with the Decision of the Ministry of Land and Resources on Amending and Repealing Some Rules on December 27, 2017)

Article 1 These Measures are formulated in accordance with the provisions of Article 47 of the Marine Environment Protection Law of the People's Republic of China, for the purpose of implementing the Regulations of the People's Republic of China on the Dumping of Wastes at Sea (hereinafter referred to as the Regulations) and strengthening the administration of dumping of wastes at sea..

Article 2 These Measures shall apply to the dumping of wastes and other substances at internal sea, territorial sea, continental shelf, and all other sea areas of the People's Republic of China by legal persons, natural persons, or other economic entities.

These Measures shall also apply to the acts as prescribed in paragraphs 2, 3, and 4 of Article 3 of these Regulations and the acts of abandoning vessels, aircrafts, platforms and other means of transport for irresistible reasons.

Article 3 The State Oceanic Administration and its local offices (hereinafter referred to as “competent departments of the oceanic jurisdictions”) are the competent departments for the implementation of these Measures.

Article 4 To prevent or mitigate the pollution and damage to the marine environment by dumping of wastes at sea, the wastes and other substances dumped at sea shall be subject to necessary pretreatment in light of their poisonousness.

Article 5 Wastes may be classified to Type I, II, and III according to their nature.

Type I wastes refer to the substances listed in Annex I of these Regulations, which shall be prohibited from being dumped at sea, except when land disposal of them will seriously endanger human health, and dumping at sea is the only way to prevent the threat.

Type II wastes refer to the substances listed in Annex II of these Regulations and substances that belong to “trace amount of contamination” or are able to be “rendered harmless promptly” as listed in paragraphs 1 and 3 of Annex I.

Type III wastes refer to the substances with low toxicity and harmless substances as listed in Annexes 1 and 2 of these Regulations and substances with content of less than “significant quantity” as listed in paragraph 1 of Annex II.

Article 6 Substances not listed in Annexes 1 and 2 of these Regulations shall be subject to evaluation in advance, to confirm their types, before dumping of them at sea is confirmed to be harmless.

Article 7 Sea dumping sites are divided into type I, II, and III dumping sites, test dumping sites, and temporary dumping sites.

Type I, II, and III dumping sites are accordingly determined for the disposal of type I, II, and III wastes. Type I dumping sites are determined for emergency disposal of type I wastes.

Test dumping sites are determined for dumping tests (the using period shall not exceed 2 years).

Temporary dumping sites are one-time special dumping sites designated for project needs and other special reasons.

Article 8 The selection and demarcation of type I and II dumping sites are organized by the State Oceanic Administration.

The selection and demarcation of type III dumping sites, test dumping sites, and temporary dumping sites are organized by the competent departments of the oceanic jurisdictions.

Article 9 Type I, II, and III dumping sites shall, upon consultations with the relevant departments, be submitted by the State Oceanic Administration to the State Council for approval and be announced by the State Oceanic Administration.

Test dumping sites shall, upon consultations with the relevant entities in the oceanic jurisdictions by the competent departments of the oceanic jurisdictions (branch office level), be submitted to the State Oceanic Administration for examination and determination, and be submitted to the State Council for recordation.

Test dumping sites tested to be feasible shall, upon consultations with the relevant departments, be submitted to the State Council for approval as official dumping sites.

Temporary dumping sites shall, upon examination and approval of the competent departments of the oceanic jurisdictions (branch office level), be submitted to the State Oceanic Administration for recordation. Upon expiry of the using period, they shall be immediately closed.

Article 10 A licensing system shall be adopted for dumping of wastes at sea.

A dumping license shall specify the dumping entity, the period of validity, and the quantity, type, and dumping method of wastes, among others.

Dumping licenses may be divided into emergency license, special license, and common license.

Article 11 Wastes owners and dredging project entities that dump wastes at sea shall file applications for dumping with the competent departments in advance and handle dumping licenses.

Where a waste owner or dredging project entity has concluded a contract with the entity

carrying out the dumping operation, the entity carrying out the dumping operation may also apply to the competent authority for handling dumping license as required by the contract.

Article 12 An applicant for a dumping license shall fill out an application form for dumping wastes.

Article 13 A competent authority shall, within 2 months after receipt of an application, make a reply. Upon examination and approval, a dumping license shall be issued.

Emergency licenses shall be issued by the State Oceanic Administration or by the competent departments of the oceanic jurisdictions with approval of the State Oceanic Administration.

Special licenses and common licenses shall be issued by the competent departments of the oceanic jurisdictions.

Article 14 An emergency license shall be a single-use license.

The period of validity of a special license shall not exceed 6 months.

The period of validity of a common license shall not exceed 1 year.

A license holder that still needs to continue with dumping upon expiry of the period of validity shall handle the license replacement formalities with the competent license-issuing authority 2 months before the expiry of the period of validity.

A dumping license shall not be transferred; and a dumping license shall be returned to the license-issuing authority within 15 days after the expiry of the using period.

Article 15 An applicant for a dumping license and replacement of a dumping license shall pay fees. Specific charge items and charging standards shall be otherwise prescribed by the State Price Control Bureau and the State Oceanic Administration.

Article 16 The inspection shall be conducted by the inspection institutions authorized by the competent departments of oceanic jurisdictions according to the relevant evaluation rules.

Article 17 Type I wastes shall be prohibited from being dumped at sea. However, anyone or any entity that satisfies the conditions as prescribed in paragraph 2, Article 5 of these Measures may apply for an emergency license and dump them at designated type I dumping sites.

Article 18 Type II wastes shall be dumped at type II dumping sites upon filing an application for and obtaining a special license.

Article 19 Type III wastes shall be dumped at type III dumping sites upon filing an application for and obtaining a common license.

Article 20 Dumping of dredging materials including the substances listed in Annexes I and II of these Regulations shall be subject to management under the “Dredging Materials Classification Standards and Evaluation Procedures.”

Article 21 Disposal of vessels, aircrafts, platforms and other offshore man-made structures at sea shall be conducted with a special license issued by the competent departments of the oceanic jurisdictions and shall be handled under the provisions of license.

Article 22 After oily water and trash recycling vessels handle oily water and wastes recycled, anyone or any entity that needs to dump them at sea shall file an application with the competent authority of the oceanic jurisdiction and dump them at the designated sites after

obtaining a license.

Article 23 For dumping of military wastes at sea, the relevant departments of the army shall apply to the competent departments of the oceanic jurisdictions under the provisions of these Measures and dump military wastes as required by their licenses.

Article 24 An entity that needs to dump substances at sea for scientific research shall apply to the competent department of the oceanic jurisdiction according to the procedures under these Measures and attach the dumping test plans and the oceanic environmental impact assessment report, and the competent department of the oceanic jurisdiction shall conduct examination and approval, and issue corresponding category of licenses.

Article 25 All vessels, aircrafts, and other means of transport that carry out dumping operation shall have dumping licenses (or duplicates of licenses), and vessels, aircrafts, or other means of transport without licenses shall not conduct dumping.

Article 26 Vessels, aircrafts, and other means of transport that conducts dumping operation shall, at the time of loading wastes, notify the competent license-issuing department of verification.

Those who use vessels to carry wastes shall, before departure, notify the nearby harbor superintendency administration of verification.

Those who load and transport wastes at military harbors shall notify relevant military departments of verification.

If the actual loading is inconsistent with the contents indicated in the dumping license, substances loaded shall not be released, and the competent license-issuing department shall be promptly notified of handling.

Article 27 The information on the operation of vessels, aircrafts, and other means of transport that conduct dumping operation shall be truthfully filled out in the dumping record chart and the log book in detail, and the form for recording shall be submitted to the license-issuing department within 15 days of the return to the port.

Article 28 Vessels, aircrafts, and vehicles of “China Marine Surveillance Force” shall be responsible for the monitoring, examination, supervision and management of dumping at sea. If necessary, the oceanic inspectors may also board vessels or follow the dumping vessels or other means of transport for supervision and inspection. Vessels carrying out dumping operation (or other means of transport) shall provide convenience to inspectors for their performance of duties.

Article 29 The competent departments shall monitor sea dumping sites, close dumping sites identified to be inappropriate to be continuously used, and report them to the State Council for recordation.

The competent departments shall issue announcements to dumping entities 2 months before the dumping sites are closed, and the dumping entities shall terminate dumping at the dumping sites from the days when the dumping sites are closed.

Article 30 A dumping entity that is unable to apply for dumping according to the procedures under these Measures or is unable to carry out dumping as required by the license due to

urgent need to avert hazards or to save life shall submit a written report to the competent department of the oceanic jurisdiction within 10 days after dumping. A report shall include: the time and location of dumping, the characteristics and quantity of the substances dumped, the sea state and weather conditions at the time of dumping, the detailed process of dumping, the measures taken after dumping, and other items, among others.

For an aircraft, a written report shall be submitted to the competent department of an oceanic jurisdiction within 10 days after urgent fuel dumping, and a report shall include the nationality, the owner, device number, fuel dumping time, place, quantity, height, and the specific reasons for fuel dumping, among others, of the aircraft.

Article 31 For vessels, aircrafts, platforms and other means of transport abandoned due to force majeure, the valves and ventholes of all tanks (cabinets) shall be closed as far as possible, to prevent oil spilling. After abandoning, their owners shall, within 10 days, report to the competent departments of the oceanic jurisdictions and the nearby harbor superintendency administration, and handle them as required.

Article 32 Before abandoning vessels, aircrafts, platforms and other offshore man-made structures at sea, all oils and other harmful substances shall be discharged.

Article 33 Any entity that needs to set up offshore incineration facilities shall apply to the competent department of the oceanic jurisdiction in advance, attach the detailed technical materials of the facilities to the application, and set up the facilities with the approval of the competent department of the oceanic jurisdiction. Facilities shall, upon establishment, be subject to the inspection and examination of the competent department of the oceanic jurisdiction.

An entity that carries out the incineration operation shall apply to the competent department of the oceanic jurisdiction for a license for incineration at sea under the procedures as prescribed in these Measures.

Article 34 Any violator of these Regulations and the Measures for the Implementation that causes or may cause pollution or damage to the marine environment may be punished by the competent department of the oceanic jurisdiction under the provisions of Articles 17, 20, and 21 of these Regulations.

Anyone or any entity that does not obtain a dumping license issued by the competent department, dumps substances without authorization, and fails to conduct dumping under the conditions approved or at the sites approved shall be punished under the relevant provisions of Article 20 of these Regulations.

Article 35 Anyone or any entity that is not satisfied with the punishment may, within 15 days upon receipt of the decision on administrative punishment, apply for reconsideration to the authority at the next higher level over the authority that rendered the decision on punishment. A party that is not satisfied with the reconsideration results may, within 15 days upon receipt of the decision on reconsideration, file a lawsuit with a people's court; and a party may also directly file a lawsuit with a people's court within 15 days of the receipt of the decision on punishment.

Where a party within the time limit has neither applied for reconsideration nor filed a lawsuit with a people's court, nor complied with the decision on punishment, the authority rendered the decision on punishment may apply to the people's court for compulsory execution.

Article 36 Any violator of these Regulations and the Measures for the Implementation that causes pollution or damage to the marine environment, or losses to public and private property shall be liable for compensation.

Article 37 The liabilities for damage include:

1. The fees paid by the injured party for the removal or treatment of pollution, and the fees paid for the preventive measures taken for the pollution or damage.
2. The economic losses caused by pollution to public or private properties, and damage to sea water quality, and biological resources, among others.
3. The fees of the survey conducted for the handling of the pollution or damage incidents caused by dumping of wastes at sea.

Article 38 For disputes of compensation liabilities and compensation amount, a party may, under the civil procedure, file a lawsuit with a people's court; and may also request the competent department of the oceanic jurisdiction to conduct mediation. A party that refuses to accept the mediation may also file a lawsuit with a people's court; and a foreign-related case may be resolved under the arbitration procedure.

Article 39 The limitation period for prosecution with respect to compensation for damage to environmental pollution shall be 3 years, counted from the time when the party is aware of or should be aware of the pollution or damage.

After a compensation dispute is handled, the injured party shall not claim for damages as result of the same pollution accident.

Article 40 Where due to acts of war, irresistible natural disasters or third-party negligence, pollution or damage to the marine environment is still unable to be avoided, despite of the reasonable measures taken in a timely manner, the dumping entity may be exempted from compensation liability.

Where pollution or damage is caused due to the liability of a third party, the third party shall assume the compensation liability.

For vessels, aircrafts, platforms and other means of transport abandoned due to force majeure that cause pollution or damage due to their failure to be handled under the provisions of Article 31 of these Measures, the compensation liability shall be assumed.

After the competent department of the oceanic jurisdiction verifies that the exemption or mitigation conditions are satisfied, it may make a decision of exemption from compensation liability.

Article 41 Definitions of the following terms in these Measures are as follows:

1. "Internal sea" means all the sea areas (including the bays, straits, harbors and firths) to the inner side of the sea baseline, the sea areas between the territorial sea baseline and the coast, and the sea areas surrounded by land or in connection with the ocean through a narrow waterway.

2. “Dumping dredging materials” means any intentional abandoning and disposal of dredging materials at sea in various ways through or utilizing vessels or other means of transport. “Dredging materials” means the soil, gravels, and other substances generated by any dredging, deep digging of harbor basins, navigation projects and construction, digging of ports, docks, submarine or shore projects.
3. “Incineration at sea” means the intentional act of burning hazardous wastes by offshore incineration facilities aiming at destruction by heat, excluding such acts that occur accidentally during normal operation of vessels or other man-made structures.
4. “Offshore incineration facilities” means vessels, platforms, or other man-made structures for the purpose of incineration at sea.
5. “Wastes and other substances” means any form and type of substances and materials dumped at sea or planned to be dumped at sea for the purpose of abandoning.
6. “Rendered harmless promptly” means that some substances listed in Annex I of these Regulations are rendered harmless through physical, chemical and biological processes at sea, which does not make edible marine life revert or endanger human health and the normal growth of livestock and poultry.
7. “Trace amount of contamination,” namely “mere trace” in Annex 1 of these Regulations, means that dumping of some substances as listed in Annex 1 of these Regulations at sea will not generate harmful effect, especially will not cause acute or chronic effect to marine life or human health, no matter whether such toxic effects are caused as these substances gather in marine life, especially edible marine life.
8. “Significant quantity” is “large quantity” in Annex II of these Regulations. Where the dumping of some substances as listed in Annex II of these Regulations is proved upon biological assessment to have chronic toxic effects to marine life, the content of these substances shall be considered as significant quantity.
9. “Special management measures” means some administrative or technical management measures to be taken for dumping of dredging materials that are not “trace amount of contamination” or unable to be “rendered harmless promptly.” These measures are taken to reduce the impact of the substances as listed in Annex I and Annex II contained in the dredging materials on the environment and to make them do not harm human health or biological resources.

Article 42 The power to interpret these Measures shall remain with the State Oceanic Administration.

Article 43 These Measures shall come into force on the day of issuance.

4. Administrative Provisions of the People's Republic of China on the Prevention and Control of Marine Environmental Pollution by Vessels and Their Operations

(Issued by the Ministry of Transport on November 16, 2010 and amended for the first time according to the Decision on Amending the Administrative Provisions of the People's Republic of China on the Prevention and Control of Marine Environmental Pollution by

Vessels and Their Operations, Order No. 12 [2013] of the Ministry of Transport on August 31, 2013; and amended for the second time according to the Decision on Amending the Administrative Provisions of the People's Republic of China on the Prevention and Control of Marine Environmental Pollution by Vessels and Their Operations, Order No. 17 [2013] of the Ministry of Transport on December 24, 2013)

Chapter I Guiding Principles

Article 1 For the purpose of preventing and controlling marine environmental pollution caused by vessels and their operations, these Provisions are developed in accordance with the Marine Environmental Protection Law of the People's Republic of China, the Atmospheric Pollution Prevention and Control Law of the People's Republic of China, the Regulation of the People's Republic of China on the Administration of Prevention and Control of Vessel-induced Pollution to the Marine Environment, and the international treaties concluded or acceded to by the People's Republic of China.

Article 2 These Provisions shall apply to the prevention and control of pollution caused by vessels and their relevant operations to the sea areas of the People's Republic of China. The term “operations” as mentioned in these Provisions refers to vessel loading and unloading, barging, clearing and washing of vessel cabins, oil supply and receiving, repair and building, salvage, dismantlement, packing or filling of cargos with hazardous pollutants, pollution clean-up operations and other above-water and underwater construction operations relating to vessels.

Article 3 The transport administrative department of the State Council shall administer the prevention and control of marine environmental pollution caused by vessels and their operations throughout the country.

The maritime safety administration of the state shall be responsible for the supervision and administration of marine environmental pollution caused by vessels and their relevant operations throughout the country.

The maritime safety administrations at all levels shall, under their respective functions, be responsible for the supervision and administration of marine environmental pollution caused by vessels and their relevant operations throughout the country.

Chapter II General Provisions

Article 4 The structure, facilities and equipment of a vessel shall conform to the relevant vessel inspection rules of the state on the prevention and control of vessel-induced pollution to the marine environment and meet the requirements of the international treaties concluded or acceded to by the People's Republic of China, and for which corresponding certificates shall be obtained under relevant provisions of the state.

Article 5 A vessel shall, in accordance with the laws, administrative regulations, provisions of the transport administrative department under the State Council and the requirements of the international treaties concluded or acceded to by the People's Republic of China, obtain and carry on board the corresponding certificates and documents relating to the prevention and control of vessel-induced pollution to the marine environment.

The maritime safety administration shall announce to the general public a list of certificates and documents as mentioned in paragraph 1 of this Article, and timely update it.

Article 6 The certificates and documents relating to the prevention and control of vessel-induced pollution to the marine environment which are held by a Chinese vessel shall be issued by the maritime safety administration of the state or by an institution recognized by it. The certificates and documents relating to the prevention and control of vessel-induced pollution to the marine environment which are held by a foreign vessel shall meet the requirements of the international treaties concluded or acceded to by the People's Republic of China.

Article 7 A seaman shall have corresponding professional knowledge and skills on the prevention and control of vessel-induced pollution to the marine environment, take part in the corresponding training, examination and assessment as required by relevant laws, administrative regulations, and rules, and have a valid competency certificate of post and corresponding compliance certificate of training.

An entity conducting relevant operations shall organize its own operators to receive professional trainings on operating skills, use of equipment, operating procedures, safety protection, emergency responses, etc. so as to ensure that the operators have corresponding professional knowledge and skill on the prevention and control of vessel-induced pollution to the marine environment.

Article 8 Ports, docks, loading and unloading stations, and entities conducting the building and repair of vessels shall have corresponding pollution monitoring facilities and pollutant receiving facilities under relevant criterions of the state.

Ports, docks, loading and unloading stations, and the entities conducting the building, repair, salvaging, dismantlement and other operations of vessels shall be equipped with corresponding facilities and equipment for the prevention and control of pollution under relevant criterions of the state.

Article 9 To carry out any of the following operations, a vessel shall comply with the relevant laws, regulations and standards and the relevant operating procedures, take safety and pollution prevention and control measures, and report to the maritime safety administration the operating type, operating time, operating location, operating entity and vessel name and other information before operations; and where operation information changes, it shall make a supplementary report in a timely manner:

- (1) Conducting gunwale rust-eradicating or painting operation or using incinerators in a coastal port.
- (2) Washing tanks, cleaning cabins, discharging gas, or discharging garbage, domestic sewage, residual oil, oily waste water, waste water containing toxic or hazardous substances or other pollutants or ballast water at a harbor water area.
- (3) Washing the deck stained with pollutants or toxic or hazardous substances.
- (4) Conducting above-water dismantlement, salvage, building and repair of vessels, or any other above-water or underwater vessel construction operation.

(5) Conducting a vessel oil supply operation.

Article 10 An operator engaging in clearing the cargo hold of an oil tanker with load-carrying capacity of 30,000 tons or more, lightering bulk liquid cargo with hazardous pollution, salvaging sunken vessels or dismantling oil tankers, or any other operation with large pollution risk shall conduct a feasibility study on the operation scheme, and accept the inspection by the maritime safety administration during the operation.

Article 11 Where an entity or individual finds that a vessel and its operations have caused or may cause marine environmental pollution, it or he shall promptly report to the nearby maritime safety administration.

Chapter III Discharge and Receiving of Vessel-induced Pollutants

Article 12 A vessel which is navigating, berthing or operating within the sea areas of the People's Republic of China shall comply with the laws, administrative regulations, relevant criterions, as well as the international treaties concluded or acceded to by the People's Republic of China if it is to discharge garbage, living sewage, sewage with oil, sewage with toxic and hazardous substances, waste gas and other pollutants as well as ballasting water. A vessel navigating, berthing or operating within a vessel discharge control area shall also comply with the requirements for the prevention and control of atmospheric pollution within the vessel discharge control area. A vessel shall meet the control requirements for a vessel's atmospheric emissions by using low-sulfur fuel or taking an alternative measure, such as shore electricity, clean energy, or tail gas after-treatment devices, among others.

Article 13 No vessel shall discharge pollutants to marine nature reserves, marine special reserves, seashore scenic spots and historic sites, important fishing waters which are delimited pursuant to law and other sea areas which need special protection.

To establish a sea area which needs special protection as prescribed in paragraph 1 of this Article, supporting vessel pollutant receiving facilities and emergency facilities and equipment shall be prepared at a proper location.

Article 14 A vessel shall discharge those pollutants, which do not meet the discharge requirements of Article 12 and which are banned from discharge to sea areas according to law, to the receiving facilities of a port with the corresponding receiving capacity or have the aforesaid pollutants received by its authorized vessel pollutant receiving entity with the corresponding receiving capacity.

If a vessel authorizes a vessel pollutant receiving entity to receive pollutants, the vessel operator shall, prior to the operation of receiving pollutants, expressly designate the authorized vessel pollutant receiving entity.

Article 15 To receive vessel garbage, residual oil, oily waste water, waste water containing toxic and hazardous substances and other pollutants, a vessel pollutant receiving entity shall report the operating time, operating location, operating entity and vessel, the types and quantities of pollutants, methods to be adopted for disposing of and the whereabouts of such pollutants and other information to the maritime safety administration prior to the operation. Where the information on the receipt and treatment of pollutants changes, a supplementary

report shall be made in a timely manner.

Where a port has established the duplicate form system for the receipt, transfer and disposal of vessel pollutants, the vessel and the vessel pollutant receiving entity shall, in accordance with the requirements of the duplicate form system, report to the competent department the information on the receipt, transfer and disposal of vessel pollutants.

Article 16 A vessel pollutant receiving operating entity shall comply with the administrative rules on safety and pollution prevention. When it receives pollutants, it shall prepare the operation scheme, and comply with the relevant standards and operating procedures of the state, and take effective pollution prevention measures so as to prevent pollutants from spilling and leaking.

Article 17 After having finished receiving pollutants, a vessel pollutant receiving entity shall issue to the vessel the pollutant receiving documents, which shall be signed by both parties for confirmation and retained for at least two years. The pollutant receiving documents shall be indicated with the names of the operating entities, names of both operating vessels, time of start and end of operation, place of operation, and types and quantities of pollutants, among others.

The vessel shall keep the vessel pollutant receiving documents in the corresponding record book.

Article 18 To conduct operations involving disposal of pollutants, a vessel shall normatively fill out the corresponding record book, faithfully recording and genuinely reflecting the quantities of pollutants generated during the voyage of the vessel, process of disposal of pollutants, and whereabouts of the pollutants. If no record book is required under any law, administrative regulation, provisions of the transport administrative department of the State Council, or international treaty concluded or acceded to by the People's Republic of China, the vessel shall faithfully record the relevant information in the logbook or engine logbook on the same day of operation.

A vessel shall preserve a vessel garbage record book, which is totally used up, on board for at least 2 years. It shall preserve a record book of sewage with oil and sewage with toxic and hazardous substances, which is totally used up, on board for at least 3 years.

Article 19 A vessel pollutant receiving entity shall deliver the received pollutants to the pollutant disposal entity with the eligibility prescribed by the state and shall, every month, report to the maritime safety administration for records the information about the vessel-induced pollutants received and disposed of.

Article 20 The receiving and disposal of vessel-induced pollutants with toxic and hazardous substances or other dangerous elements shall conform to the administrative provisions of the state on dangerous wastes. Pollutants generated by vessels from epidemic regions shall not be received or treated until they have undergone the quarantine disposal by the relevant quarantine department.

Article 21 A vessel shall prepare garbage storage containers which have covers and are seep-and leakage-proof, or pack garbage in bags.

A vessel shall collect and store garbage in a categorized manner and shall separately store the garbage with toxic and hazardous substances or other dangerous elements.

When a vessel is to discharge any garbage with toxic and hazardous substances or other dangerous elements to the receiving facilities of a port or is to have the garbage received by its authorized vessel pollutant receiving entity, it shall inform the other party about the name, nature, quantity and other information about the substances in such garbage.

Article 22 A vessel shall, under the relevant provisions of the state, as well as the requirements of the international treaties concluded or acceded to by the People's Republic of China, prepare disposal devices or storage containers commensurate with the quantity of living sewage it produces.

Chapter IV Carrying Cargos with Hazardous Pollutants and Other Relevant Operations through Vessels

Article 23 The term “cargos with hazardous pollutants” refers to the cargos which directly or indirectly enter into the water body, may impair the quality of the water body and quality of the environment, and thus impair the biological resources and do harm to the human health.

The maritime safety administration of the state shall announce to the general public a list of cargos with hazardous pollutants, and timely update it where necessary.

Article 24 Where a vessel carrying cargos with hazardous pollutants is to enter or leave a port, the carrier or agent shall, 24 hours prior to its entering or leaving the port (or at the time of its leaving the prior port in the case of a voyage of less than 24 hours), make a seaworthiness declaration to the maritime safety administration. The cargo owner or agent shall, prior to making a declaration of seaworthiness of vessel, make a declaration of cargo worthiness to the maritime safety administration.

No vessel shall enter or leave the port, or stay for transit until the declaration of cargo worthiness and the declaration of seaworthiness of vessel have been examined and approved by the maritime safety administration.

Article 25 The special characteristics and package of the consigned cargos with hazardous pollutants as well as the risk prevention and emergency measures taken against the said cargos shall conform to the relevant criterions and provisions of the state, and the requirements of the international treaties concluded or acceded to by the People's Republic of China. If the shipping of the said cargos is subject to the approval of the relevant administrative department of the state, an approval of the relevant administrative department shall be obtained.

The seaworthiness conditions shall be governed by the seaworthiness conditions for vessels carrying dangerous cargos as prescribed in the Provisions of the People's Republic of China on the Conditions for Maritime Administrative Licensing.

Article 26 To make a declaration of cargo worthiness, the cargo owner or agent shall submit the following materials to the maritime safety administration:

1. a form of declaration of cargo worthiness, including the relevant information about the

cargo owner or agent, as well as the name, category, special characteristics and other basic information of the cargos;

2. valid power of attorney issued by the cargo owner, if the agent is to make a declaration of cargo worthiness;

3. material safety data sheets of the corresponding cargos with hazardous pollutants, and relevant materials about safe precautions for safe operations, prevention and emergency measures, etc.;

4. valid document of approval, if the shipping of cargos with hazardous pollutants shall be subject to the approval of the relevant administrative department of the state; and

5. The cargo owner or agent shall also submit the following materials when delivering the following to-be-shipped cargos with hazardous pollutants:

(1) packing and medium bulk container inspection compliance certificate or pressure container inspection compliance certificate, if it is to ship packed cargos with hazardous pollutants;

(2) tank or container inspection compliance certificate, if it is to use movable tanks or containers to load cargos with hazardous pollutants;

(3) certificate of radiation dosage, if it is to ship cargos with hazardous pollutants of radioactivity;

(4) name and quantity, temperature and valid term of the suppressant or stabilizer, and the measures to be taken after the expiration of the valid term of the suppressant or stabilizer, if the cargos contain suppressant or stabilizer;

(5) certificate of dangerous cargos under quantity restrictions, if it is to ship dangerous cargos under quantity restrictions; and

(6) report of assessment of hazardous pollutants as prescribed in Article 31, if it is to ship cargos with unknown hazardous pollutants.

Article 27 To make a declaration of seaworthiness of vessel, the carrier or agent shall submit the following materials to the maritime safety administration:

1. a form of declaration of shipping cargos with hazardous pollutants, including the relevant information of the carrier or agent, as well as the name, category, special characteristics and other basic information of the cargos;

2. cargo worthiness certificate approved by the maritime safety administration;

3. valid authorization certificate issued by the carrier, if the agent makes a declaration of seaworthiness of vessel;

4. certificate on prevention of oil pollution, certificate of seaworthiness of vessel, civil liability insurance for vessel-induced oil pollution damage or other financial guarantee certificate;

5. brief descriptions about the cause for the accident, control measures already taken, present situation and other relevant information which shall be included in the form of declaration of shipping cargos with hazardous pollutants; and a detailed report, which shall be submitted after the vessel arrives at the port, if the vessel carrying the cargos with hazardous pollutants has ever had any accident during the voyage;

6. checklist, manifest or cargo plan which clearly indicate the actually loaded cargos; and
7. port, dock or loading and unloading station for the planned operation of loading and unloading.

A regular vessel, a vessel of regular navigation route or a vessel carrying regular type of goods may go through the formalities for a declaration of regular seaworthiness of vessel with a maximum time period of 1 month. Apart from the materials as prescribed in paragraph 1 of this Article, the relevant materials which can certify that the regular vessel transports regular cargos with hazardous pollutants on the regular navigation route shall be submitted for going through the formalities for declaration of regular seaworthiness of vessel.

Article 28 After receiving a declaration of cargo worthiness or declaration of seaworthiness of vessel, the maritime safety administration shall, under the requirements as prescribed in Article 26, make a decision of approval or disapproval within 24 hours. For a declaration of regular seaworthiness of vessel, it shall make a decision of approval or disapproval within 7 days.

Article 29 To deliver the to-be-shipped cargos with hazardous pollutants, the cargo owner or agent shall take effective measure for prevention and control of pollution, ensure that the packages of cargos as well as the specifications, scale, color, endurance, etc. of the signs of the cargos meet the relevant requirements of the state for safety and prevention and control of pollution, and faithfully state in the shipping documents the technical name, quantity, category and nature of the cargos, and prevention and emergency measures.

Article 30 The cargos with unknown hazardous pollutants to be delivered by the cargo owner or agent for shipping shall, prior to being delivered for shipping, be subject to assessment by the technical institution with corresponding qualifications as entrusted in terms of the hazardous pollutants of the cargos and the technical conditions of vessel carriage.

Article 31 Empty containers and transport components which have ever been used to load cargos with hazardous pollutants shall be thoroughly washed and be harmless. They shall not be delivered as ordinary cargos for shipping unless a clean certificate issued by an inspection agency with the eligibility prescribed by the state has been obtained. They shall be transported under the requirements for the formerly loaded cargos prior to thorough washing and elimination of harm.

Article 32 If the maritime safety administration considers that the cargos delivered for shipping should have been declared as cargos with hazardous pollutants or that the declaration does not conform to the actual information, it may, upon approval of its person-in-charge, conduct an inspection by opening the boxes.

When the maritime safety administration conducts an inspection by opening the boxes, the cargo owner or agent shall be present and be responsible for moving the cargos, opening and resealing the packages of the cargos. If the maritime safety administration deems it necessary, it may directly inspect or re-inspect the cargos or take samples of cargos. The relevant entities and individuals shall be cooperative.

Article 33 If a vessel does not meet the worthiness requirements for cargos with hazardous

pollutants, it shall not carry cargos with hazardous pollutants. No loading and unloading station shall conduct the operation of loading and unloading for it.

If it is found that a vessel and its relevant operations may cause pollution to the marine environment, the dock, loading and unloading station and vessel shall promptly take corresponding emergency measures and report to the maritime safety administration.

Article 34 A dock or loading and unloading station engaged in loading and unloading cargos with hazardous pollutants shall meet the relevant criterions for safe loading and unloading and disposal of pollutants and submit to the maritime safety administration relevant materials about its safe loading and unloading and pollutant disposal capacities. The maritime safety administration shall announce to the general public those docks and loading and unloading stations with the corresponding safe loading and loading and pollutant disposal capacities. A vessel carrying cargos with hazardous pollutants shall conduct the operation of loading and unloading at a dock or loading and unloading station with the corresponding safe loading and unloading and pollutant disposal capacities as announced by the maritime safety administration.

Article 35 If a vessel is to conduct the operation of barging bulk liquid cargo with hazardous pollutants, it shall conform to the administrative provisions and technical norms of the state regarding the marine traffic safety and the prevention and control of vessel-induced pollution to marine environment, choose water areas with slow flow of water, easy to be sheltered from wind, and with suitable water depth and bottom characteristics, etc., and try to be far from populated areas, crowded navigable areas, navigation routes, important civil targets or facilities, and military water areas. It shall also formulate safety measures and pollution-prevention measures and the emergency plan and ensure the effective implementation thereof.

Article 36 If a vessel is to conduct an operation of barging bulk liquid cargo with hazardous pollutants, the carrier, cargo owner or agent thereof shall submit the following application materials to the maritime safety administration:

1. an application for vessel operation, including the materials of the operating vessel, contact person, contact information, time and place of operation, category and quantity of bulk liquid cargo to be barged and other basic information;
2. plan on vessel operation, as well as the measures for monitoring, prevention and control of pollution;
3. emergency plan on vessel operations,
4. analytical report about the navigation safety and pollution risks in the water areas where the vessel operation is to be conducted; and
5. pollution elimination operation agreement concluded with a pollution elimination operation entity with corresponding capacities.

The maritime safety administration shall, within 2 days as of the date of acceptance of an application, make a decision of approval or disapproval under the requirements as prescribed in Article 36. If it is unable to make a decision within 2 days, a 5-day extension

may be made upon approval of its person-in-charge.

Article 37 An entity engaged in oil supply and receiving operations through vessels shall register itself with the maritime safety administration and shall submit the following materials for records:

1. its industrial and commercial business license;
2. documents on the system of safety and prevention and control of pollution, emergency plan, checklist of emergency equipment and materials, hose pressure proof test certificate, and information about training of operators;
3. relevant certificates of the vessels, emergency plan on oil pollution on board, voucher of insurance of liability for operating-vessel-induced oil pollution damage, and seaman competency certificates, if the oil supply and receiving operations are conducted through vessels; and
4. fuel quality guarantee; and a certificate of wholesale or retail of refined oil approved by the relevant department according to law shall be submitted simultaneously if the entity is engaged in refined oil supply and receiving operations.

Article 38 To conduct oil supply and receiving operations through vessels, both operating parties shall take measures for management of oil supply and receiving which can satisfy the requirements for safety and prevention and control of pollution and simultaneously abide by the following provisions:

1. Prior to the operations, they shall
 - (1) check the pipeline and valves, make good preparations, plug the drain hole on the deck and close the relevant hull valve;
 - (2) check the relevant equipment for oil operations and make it in good condition;
 - (3) prepare oil collection containers at places of possible spilling or leakage;
 - (4) the oil receiving party shall determine the communication signals upon discussion with the oil supply party, but both parties shall earnestly execute the said signals.
2. During the operations, there shall be sufficient people to be on duty, and those who are on duty shall keep to their posts, strictly observe the operating procedures and control the progress so as to avoid the leakage of oil.
3. When stopping the operations, they shall effectively close the relevant valves.
4. When the hose is taken back, it shall, in advance, be effectively closed off by a blind plate, or other effective measures shall be taken so as to prevent the oil residue in the hose from flowing backward into the sea.

The maritime safety administration shall supervise and inspect the oil supply and receiving operations through vessels. It shall stop those operations which do not meet the requirements for safety and prevention and control of pollution.

Article 39 A vessel oil supply entity shall faithfully fill out the fuel supply and receiving document and provide a fuel supply and receiving document and a fuel sample to the vessel. The fuel supply and receiving document shall include the name of the vessel receiving the fuel, identity number of the vessel or serial number given by the International Maritime

Organization, time and place of operation, name, address and contact information of the oil supply entity, as well as the type, quantity, density and sulphur content of the fuel. The vessel and the oil supply entity shall preserve the fuel supply and receiving document for 3 years and properly preserve the fuel sample for 1 year.

The oil supply entity shall ensure that the quality of the fuel, which it supplies, conforms to the relevant criteria and requirements, and shall send the fuel, which it supplies, to the fuel testing entity with the eligibilities required by the state for testing. The testing report on the quality of fuel shall be kept on the operating vessel for check.

Article 40 A vessel shall, before leaving the port, report as required the type and quantity of fuel consumed in the previous voyage, the main engine, auxiliary engine and boiler powers, and the operating conditions and time and other information to the maritime safety administration.

Where a vessel meets the control requirements for a vessel's atmospheric emissions by converting its fuel to low-sulfur fuel or taking any alternative measure such as shore electricity, clean energy, or tail gas after-treatment devices, among others, in accordance with the requirements of the vessel discharge control area, it shall be truthfully recorded as required.

Article 41 When a vessel performs any of the following operations with a workload of more than 300 tons, such pollution prevention measures as establishment of oil fences shall be taken, and the barging operator shall take charge of the barging operation thereof:

- (1) Loading and unloading or barging of persistent oils in bulk, excluding vessel fuel supply.
- (2) Loading and unloading or barging of toxic liquid substances in bulk whose specific gravity is less than 1 (as compared with water) and solubility is less than 0.1%.
- (3) Other operations that may result in severe pollution to any water area.

If it is not appropriate to establish oil fences due to the restrictions of natural conditions or for any other reason, effective alternative measures shall be taken.

Article 42 Where a vessel carrying cargoes with hazardous pollutants enters or leaves a port or passes a bridge area, area under traffic control, crowded navigable area or any area subject to navigation restrictions, or where a vessel carrying virulent, explosive or radioactive cargoes enters or leaves a port, it shall abide by the special provisions of the maritime safety administration and take necessary measures for ensuring the safety and prevention and control of pollution.

Article 43 To carry cargoes which emit poisonous and harmful gas or emanate dust substances, a vessel shall take closing or other protection measures. For cargoes with hazardous pollutants for which closing operation is required, it shall take measures to recover the toxic and harmful gas during the courses of transport and operation.

Chapter V Dismantlement, Salvage, Repair and Building of Vessels and Other Above-water and Underwater Construction Operations Relating to Vessels

Article 44 It is forbidden to conduct vessel dismantling operation by way of beaching.

Article 45 The relevant operating procedures shall be abided by and necessary measures

for safety and prevention and control of pollution shall be taken when such operations as dismantlement, salvage, repair and building of vessels and other above-water and underwater construction operations relating to vessels are conducted.

Article 46 Prior to the operation of dismantlement of a vessel or repair of the oil tank of a vessel, the operating entity shall effectively dispose of the residues and wastes on the vessel, barge out the remaining oil in the fuel tank and cargo oil tank, and then clear and wash the vessel cabins and tanks, conduct an explosion test, etc., and shall, under relevant provisions, obtain a vessel pollutant receiving documents and a valid certificate of explosion test.

If it is necessary to deliver for storage the remaining oil in the fuel tank and cargo oil tank of the vessel by means of lightering, the requirements of these Provisions on the operation of lightering bulk liquid cargo with hazardous pollution shall be abided by.

A vessel repair and building factory shall establish the administration system for the prevention and control of vessel-induced pollution to the marine environment, and take necessary prevention measures, so as to prevent the marine environment pollution caused during the period of vessel repair and building.

Article 47 To repair or build vessels in a dock, the vessel repair and building factory shall thoroughly clean the pollutants in the dock. It shall not launch floating dock or open the door of the dock until it confirms that no pollution shall be caused to the water area.

Article 48 After the completion of such operations as dismantlement, salvage, repair and building of vessels and other above-water and underwater construction operations relating to vessels, the operating entity shall timely clean up the pollutants and report to the maritime safety administration the information about the elimination and disposal of pollutants generated during the whole operation process. The maritime safety administration may conduct an on-site verification, if necessary.

Chapter VI Legal Liabilities

Article 49 If the maritime safety administration finds that any vessel or a relevant operating entity violates these Provisions, it shall order it to make a correction. If it refuses to make a correction, the maritime safety administration may order it to suspend the operation, compel it to unload the cargos, prohibit the vessel from entering or leaving the port, berthing or staying for transit, or order the vessel to suspend navigation, reroute, leave China or head for the designated place.

Article 50 Where, in violation of these Provisions, the structure of a vessel does not meet the relevant technical requirements of the state for prevention and control of vessel-induced pollution to the marine environment or the requirements of the relevant international treaties, the maritime safety administration shall impose a fine of more than 100,000 yuan and less than 300,000 yuan upon it.

Article 51 Where, in violation of these Provisions, a vessel, port, dock or loading and unloading station fails to equip itself with pollution prevention and control facilities, equipment and instruments under either of the following circumstances, the maritime safety administration shall give a warning to the violator or impose on it a fine of more than 20, 000

yuan and less than 100, 000 yuan:

1. The quantity of its pollution prevention and control facilities, equipment and instruments do not accord with the laws, administrative regulations, rules, relevant criteria, as well as the requirements of the international treaties concluded or acceded to by China; or
2. The technical performances of its pollution prevention and control facilities, equipment and instruments do not accord with the law, administrative regulations, rules, relevant criteria, as well as the requirements of the international treaties concluded or acceded to by China.

Article 52 Where, in violation of the provisions of Article 9 or 40 of these Provisions, a vessel fails to report as required the relevant information to the maritime safety administration, the maritime safety administration shall give it a warning; and where the circumstances are serious, it shall be fined less than 20,000 yuan.

Article 53 Where, in violation of these Provisions, a vessel does not hold certificates and documents relating to the prevention and control of vessel-induced pollution to the marine environment, the maritime safety administration shall give it a warning or fine it not more than 20, 000 yuan.

Article 54 Where, in violation of these Provisions, a vessel discharges to the sea area any pollutants banned from being discharged by these Provisions, the maritime safety administration shall impose on it a fine of more than 30, 000 yuan and less than 200, 000 yuan.

Article 55 Where, in violation of these Provisions, a vessel discharges or disposes of pollutants under any of the following circumstances, the maritime safety administration shall impose on it a fine of more than 20, 000 yuan and less than 100, 000 yuan:

1. discharging pollutants to the sea areas beyond the criteria;
 2. failing to keep on board the records of discharge or disposal of vessel-induced pollutants;
- or
3. providing records of disposal of vessel-induced pollutants which are inconsistent with the quantity of the pollutants generated in the process of operation of the vessel.

Article 56 Where any vessel pollutant receiving entity receives any garbage, residual oil, oily waste water, waste water containing toxic and hazardous substances or any other pollutant in violation of these Provisions, or fails to prepare the operation scheme, comply with the relevant operating procedures or take necessary pollution prevention measures, the maritime safety administration shall impose a fine of not less than 10,000 yuan nor more than 50,000 yuan on it; and if it causes pollution to the marine environment, the maritime safety administration shall impose a fine of not less than 50,000 yuan nor more than 250,000 yuan on it.

Article 57 Where, in violation of these Provisions, a vessel or vessel pollutant receiving entity receives and disposes of pollutants under the circumstance as described in subparagraph 1, the maritime safety administration shall give it a warning or fine it not more than 20, 000 yuan; if it is under either of the circumstances as described in subparagraphs 2 and 3, the

maritime safety administration shall fine it not more than 20, 000 yuan:

1. The vessel fails to faithfully record the information about disposal of pollutants;
2. The vessel pollutant receiving entity fails to report as required to the maritime safety administration the information on the receipt of vessel-induced pollutants, or fails to issue pollutant receiving documents to the vessel as required.
3. The vessel pollutant receiving entity fails to report to the maritime safety administration for records the information about the vessel-induced pollutants received and disposed of.

Article 58 Where, in violation of these Provisions, a vessel carrying cargos with hazards pollutants enters or leaves a port, or stays for transit without approval of the maritime safety administration, the maritime safety administration shall impose a fine of more than 10, 000 yuan and less than 50, 000 yuan on the carrier, cargo owner or agent thereof. If a vessel conducts operation of barging bulk liquid cargos with hazardous pollutants without approval of the maritime safety administration, the maritime safety administration shall impose a fine of more than 10, 000 yuan and less than 50, 000 yuan on the vessel.

Article 59 Where a violator of these Provisions is under the circumstance as described in subparagraph 1 of this Article, the maritime safety administration shall give it a warning or fine it more than 20, 000 yuan and less than 100, 000 yuan; if it is under any of the circumstances as described in subparagraphs 2, 3 and 4, the maritime safety administration shall fine it more than 20, 000 yuan and less than 100, 000 yuan:

1. The cargos with hazardous pollutants carried by a vessel do not meet the cargo worthiness conditions;
2. A vessel carrying the cargos with hazardous pollutants does not meet the seaworthiness conditions for vessels carrying cargos with hazardous pollutants;
3. A vessel carrying cargos with hazardous pollutants fails to conduct the loading and unloading operation at a dock or loading and unloading station with the corresponding safe loading and unloading and pollutant disposal capacities; or
4. The cargo owner or the agent thereof fails to make a hazardous pollutant assessment of the cargos with unknown hazardous pollutants under relevant provisions.

Article 60 Where a violator of these Provisions is under any of the following circumstances, the maritime safety administration shall fine it more than 2, 000 yuan and less than 10, 000 yuan:

1. A vessel fails to preserve the pollutant receiving documents;
2. A vessel oil supply or receiving entity fails to faithfully fill out the fuel supply and receiving document;
3. A vessel oil supply or receiving entity fails to provide a fuel supply and receiving document and a fuel sample to a vessel; or
4. A vessel or a vessel oil supply or receiving entity fails to preserve a fuel supply and receiving document or fuel sample as required.

Where a vessel fuel supplier fails to engage in oil supply operation in accordance with the requirements of the standards for safety and pollution prevention and control, or the vessel

fuel supplied exceeds the standards, the maritime safety administration shall require it to make rectification, and notify the relevant competent department.

Article 61 Where a violator of these Provisions conducts dismantlement of vessels above water, renovation of old vessels, salvage, and other above-water or underwater construction operations relating to vessels and leads to pollution and damages to the marine environment, the maritime safety administration shall give it a warning or fine it more than 50, 000 yuan and less than 200, 000 yuan.

Chapter VII Supplementary Provisions

Article 62 These Provisions do not apply to the prevention and control of marine environmental pollution by military vessels, and the fishing vessels beyond the water areas administered by the transport administrative department of the State Council.

Article 63 These Provisions shall come into force as of February 1, 2011.

5. Provisions on Safety Production and Environmental Protection for Ship Recycling

(Omitted, Chinese only)

6. Rules on Supervision and Administration of Ship Recycling

(Omitted, Chinese only)

7. Measures for the Implementation by Competent Environmental Protection Departments of Consecutive Daily Penalties

(Omitted, Chinese only)

8. Measures for Pollutant Discharge Permitting Administration

The Measures for Pollutant Discharge Permitting Administration (For Trial Implementation), as deliberated and adopted at the executive meeting of the Ministry of Environmental Protection on November 6, 2017, are hereby issued, and shall come into force upon issuance.

Li Ganjie Minister of Environmental Protection January 10, 2018

Chapter I General Provisions

Article 1 For the purposes of regulating the pollution discharge permitting administration, these Measures are developed under the Environmental Protection Law of the People's Republic of China, the Water Pollution Prevention and Control Law of the People's Republic of China, the Atmospheric Pollution Prevention and Control Law of the People's Republic of China, and the Implementation Plan for the Permit System for Controlling Pollutants

Emission as issued by the General Office of the State Council.

Article 2 These Measures shall apply to the application for and the issuance and enforcement of pollution discharge permits and the regulation, punishment and other conduct relating to pollutant discharge permitting.

Article 3 The Ministry of Environmental Protection shall develop and issue according to law a classification administration list of pollutant discharge permitting for fixed pollution sources and specify the scope under pollutant discharge permitting administration and the application time limit.

The enterprises, public institutions and other producers and businesses (hereinafter referred to as the "pollutant discharging entities") on the list shall apply for and obtain a pollutant discharge permit according to the prescribed application time limit; and those not on the list are required to do so for the time being.

Article 4 A pollutant discharging entity shall hold a pollutant discharge permit as legally required and discharge the pollutant as provided in the pollutant discharge permit.

Without a required pollutant discharge permit, no pollutant may be discharged.

Article 5 Pollution discharging entities generating or discharging high-volume pollutants or highly detrimental to the environment shall be placed under priority pollutant discharge permitting administration, and the others shall be placed under summary pollutant discharge permitting administration.

The specific scope of pollutant discharging entities under priority pollutant discharge permitting administration or those under summary pollutant discharge permitting administration shall be governed by the classification administration list of pollutant discharge permitting for fixed pollution sources. The content and requirements of the application of priority administration and summary administration shall be governed by the relevant technical specifications and guidelines relating to pollutant discharge permitting as described in Article 11 of these Measures.

The local environmental protection authorities at and above the level of city divided into districts shall determine the pollutant discharging entities subject to priority pollutant discharge permitting administration as priority pollutant discharging entities.

Article 6 The Ministry of Environmental Protection shall be responsible for the implementation and supervision of the national pollutant discharge permitting rules. Each provincial environmental protection authority shall be responsible for the organization of the implementation and supervision of the local pollutant discharge permitting rules.

The environmental protection authorities at the level of city divided into districts in the places of production and business of pollutant discharging entities shall be responsible for issuing pollutant discharge permits, unless otherwise provided by local rules.

Article 7 An pollutant discharging entity under a same corporate entity or any other organization, having more than one place of production and business, shall, in the name of the corporate entity or other organization, apply for a pollutant discharge permit with the environmental protection authority having the issuing power (hereinafter referred to as the

"issuing environmental protection authority") in each of the production and business venues. Where the place of production and business and the outlet are in different administrative regions, the issuing environmental protection authority in the place of production and business shall be responsible for issuing the pollutant discharge permit provided that, before doing so, it shall solicit the opinions of the environmental protection authority at the same level in the place of the outlet.

Article 8 As required by the relevant laws, the environmental protection authorities shall subject the discharge of water pollutants, air pollutants, and other various pollutants by pollutant discharging entities to comprehensive permitting administration.

For pollutant discharging entities that have obtained construction project environmental impact assessment approval opinions on or after January 1, 2015, the main content regarding pollutant discharge in the environmental impact assessment documents and approval opinions shall be included in the pollutant discharge permits.

Article 9 The Ministry of Environmental Protection shall place pollutant discharging entities subject to pollutant discharge permitting administration and their production facilities, production prevention and control facilities and outlets under unified coding administration.

Article 10 The Ministry of Environmental Protection shall be responsible for building, operating, maintaining and managing the National Pollution Discharge Permits Administration Information Platform.

The application for and its acceptance, review, issuance, modification, renewal, deregistration, revocation, and re-issuance as a result of loss of a pollutant discharge permit shall be conducted on the National Pollution Discharge Permits Administration Information Platform. The self-monitoring and enforcement reports of the pollutant discharging entities and the information on the regulation and law enforcement from the environmental protection authorities shall be entered in and made public according to these Measures through the National Pollution Discharge Permits Administration Information Platform.

The electronic information relating to pollutant discharge permits recorded in the National Pollution Discharge Permits Administration Information Platform shall have the same effect as the original and duplicate of pollutant discharge permits according to law.

Article 11 The Ministry of Environmental Protection shall develop technical specifications of application and issuance of pollutant discharge permits, technical specifications of environmental management ledgers and pollutant discharge permits enforcement reports, technical guidelines on the self-monitoring by pollutant discharging entities, guidelines on feasible pollution prevention and control technologies, and other pollutant discharging permitting policies, standards and specifications.

Chapter II Content of Pollution Discharge Permits

Article 12 A pollutant discharge permit consists of an original and a duplicate copy, and while the original specifies the basic information, the duplicate contains the basic information, registration items, permitting items, undertaking, etc.

The local environmental protection authorities at and above the level of city divided into

districts may add more contents that need to be included in the pollutant discharge permit under local environmental protection rules.

Article 13 The following basic information shall be included in both the original and the duplicate of a pollutant discharge permit:

(1) Name, registered address, legal representative or principal person in charge, persons in charge of technology, address of the place of production and business, industry category, unified social credit code, and other basic information of the pollutant discharging entity.

(2) The validity period, issuing authority, issuing date, serial number, QR code, and other basic information of the pollutant discharge permit.

Article 14 The following registration items shall be declared by pollutant discharging entities and specified in the duplicate of the pollutant discharge permits:

(1) Main production facilities, main products and capacity, and main and accessory raw materials, etc.;

(2) Pollutant generating and discharging links and pollution prevention and control facilities, etc.;

(3) Environmental impact assessment approval opinions, the total quantity control indicators of the discharge of priority pollutants broken down and assigned to the entities in accordance with the law, and the records of onerous use of and trading in the right of pollutant discharge, etc.

Article 15 The following permitting items shall be applied for by pollutant discharging entities and, upon the review of the issuing environmental protection authorities, specified in the duplicate of a pollutant discharge permit:

(1) The locations and number of outlets, the manners and destination, among others, of pollutant discharge, and the locations and number of fugitive emission sources of air pollutants.

(2) The types of pollutants from outlets and fugitive emissions, permitted pollutant concentrations, and permitted quantity of pollutants discharged.

(3) Environmental management requirements which shall be complied with after the pollution discharge permit is obtained.

(4) Other permitting items as prescribed by laws and regulations.

Article 16 The issuing environmental protection authorities shall determine the permitted concentrations of pollutants from the outlets or fugitive emissions of pollutant discharging entities according to the local and national pollutant discharging standards.

Any more stringent pollutant concentrations a pollutant discharging entity undertakes to comply with shall be specified in the duplicate of its pollution discharge permit.

Article 17 The issuing environmental protection authorities shall determine the permitted quantity of pollutant discharged by pollutant discharging entities according to the methodology to calculate the permitted quantity of industry priority pollutant discharged as described in the technical specifications of application and issuance of pollutant discharge permits and the requirements for environmental quality improvement.

With respect to a pollutant discharging entity to which the total quantity control indicators of priority pollutants has been broken down and assigned in accordance with the law before the implementation of these Measures, the issuing environmental protection authorities shall determine the permitted quantity of pollutant discharged according to the methodology to calculate the permitted quantity of industry priority pollutant discharged, the requirements for environmental quality improvement, and total quantity control indicators of the discharge of priority pollutants.

For a pollutant discharging entity that obtained environmental impact assessment approval opinions on or after January 1, 2015, if the quantity of pollutant discharged determined in the environmental impact assessment documents and approval opinions is more stringent than that as determined under paragraphs 1 and 2 of this Article, the issuing environmental protection authorities shall determine the quantity according to the environmental impact assessment documents and approval opinions.

If any plan for environmental quality coming up to standard within a specified period, or the heavy air pollution response measures, developed by the local people's governments according to the law, require pollutant discharging entities to comply with more stringent total quantity control indicators of the discharge of priority pollutants, the requirements shall be specified in the duplicate of a pollutant discharge permit.

The environmental protection authorities shall, upon implementation of these Measures, determine the total quantity control indicators of the discharge of priority pollutants for environmental protection authorities according to the permitted quantity of pollutants discharged as specified in the pollutant discharge permits.

Article 18 The following environmental management requirements shall be specified in the duplicate of a pollutant discharge permit by the issuing environmental protection authorities according to the application materials of pollutant discharging entities, the relevant technical specifications, and regulatory needs:

- (1) The requirements for the operation and maintenance of pollution prevention and control facilities and for the control of fugitive emissions, etc.
- (2) Self-monitoring requirements, ledger keeping requirements, content and frequency of enforcement reporting, and other requirements.
- (3) Requirements for disclosing the information of pollutant discharging entities to the public.
- (4) Other items as required by laws and regulations.

Article 19 A pollutant discharging entity shall, when applying for a pollutant discharge permit, prepare a self-monitoring plan according to the self-monitoring technical guidelines.

The self-monitoring plan shall include the following:

- (1) Location and sketch of monitoring stations, monitoring indicators, and monitoring frequency.
- (2) Adopted monitoring and analysis methodology and sampling methodology.
- (3) Monitoring quality assurance and quality control requirements.
- (4) Requirements for recording, reorganization and archiving of the monitoring data.

Article 20 A pollutant discharging entity shall, when filling in an application for pollutant discharge permit, undertake that the application materials for the pollutant discharge permit is complete, authentic and lawful; and undertake to discharge pollutants according to the pollutant discharge permit and implement the environmental management requirements contained in the pollutant discharge permit, signed or sealed by the legal representative or the principal person in charge.

Article 21 A pollutant discharge permit shall take effect on the date when the permitting decision is made. The validity period of an emission permit issued for the first time shall be three years, and the validity period of a renewed emission permit shall be five years.

For any outdated technological equipment, or outdated products, which the industry policy list issued by the comprehensive and macro economic regulation department of the State Council in conjunction with the other relevant departments of the State Council purports to eliminate, the validity period of the pollutant discharge permit shall not exceed the purported time limit for the elimination.

Article 22 The environmental protection authorities shall not collect any fees for issuing pollutant discharge permits or conducting supervisory inspection of the enforcement of pollutant discharge permits.

Chapter III Application and Issuance

Article 23 The provincial environmental protection authorities shall, under Article 6 of these Measures and the classification administration list of pollution discharge licensing for fixed pollution sources, determine and announce the issuing environmental protection authorities responsible for accepting the applications for pollutant discharge permits in their respective administrative regions, application procedures, and other relevant matters.

If a region decides to subject part industries to pollutant discharge permitting administration in advance as required for the improvement of environmental quality, the provincial environmental protection authority in the region shall do so after filing with the Ministry of Environmental Protection and make an announcement.

Article 24 A pollutant discharging entity that has already been established and discharged pollutants before the time limit as provided in the classification administration list of pollution discharge licensing for fixed pollution sources shall apply for a pollutant discharge permit within the time limit; and a pollutant discharging entity established after the time limit shall do so before launching the production facilities or discharging pollutants.

Article 25 A pollutant discharging entity under priority administration shall disclose its undertaking, basic information, and permitted items under the purported application to the public before submitting the application materials for pollutant discharge permitting. The disclosure shall be made through the National Pollution Discharge Permits Administration Information Platform or in any other manner easily accessible to the public, and the disclosure shall not last less than five working days.

Article 26 A pollutant discharging entity shall complete and submit its application for a pollutant discharge permit on the National Pollution Discharge Permits Administration

Information Platform and submit the written application package generated through the National Pollution Discharge Permits Administration Information Platform to the issuing environmental protection authority.

The application package shall include the following:

(1) The application form for a pollutant discharge permit, mainly containing: the basic information of the pollutant discharging entity; main production facilities, main products and capacity, and main and accessory raw materials; exhaust gas, waste water, and other pollutant generating and discharging links and pollution prevention and control facilities; locations and number of the outlets under the application, discharging manner, and discharging destination; the types of pollutants discharged under the application by outlets, production facilities or workshops, pollutant concentrations, and quantity of pollutant discharged; and governing discharging standards.

(2) The self-monitoring plan.

(3) The undertaking signed or sealed by the legal representative or principal person in charge of the pollutant discharging entity.

(4) Statements regarding the standardization of outlets made by the pollutant discharging entity.

(5) The approval document number for the construction project environmental impact assessment document, or the supporting documents relating to the disposition, rectification or regulation conducted by the local people's government according to the relevant provisions to the extent of meeting the requirements.

(6) The form of statements of the information disclosure before the application for a pollutant discharge permit.

(7) An operating and managing entity of centralized sewage treatment facilities shall also provide the scope of sewage received, the list of sewage receiving or discharging entities, pipe networks, final destination of discharge, and other materials.

(8) If, for a construction, reconstruction or expansion project of a pollutant discharging entity, upon the implementation of these Measures the total quantity control indicators of the discharge of priority pollutants is obtained through substitution or reduction by maintaining or cutting the quantity of pollutants discharged, and the pollutant discharging entity alienating the total quantity control indicators of the discharge of priority pollutants has already obtained a pollutant discharge permit, providing the materials relating to the completion of the modification of the pollutant discharge permit by the pollutant discharging entity alienating the total quantity control indicators of the discharge of priority pollutants.

(9) Other materials as required by any law, regulation or rules.

The pollutant discharging entity shall indicate main production facilities, main products and capacity, or any other registration items involving a trade secret.

Article 27 The issuing environmental protection authority shall, upon receipt of the application package submitted by a pollutant discharging entity, review the integrity and standard compliance of the materials and process it according to the following

circumstances:

(1) if no pollutant discharge permit is required under these Measures, notify the pollutant discharging entity forthwith or within five working days that no permit is required.

(2) if the application is outside its remit, decide not to grant acceptance and notify the pollutant discharging entity to apply to the authority having the issuing power, forthwith or within five working days.

(3) if the application package is incomplete or does not conform to the provisions, issue a notice forthwith or within five working days to inform the pollutant discharging entity of all the supplements and corrections, and if correction may be made forthwith, allow the pollutant discharging entity to do so.

(4) accept the application if the application is within its remit, the application materials are complete and conform to the provisions, or the pollutant discharging entity has submitted all the supplements and corrections as required.

The issuing environmental protection authority shall decide whether or not to accept the application on the National Pollution Discharge Permits Administration Information Platform and issue a notice of acceptance or rejection sealed and dated to the pollutant discharging entity.

The issuing environmental protection authority shall notify the pollutant discharging entity of the necessary supplements and corrections. If it fails to do that, it shall be deemed to have granted acceptance upon receipt of the written application materials.

Article 28 Under any of the following circumstances, the issuing environmental protection authority shall not issue a pollutant discharge permit:

(1) A region where construction is banned by any law or regulation.

(2) Any outdated technological equipment, or outdated products, of which the industry policy list issued by the comprehensive and macro economic regulation department of the State Council in conjunction with the other relevant departments of the State Council expressly order elimination or immediate elimination.

(3) Other circumstances under which the application shall be disapproved as provided by any law or regulation.

Article 29 The issuing environmental protection authorities shall review the application materials of the pollutant discharging entities and issue pollutant discharge permits to those that meet the following conditions:

(1) Obtaining as legally required the approval opinions on the construction project environmental impact assessment document, or the supporting documents relating to the disposition, rectification or regulation conducted by the local people's government according to the relevant provisions to the extent of meeting the requirements.

(2) Using or taking pollution prevention and control facilities or measures capable of meeting the concentration requirements for permitted discharge.

(3) The discharge concentrations conform to Article 16 of these Measures and the discharge quantity conforms to Article 17 of the same.

(4) The self-monitoring plan conforms to the relevant technical specifications.

(5) If, for a construction, reconstruction or expansion project of a pollutant discharging entity, and upon the implementation of these Measures the total quantity control indicators of the discharge of priority pollutants has been obtained through substitution or reduction by maintaining or cutting the quantity of pollutants discharged, the pollutant discharging entity alienating the total quantity control indicators of the discharge of priority pollutants has already completed the modification of the pollutant discharge permit.

Article 30 Where corresponding feasible pollution prevention and control technology is applied, or a pollutant discharging entity of a construction, reconstruction or expansion project applies the pollution prevention and control technology as required by the environmental impact assessment approval opinions, the issuing environmental protection authority may consider the pollution prevention and control facilities or measures used or taken by the pollutant discharging entity to be capable of meeting the concentration requirements for permitted discharge.

In a case not mentioned in the preceding paragraph, a pollutant discharging entity may provide monitoring data as proof. The monitoring data shall be obtained through monitoring equipment in conformity with the relevant monitoring and measurement certification provisions and technical specifications issued by the state; and for pollution treatment technology first applied in China, project experimental data shall be provided as proof.

The Ministry of Environmental Protection shall revise the guidelines on feasible pollution prevention and control technology in good time according to the execution of pollutant discharge across the country.

Article 31 The issuing environmental protection authority shall decide whether to grant a permit within 20 working days of accepting an application. The issuing environmental protection authority shall issue a pollutant discharge permit sealed by it to the pollutant discharging entity within ten working days after it is decided to grant the permit.

If the issuing environmental protection authority fails to make a decision within 20 working days, it may, with the approval of the person in charge of it, have an extension of ten working days and notify the pollutant discharging entity of the reasons of the extension.

If a hearing, inspection, testing, or expert assessment is required in accordance with the law, the time required shall not be included in any period as mentioned in this Article. The issuing environmental protection authority shall notify the pollutant discharging entity of the required time in writing.

Article 32 Where the issuing environmental protection authority decides to grant a permit, it must submit the approval results to the National Pollution Discharge Permits Administration Information Platform and obtain a nationally unified serial number for the pollutant discharge permit.

In the same case, it shall announce the basic information, permitting items, and its undertaking in the original and duplicate of the pollutant discharge permit in the National Pollution Discharge Permits Administration Information Platform.

If the issuing environmental protection authority decides to disprove the application, it shall prepare a written decision of disapproval, notify the pollutant discharging entity of the reasons for the disapproval in writing and its right to apply for administrative reconsideration, or bring an administrative action, in accordance with the law, and make an announcement in the National Pollution Discharge Permits Administration Information Platform.

Chapter IV Implementation and Supervision

Article 33 Tampering with pollutant discharge permits shall be prohibited. The illegal alienation of pollutant discharge permits by lease, lending, sale or any other means shall be prohibited. A pollutant discharging entity shall place its pollutant discharge permit in the place of its production and business convenient for public supervision.

Article 34 A pollutant discharging entity shall, according to the provisions in its pollutant discharge permit, install or use monitoring equipment in conformity with the relevant monitoring and measurement certification provisions and the technical specifications issued by the state, maintain the monitoring facilities as required, conduct self-monitoring, and keep original monitoring records.

A pollutant discharging entity subject to priority pollutant discharge permitting administration shall, according to the provisions in the pollutant discharge permit, install automatic monitoring equipment connected to the monitoring equipment of the environmental protection authorities.

If no feasible pollution prevention and control technology is applied, self-monitoring shall be heightened, and the feasibility that the pollution prevention and control technology reaches standard shall be assessed.

Article 35 A pollutant discharging entity shall keep records according to the requirements relating to ledger keeping in the pollutant discharge permit, based on the characteristics of its production and pollutant discharge, by outlets or fugitive emissions. The records shall mainly include the following:

- (1) The information on the operation of main production facilities relating to pollutant discharge; if an abnormal situation takes place, the reasons and the measures taken shall be recorded.
- (2) The information on the operation and management of pollution prevention and control facilities; if an abnormal situation takes place, the reasons and the measures taken shall be recorded.
- (3) The actual concentrations and quantity of pollutant discharged; if a pollutant is discharged by exceeding standards, the reasons and the measures taken shall be recorded.
- (4) Other information required to be recorded according to the relevant technical specifications.

The ledger shall be retained for at least three years.

Article 36 The actual quantity of pollutant discharged shall be calculated by the outlets of exhaust gas or sewage, production facilities or workshops, respectively, as specified in the pollutant discharge permit, according to the following methodology, in the following order:

(1) If automatic pollutant monitoring equipment in conformity with the provisions and monitoring specifications issued by the state has been installed and has been in use in accordance with the law, the calculation shall be made according to the automatic pollutant monitoring data.

(2) If the law does not require the installation of automatic pollutant monitoring equipment, the calculation shall be made according to the manual pollutant monitoring data in conformity with national provisions and monitoring specifications.

(3) If the methods as described in (1) and (2) herein do not apply, or automatic pollutant monitoring equipment has not been installed as legally required, or the automatic pollutant monitoring equipment does not conform to provisions, calculation shall be made according to the pollutant generating and discharging coefficients and material balance methodologies as provided for by the Ministry of Environmental Protection.

Article 37 A pollutant discharging entity shall prepare a pollutant discharge permit enforcement report according to the content and frequency of enforcement reporting as specified in the pollutant discharge permit.

Such a report may be made on a monthly, quarterly or annual basis.

A pollutant discharging entity shall complete, submit, and disclose to the public an annual pollutant discharge permit enforcement report on the National Pollution Discharge Permits Administration Information Platform and submit a hard-copy enforcement report generated through the National Pollution Discharge Permits Administration Information Platform to the issuing environmental protection authority. The hard-copy enforcement report shall be signed or sealed by the legal representative or principal person in charge.

A monthly or quarterly enforcement report shall at least include the following:

(1) Stating the actual concentrations and quantity of pollutant discharged and the standard compliance analysis according to the self-monitoring results.

(2) Stating the information that the pollutant discharging entity discharged pollutants by exceeding the standards, or on the abnormality of pollution prevention and control facilities.

An annual enforcement report may be substituted for the enforcement report for the current month or quarter, with the following added:

(1) The basic information of the pollutant discharging entity.

(2) The operational information of the pollution prevention and control facilities.

(3) The information of implementation of self-monitoring.

(4) The information of the keeping of the environmental management ledger.

(5) Information disclosure.

(6) The information of development and operation of the environmental management system of the pollutant discharging entity.

(7) The information on the enforcement of other provisions in the pollutant discharge permit.

The main content of a construction project completion environmental protection acceptance check report relating to pollutant discharge shall be contained by the pollutant discharging entity in the annual pollutant discharge permit enforcement report for the year when the

acceptance check of the project is completed.

When a pollution accident takes place, the pollutant discharging entity shall make a timely report according to the relevant laws, regulations and rules.

Article 38 A pollutant discharging entity shall be responsible for the authenticity and integrity of the submitted ledgers, monitoring data and enforcement reports and accept the supervisory inspection by the environmental protection authorities in accordance with the law.

Article 39 The environmental protection authority shall make a law enforcement plan and determine regulatory priorities and inspection frequency in law enforcement, taking into account the environmental credit records of a pollutant discharging entity.

In the supervisory inspection of a pollutant discharging entity, the environmental protection authority shall inspect the implementation of the permitting items as specified in the pollutant discharge permits in priority, by law enforcement monitoring, examination of ledgers and self-monitoring data, and other monitoring means, verify the authenticity of pollutant discharge data and enforcement reports, decide the compliance with the permitted concentrations and quantity of pollutants discharged, and inspect the implementation of environmental management requirements.

The environmental protection authorities shall enter the time, content and results of on-site inspections and punishment decisions on the National Pollution Discharge Permits Administration Information Platform and release the monitoring law enforcement information and the lists of pollutant discharging entities without pollutant discharge permits, or violating the provisions in the pollutant discharge permits, in the same according to the law.

Article 40 The environmental protection authority may, by means of government procurement of services, organize or commission a technical institution to provide technical support for pollutant discharge permitting administration.

The technical institution shall be responsible for the technical reports it submits, without charging a pollutant discharging entity any fees.

Article 41 The superior environmental protection authority may conduct supervisory inspection and guidance of the issuance of pollutant discharge permits by its subordinate environmental protection authorities and, if discovering any violation as described in Article 49 of these Measures, revoke it according to law.

Article 42 The public and the press are encouraged to supervise the pollutant discharge by pollutant discharging entities. A pollutant discharging entity shall disclose the relevant pollutant discharging information to the public in a timely manner and voluntarily accept public supervision.

A citizen, legal person, or any other organization that discovers any violation of these Measures by a pollutant discharging entity shall have the right report it to the environmental protection authority.

The environmental protection authority receiving the report shall process it in accordance with the law, provide feedback on the investigation results according to the relevant

provisions, and keep the informant confidential.

Chapter V Modification, Renewal and Revocation

Article 43 Where any of the following items relating to a pollutant discharging entity changes within the validity period of its pollutant discharge permit, it shall apply to the issuing environmental protection authority within the given period for modification of its pollutant discharge permit:

- (1) Within 30 working days from the date when the name, address, legal representative or principal person in charge, or any other basic information of the pollutant discharging entity contained in the original changes.
- (2) Within 30 working days from the date when the permitted items change by reason of the pollutant discharging entity.
- (3) If the pollutant discharging entity is required to conduct an environmental impact assessment for its construction, reconstruction, or expansion project on its existing site, within 30 working days between the obtainment of the environmental impact assessment approval opinions and the change of the pollutant discharge.
- (4) Within 30 working days pending the implementation of newly set or revised local or national pollutant discharge standards.
- (5) Within 30 working days from the change of the total quantity control indicators of the discharge of priority pollutants broken down and implemented in accordance with the law.
- (6) Within 30 working days pending the implementation of a plan for standard compliance within given periods as laid down by the local people's government according to the law.
- (7) Within 30 working days following the implementation of a contingency plan for heavily polluted air developed by the local people's government according to law.
- (8) Modification otherwise required by any law or regulation.

In a case as described in paragraph 1(3) of this Article, if the total quantity control indicators of the discharge of priority pollutants are obtained through substitution or reduction by maintaining or cutting the quantity of pollutants discharged, the pollutant discharging entity alienating the total quantity control indicators of the discharge of priority pollutants shall have already completed the modification of the pollutant discharge permit before the pollutant discharging entity applies for modification of its pollutant discharge permit.

Article 44 For the modification of a pollutant discharge permit, the following application materials shall be submitted:

- (1) An application for modification of the pollutant discharge permit.
- (2) The undertaking signed or sealed by the legal representative or principal person in charge of the pollutant discharging entity.
- (3) A photocopy of the original of the pollutant discharge permit.
- (4) Other materials relevant to the modification of pollutant discharge permitting items.

Article 45 The issuing environmental protection authority shall review the application materials of modification, and, if it decides to approve the modification, it shall specify and seal the content of the modification in the duplicate of the pollutant discharge permit and

make an announcement on the National Pollution Discharge Permits Administration Information Platform; and, in a case as mentioned in paragraph 1(1), Article 43 of these Measures, also issue a new original of the pollutant discharge permit.

In a case as set forth in paragraph 1, Article 43 of these Measures, the validity period of the pollutant discharge permit shall still begin to run from the date of issuing the former one; and in a case as specified in paragraph 2, Article 43 of these Measures, the validity period of the modified pollutant discharge permit shall begin to run from the date of modification.

In a case as mentioned in paragraph 1(1) of Article 43 of these Measures, the issuing environmental protection authority shall decide whether to approve modification within 10 working days of accepting the application; and in other cases as specified in paragraph 1 of Article 43 of these Measures, a decision as to whether to approve the modification shall be made within 20 working days from the date when the application was accepted.

Article 46 Where a pollutant discharging entity needs to renew its pollutant discharge permit it has lawfully obtained, it shall apply to the original issuing environmental protection authority 30 working days before the expiry of the pollutant discharge permit.

Article 47 An applicant for the renewal of its pollutant discharge permit shall submit the following materials:

- (1) An application for renewal of the pollutant discharge permit.
- (2) The undertaking signed or sealed by the legal representative or principal person in charge of the pollutant discharging entity.
- (3) A photocopy of the original of the pollutant discharge permit.
- (4) Other materials relevant to the renewal of pollutant discharge permitting items.

Article 48 The issuing environmental protection authority shall review the application materials for renewal under Article 29 of these Measures and decide whether to renew the permit within 20 working days of accepting the application.

If it decides to renew the permit, it shall issue a pollutant discharge permit sealed by it to the pollutant discharging entity, take back the original of the former one, and make an announcement in the National Pollution Discharge Permits Administration Information Platform.

Article 49 Under any of the following circumstances, the issuing environmental protection authority or its superior administrative agency may revoke the pollutant discharge permit and make an announcement on the National Pollution Discharge Permits Administration Information Platform:

- (1) Issuing a pollutant discharge permit beyond the statutory power.
- (2) Issuing a pollutant discharge permit in violation of statutory procedure.
- (3) An employee of the issuing environmental protection authority issuing a pollutant discharge permit by abusing power or neglecting his/her duties.
- (4) Granting administrative licensing to an applicant disqualified for application, or not meeting the statutory conditions.
- (5) Other circumstances in which a pollutant discharge permit may otherwise be revoked in

accordance with the law.

Article 50 Under any of the following circumstances, the issuing environmental protection authority shall undergo the formalities for the deregistration of the pollutant discharge permit and make an announcement on the National Pollution Discharge Permits Administration Information Platform:

- (1) An administrative license expires and has not been renewed.
- (2) The pollutant discharging entity terminates according to the law.
- (3) Deregistration is otherwise required.

Article 51 Where a pollutant discharge permit is missing or damaged, the pollutant discharging entity shall apply to the issuing environmental protection authority for another pollutant discharge permit within 30 working days; in the former case, it shall release a declaration of loss on the National Pollution Discharge Permits Administration Information Platform before the application; and in the latter case, it shall return the damaged pollutant discharge permit at the application.

The issuing environmental protection authority shall issue a new pollutant discharge permit within ten working days of receiving the application and make an announcement on the National Pollution Discharge Permits Administration Information Platform.

Chapter VI Legal Liability

Article 52 Where the environmental protection authority commits any of the following conducts during acceptance, issuance and regulation and law enforcement of pollutant discharge permits, its superior administrative agency or the supervisory authority shall order it to take corrective actions and take an administrative action against the person in charge directly liable or any other directly liable person according to law; if it is criminally punishable, the offender shall be held criminally liable in accordance with the law:

- (1) Failing to accept an application that meets the acceptance requirements in accordance with the law.
- (2) Failing to issue a pollutant discharge permit in accordance with the law, or failing to make a decision to issue a pollutant discharge permit within the statutory period, to one that meets the permitting conditions.
- (3) Issuing a pollutant discharge permit to one that does not meet the permitting conditions, or issuing a pollutant discharge permit beyond the statutory power.
- (4) Collecting fees without authorization when implementing pollutant discharge permit administration.
- (5) Failing to disclose the information regarding pollutant discharge permitting in accordance with the law.
- (6) Failing to discharge supervisory duties in accordance with the law, or conducting ineffective supervision, causing serious consequences.
- (7) Other circumstances in which liabilities should be investigated.

Article 53 Where a pollutant discharging entity conceals relevant information or provides false documents in applying for an administrative license, the issuing environmental

protection authority shall reject or disapprove the application and issue a warning to it.

Article 54 Anyone who, as in violation of Article 43 of these Measures, fails to apply for modification of its pollutant discharge permit in a timely manner, or anyone who, as in violation of Article 51 of these Measures, fails to apply for a new pollutant discharge permit in a timely manner, shall be ordered by the issuing environmental protection authority to take corrective actions.

Article 55 Where a priority pollutant discharging entity fails to disclose according to law or fails to faithfully disclose the relevant environmental information to the public, the environmental protection authority at or above the county level shall order it to disclose, impose a fine on it as legally required, and make an announcement.

Article 56 Where any of the following conduct is committed as in violation of Article 34 of these Measures, the environmental protection authority at or above the county level shall, under the Atmospheric Pollution Prevention and Control Law of the People's Republic of China and the Water Pollution Prevention and Control Law of the People's Republic of China, order the violator to take corrective actions and fine it 20,000 yuan up to 200,000 yuan; and, if it refuses to do so, order it to suspend business for rectification in accordance with the law:

- (1) Failing to monitor as required the industrial exhaust gas, or toxic and injurious air pollutants or water pollutants discharged, or failing to retain the original monitoring records.
- (2) Failing to install automatic air or water pollutant monitoring equipment as required, or failing to connect it to the monitoring equipment of the environmental protection authority as required, or failing to ensure the normal operation of the monitoring equipment.

Article 57 Where a pollutant discharging entity discharges any pollutant without a pollutant discharge permit under the following circumstances, the environmental protection authority at or above the county level shall, under the Atmospheric Pollution Prevention and Control Law of the People's Republic of China and the Water Pollution Prevention and Control Law of the People's Republic of China, order it to take corrective actions, carry out production in a limited manner, or suspend production for rectifications and fine it 100,000 yuan up to one million yuan; if the circumstances are serious, with the approval of the competent people's government, order it to shut down:

- (1) Failing to apply for a pollutant discharge permit as legally required, or discharging any pollutants pending an application for a pollutant discharge permit.
- (2) Failing to apply for the renewal of a pollutant discharge permit before its expiry, or discharging any pollutants notwithstanding the disapproval of the application for renewal by the issuing environmental protection authority.
- (3) Discharging any pollutants upon lawful revocation of its pollutant discharge permit.
- (4) Other circumstances as provided for by any law or administrative regulation.

Article 58 Where a pollutant commits any of the following violations of its pollutant discharge permit, the environmental protection authority at or above the county level shall, under the Environmental Protection Law of the People's Republic of China, the Atmospheric Pollution Prevention and Control Law of the People's Republic of China, and the Water Pollution

Prevention and Control Law of the People's Republic of China, order it to take corrective actions, carry out production in a limited manner, or suspend production for rectifications and fine it 100,000 yuan up to one million yuan; if the circumstances are serious, with the approval of the competent people's government, order it to shut down:

(1) Discharging any water or air pollutants in excess of the discharge standard or the total quantity control indicators of the discharge of priority air or water pollutants.

(2) Discharging any air pollutants furtively, or by tampering with or forging monitoring data, suspending production for the purpose of evading on-site inspection, opening emergency discharge channels under non-emergent conditions, operating air pollution prevention and control facilities in an abnormal manner, or any other means of evading regulation.

(3) Discharging any water pollutants through drainage wells, drainage pits, ditches, or karst caves, or by laying any concealed pipeline without authorization, tempering with or forging monitoring data, operating water pollution prevention and control facilities in an abnormal manner, or any other means of evading regulation.

(4) Other circumstances of discharging pollutants in violation of the pollutant discharge permit.

Article 59 Where a pollutant discharging entity has been fined and ordered to take corrective actions due to illegally discharging any air or water pollutants, and the administrative agency making the punishment decision organizes a re-inspection and discovers that it continues to illegally discharge the air or water pollutants or refuses or obstructs the re-inspection, the administrative agency making the punishment decision may impose on it a fine in the amount of the former fine per diem consecutively from the day after ordering it to take corrective actions.

Article 60 Where a pollutant discharging entity undergoes any abnormal conditions as specified in paragraph 1(2) and (3) of Article 35, or paragraph 4(2) of Article 37, of these Measures, reports them to the issuing environmental protection authority in a timely manner, and takes voluntary measures to eliminate or mitigate the harmful consequences as a result of the violations, the environmental protection authority at or above the county level shall give it a mitigated penalty under the Administrative Punishment Law of the People's Republic Of China.

The pollutant discharging entity shall state the circumstances, as mentioned in paragraph 1, in the corresponding quarterly or monthly enforcement report.

Chapter VII Supplemental Provisions

Article 61 When pollutant discharge permits are to be issued for the first time, if a pollutant discharging entity that has been in production and operation before the implementation of these Measures falls under any of the following conditions, undertakes to take corrective actions, and prepares a correction plan, the environmental protection authority may issue it a pollutant discharge permit and, specify in the permit its problem, the content of the corrective action it has undertaken to take, and the period of the corrective action.

(1) A construction, reconstruction, or expansion project before the implementation of these

Measures does not meet the condition as described in Article 29(1) of these Measures.

(2) Failing to meet the condition as described in Article 29(2) of these Measures.

In the former case, the issuing environmental protection authority shall, under Article 23 of the Regulation on the Administration of Construction Project Environmental Protection, order the pollutant discharging entity to take corrective actions within a specific period and impose a fine on it.

In the latter case, the issuing environmental protection authority shall, under Article 99 of the Atmospheric Pollution Prevention and Control Law of the People's Republic of China, or Article 83 of the Water Pollution Prevention and Control Law, order the pollutant discharging entity to take corrective actions, carry out production in a limited manner, or suspend business for rectifications, and impose a fine on it.

The content of the corrective action, or that of production in a limited manner or suspension of business for rectifications, which the issuing environmental protection authority orders, as mentioned in paragraphs 2 and 3 of this Article shall be the same as the content of the corrective action contained in the pollutant discharge permit as set forth in paragraph 1 of this Article; and the period of the corrective action, or that of production in a limited manner or suspension of business for rectifications, which the issuing environmental protection authority orders, as mentioned in paragraphs 2 and 3 of this Article shall be the same as the period of the corrective action contained in the pollutant discharge permit as set forth in paragraph 1 of this Article.

The period of corrective action contained in the pollutant discharge permit as set forth in paragraph 1 of this Article shall be three to six months and may not extend beyond one year. During the period of corrective action, production in a limited manner, or suspension of business for rectifications, the pollutant discharging entity shall discharge the pollutants according to the permit and implement the self-monitoring, ledger keeping and enforcement report rules, and the issuing environmental protection authority shall tighten supervisory inspection according to the provisions in the permit.

Article 62 Where a pollutant discharging entity accomplishes its task for the corrective actions at, or has done so before, the expiry of the period of the corrective actions contained in the pollutant discharge permit as set forth in paragraph 1, Article 61 of these Measures, it may apply to the issuing environmental protection authority for modification of its pollutant discharge permit, which the issuing environmental protection authority shall approve under Chapter V of these Measures.

If the pollutant discharging entity still does not meet the permitting conditions at the expiry of the period of the corrective action contained in the pollutant discharge permit as set forth in paragraph 1, Article 61 of these Measures, the issuing environmental protection authority shall, under Article 99 of the Atmospheric Pollution Prevention and Control Law of the People's Republic of China, or Article 83 of the Water Pollution Prevention and Control Law, or Article 23 of the Regulation on the Administration of Construction Project Environmental Protection, make a proposal, request the people's government having the approval power

to order its shutdown, and deregister its pollutant discharge permit according to Article 50 of these Measures.

Article 63 Where a pollutant discharge permit issued under local rules before the implementation of these Measures remains effective, the environmental protection authority issuing it shall enter its data on the National Pollution Discharge Permits Administration Information Platform and obtain a serial number for it; and if it has expired, the pollutant discharging entity shall apply for a pollutant discharge permit subject to these Measures.

Article 64 The format of the pollutant discharge permits in Article 12 of these Measures, the standard text of the undertaking in Article 20, and the format of the application form for a pollutant discharge permit in Article 26 of these Measures shall be developed by the Ministry of Environmental Protection.

Article 65 For the purpose of these Measures, "pollutant discharge permitting" means the environmental administration rules by which the environmental protection authorities, on the application and undertaking by pollutant discharging entities, in the form of issuing the legal documents of pollutant discharge permits, regulate and restrict pollutant discharge in accordance with the laws and regulations, specify the requirements for environmental administration, and subject pollutant discharging entities to regulatory law enforcement according to pollutant discharge permits.

Article 66 For the purpose of these Measures, "principal person in charge" means the person in charge who exercises the power on behalf of the unincorporated entity according to the laws and administrative regulations.

Article 67 For a pollutant discharging entity involving any national secret, the application for and its acceptance, review, issuance, modification, renewal, deregistration, revocation, and re-issuance as a result of loss of pollutant discharge permits shall be governed by the confidentiality provisions.

Article 68 These Measures shall come into force upon issuance.

9. Directory of National Hazardous Wastes

Article 1 This Directory is developed under the relevant provisions of the Law of the People's Republic of China on the Prevention and Control of Environmental Pollution by Solid Wastes.

Article 2 The solid wastes (including liquid wastes) under one of the following circumstances shall be included in this Directory:

(1) They have such one or more hazardous characteristics as corrosivity, toxicity, ignitability, reactivity, and infectivity, among others.

(2) They have possible hazardous characteristics, are likely to cause adverse effect on the environment or personal health, and shall be subject to the administration as hazardous wastes.

Article 3 Medical wastes are hazardous wastes. Medical wastes shall be classified according to the Medical Wastes Classification Directory.

Article 4 Chemicals included in the Hazardous Chemicals Directory are hazardous wastes after they are abandoned.

Article 5 The hazardous wastes included in the List of Hazardous Wastes under Exemption Administration, an Annex to this Directory, may be subject to exemption administration according to the provisions of the exempted contents, at the exemption links listed and when the corresponding exemption conditions are met.

Article 6 The nature of the mixture of hazardous wastes and other fixed wastes, and wastes after the disposal of hazardous wastes shall be determined according to the identification standards for hazardous wastes as prescribed by the state.

Article 7 The relevant terms in this Directory shall have the following meanings:

(1) “Waste type” means the classification conducted for hazardous wastes in light of the actual situation of China on the basis of the categories classified under the Basel Convention on the Control of Trans-Boundary Movements of Hazardous Waste and Their Disposal.

(2) “Industry source” means the industry from which hazardous wastes are generated.

(3) “Waste code” means the sole code of the hazardous waste, with 8 digits, of which the first to the third digits are the code of the industry from which hazardous wastes are generated (determined according to the National Industries Classification, GB/T 4754-2011), the fourth to the six digits are the sequence code of the hazardous wastes, and the seventh to the eighth digits are the code for the classification of the hazardous wastes.

(4) “Hazardous characteristics” means corrosivity (C), toxicity (T), ignitability (I), reactivity (R), and infectivity (In).

Article 8 Where whether solid wastes have hazardous characteristics is uncertain, the identification standards and methods for hazardous wastes as prescribed by the state shall be adopted for identification.

Wastes identified to have hazardous characteristics are hazardous wastes. Their categories shall be determined according to their main injurious ingredients and hazardous characteristics and these wastes shall be subject to classification administration according to the code “900-000- × ×” (× × is the category code of hazardous waste).

Wastes identified to have no hazardous characteristics are not hazardous wastes.

Article 9 This Directory shall come into force on August 1, 2016. The Directory of National Hazardous Wastes (Order No. 1 of the Ministry of Environmental Protection and the National Development and Reform Commission) issued by the Ministry of Environmental Protection and the National Development and Reform Commission on June 6, 2008 shall be concurrently repealed.

Annex: Directory of National Hazardous Wastes (Omitted, Chinese only)

(Omitted, Chinese only)

12. Provisions of Marine Environmental Protection of Qingdao Municipality

(Omitted, Chinese only)

Chapter VI Full Texts of Judicial Interpretations Relevant to Marine Pollution

1. Provisions of the Supreme People's Court on Several Issues Concerning the Trial of Cases of Disputes over Compensation for Vessel-induced Oil Pollution Damage

(Interpretation No.14 [2011] of the Supreme People's Court)

To correctly try cases of disputes over compensation for vessel-induced oil pollution damage, and in light of the judicial practices, these Provisions are formulated pursuant to the General Principles of the Civil Law of the People's Republic of China, the Tort Law of the People's Republic of China, the Marine Environment Protection Law of the People's Republic of China, the Maritime Law of the People's Republic of China, the Civil Procedure Law of the People's Republic of China, the Special Maritime Procedure Law of the People's Republic of China, other relevant laws and regulations, and the international treaties which the People's Republic of China has concluded or acceded to.

Article 1 These Provisions shall apply when the people's courts try cases of disputes over compensation for vessel-induced oil pollution damage as involved in oil pollution incidents of vessels that cause oil pollution damage or pose dangers of oil pollution damage in the territory or any other territorial sea of the People's Republic of China.

Article 2 Where a party concerned brings a lawsuit for the oil pollution damage caused by an oil tanker carrying persistent oil or applies for establishing a fund for limitation of liability for oil pollution damage, the maritime court at the place where the vessel-induced oil pollution incident occurs shall have jurisdiction over it.

Where, after a vessel-induced oil pollution incident caused by an oil tanker carrying persistent oil occurs without the territory or any other territorial sea of the People's Republic of China but causes actual oil pollution damage or poses dangers of oil pollution damage to the territory or any other territorial sea of the People's Republic of China, and a party concerned brings a lawsuit for damage caused by the vessel-induced oil pollution incident or applies for establishing a fund for limitation of liability for oil pollution damage, the maritime court at the place where the oil pollution damage is done or oil pollution preventive measures are taken shall have jurisdiction over it.

Article 3 When oil has escaped from two or more vessels, and pollution damage results therefrom, if the party who suffers the damage requests that the owners of all vessels

involved undertake the liability for compensation, the owners of all vessels involved shall undertake their respective liability for compensation if the damage is reasonably separable according to the quantity of oil leaked, the harm caused by their oil and other relevant factors; if the damage is not reasonably separable, the owners of all vessels involved shall be jointly and severally liable, unless exonerated by law.

Where the owners of all vessels involved are jointly and severally liable for the damage, they shall determine the amount of compensation of each one of them according to their respective liability. If it is difficult to determine who undertakes a bigger liability, they shall undertake the liability for compensation evenly. Where any owner pays more than the payable amount, it has the right of recourse against the owners of other vessels involved.

Article 4 If oil pollution damage is caused by oil which has escaped as a result of a collision between vessels in contributory negligence, the party who suffers the damage may request that the owner(s) of the vessel(s) from which the oil has escaped undertake all the liabilities for compensation.

Article 5 If oil pollution damage is done due to the persistent oil carried by oil tankers, the limits of liability shall be determined according to the Regulation on the Prevention and Control of Vessel-induced Pollution to the Marine Environment and the International Convention on Civil Liability for Oil Pollution Damage (1992).

If oil pollution damage is caused by non-persistent fuel oil carried by oil tankers or by fuel oil carried by vessels other than oil tankers, the limits of liability shall be determined according to the provisions of the Maritime Law on the limits of liability for maritime claims.

Article 6 If it is proved that the oil pollution damage is resulted from an act or omission done by the vessel owner with intent to cause damage or with knowledge that such damage would probably occur, the owner's claim for limiting its liability shall not be upheld by the people's court.

Article 7 If the oil pollution damage is caused by the vessel owner with intent, the claim of the party, who suffers the damage, for compensation against the insurer of the liability for oil pollution damage or the party providing financial security shall not be upheld by the people's court.

Article 8 Where the party who suffers the damage directly brings a lawsuit against the insurer of the liability for oil pollution damage or the party providing financial security, the insurer or the party providing financial security may defend on the claim of the party who suffers the damage against the vessel owner.

Unless the oil pollution damage is caused by the vessel owner with intent, the defense of the insurer or the party providing financial security on the claim of the party who suffers the damage against the vessel owner shall not be upheld by the people's court.

Article 9 The compensation for vessel-induced oil pollution damage shall cover:

1. Costs of preventive measures to prevent or minimize vessel-induced oil pollution damage, and further loss or damage caused by preventive measures;
2. Property damage caused outside the vessel carrying oil by the vessel-induced oil pollution

incident, and loss of earnings caused therefrom;

3. Loss of earnings caused by environmental damage resulting from oil pollution; and

4. Costs of reasonable measures which have been taken or are about to be taken to restore the contaminated environment.

Article 10 The people's courts shall reasonably determine the costs of preventive measures and the further loss or damage caused by preventive measures according to the polluted area, degree of pollution, quantity of oil that has escaped, reasonability of preventive measures, number of persons assigned to clean out oil, costs of equipment put into use, etc.

Article 11 Expenses incurred for taking measures to prevent pollution from a vessel in distress shall be treated as costs of preventive measures if the major purpose of such operations is merely to prevent or minimize oil pollution damage.

If the said operations are for the dual purposes of salvaging the vessel in distress and salvaging other property and preventing or minimizing oil pollution damage, the costs of preventing measures and the costs of salvaging measures shall be reasonably separated according to the proportion between the major purpose and the minor purpose. Where there is no reasonable basis to decide which purpose is major, the expenses shall be evenly distributed. Expenses incurred after the danger of pollution is eliminated shall not be treated as costs of preventive measures.

Article 12 If the oil that has escaped from a vessel contaminates other vessels, fishing gears, breeding devices or other property, and the party who suffers the damage claims for reasonable expenses on cleaning and restoring contaminated properties against the party liable for pollution damage, the people's court shall uphold it.

If it is unable to clean or restore the contaminated properties or the cleaning or restoring costs are more than the value thereof, the claim of the party, who suffers the damage, against the party liable for pollution damage for reasonable expenses on replacing the properties shall be upheld by the people's court, but the compensation shall be reasonably reduced according to the actual service life in proportion to the expected service life of the contaminated properties.

Article 13 If the normal production and operating activities of the party who suffers the damage are disrupted due to property losses resulting from vessel-induced oil pollution, its loss of earnings shall be calculated according to the reasonable period for cleaning, restoring or replacing such property.

Article 14 Where any entity or individual engaged in marine fishery, costal tourism or other operations on the sea claims for loss of earnings suffered from environmental pollution, and the claimant meets all of the following conditions and hence proves a direct causality between the loss of earnings and environment pollution, the people's court shall uphold the claim:

1. The claimant's production and operating activities are located in or near the contaminated area;

2. The claimant's production and operating activities mostly depend on the contaminated

resources or coastlines;

3. It is difficult for the claimant to find alternative resources or business opportunities; and

4. The claimant's production and operating activities are in a relatively stable sector in the local area.

Article 15 If the party who suffers the damage claims for loss of earnings from the maritime aquatic breeding or maritime fishery business operated without the approval of the competent administrative department, the people's court shall not uphold it, but its claim for reasonable costs on cleaning, repairing or replacing the breeding or fishery devices shall be upheld.

Article 16 If the party who suffers the damage claims for loss of earnings resulting from pollution of its property or environment pollution, the earnings shall be its average net income during the same period over the last three years minus its actual net income during the period of loss, in reasonable consideration of other factors affecting its income.

If it is impossible to determine the loss of earnings under the preceding paragraph, the statistics or data of the governmental departments can be used as a reference, or the average income of business operators of the same category in the same area during the same period can be considered to reasonably determine it.

If the party who suffers the damage claims for costs of reasonable measures taken to avoid loss of earnings, the claim shall be upheld by the people's court only to the extent of not exceeding the amount of avoided loss of earnings.

Article 17 If a vessel-induced oil pollution incident causes environmental damage, the compensation for environmental damage shall be limited to expenses on reasonable measures which have been taken or are about to be taken to restore the environment. Such expenses include reasonable expenses on monitoring, assessment and research.

Article 18 If the party who suffers the damage claims for maritime lien against a vessel with civil liability insurance for vessel-induced oil pollution damage or other financial security in force, the people's court shall not uphold it.

Article 19 Claims for compensation for oil pollution damage caused by non-persistent fuel oil carried by oil tankers or fuel oil carried by vessels other than oil tankers shall be governed by the provisions of the Maritime Law of the People's Republic of China on the limitation of liability for maritime claims.

Where a same maritime incident causes oil pollution damage mentioned in the preceding paragraph and other damage for which the liability can be limited under Article 207 of the Maritime Law of the People's Republic of China, the vessel owner's claim for limiting its liability for compensation within a same limit under Chapter XI of the Maritime Law of the People's Republic of China shall be upheld by the people's court.

Article 20 If the vessel owner has taken measures such as floating, clearing off or eliminating the harm of the vessel which is sunken, grounded or in distress for the purpose of preventing pollution damage caused by non-persistent fuel oil carried by oil tankers or fuel oil carried by vessels other oil tankers, the owner's claim for limiting its liability for the costs thereof

under Chapter XI of the Maritime Law of the People's Republic of China shall not be upheld by the people's court.

Article 21 For oil pollution damage caused by persistent oil carried by oil tankers, if the vessel owner, insurer of liability for vessel-induced oil pollution damage or party providing financial security claims for limiting its liability, a fund for limitation of liability for oil pollution damage shall be constituted.

If the fund is constituted with cash, the amount of fund shall be the limit for compensation as prescribed in the Regulation on the Prevention and Control of Vessel-induced Pollution to the Marine Environment and the International Convention on Civil Liability for Oil Pollution Damage (1992). If the fund is constituted in the form of security, the amount of security shall be the amount of fund plus the interest incurred during the constitution of the fund.

Article 22 If the vessel owner, insurer of liability for vessel-induced oil pollution damage or party providing financial security applies for constituting a fund for limitation of liability for oil pollution damage, but an interested party raises a demur against the vessel owner's claim for limiting its liability, such a demur shall be raised in writing within the time limit specified under Paragraph 1, Article 106 of the Special Maritime Procedure Law of the People's Republic of China, but it does not affect the constitution of the fund.

Article 23 For oil pollution damage caused by persistent oil carried by oil tankers, if no interested party raises any demur against the vessel owner's claim for limiting its liability within the prescribed time, after the fund for limitation of liability for oil pollution damage is constituted, the maritime court shall lift the preservation measures taken against the vessel owner's property or return the security provided for lifting the preservation measures.

Article 24 For oil pollution damage caused by persistent oil carried by oil tankers, if an interested party raises a demur against the vessel owner's claim for limiting its liability within the prescribed time, the people's court shall, if deciding that the vessel owner is entitled to limit its liability for compensation, lift the preservation measures taken against the vessel owner's property or return the security provided for lifting the preservation measures after the decision comes into force.

Article 25 For oil pollution damage caused by persistent oil carried by oil tankers, if the party who suffers the damage claims in its lawsuit that the vessel owner has no right to limit its liability for compensation, the maritime court may firstly try the case about dispute over whether the vessel owner is entitled to limit its liability and make a judgment thereon.

Article 26 For oil pollution damage caused by persistent oil carried by oil tankers, if the party who suffers the damage fails to apply for the registration of the creditor's right within the prescribed time, it shall be construed that the party has abandoned the right to receive compensation from the fund for limitation of liability for oil pollution damage.

Article 27 If the fund for limitation of liability for oil pollution damage is insufficient to pay off the compensation for oil pollution damage, the fund shall be distributed among the claimants in proportion to the amounts of their established claims.

Article 28 For oil pollution damage caused by persistent oil carried by oil tankers, if the vessel

owner, the insurer of the liability for oil pollution damage or the party providing financial security shall apply for constituting a fund for limitation of liability for oil pollution damage, or the party who suffers the damage applies for registration of creditor's rights and compensation, the Special Maritime Procedure Law of the People's Republic of China and the relevant judicial interpretations shall apply in the absence of governing provisions in these Provisions.

Article 29 Where the vessel owner, the insurer of the liability for oil pollution damage or the party providing financial security has paid the compensation before the fund for limitation of liability for oil pollution damage is distributed, it may apply for subrogation against the fund in writing up to the amount that the compensated person is entitled to.

The maritime court shall, after accepting the subrogation application, notify all interested parties claiming against the fund for limitation of liability for oil pollution damage in writing. Any interested party shall raise a demur, if any, against the subrogation applicant within 15 days after being notified.

If, upon examination, the maritime court decides to establish the applicant's right of subrogation, it shall make a ruling thereon; if the application lacks factual or legal basis, the maritime court shall rule to reject it. If the applicant refuses to accept the ruling, it may make an appeal within 10 days after receiving the written ruling.

Article 30 Claims in respect of expenses reasonably paid or sacrifices reasonably made by the owner of a vessel voluntarily to prevent or minimize pollution damage against the fund for limitation of liability for oil pollution damage shall be upheld by the people's courts and be handled analogically under Paragraph 2 or 3, Article 29 of these Provisions.

Article 31 For the purpose of these Provisions:

1. "Vessels" means any sea-going ship and any seaborne craft of any type whatsoever not used for military purposes or official duties of the government, including oil tankers and vessels other than oil tankers of international and domestic voyages. In particular, oil tankers refer to ships built or rebuilt to convey persistent oil in bulk and other ships actually carrying oil in bulk as cargo.
2. "Oil" means any hydrocarbon mineral oil and the residuum thereof, limited to persistent oil carried on board a vessel as cargo and persistent or non-persistent fuel oil carried in the bunkers of such a vessel, not including non-persistent oil carried on board a vessel as cargo.
3. "Vessel-induced oil pollution incident" means any occurrence or a series of occurrences causing oil pollution damage resulting from the escape of oil from the vessel or, if there is no escape of oil, posing serious and urgent dangers of oil pollution damage. A series of occurrences having the same origin shall be treated as a same incident.
4. "Insurer of the liability for oil pollution damage or party providing financial security" means the party providing insurance or financial security for a vessel from which oil has escaped or which directly poses dangers of oil pollution damage in a maritime incident.
5. "Fund for limitation of liability for oil pollution damage" refers to a liability limitation fund constituted by the owner of a vessel, the insurer of the liability for oil pollution damage or the

party providing financial security for oil pollution damage caused by oil tankers carrying persistent oil upon the application thereof.

Article 32 For any discrepancy between any judicial interpretation issued by the Supreme People's Court before these Provisions come into force and these Provisions, the latter shall prevail.

Where a final judgment has been made for a case before these Provisions come into force, the people's court shall not apply these Provisions in the retrial of the case.

2. Provisions of the Supreme People's Court on Several Issues Concerning the Trial of Marine Natural Resources and Ecological and Environmental Damage Compensation Disputes

(Omitted, Chinese only)

3. Provisions of the Supreme People's Court on Several Issues Concerning the Application of Law in the Trial of Disputes over Liability for Environmental Torts

(Adopted at the 1644th Session of the Judicial Committee of the Supreme People's Court on February 9, 2015, Interpretation No. 12 [2015], SPC)

For the purpose of correctly trying the disputes over liability for environmental torts, this Interpretation is developed in accordance with the provisions of the Tort Law of the People's Republic of China, the Environmental Protection Law of the People's Republic of China, the Civil Procedure Law of the People's Republic of China, and other laws, and in light of the judicial practice.

Article 1 For damage caused by environmental pollution, a polluter shall bear tort liabilities regardless of fault. If the polluter claims no liability on the ground that the discharge of pollutants complies with national or local pollutant discharge standards, the people's court shall not support such a claim.

The circumstances under which a polluter's liability may be exempted or mitigated shall be governed by the provisions of the marine environment protection law, water pollution prevention and control law, air pollution prevention and control law, and other separate laws on environmental protection; if there are no provisions in the relevant separate environmental protection laws, the tort law shall apply.

Article 2 Where two or more polluters jointly commit pollution and damages are caused, and the aggrieved party requests the polluters' assumption of joint and several liability in accordance with Article 8 of the Tort Law, the people's court shall support such a request.

Article 3 Where two or more polluters commit separate pollutions, which result in a same damage, and the pollution of each polluter is sufficient to cause the entire damage, if the aggrieved party requests that the polluters assume joint and several liabilities in accordance with Article 11 of the Tort Law, the people's court shall support such a request.

Where two or more polluters commit separate pollution, which results in a same damage,

and the pollution of each polluter is insufficient to cause the entire damage, if the aggrieved party requests the polluters' assumption of liability in accordance with Article 12 of the Tort Law, the people's court shall support such a request.

Where two or more polluters commit separate pollutions, which result in a damage, and the pollution of certain polluter is sufficient to cause the entire damage, and the pollution of certain polluter only causes partial damage, if the aggrieved party requests that the polluter whose pollution is sufficient to cause the entire damage to assume joint and several liability for the damage caused jointly with other polluters and be responsible for the entire damage in accordance with Article 11 of the Tort Law, the people's court shall support such a request.

Article 4 Where two or more polluters cause pollution to the environment, the people's court shall determine the liability of each polluter based on the type, emissions and hazard of pollutants, and whether the polluters have any pollutant discharge license, have exceeded the pollutant discharge standards, or exceeded the indicators for the control of total emissions of major pollutants, etc.

Article 5 Where the aggrieved party files a lawsuit against a polluter and a third party separately or jointly in accordance with Article 68 of the Tort Law, the people's court shall accept the lawsuit.

Where the aggrieved party requests that the third party be responsible for compensation, the people's court shall determine the corresponding compensation that shall be assumed by the third party based on its extent of fault.

Where a polluter claims non-assumption or mitigation of liability on the ground that the third party's fault causes environmental pollution and damage, the claim shall not be supported by the people's court.

Article 6 Where the aggrieved party claims compensation in accordance with Article 65 of the Tort Law, the aggrieved party shall provide evidentiary materials proving the following facts:

- (1) The polluter discharged the pollutants.
- (2) Damage has been caused to the aggrieved party.
- (3) The pollutants discharged by the polluter or their secondary pollutants are relevant to the damage.

Article 7 Where the polluter provides evidence to prove any of the following circumstances, the people's court shall determine that the polluter's pollution has no causal relationship with the damage.

- (1) The discharged pollutants could not possibly have caused the damage.
- (2) The discharged pollutants that may cause the claimed damage have not reached the place where the damage occurred.
- (3) The damage has occurred before the discharge of the claimed pollutants.
- (4) Any other circumstance under which it can be proven that there is no causal relationship between the pollution and the claimed damage.

Article 8 For the special issues on the ascertainment of facts in environmental pollution

cases, a forensic identification institution with the relevant qualification may be authorized to issue identification opinions or an institution recommended by the environmental protection department of the State Council may issue an inspection report, testing report, assessment report or monitoring data.

Article 9 Where a party applies for notifying one to two persons with expertise to appear in court to review the identification opinion, or professional issues such as the determination of pollutants, the damages, and the casual relationship, etc., it shall be approved by the people's court. If the applicant does not file such an application and the people's court deems it necessary, it may make an interpretation.

The opinions offered by a person with expertise in court that have been cross-examined by the parties may be taken as the basis for determining case facts.

Article 10 An environmental pollution incident investigation report, inspection report, testing report, assessment report or monitoring data issued by the department with environmental protection supervision and administration functions or the institution authorized by it may be taken as the basis for determining case facts after being cross-examined by the parties concerned.

Article 11 For an environmental pollution incident which occurs in a sudden or lasts for a relatively short period, if evidence is likely to be lost or will be hard to be obtained later, and a party or an interested party applies for evidence preservation in accordance with Article 81 of the Civil Procedure Law, it shall be approved by the people's court.

Article 12 Where the respondent falls under any of the circumstances as set forth in Article 63 of the Environmental Protection Law, and a party or an interested party applies for preservation in accordance with Article 100 or 101 of the Civil Procedure Law, the people's court may render a ruling to order the respondent to immediately stop pollution or take pollution prevention and control measures.

Article 13 The people's court may, based on the claim of the aggrieved party and the specific case circumstances, rationally render a judgment to order the polluter to assume civil liabilities, including but not limited to the stopping the tortious act, removal of obstruction, elimination of danger, restoration to the original state, making an apology, and making compensation for losses.

Article 14 Where the aggrieved party requests restoration to the original state, the people's court may, in accordance with the law, render a judgment that the polluter shall assume the liability for restoring the environment, and at the same time, determine the expenses for restoring the environment that shall be borne by the defendant when it fails to perform the obligation of restoring the environment.

Where the polluter fails to perform the obligation of restoring the environment within the time limit determined in the valid judgment, the people's court may authorize someone else to restore the environment, and the required expenses shall be borne by the polluter.

Article 15 Where the aggrieved party files a lawsuit to request the polluter to make compensation for the property loss and personal damage caused by the pollution and

reasonable costs occurred for taking necessary measures to prevent the expansion of pollution and eliminate pollution, it shall be supported by the people's court.

Article 16 Any of the following circumstances shall be determined as a fraud prescribed in Article 65 of the Environmental Protection Law:

(1) The environmental impact assessment institution issues assessment documents that seriously deviate from facts although it is fully aware of the fact that the materials provided by the principal are false.

(2) The environmental monitoring institution or the institution engaging in the maintenance and operation of environmental monitoring equipment intentionally conceals the principal's discharging pollutants in excess of the discharge standards or indicators for the control of total major pollutant emissions.

(3) The institution engaged in the maintenance or operation of pollution prevention and control facilities intentionally fails to operate or operate in an irregular manner environmental monitoring equipment or pollution prevention and control facilities.

(4) The relevant institution commits any other fraudulent conduct in environmental service activities.

Article 17 Where the aggrieved party files a lawsuit to request the pollutant to stop pollution, remove obstruction or eliminate danger, it shall not be subject to the restriction of the limitation period as prescribed in Article 66 of the Environmental Protection Law.

Article 18 This Interpretation shall apply to the trial of civil cases on damage caused by environmental pollution and ecological destruction with the exception of environmental civil public interest lawsuits about which there are different provisions in any law or judicial interpretation.

This Interpretation shall not apply to the disputes over adjacent pollution infringements and disputes arising from pollution damage caused to laborers in work.

Article 19 After this Interpretation comes into force, its provisions shall apply to the cases of first and second instances not yet closed by the people's courts. The provisions of this Interpretation shall not apply to any case in which an effective judgment was rendered before this Interpretation comes into force and which is retried in accordance with the law after this Interpretation comes into force.

In the case of any discrepancy between this Interpretation and the judicial interpretations and regulatory documents issued previously by the Supreme People's Court, the latter shall no longer apply.

4. Provisions of the Supreme People's Court on Several Issues Concerning the Application of Law in the Conduct of Environmental Civil Public Interest Litigations

(Adopted at the 1,631st session of the Judicial Committee of the Supreme People's Court on December 8, 2014 and came into force on January 7, 2015; Interpretation No. 1 [2015] of the Supreme People's Court)

To correctly conduct environmental civil public interest litigations, this Interpretation is

developed in accordance with the provisions of the Civil Procedure Law of the People's Republic of China, the Tort Law of the People's Republic of China, the Environmental Protection Law of the People's Republic of China, and other relevant laws, and in light of the judicial practice.

Article 1 Where an authority or relevant organization as prescribed by law files a lawsuit against any conduct that pollutes the environment and damages the ecology, which has damaged the public interest or has the major risk of damaging the public interest, in accordance with the provisions of Article 55 of the Civil Procedure Law, Article 58 of the Environmental Protection Law, and other laws, if the provisions of item (2), (3) or (4) of Article 119 of the Civil Procedure Law are complied with, the people's court shall accept the lawsuit.

Article 2 A social organization, private non-enterprise entity, or foundation, among others, registered in the civil affairs administrative department of the people's government at or above the level of a districted city in accordance with laws and regulations may be determined as a social organization prescribed in Article 58 of the Environmental Protection Law.

Article 3 The civil affairs administrative department of the people's government at or above the level of a districted city, autonomous prefecture, league or region, prefecture-level city not divided into districts or a district of municipality directly under the Central Government may be determined as the “civil affairs administrative department of the people's government at or above the level of a districted city” prescribed in Article 58 of the Environmental Protection Law.

Article 4 Where a social organization's tenets and main business scope specified in its articles of association are to maintain the public interest and it engages in public environmental protection activities, it may be determined as “specially engages in public environmental protection activities” prescribed in Article 58 of the Environmental Protection Law.

The public interest involved in the lawsuit filed by a social organization shall be related to its tenets and business scope.

Article 5 Where no administrative or criminal punishment is imposed on a social organization due to any violation of law or regulation in its business activities within five years before filing a lawsuit, it may be determined as “has no record of violations of laws” prescribed in Article 58 of the Environmental Protection Law.

Article 6 An environmental civil public interest litigation shall be under the jurisdiction of the people's court at or above the intermediate level at the place where the conduct that pollutes the environment and damages the ecology takes place, the place where the damage occurs or the place of domicile of the defendant as the court of first instance.

Where the intermediate people's court deems it necessary, it may, after reporting to the higher people's court for approval, render a ruling to hand the environmental civil public interest litigation over which it has jurisdiction as the court of first instance to the basic people's court for trial.

Where the same plaintiff or different plaintiffs file an environmental civil public interest litigation against the same conduct that pollutes the environment and damages the ecology in two or more people's courts having jurisdiction respectively, the people's court that first docketed the case shall have jurisdiction; and when necessary, their mutual superior people's court shall designate jurisdiction.

Article 7 With the approval of the Supreme People's Court, a higher people's court may, according to the actual conditions of environmental and ecological protection within its jurisdiction, determine some intermediate people's courts within its jurisdiction to accept environmental civil public interest litigations as the court of first instance.

The higher people's court shall determine the areas where an intermediate people's court has jurisdiction over environmental civil public interest litigations.

Article 8 The following materials shall be submitted for filing of an environmental civil public interest litigation:

- (1) A written complaint in compliance with Article 121 of the Civil Procedure Law and its copies according to the number of defendants.
- (2) Preliminary certification materials that the defendant's conduct has damaged the public interest or has the major risk of damaging the public interest.
- (3) Where a social organization files a lawsuit, it shall submit its registration certificate, articles of association, annual work reports or annual inspection reports in the five consecutive years before filing the lawsuit, and its statement on no record of violations of laws and regulations to which its legal representative or person in charge affixes his or her signature and the official seal is affixed.

Article 9 Where the people's court deems that the claim filed by the plaintiff is insufficient to protect the public interest, it may explain to the plaintiff to modify its claim or increase such claims as ceasing the tortious act and restoring to the original state.

Article 10 The people's court shall, after accepting an environmental civil public interest litigation, serve the copies of the written complaint upon the defendant within five days as of the date of docketing the case, and announce the information on the acceptance of the case. Where any other authority or social organization that has the right to file a lawsuit applies for participating in the proceedings within 30 days after the announcement is made, and it meets the statutory conditions upon examination, the people's court shall list it as the co-plaintiff; and shall not grant the application if it is filed beyond the time limit.

Where a citizen, legal person or any other organization applies for participating in the proceedings on the ground of its or his personal or property damage, it or he shall be informed to file a separate lawsuit.

Article 11 A procuratorial organ, the department assuming environmental protection supervision and administration functions or any other authority, social organization, or enterprise or public institution may, in accordance with the provisions of Article 15 of the Civil Procedure Law, support a social organization in legally filing an environmental civil public interest litigation by such means as providing legal consulting, submitting written opinions

and assisting investigation and gathering of evidence.

Article 12 The people's court shall, within ten days after accepting an environmental civil public interest litigation, inform the department assuming environmental protection supervision and administration functions responsible for the defendant's conduct.

Article 13 Where the plaintiff requests the defendant to provide environmental information such as the names of its major pollutants, the discharge methods, the concentration and total volume of pollutants discharged, any discharge beyond the approved quota, and the construction and operation of pollution prevention and control installations, which shall be held by the defendant as provided for in any law, regulation or rule or is held as proved by evidence, but the defendant refuses to provide such information, if the plaintiff claims that the relevant facts are unfavorable to the defendant, the people's court may presume that the claim is supported.

Article 14 The people's court shall, when it deems necessary, conduct investigation and collect the evidence required for the conduct of an environmental civil public interest litigation. For a specialized issue that the plaintiff bears the burden of proof and is necessary for maintaining the public interest, the people's court may entrust a qualified identification expert to conduct identification.

Article 15 Where a party applies for notifying a person with expertise to appear in court to offer an opinion regarding an identification opinion issued by an identification expert or regarding a specialized issue such as the casual relationship, the methods of restoring the ecological environment, the expenses for restoring the ecological environment, and the loss of service functions from the period when the ecological environment is damaged to the restoration thereof, the people's court may grant such an application.

The cross-examined expert opinions as prescribed in the preceding paragraph may be taken as the basis for determining facts.

Article 16 The people's court shall not admit the evidence acknowledged and recognized by the plaintiff in litigation that are unfavorable for the plaintiff, if it is of the opinion that the evidence damages the public interest.

Article 17 In the conduct of an environmental civil public interest litigation, if the defendant raises a claim in the form of counterclaim, the people's court shall not accept such a claim.

Article 18 For any conduct that pollutes the environment and damages the ecology, which has damaged the public interest or has the major risk of damaging the public interest, the plaintiff may request the defendant to assume the civil liabilities including but not limited to the cessation of the tortious act, removal of the obstruction, elimination of the danger, restoration to the original state, compensation for losses, and apology.

Article 19 Where, for the purpose of preventing the occurrence and enlargement of damage to the ecological environment, the plaintiff requests the defendant to cease the tortious act, remove the obstruction, and eliminate the danger, the people's court may support such a request in accordance with law.

Where the plaintiff requests the defendant to assume the expenses incurred for taking

reasonable prevention and disposal measures so as to cease the tortious act, remove the obstruction and eliminate the danger, the people's court may support such a request in accordance with law.

Article 20 Where the plaintiff requests the restoration to the original state, the people's court may render a judgment in accordance with law that the defendant shall restore the ecological environment to the state and functions before the damage occurs. If complete restoration is impossible, the people's court may permit the adoption of alternative restoration methods.

The people's court may, when rendering a judgment that the defendant shall restore the ecological environment, determine the expenses for restoring the ecological environment that shall be borne by the defendant when it fails to perform the restoration obligation; or may directly render a judgment that the defendant shall assume the expenses for restoring the ecological environment.

The expenses for restoring the ecological environment include the expenses for preparing and implementing the restoration plan, monitoring, and supervision, among others.

Article 21 Where the plaintiff requests the defendant to pay expenses for the loss of service functions from the period when the ecological environment is damaged to the restoration thereof, the people's court may support such a request in accordance with law.

Article 22 Where the plaintiff requests the defendant to assume the inspection and identification expenses, reasonable attorney fee and other reasonable expenses for litigation, the people's court may support such a request in accordance with law.

Article 23 Where the expenses for restoring the ecological environment can hardly be determined or the identification expenses for determining the specific amount is evidently too high, the people's court may reasonably determine the aforesaid expenses in light of the extent and degree of environmental pollution and ecological destruction, the scarcity of the ecological environment, the difficulty to restore the ecological environment, the operating cost of pollution prevention and control equipment, the benefits obtained by the defendant out of the tortious act, the extent of fault, and other factors, and may refer to the opinions of the department assuming environmental protection supervision and administration functions, and expert opinions, among others.

Article 24 The expenses for restoring the ecological environment, the loss of service functions from the period when the ecological environment is damaged to the restoration thereof and other expenses that shall be assumed by the defendant according to the judgment rendered by the people's court shall be used to restore the damaged ecological environment.

The necessary expenses for investigation, taking evidence, expert consultation, inspection, and identification, among others, required in litigation by the plaintiff that loses any other environmental civil public interest litigation may be deducted from the aforesaid expenses in consideration of the actual circumstances.

Article 25 Where the parties to an environmental civil public interest litigation reach a mediation agreement or a settlement agreement by themselves, the people's court shall

announce the content of the agreement for no less than 30 days.

After the expiration of the announcement period, if the people's court deems upon examination that the content of the mediation agreement or settlement agreement does not damage the public interest, it shall issue a mediation paper. If the parties apply for withdrawing the case on the ground of reaching a settlement agreement, the people's court shall not grant such an application.

The mediation paper shall state the claim, basic case facts and the content of the agreement, and shall be disclosed.

Article 26 Where the plaintiff applies for withdrawing the case since all the claims thereof have been realized for the lawful performance of functions by the department assuming environmental protection supervision and administration functions, the people's court shall grant such an application.

Article 27 Where the plaintiff applies for withdrawing a lawsuit after the end of court debate, the people's court shall not grant the application, unless as prescribed in Article 26 of this Interpretation.

Article 28 Where, after the judgment of an environmental civil public interest litigation comes into force, any other authority or social organization that has the right to file a lawsuit concerning the same conduct that pollutes the environment and damages the ecology institutes a separate action, under any of the following circumstances, the people's court shall accept the case:

- (1) A ruling is rendered to dismiss the lawsuit filed by the plaintiff in the former case.
- (2) A ruling is rendered to grant the application filed by the plaintiff in the former case for withdrawing the case, unless as prescribed in Article 26 of this Interpretation.

Where, after the judgment on an environmental civil public interest litigation comes into force, there is any evidence proving any undiscovered damage when the former case is tried, and an authority or social organization that has the right to file a lawsuit institutes a separate action, the people's court shall accept the case.

Article 29 The filing of an environmental civil public interest litigation by any authority or social organization prescribed by law shall not affect the filing of an action by any citizen, legal person or any other organization that suffers from personal injury or property damage due to the same conduct that pollutes the environment and damages the ecology in accordance with the provisions of Article 119 of the Civil Procedure Law.

Article 30 Both the plaintiff that files a lawsuit concerning the same conduct that pollutes the environment and damages the ecology in accordance with the provisions of Article 119 of the Civil Procedure Law and the defendant are not required to offer evidence to prove the facts determined in a valid judgment of an environmental civil public interest litigation, unless the plaintiff has any objection to the facts and has any evidence to the contrary which suffices to overturn the judgment.

Where the plaintiff that files a lawsuit concerning the same conduct that pollutes the environment and damages the ecology in accordance with the provisions of Article 119 of

the Civil Procedure Law claims the application of the facts determined in a valid judgment of an environmental civil public interest litigation concerning whether the defendant falls under any circumstance where it should not be liable or its liability could be mitigated as provided for by any law or whether there is a casual relationship between its conduct and the damage, and the liability that shall be assumed by the defendant, among others, the people's court shall support such a claim, unless the defendant has any evidence to the contrary which suffices to overturn the judgment. If the defendant claims the direct application of determined facts favorable for it, the people's court shall not support such a claim, and the defendant shall still offer evidence to prove the claim.

Article 31 Where the defendant shall assume liabilities in an environmental civil public interest litigation and other civil litigations due to environmental pollution and ecology damage, if the defendant's property is insufficient to carry out all obligations, the defendant shall first carry out the obligations determined in the valid judgments of other civil litigations, unless otherwise prescribed by any law.

Article 32 Where compulsory enforcement is required according to a legally effective judgment of an environmental civil public interest litigation, the case shall be transferred for enforcement.

Article 33 Where it is indeed difficult for the plaintiff to pay any litigation expenses, and the party applies to the people's court for payment postponement in accordance with law, the people's court shall grant such an application.

Where the plaintiff that loses or partly loses the case applies for the reduction or exemption from payment of litigation costs, the people's court shall decide whether to grant the application or not in accordance with the provisions of the Measures for the Payment of Litigation Costs, and in light of the plaintiff's economic status and the trial of the case.

Article 34 Where a social organization illegally receives property or otherwise seeks economic benefits by filing a lawsuit, the people's court may, in light of the seriousness of the circumstances, confiscate its illegal income and impose a fine on it in accordance with law; and if the organization is suspected of any crime, it shall be transferred to the relevant authority for punishment in accordance with law.

Where a social organization seeks economic benefits by filing a lawsuit, the people's court shall send judicial suggestions to the registration administrative authority or the relevant authority, which shall handle in accordance with law.

Article 35 In the case of any discrepancy between this Interpretation and the judicial interpretations and regulatory documents issued by the Supreme People's Court before this Interpretation comes into force, this Interpretation shall prevail.

5.Provisions of the Supreme People's Court and the Supreme People's Procuratorate on Several Issues concerning the Application of Law in the Handling of Criminal Cases of Environmental Pollution

(Adopted at the 1698th meeting of the Judicial Committee of the Supreme People's Court

on November 7, 2016 and at the 58th meeting of the Twelfth Procuratorial Committee of the Supreme People's Procuratorate on December 8, 2016, and to be in force on January 1, 2017. No. 29 [2016] of the Supreme People's Court)

In order to punish crimes related to environmental pollution according to the law and protect cultural relics, in accordance with the relevant provisions of the Criminal Law of the People's Republic of China, and the Criminal Procedure Law of the People's Republic of China, several issues concerning the application of law in the handling of this type of criminal cases are hereby interpreted as follows:

Article 1 Under any of the following circumstances, whoever commits any of the conducts as provided in Article 338 of the Criminal Law shall be determined to “have caused serious environmental pollution” :

(1) Discharging, dumping or disposing of wastes containing radioactive substances or infectious disease pathogens, or toxic substances in the Grade I reserves of drinking water source and the core area of nature reserves.

(2) Illegally discharging, dumping or disposing of three tons or more of hazardous wastes.

(3) Discharging, dumping or disposing any pollutant containing lead, mercury, cadmium, chrome, arsenic, thallium or antimony, exceeding more than three times the standards for pollutant discharge issued by the state or the local governments.

(4) Discharging, dumping or disposing any pollutant containing nickel, copper, zinc, silver, vanadium, manganese or cobalt, exceeding more than ten times the standards for pollutant discharge issued by the state or the local governments.

(5) Discharging, dumping or disposing of radioactive wastes, wastes containing infectious disease pathogens, or toxic substances through underground pipelines, seepage wells, seepage pits, crevices, karst caves, pouring and other means to evade supervision.

(6) Receiving two or more administrative penalties due to discharging, dumping or disposing of radioactive wastes, wastes containing infectious disease pathogens or toxic substances within two years in violation of the state provisions, but carrying out the aforesaid conduct again.

(7) A key pollutant discharge entity tampers with or forges automatic monitoring data or disrupts any automatic monitoring facility, or discharges chemical oxygen demand, ammonia nitrogen, sulfur dioxide, nitric oxide, or any other pollutant.

(8) Illegally reducing expenditure on the operation of any pollution prevention and control facility by more than one million yuan.

(9) Illegal income or resulting in the loss of public or private property of more than 300,000 yuan.

(10) Inflicting serious damage on eco-environment.

(11) Resulting in more than 12 hours of interruption of centralized water drawing from the drinking water source at or above the township level.

(12) Resulting in the loss of fundamental functions of or permanent destructions to five mu or more of basic farmland, protection forestland or special-purpose forestland, or ten mu or

more of other farmlands, or 20 mu or more of other lands.

(13) Resulting in the death of 50 cubic meters or more of forests or other woods, or 2,500 saplings or more.

(14) Resulting in the evacuation or transfer of 5,000 people or more.

(15) Resulting in 30 persons or more being poisoned.

(16) Causing any minor injury, light disability or general dysfunction due to the damage of organ or tissue to three persons or more.

(17) Causing any serious injury, moderate disability or serious dysfunction due to the damage of organ or tissue to one person or more.

(18) Other circumstances that cause serious environmental pollution.

Article 2 Where the commission of any of the acts as provided in Articles 339 and 408 of the Criminal Law results in the loss of public or private property of more than 300,000 yuan, or falls under any of the circumstances as set forth in Items (10) through (17) of Article 1 of this Interpretation, the commission shall be determined to “cause any heavy losses to public or private property or any serious harm to human health” or “cause any heavy losses to public or private property or any serious consequences of human casualties.”

Article 3 Where the commission of any of the acts as provided in Articles 338 and 339 of the Criminal Law falls under any of the following circumstances, the commission shall be determined to “have particularly serious consequences:”

(1) Causing more than 12 hours of interruption of centralized water drawing from the drinking water source in urban areas at or above the county level.

(2) Illegally discharging, dumping or disposing of 100 tons or more of hazardous wastes.

(3) Causing the loss of fundamental functions of or permanent destructions to 15 mu or more of basic farmland, protection forestland or special-purpose forestland, or 30 mu or more of other farmlands, or 60 mu or more of other lands.

(4) Resulting in the death of 150 cubic meters or more of forests or other woods, or 7500 saplings or more.

(5) Resulting in the loss of public or private property of more than one million yuan.

(6) Incurring particularly serious damage to eco-environment.

(7) Resulting in the evacuation or transfer of 15,000 people or more.

(8) Resulting in 100 persons or more being poisoned.

(9) Causing any minor injury, light disability or general dysfunction due to the damage of organ or tissue to ten persons or more.

(10) Causing any serious injury, moderate disability or serious dysfunction due to the damage of organ or tissue to three persons or more.

(11) Causing any serious injury, moderate disability or serious dysfunction due to the damage of organ or tissue to one person or more, and concurrently causing any minor injury, light disability or general dysfunction due to the damage of organ or tissue to five persons or more.

(12) Resulting in the death or severe disability of one person or more.

(13) Other circumstances with any particularly serious consequences.

Article 4 Where the commission of any of the criminal acts as provided in Articles 338 and 339 of the Criminal Law falls under any of the following circumstances, the offender shall be subject to a heavier punishment:

(1) Obstructing environmental supervision and inspection or investigation into environmental emergencies, but not punishable as the crime of disrupting public service, among others.

(2) Discharging, dumping or disposing of wastes containing radioactive substances, wastes containing infectious disease pathogens, toxic substances or other hazardous substances in violation of state provisions at or near densely inhabited areas such as hospitals, schools, residential areas.

(3) Discharging, dumping or disposing of radioactive wastes, wastes containing infectious disease pathogens, toxic substances or other hazardous substances in violation of state provisions during the period of heavy pollution weather warning, environmental emergency, or being ordered to take corrective action within a prescribed time limit.

(4) An enterprise with a Hazardous Waste Permit discharging, dumping or disposing of radioactive wastes, wastes containing infectious disease pathogens, toxic substances or other hazardous substances in violation of state provisions.

Article 5 Where the commission of any of the criminal acts as provided in Articles 338 and 339 of the Criminal Law reaches the standard of criminal liability only, but the offender adopts timely measures to prevent the loss from expanding or eliminate pollution, makes compensation for all damage, vigorously repairs eco-environment, commits the act for the first time, and indeed repents of his offense, he shall be determined to fall under minor circumstances and be exempt from charges or criminal punishment; and if it is indeed necessary to impose punishment on him, he shall be subject to lenient punishment.

Article 6 Where the conduct of business activities such as collecting, storing, utilizing and disposing of hazardous waste without a Hazardous Waste Permit seriously pollutes environment, the offender shall be convicted and punished by analogy to the crime of environmental pollution; and if it is concurrently punishable as the crime of illegal business operation, the offender shall be convicted and punished according to the provisions on heavier punishment.

If the commission of any of the acts as set out in the preceding paragraph doesn't fall under the circumstances of illegally causing environmental pollution, such as discharging any pollutant exceeding standard and illegally dumping any pollutant, the commission may be determined to be under an illegal business circumstance conspicuously minor or little detrimental and not a crime; and if it is punishable as any other crime such as production and sale of counterfeit products, the offender shall be subject to punishment for such other crime.

Article 7 Where a person, notwithstanding his full awareness that any other person has no Hazardous Waste Permit, provides hazardous waste to such other person or authorizes such other person to collect, store, utilize or dispose of hazardous wastes, causing serious

environmental pollution, he shall be subject to punishment as an accomplice.

Article 8 Where any pollutant containing toxic or radioactive substances or infectious disease pathogens is discharged, dumped or disposed of in violation of the state provisions, and concurrently punishable as a crime of environmental pollution, crime of illegally disposing of imported solid waste, crime of placing hazardous substances or any other crime, the offender shall be convicted and punished according to the provisions on heavier punishment.

Article 9 Where an environmental impact assessment institution or any of its staff members intentionally provides any false environmental impact assessment document and falls under serious circumstances, or is seriously irresponsible insofar as the issued environmental impact assessment document has major inconsistency with the facts, causing serious consequences, the offender shall, under Article 229 and Article 231 of the Criminal Law, be convicted of and punished for the crime of issuing false certification document or issuing certification document significantly inconsistent with the facts.

Article 10 One that, in violation of the state provisions, carries out any of the following acts against the environment quality monitoring system, or forcibly orders, instructs or instigates any other person to carry out any of the following acts shall, under Article 286 of the Criminal Law, be convicted of and punished for the crime of damaging computer information systems:

- (1) Amending parameters or monitoring data.
- (2) Disrupting sampling, causing serious inconsistency between monitoring data and authenticity.
- (3) Any other act damaging the environment quality monitoring system.

Where a key pollutant discharge entity tampers with or forges automatic monitoring data or disrupts any automatic monitoring facility, or discharges chemical oxygen demand, ammonia nitrogen, sulfur dioxide, nitric oxide, or any other pollutant, which is concurrently punishable as the crime of environmental pollution and the crime of damaging computer information systems, it shall be convicted and punished according to the provision on heavier punishment.

Where a person who maintains and operates an environment monitoring facility carries out or participates in carrying out any act such as tampering with or forging automatic monitoring data, disrupting automatic monitoring facility, and damaging the environment quality monitoring system, he shall be subject to heavier punishment.

Article 11 Where an entity commits any crime as specified in this Interpretation, persons who are directly in charge and other directly responsible persons of the entity shall be convicted and punished according to the conviction and sentencing standard as prescribed in this Interpretation and a fine shall be imposed on the entity.

Article 12 The monitoring data which an environmental protection department or any monitoring institution affiliated thereto collected in the process of administrative law enforcement may, in criminal proceedings, be used as evidence.

The data which is obtained by testing any pollutant sample which was collected by a public security department separately or jointly with an environmental protection department may,

in criminal proceedings, be used as evidence.

Article 13 The waste listed in the Directory of National Hazardous Waste may be determined based on the source and manufacturing process of the substance involved in the case, defendant confession, witness testimony, approved or filed environmental impact assessment document, and other evidence, and the written opinions offered by the environmental protection department or the public security department, among others.

The quantity of hazardous waste may be determined in comprehensive consideration of the defendant confession, the manufacturing technique, material consumption and energy consumption of the enterprise involved in the case, approved or filed environmental impact assessment document, and other evidence.

Article 14 Any specialized environmental pollution problem involved in a case which is difficult to determine shall be determined according to the expert opinions issued by a forensic identification institution, or the report issued by an institution designated by the environmental protection department of the State Council or the public security department, and based on other evidence.

Article 15 The following substances shall be determined to be "toxic substances" as set out in Article 338 of the Criminal Law:

(1) "Hazardous waste" means the waste of hazardous character listed in the Directory of National Hazardous Waste, or determined according to the identification standards and methods for hazardous waste as prescribed by the state.

(2) Substances listed in the annexes to the Stockholm Convention on Persistent Organic Pollutants.

(3) Pollutants containing heavy metal.

(4) Other toxic substances which are likely to pollute the environment.

Article 16 An act which is committed without a Hazardous Waste Permit, for profits, in order to extract substances as raw material or fuel from hazardous waste, and falls under circumstances of illegally causing environmental pollution, such as discharging any pollutant exceeding standard and illegally dumping any pollutant shall be determined as "illegal disposition of hazardous waste."

Article 17 For the purpose of this Interpretation, "within two years" shall be calculated and determined based on the interval between the date of the commencement of the punishment imposed for the first illegal act and the date of commission of a second corresponding act.

For the purpose of this Interpretation, "a key pollutant discharge entity" means a key enterprise or any other entity under monitoring which, as determined by the environmental protection department of the people's government at or above the level of cities divided into districts in accordance with the law, ought to install or use pollutant discharge automatic monitoring equipment.

For the purpose of this Interpretation, "illegal income" means all the illegal income obtain and which can be obtained by carrying out any of the acts as set forth in Articles 338 and 339 of the Criminal Law.

For the purpose of this Interpretation, “loss of public or private property” shall include the actual value of the damage or loss of property directly resulting from any of the acts as set forth in Articles 338 and 339 of the Criminal Law, and the expenses incurred due to necessary and rational measures adopted to prevent the expansion of pollution or eliminate pollution and expenses for emergency response and monitoring in the disposition of environment emergency.

For the purpose of this Interpretation, "damage to eco-environment" shall include expenses for the repair of eco-environment, loss of service functions during the repair of eco-environment, loss occasioned by permanent damage to the functions of eco-environment, and other necessary and reasonable expenses.

For the purpose of this Interpretation, "without a Hazardous Waste Permit" means failure to obtain a Hazardous Waste Permit, or beyond the business scope of the Hazardous Waste Permit.

Article 18 This Interpretation shall come into force on January 1, 2017. The Interpretation of the Supreme People's Court and the Supreme People's Procuratorate on Several Issues concerning the Application of Law in the Handling of Criminal Cases of Environmental Pollution (No. 15 [2013] of the Supreme People's Court) shall, upon entry of this Interpretation into force, be repealed concurrently; and for any discrepancies between this Interpretation and the judicial interpretations and regulatory documents previously issued, this Interpretation shall prevail

Chapter VII Full Texts of Important National Policies Relevant to Marine Pollution

1.The CPC Central Committee's Decision on Some Major Issues of Comprehensive Reform

(Omitted, Chinese only)

2. Opinions of the CPC Central Committee and the State Council on Accelerating the Ecological Civilization Construction

(Omitted, Chinese only)

3. Integrated Reform Plan for Promoting Ecological Progress

(CPC Central Committee, the State Council September 21, 2015)

This plan has been formulated for putting systematic and complete systems for improving the ecosystem in place more quickly; achieving faster ecological progress; and making the reform for promoting ecological progress more systemic, more holistic, and better coordinated.

I. A General Description

1. The thinking behind the reform

It is crucial to fully implement the guiding principles from the 18th National Congress of the Communist Party of China (CPC) and the second, third, and fourth plenary sessions of the 18th CPC Central Committee; follow the guidance of Deng Xiaoping Theory, the Theory of the Three Represents, and the Scientific Outlook on Development; thoroughly put into practice the guiding principles from the major speeches of General Secretary Xi Jinping; act in accordance with the decisions and plans of the CPC Central Committee and the State Council; adhere to the fundamental state policy of conserving resources and protecting the environment; and give high priority to resource conservation, environmental protection, and the restoration of nature. Based on the fundamental context of China being in the primary stage of socialism and in the particular characteristics new to China in the present phase, and in order to build a beautiful China, handle correctly the relationship between humankind and nature, and solve serious ecological and environmental problems, it is essential to safeguard China's ecological security, improve the environment, ensure that resources are used more efficiently, and step up efforts to promote the formation of a new pattern of modernization in which humankind develops in harmony with nature.

2. The ideas

The idea is to: Respect, protect, and stay in tune with nature. Ecological conservation is vital not only to sustained, healthy economic development, but also to political and social progress, and must therefore be given a position of prominence and incorporated into every aspect and the whole process of economic, political, cultural, and social development.

Integrate development and conservation. It is necessary to remain committed to the strategy of treating development as being of the utmost importance to China. Development is good only when it is green, circular, and low-carbon. There should be the right balance between development and conservation. The intensity of development should be brought under control on the basis of functional zoning and spatial planning should be adjusted to ensure that development and conservation are coordinated and reinforce each other so we leave behind a comfortable place that future generations can call home with blue skies, green lands, and clear waters.

Foster an understanding that lucid waters and lush mountains are invaluable assets. Fresh air, clean water sources, beautiful rivers and mountains, fertile land, and biological diversity form an ecological environment that is essential to human survival. As development is a top priority for China, it is imperative to protect forests, grasslands, rivers, lakes, wetlands, seas, and other natural ecosystems.

Cultivate respect for the value of nature and natural capital. Natural ecosystems have value; the protection of nature is a process of increasing the value of nature and the value of natural capital, and means the protection and development of the productive forces. Protection efforts should, then, be adequately rewarded and come with economic returns.

Seek equilibriums in China's territorial space. To move forward with development, it is

necessary to find the right balance between population, economy, resources, and the environment and ensure that the population, the industrial structure, and the economic growth of a region do not surpass its environmental capacity and the carrying capacity of its water and land resources.

See that mountains, waters, forests, and farmlands are a community of life. Based on the integrity and systemic nature of ecosystems and the way they work, it is necessary to take into consideration all the elements of the natural ecosystem - both hills and their surrounding areas, both above and under the ground, both land and sea, both upper and lower river basins -and work to protect them in their entirety, restore them systematically, and take a comprehensive approach to their governance in order to preserve ecological balance by strengthening the ability of ecosystems to circulate.

3. The principles

Ensuring that the reform moves in the right direction. China's market mechanisms need to be improved, and the government should make better use of its leadership and regulatory roles. Those in the business sector should bring their own initiative into play and exercise self-restraint. Social organizations and the general public should participate and play a supervising role in ecological conservation.

Maintaining the public nature of natural resource assets. New property rights systems should be created for natural resources. Ownership rights should be clarified. There should be a distinction between ownership rights and the authority to manage. Powers and regulatory responsibilities of the central and local governments should be divided more appropriately. Everyone should be entitled to benefit from state-owned natural resource assets.

Integrating environmental governance for rural and urban areas. Continued efforts should be made to strengthen urban environmental protection and industrial pollution prevention and control. The rural coverage of ecological and environmental protection efforts should be expanded. Effective systems and mechanisms for rural environmental governance should be established. The development of pollution prevention and control facilities should be stepped up in rural areas, and related funding should be increased.

Attaching equal importance to incentives and restraints. It is imperative to develop interest-related mechanisms for promoting green, circular, and low-carbon development, and at the same time practice strict prevention at the source of pollution, strict regulation over operations, strict compensation for environmental damage, and accountability for those responsible in order to effectively restrain all types of market entities and, step by step, make ecological conservation efforts more market-, law-, and procedure-based.

Combining China's own independent efforts with international cooperation. Strengthening ecological conservation and environmental protection is something China is doing of its own accord, though at the same time it needs to deepen exchange and practical cooperation with other countries, borrow from their advanced technology and their valuable experience in institution building, take an active part in global environmental governance, and assume and perform its international responsibilities as a large developing country.

Integrating piloting first with overall coordination. It is necessary, in accordance with the unified plans of the CPC Central Committee and the State Council, to deal with the easier parts first, move forward step by step, and launch each reform when conditions are ripe to do so. On the basis of the fundamental direction laid out in this plan, encouragement should be given to local governments to explore and experiment boldly in light of their own local conditions.

4. The objectives

This reform is designed to establish a systematic and complete institutional framework composed of eight systems for promoting ecological progress with clearly defined property rights, diversified participation, and equal focus on incentives and restraints by 2020. It is also designed to modernize China's governance system and capacity for governance in the field of ecological progress and usher in a new era for socialist ecological progress. These eight systems include a system of property rights for natural resource assets, a system for the development and protection of territorial space, a spatial planning system, a system for regulating total consumption and comprehensive conservation of resources, a system for payment-based resource consumption and compensating conservation and protection efforts, the environmental governance system, the market system for environmental governance and ecological preservation, and the system for evaluating officials' ecological conservation performance and for holding those responsible for ecological damage to account.

A system of property rights for natural resource assets will be established, according to which ownership is clearly defined, powers and responsibilities are explicit, and regulation is effective, in order to ensure there are owners for natural resources and ownership is clear. A system will be built on the basis of spatial planning for the development and protection of territorial space, drawing on regulation of its uses as the main approach, with a view to stopping the over-use of quality cropland and ecological space, ecological damage, and environmental pollution caused by disorderly, excessive, and scattered development.

A spatial planning system will be designed, with the main purpose of strengthening the spatial governance and improving its structure, which is nationally unified and better connected between different departments of government, and according to which management is divided between governments at multiple levels, in an effort to eliminate overlapping and conflicting spatial plans, the overlap and duplication of responsibilities between departments, and the issue of local authorities frequently changing their plans.

An effective, standardized, and strictly managed system that achieves complete coverage will be established for regulating total consumption and comprehensive conservation of resources, in order to address inefficiency and serious waste in resource consumption.

A system for payment-based resource consumption and compensating conservation and protection efforts will be established. The system will reflect market supply and demand, resource scarcity, the value of nature, and the need for intergenerational compensation, in order to address the problems of excessively low prices for natural resources and their

products, the cost of production and development being lower than the social cost, and inadequate incentives for ecological conservation efforts.

An environmental governance system which is oriented toward improving the environment, and which incorporates unified regulation, strict law enforcement, and multi-party participation will be developed in an effort to deal with weak capacity for pollution prevention and control, overlapping regulatory functions between government departments, powers not being in accord with responsibilities, and the cost of law violations being too low.

A market system which allows economic levers to play a greater role in environmental governance and ecological conservation will be developed, with a view to addressing the slow development of market entities and market systems and low rates of public participation in ecological conservation.

An evaluation and accountability system will be developed to assess the performance of officials in ecological conservation and hold to account those responsible for ecological damage. This system will be designed to be fully reflective of resource consumption, environmental damage, and ecological benefits, and is to be built so as to correct the shortcomings in performance evaluations, narrow the gaps in responsibility systems, and improve poor accountability for ecological damage.

II. Improving the System of Property Rights for Natural Resource Assets

5. Establishing a unified system for determining and registering ownership The owners of natural resource assets of all types throughout all Chinese territorial space will be determined in accordance with the principles that all natural resources in China are publicly owned and all property rights are legally prescribed. Ownership of all natural ecological spaces including water flows, forests, mountains, grasslands, uncultivated land, and tidal flats will, according to a unified system, be determined and registered. Clear lines will be gradually delineated to distinguish between assets owned by the whole people and assets collectively owned, ownership by the whole people and ownership operated by different levels of government, and between different collective owners. The rule of law will be strengthened in the determination and registration of ownership.

6. Establishing a system of property rights for natural resources within which rights and responsibilities are explicit.

A list of rights will be developed to specify the rights of ownership for all types of natural resource assets. The relationship between ownership rights and use rights will be properly dealt with. New forms of collective ownership and ownership by the whole people will be created. With the exception of natural resources which are ecologically important, the ownership rights and use rights for all other natural resources can be separated. It will be made clear who has the right to possess, use, benefit from, or dispose of natural resources, and corresponding rights and responsibilities will be clarified. The right to sell, transfer, and rent out use rights, as well as the right to use them as collateral, as the basis of a loan guaranty, or to gain an equity stake, will all be suitably expanded. The roles of owners and users of land on which state-owned farms, forests, and pastures are located will be clearly

defined. A complete system for sale will be established covering all types of natural resource assets owned by the whole people, while the uncompensated transfer of rights or their sale at excessively low a price are to be strictly forbidden. We will draw up an integrated plan for strengthening efforts to develop a natural resource asset exchange.

7. Improving the state system of management for natural resource assets

In accordance with the principles of separating owners from regulators and assigning the responsibility for one matter to one single department, the currently diffuse duties and responsibilities of ownership of natural resource assets owned by the whole people will be integrated, and one body will be established to carry out the unified exercise of ownership rights for all types of natural resources owned by the whole people, such as mineral deposits, water flows, forests, mountains, grasslands, uncultivated land, marine areas, and tidal flats, and take responsibility for the sale of these natural resources.

8. Exploring the establishment of a system for exercising ownership rights at different levels

Research will be conducted to explore how a system can be put into practice in which, in accordance with the type of resource and its importance in relation to the ecological environment, the economy, and national defense, the central and local governments act as the agents of the owners of natural resource assets owned by the whole people, in order to achieve both efficiency and equity. Resources and territorial space for which the ownership rights are owned by the whole people and directly exercised by the Central Government will be distinguished from those for which the ownership rights are owned by the whole people and exercised by local governments. The Central Government will primarily exercise directly the ownership rights for petroleum and natural gas, valuable and rare mineral resources, key state-owned forests, major rivers and lakes, trans-boundary rivers, ecologically important wetlands and grasslands, marine areas, tidal flats, rare and endangered species of wild fauna and flora, and some national parks.

9. Launching trials for determining property rights for water flows and wetlands

Explorations will be made into establishing a water ownership system. Trials will be carried out in determining ownership of bodies of water, coast lines, and other aquatic ecospace. On the basis of respecting the systematic nature and integrity of water ecosystems, the ownership rights, use rights, and allowable volumes for water resource use will be delineated. Trials will be launched in Gansu, Ningxia, and other areas for determining the ownership of wetlands.

III. Establishing a System for the Development and Protection of Territorial Space

10. Improving the functional zoning system

National and provincial-level planning of functional zones will be coordinated. Regional policies which are based on the functional zones will be improved. On the basis of the different functions- urban areas, primary production areas for agricultural products, or key ecosystem service areas - adjustments and improvements to policies regarding finance, industry, investment, population flow, land to be used for construction, resource development, and environmental protection will be stepped up.

11. Improving the regulatory system for the use of territorial space

The top-down land-use indices control system will be simplified and the method of allocating indices based on administrative district and baselines for land use will be adjusted. Development intensity indices will be broken down and assigned to the county-level administrative districts as binding quotas to control the total amount of land used for construction purposes. Land use regulation will be extended to all natural ecological spaces, ecological redlines will be defined and strictly observed, and arbitrary changes to land use will be strictly prohibited. Efforts will be made to protect against ecological redlines being crossed by unreasonable development and construction activities. The monitoring system for all territorial space will be improved and a longitudinal approach will be used to monitor changes within China's territorial space.

12. Establishing a national park system

The protection of important ecosystems will be strengthened to ensure their sustainable use. The system of departments independently setting up their own nature reserves, historical and scenic sites, cultural and natural heritage sites, geological parks, and forest parks will be reformed. These protected areas will be reorganized by function and the scope of national parks will be determined as appropriate. National parks will be under more stringent protection: with the exception of improvements to the facilities used by local people in their everyday lives and work and nature-based research, education, and tourism which do not harm ecosystems, other types of development and construction will be prohibited so as to protect the authenticity and integrity of the natural ecological environment and natural and cultural heritage. Guidance on national park trials will be strengthened, and on the basis of these trials, research will be carried out into designing an overall plan for establishing a national park system. A permanent mechanism will be created for the protection of rare and endangered species of wild plants and animals.

13. Improving the system for regulating natural resources

Duties and responsibilities related to regulation of use, which are currently spread among different departments, will be gradually concentrated within a single department. This department will then perform all use-related regulatory duties and responsibilities for all territorial spaces.

IV. Establishing a Planning System for Territorial Space

14. Formulating plans for territorial space

All types of current spatial plans formulated by different departments will be integrated into unified spatial plans, which will be all-encompassing. The new plans will be the guide for the development of the country's territorial space, and the spatial blueprints for sustainable development; they will be the fundamental basis for all types of development and construction programs. Spatial plans will be divided into national, provincial, and municipal (or county) levels (spatial plans for cities which are divided into districts will be formulated for the district level). Research will be conducted into how to establish unified and standardized mechanisms for formulating spatial plans. An environmental impact

assessment system will be set up to be used in spatial planning. Provincial-level spatial planning trials are encouraged. A spatial plan will be developed for the Beijing-Tianjin-Hebei region.

15. Integrating municipal-level (county-level) plans

Cities and counties will be supported in combining different types of plans into a single spatial plan, such that gradually, there will be one plan - one blueprint - per city or county. Municipal or county spatial plans should classify land using a unified standard, and, in accordance with the relevant functional zoning and the requirements of the provincial-level spatial plan, should delineate production space, living space, and ecological space, demarcate the development boundaries of urban construction areas, industrial areas, and rural living areas, as well as the boundaries of protected areas of arable land, woodlands, grasslands, rivers, lakes, and wetlands, and strengthen coordinated planning for urban subsurface space. More effective guidance will be given to cities and counties regarding their trials for plan integration. Research will be undertaken into developing guidelines and technical standards for the formulation of municipal-level (county-level) spatial plans, which will then serve as experience that can be applied elsewhere.

16. Developing new approaches for formulating municipal-level (county-level) spatial plans

We will explore how best to standardize procedures for formulating municipal-level (county-level) spatial plans, public participation will be expanded, and planning will be made more effective and transparent. Those areas piloting municipal-level (county-level) spatial plans are encouraged to integrate planning departments, making a single department responsible for formulating the spatial plan for that municipality or county; and they may form a planning appraisal committee of experts and representatives of the relevant fields. Prior to the formulation of a plan, a resource and environmental carrying capacity assessment must be carried out, and the results of the assessment should serve as the fundamental basis of planning. During the process of formulation, efforts should be made to solicit opinions of those from relevant sectors; the draft of the plan should be published in full so that the suggestions and comments of local residents can be extensively solicited. After evaluation and approval by the planning appraisal committee, the plan must be deliberated and passed by the local people's congress, then reported to the relevant government department at the next level up to be placed on record. The finalized plan should include the text of the plan along with precise maps and images, and should be made available to the public through websites and other forms of local news media. Local residents are to be encouraged to oversee the implementation of the plan and report any development and construction activities that violate it. The local people's congress and its standing committee will hear reports at regular intervals on the implementation of the plan, and will hold the local government accountable for violations of the plan.

V. Improving the Systems for Total Resource Management and Comprehensive Resource Conservation

17. Improving the systems for providing the strictest possible protection for farmland and

securing the economical and intensive use of land

The system for the protection of basic cropland will be improved and a redline below which the area of China's permanent basic cropland must not fall will be established. To ensure that the area of basic cropland are not diminished, its quality does not deteriorate, and it is not converted to any other uses, the duty of basic cropland protection will be assigned to farming households and every piece of this cropland will be captured through photo-imaging and entered into the national cropland protection database, and its strict protection will be enforced. With the exception of unavoidable cases as specified by law in which basic cropland has to be used as the site of key national projects, no basic cropland may be used for construction purposes. Efforts will be redoubled to grade and monitor as well as maintain and improve the quality of cultivated land. The system for offsetting the occupation of cultivated land for purposes other than cultivation will be improved. A cap will be set on total cultivated land that can be used for new construction projects. It will be made sure that equivalent land is offset ahead of occupation and that the replacement land is of equal or higher grade than the cultivated land to be occupied. A cap will also be on total land that can be occupied for construction purposes, management will be instituted to reduce the amount of cultivatable land that is used as such, and incentive and constraint mechanisms will be established to encourage more economical and intensive use of land. Reasonable annual plans will be made for the use of land, adjusting the structure of land used for different purposes and making the best use of land that has already been made available.

18. Improving the system for the strictest possible management of water resources

To give priority to saving water, achieve harmony between development and water conservation, carry out systemic governance, and ensure that both government and market play their respective roles, the system for controlling total water usage will be improved to ensure water security. Efforts will be accelerated to formulate water allocation plans for major river basins, strengthen coordination between provincial-level governments, and improve the system of targets for control of total water usage at the provincial, municipal, and county levels. Effective mechanisms will be established to ensure economical and intensive water usage. More work will be done to adjust the way water resources are used and improve their allocation. The system for evaluating the impact of plans and construction projects on water resources will be improved. Efforts will be made to draw principally on pricing and taxation to gradually establish systems for controlling and instituting quota-based management of the volume of water used in irrigation, and for controlling and instituting quota-based management of the planned water usage of high-water-consuming industrial enterprises. In regions seriously affected by water scarcity, water quotas will be used as a threshold for market entry and the development of high-water-consuming projects will be strictly controlled. The protection and environmental restoration of areas producing aquatic products will be strengthened, their aqua culture will be controlled, and mechanisms will be established for the protection of aquatic plant and animal life. Regulation of water functional zones will be improved and systems for promoting the utilization of alternative water resources will be

established.

19. Establishing a system for total energy consumption management and energy conservation

High priority will be given to energy conservation, the control of energy intensity will be strengthened, and the responsibility system and the system of incentives for meeting energy conservation targets will be improved. Improvements will be made to the energy statistics system. The management system for energy conservation by major energy-consuming organizations will be improved, and a mechanism for making voluntary pledges on energy conservation will be implemented on an explorative basis. The system of energy conservation standards will be improved to make timely updates to energy efficiency standards for energy-consuming products, limits on energy consumption for energy-intensive industries, and energy efficiency standards for buildings. A reasonable target will be established for total national energy consumption and broken down and assigned to the provincial-level and major energy-consuming organizations. The mechanism for promoting the use of energy-saving, low-carbon products, technologies, and equipment will be improved and lists of technologies will be issued at regular intervals. Supervision over energy conservation will be strengthened. Stronger support will be provided for the development of renewable energy sources, and subsidies for all fossil fuels will be phased out. A system for controlling total national carbon emissions and a mechanism for breaking down the responsibility for implementation will be gradually established. A mechanism for effectively increasing forest, grassland, wetland, and ocean carbon sinks will be set up. China's involvement in international cooperation on responding to climate change will be strengthened.

20. Establishing a system for protecting virgin forests

All virgin forests will be placed under protection. A national timber forest reserve system will be established. Government administration will be gradually separated from the management of state-owned forests, and the public benefit forest protection and management system will be improved for state-owned forestry farms drawing principally on service procurement. The collective forest tenure system will be improved. Tenure contracts for collective forests will be kept stable, the operations allowed under these contracts will be expanded, and the systems by which forest tenure rights are used as collateral for loans and tenure rights are transferred will be improved.

21. Establishing a system for protecting grassland

The system by which collective grassland is contracted out for operation to individual households will be kept stable and improved to ensure that the plot and area of every piece of grassland contracted out is measured accurately, contracts are signed, and contracting certificates are granted. Proper procedures will be introduced for the transfer of grassland under such contracts. A system for protecting basic grassland will be put into effect to ensure that the area of basic grassland does not diminish, its quality does not deteriorate, and it is not converted for any other use. The subsidy and award mechanisms for the ecological

conservation of grassland will be improved. Grazing on certain areas of grassland will be banned or temporarily suspended, rotational paddock grazing will be introduced, and efforts will be made to strike a balance between grass and livestock. Oversight over their view and approval of grassland requisitions will be strengthened and the use of grassland for any purpose other than animal husbandry will be strictly controlled.

22. Establishing a system for protecting wetlands

All wetlands will be placed under protection, and the unauthorized requisition or occupancy of wetlands of international importance, and those of national importance, and wetland reserves will be banned. The services of wetlands will be determined, their protection and utilization will be standardized, and a mechanism for the ecological restoration of wetlands will be established.

23. Establishing a system for closing off desertified land for protection

Contiguous areas of desertified land for which conditions are not currently in place to carry out anti-desertification programs will be designated as closed-off protection zones. Systems for strict protection will be established, construction of infrastructure needed to close off and protect and manage such zones will be stepped up, desertified land governance will be strengthened, and vegetation will be increased. The appropriate development of the sand industry will be encouraged. The mechanisms for protection and management drawing principally on service procurement will be improved. New approaches that combine development with governance will be explored.

24. Improving the system for developing and protecting marine resources

Marine functional zones will be established, the major functions of offshore waters and islands will be determined, and efforts will be made to guide, control, and standardize behavior related to the use of oceans and islands. A system will be introduced to control total sea reclamation, imposing binding limits on the total area of ocean over which reclamation can take place. A system will be established for maintaining natural coastlines. The system for managing total marine fishery resources will be improved. The systems for instituting fishing off-seasons and bans on fishing will be strictly enforced. Limits on offshore fishing will be imposed. The scale of offshore and mudflat aquaculture will be controlled.

25. Improving the system for managing the development and utilization of mineral resources

A system for the investigation and evaluation of the development and utilization of mineral resources will be established. The ascertainment and registration of mineral resources and registration management of their pay-per-time occupation will be strengthened. A mechanism for the intensive development of mineral resources will be established, the concentration of enterprises in mining areas will be increased, and large-scale development is encouraged. National standards including those regarding the mining recovery rate of major mineral resources, ore dressing recovery rate, and the comprehensive utilization rate of mineral resources will be improved. The economic policies for encouraging better utilization of mineral resources will be refined. A system will be established to make available to the public information on whether mining enterprises are utilizing mineral resources

efficiently and comprehensively, and a system will be set up for blacklisting those breaking mining operation rules. The mechanism for introducing industry-based approaches will be improved to support the recycling of major mineral resources. The systems for protecting the geological environment in mining areas and reclaiming deserted areas will also be improved.

26. Improving the system of resource recycling

An effective system will be established to record resource-output ratio statistics. The extended producer responsibility (EPR) system will be put into effect, pushing producers to perform their responsibilities for take-back and disposal of their end-of-life products. A system will be established to utilize farming, livestock, and aquaculture waste and achieve the organic integration and circular development of farming, husbandry, and aquaculture. The establishment of a system for making the separation of waste compulsory will be accelerated. A list of renewable resources to be recycled will be worked out and the mandatory recycling of composite packaging, batteries, agricultural plastic sheeting, and other low-value waste will be required. Efforts will be accelerated to develop standards for the recycling and reuse of resources by type. A system for promoting the use of products and raw materials made of recycled resources will be established to require enterprises consuming related raw materials to use a certain proportion of recycled products. The system for restricting the use of single-use disposable products will be improved. Taxation policies will be implemented and improved to promote the comprehensive utilization of resources and the development of the circular economy. A list of circular economy technologies will be formulated and policies such as priority government procurement and discounted interest on loans will be implemented.

VI. Improving the System for Payment-Based Resource Consumption and Compensating Conservation and Protection Efforts

27. Accelerating price reform for natural resources and their products

In line with the principles of cost-benefit balancing and based on full consideration of society's ability to tolerate price increases, a cost assessment mechanism for natural resource exploitation and consumption will be established to incorporate the interests of resource owners and any ecological and environmental damage into the pricing mechanism for natural resources and their products. Price regulation over natural monopolies will be strengthened. A system will be created for overseeing and reviewing the pricing cost and a mechanism will be established for making pricing adjustments. Procedures for decision-making on pricing and the information disclosure system will be improved. The overall price reform of water for agricultural purposes will be moved forward. A system of progressive pricing for water will be put into full practice for non-household water consumption that exceeds plans or quotas for water consumption, and a system of tiered pricing for urban household water consumption will be fully implemented.

28. Improving the payment-based system for land use

The scope of state-owned land that is operated on the basis of a payment-based use system

will be expanded. The proportion of land for which use rights can be transferred through bidding, auction, or listing will be enlarged. Less land will be allocated for non-public use. Income and expenditures related to selling use rights for state-owned land will be incorporated into public budgeting. Industrial-land supply methods will be reformed and improved, with the implementation of flexible transfer periods, long-term leasing, lease-then-sell arrangements, and lease-and-sell arrangements being explored. The mechanisms for setting and appraising land prices will be improved. The system of grade-based pricing for land will be refined. The relationship of land-related transaction and lease expenses with taxes and fees will be straightened out. An effective regulatory mechanism will be put in place to achieve reasonable price parity between industrial-use and residential-use land. Prices of industrial-use land will be raised, and the proportion of industrial-use land will be reduced. Methods such as land contracting and leasing out will be explored to improve the payment-based use system for state-owned land for agricultural use.

29. Improving the payment-based system for mineral resource use

Improvements will be made to the system for the sale of mining rights, and means suited to a market economy and the nature of the mining industry will be established for the sale of prospecting and extraction rights. In principle, the sale of these rights will be market-oriented, and the income and expenditures related to the sale of state-owned mineral resources will be incorporated into public budgeting. The property rights of owners, investors, and operators during the processes of payment-based acquisition, possession, and exploitation will be clarified, and research will be conducted into the development of a system of national premiums for the use of mineral resources. Standard fees for the use of prospecting and extraction rights, and minimum investment in mineral prospecting will be adjusted. Progress will be made in building a nationally unified mining rights exchange, and efforts in information disclosure on the sale and transfer of such rights will be intensified.

30. Improving the payment-based system for use of sea areas and offshore islands

A mechanism will be created for adjusting use fees for sea areas and uninhabited islands. An effective system will be established for the sale of use rights for sea areas and uninhabited islands through bidding, auction, and listing.

31. Accelerating reform of resource and environmental taxes and fees

The taxes and fees for natural resources and their products will be straightened out, their respective purposes will be clarified, and the appropriate scope of taxation regulation will be defined. Faster progress will be made in introducing price-based on resources. The scope of resource taxes will be gradually expanded to cover the use of all kinds of ecological spaces. A trial reform will be carried out in parts of northern China to levy a resource tax on groundwater. The development of legislation on environmental protection tax will also be accelerated.

32. Improving the ecological compensation system

Explorations will be made into establishing a diversified compensation mechanism, transfer payments to major ecological functional zones will be increased step by step, and the

incentive mechanism that links ecological protection performance with fund allocation will be improved. Measures will be drawn up for implementing a mechanism, principally for local compensation, and supported by additional funds from the central budget, by which local governments compensate each other for ecological or environmental damage and ecological conservation efforts. Local governments are encouraged to launch ecological compensation trials. Efforts will continue in carrying out the ecological compensation pilot initiative for the Xin'an River ecosystem. Help will be given to carry out trans-regional ecological compensation pilot initiatives in the Beijing-Tianjin-Hebei water source conservation area, in areas along the Jiuzhou River in Guangxi and Guangdong, and in areas along the Ting and Han rivers in Fujian and Guangdong. Explorations will be made into carrying out pilot ecological compensation initiatives in the Yangtze River basin- an environmentally sensitive region.

33. Improving the mechanism for utilizing ecological protection and restoration funds

Given the need for systematic governance of mountains, forests, farmland, rivers, and lakes, the measures for utilizing and managing relevant funds will be improved and existing policies and channels will be integrated. At the same time as efforts are being made to comprehensively improve the conditions of rivers throughout their entire drainage basins, more funds will be spent on the protection and restoration of national ecological-security shields, such as the Qinghai-Tibet Plateau ecological shield, the Loess Plateau-Sichuan-Yunnan ecological shield, the northeast China forest belt, the northern China desertification-prevention belt, and the southern China mountainous belt.

34. Creating a recuperation system for farmland, grasslands, rivers, and lakes

A recuperation plan will be formulated for farmland, grassland, rivers, and lakes, adjusting the use of farmland in areas where there is heavy pollution or where groundwater has been over-extracted. Basic agricultural activity from land sloped greater than 25 degrees, which is not suitable for, and the ecosystem of which is harmed by, cultivation, will be gradually excluded from classification as basic cropland. A permanent mechanism will be formulated to consolidate progress in returning farmland to forest and grassland and converting grazing land back into grassland. Pilot projects will be launched to return cultivated land to lakes and wetlands. Efforts will be made to move forward with the pilot initiative for the restoration of heavy-metal contaminated soil in the Changsha-Zhuzhou-Xiangtan region, as well as the pilot project to comprehensively deal with the over-extraction of groundwater in northern China.

VII. Establishing an Effective System for Environmental Governance

35. Improving the pollutant emissions permit system

A unified and fair business emissions permit system covering all fixed pollution sources will be established quickly nationwide. Emissions permits will be issued in accordance with the law. Emission of pollutants without a permit or in violation of a permit will be prohibited.

36. Establishing a mechanism for cooperation within a region in pollution prevention and control

Cooperative mechanisms for joint prevention and control of air pollution will be improved in major areas such as the Beijing-Tianjin-Hebei region, the Yangtze River Delta, and the Pearl River Delta. Regional cooperation mechanisms will be established in other areas, taking into consideration their geographical features, levels of pollution, distribution of urban space, and patterns of pollutant transmission. Trials for creating new administrative systems for environmental protection will be held in some areas, using unified plans, standards, environmental evaluations, monitoring, and law enforcement. Trials will also be launched for the establishment of environmental regulators and administrative law enforcement agencies for river basins. A variety of cooperative mechanisms for protecting the water environments of river basins as well as early-warning systems for risk control will be put in place with the participation of the relevant provincial-level water-related departments within each river basin. An integrated mechanism for pollution prevention and control both on land and at sea and a control system governing the total quantity of pollutants discharged into key marine areas will be set up. The mechanism for responding to environmental emergencies will be improved and China's capacity for dealing with environmental emergencies of varying degrees of severity and involving different pollutants will be strengthened.

37. Establishing systems and mechanisms for rural environmental governance

An eco-oriented system of agricultural subsidies will be created. Efforts to formulate and improve relevant technical standards and specifications will be accelerated. Reductions to the use of chemical fertilizers, pesticides, and plastic sheeting and the recycling or safe disposal of animal husbandry waste will be carried out quickly. The production and use of biodegradable plastic sheeting is encouraged. The system for comprehensively utilizing crop straw will be improved. Networks for recycling, storing, transporting, and processing plastic sheeting and chemical fertilizer and pesticide packaging will be improved. Development of environmental protection facilities, such as those for handling rural wastewater and refuse, will be bolstered by subsidies from governments and village collectives, fee payments from residents, and the participation of non-government capital. A variety of assistive measures, including government procurement of services, will be adopted to foster and develop market entities for the control of all types of agricultural pollution from non-point sources and for the handling of rural wastewater and refuse. County- and township-level governments will carry greater responsibility for environmental protection, and efforts to build their capacity for environmental regulation will be boosted. In allocating government funds for supporting agriculture, full consideration should be given to improving overall agricultural production capacity and to preventing and controlling rural pollution.

38. Improving systems for public disclosure of environmental information

Extensive efforts will be made to ensure public availability of environmental information pertaining to the atmosphere, water, and so on, to businesses that emit pollution, and to regulatory bodies. The mechanism for the public release of environmental impact evaluations for development projects will be improved. The environmental spokesperson system will be refined. Efforts will be made to promote awareness for environmental

protection among the general public, the system of public participation will be improved, and more work needs to be done to ensure that the people exercise oversight over the environment in a legal and orderly way. An online platform and system will be created for the reporting of offenses related to environmental protection, and systems for offense-reporting, hearings, and public opinion-based oversight will be improved.

39. Strictly implementing compensation systems for ecological and environmental damage
Manufacturers' legal responsibilities for environmental protection will be tightened, and the cost of illegal activities will be significantly increased. Legal provisions concerning environmental damage compensation, methods for appraising damage, and mechanisms for enforcing compensation will be improved. In accordance with the law, penalties will be meted out to those who violate environmental laws and regulations, compensation for ecological and environmental damage will be determined by the extent of damage and other factors, and when violations result in serious adverse consequences, criminal liability will be pursued.

40. Improving the administrative system for environmental protection

An effective administrative system for environmental protection will be established to strictly regulate the emissions of all pollutants. Duties and responsibilities for environmental protection, which are currently spread across departments, will be assigned to one single department, progressively creating a system whereby one department is responsible for unified regulation and administrative law enforcement over urban and rural environmental protection work. Regulatory authority from different fields and departments and at different levels will be systemically organized to create a unified and authoritative system for environmental law enforcement, strengthen the ranks of law enforcement, and provide those tasked with environmental law enforcement the necessary conditions and means to enforce the law. The mechanisms linking administrative law enforcement and environmental judicial work will be improved.

VIII. Improving the Market System for Environmental Governance and Ecological Conservation

41. Fostering market entities for environmental governance and ecological conservation

Systems, mechanisms, policies, and measures that encourage energy efficient and environmentally friendly industries will be adopted. Regulations and practices that hinder fair competition and the creation of a nationally unified market will be discontinued, and all types of investment will be encouraged to enter the environmental protection market. Non-government investors may participate in the development and operation of any environmental governance or ecological conservation program where cooperation between government and non-government investment is viable. By means of government procurement of services and other methods, more support will be provided for third-party governance of environmental pollution. The transformation of organizations in charge of the operation and management of wastewater and refuse treatment facilities into companies that exercise independent accounting and management will be accelerated. Companies that

take investment from or are operated with state capital will be set up or created through reorganization in order to encourage greater investment of state capital into environmental governance and ecological conservation. Support will be given to state-owned firms in fields of ecological and environmental protection to reform toward a mixed-ownership system.

42. Promoting the trading of energy-use rights and carbon emissions rights

Combined with efforts to see that major energy-consuming organizations increase energy efficiency and to subject new projects to energy reviews, the trading of energy saved on projects will be allowed, and will progressively move toward the trading of energy-use rights based on the cap system for energy consumption. A trading system and a measurement and verification system for energy-use rights will be established. Energy performance contracting will be promoted. Trials of carbon emissions rights trading will be deepened, a national exchange for carbon emissions rights will be progressively created, and a national plan for setting the total trade and quota allocation of carbon emissions rights will be formulated. The carbon trading registration system will be improved and a regulatory system will be established for the carbon emissions rights exchange.

43. Promoting the trading of pollution rights

On the basis of the cap system for enterprise pollution emissions, improvements will be made as quickly as possible to the granting of initial pollution rights, and coverage will be expanded to include more pollutants. Working from the foundations provided by the current mechanism for granting pollution rights to administrative regions, and on the basis of the best industry-wide levels of pollution emissions, the mechanism will be gradually strengthened to ensure the cap system for enterprise pollution emissions is implemented and the trading of pollution rights creates incentives for emissions reductions at the level of the individual enterprise. In key river basins and key areas for air pollution, implementation of pollution rights trading across administrative regions will be carried out as appropriate. Trials for the payment-based use and trading of pollution rights will be expanded to include more areas where conditions are appropriate. Efforts will be stepped up to improve the pollution rights exchange. Regulations will be developed on granting pollution rights, collecting and using pollution rights use fees, and setting trading prices.

44. Promoting the trading of water rights

Combined with efforts to establish an effective mechanism for compensating the expenses of water ecosystem protection and conservation, water-related rights will be appropriately defined and allocated and ways of trading water rights between regions, between river basins, between the lower and upper reaches of rivers, between industries, and between water users will be explored. Research will be conducted into formulating regulations concerning the trading of water rights, to clearly define the scope and types of tradable water rights, the trading entities and time frames, the mechanisms for determining trading prices, and the rules for the operation of the exchange. An exchange for water rights will be developed.

45. Establishing a green finance system

Green credit will be promoted, with research being undertaken into adopting methods such as government interest subsidies to boost the level of support. All types of financial institutions are encouraged to step up grants of green loans. Requirements for the due diligence of borrowers as well as their legal responsibilities concerning environmental protection will be clarified. Efforts will be stepped up to further develop the systems related to capital markets. Research will be conducted to explore the establishment of a green stock index and the development of relevant investment products, and studies will be undertaken to explore the issuance of green bonds by banks and enterprises, encouraging the securitization of green credit assets. Support will be given for the launch of multiple types of green development funds, the operations of which will be market-based. A mechanism will be established for the mandatory release of environmental protection information by listed companies. Guaranty mechanisms for energy-efficient, low-carbon, and environmentally friendly projects will be improved, and the level of risk compensation increased. A compulsory liability insurance system for environmental pollution will be established in sectors involving high environmental risks. A green rating system as well as a non-profit system for calculating environmental costs and evaluating environmental impact will be established. Cooperation of all types with other countries will be promoted in green finance.

46. Establishing a unified system for green products

Products that are licensed as environmentally friendly, energy-efficient, water-saving, circular, low-carbon, recyclable, or organic will be uniformly classified as green products, and standardized green product standards, certifications, and logos will be established for them. Improvements will be made to policies on fiscal and tax support and government procurement for the research and development, production, transport, delivery, purchase, and use of green products.

IX. Improving Ecological Conservation Performance Evaluation and Accountability Systems

47. Establishing ecological conservation targets

Research will be conducted into developing practicable and visually representable indicators for assessing green development. Measures will be put in place to evaluate the attainment of ecological conservation targets, and indicators for resource consumption, environmental damage, and ecological benefit will be incorporated into a comprehensive evaluation system for economic and social development. Different performance evaluation criteria will be applied to different regions on the basis of their functional zoning.

48. Establishing monitoring and early-warning mechanisms for environmental and resource carrying capacity

Research will be undertaken into developing indicators and applying the right technology for monitoring and producing early warnings about resource and environmental carrying capacity. Monitoring and early-warning databases and IT platforms will be created for resources and the environment. Reports on monitoring and early-warning about resource and environmental carrying capacity will be prepared at regular intervals, and warnings will be issued and measures taken to place restrictions on regions which have exceeded or are

approaching their carrying capacity in terms of resource consumption and environmental capacity.

49. Exploring the creation of balance sheets for natural resource assets Guidelines will be formulated on preparing balance sheets for natural resource assets.

Asset and liability accounting methods will be developed for use with water, land, forest, and other types of resources; accounts will be established for accounting natural resources in physical terms; classificatory criteria and statistical standards will be clearly laid out; and changes in natural resource assets will be regularly assessed. The preparation of balance sheets for natural resource assets will take place on a trial basis at the municipal (county) level, with physical accounts of major natural resource assets being assessed and results released.

50. Auditing outgoing officials' management of natural resource assets

On the basis of the preparation of balance sheets for natural resource assets and making reasonable allowance for objective natural factors, active efforts will be made to explore the objectives, content, methods, and appraisal indicators for auditing outgoing officials' management of natural resource assets. Based on the changes in natural resource assets within their area of jurisdiction during their term of office, through auditing, an objective evaluation will be carried out of the outgoing official's management of natural resource assets; an official's liability will be determined in accordance with the law, and auditing results will be put to better use. Trials for preparing balance sheets for natural resource assets and for audits of the management of natural resource assets by outgoing officials will be conducted in the cities of Hulun Buir in Inner Mongolia, Huzhou in Zhejiang, Loudi in Hunan, Chishui in Guizhou, and Yan'an in Shaanxi.

51. Establishing a lifelong accountability system for ecological and environmental damage Leaders of local CPC committees and governments will be responsible for both economic development and ecological progress. On the basis of the results of the natural resource asset audits of outgoing officials and ecological and environmental damage, the circumstances under which the principal leaders of local CPC committees and governments, related leaders, and departmental leaders will be held accountable and the procedures for confirming accountability will be made clear. Those responsible for ecological and environmental damage will, on the basis of the severity of misconduct, be reprimanded, required to make a public apology, or dealt with through organizational, Party, or disciplinary action. For circumstances which constitute a criminal act, criminal liability will be pursued in accordance with the law. A system of lifelong accountability will be put into effect for major ecological and environmental damage which becomes apparent after an official has left office and for which he or she is found liable. A national supervision and inspection system for environmental protection will be established.

X. Ensuring Successful Implementation of the Reform to Promote Ecological Progress

52. Strengthening leadership over the reform to promote ecological progress

All local governments and departments need to study the central leadership's guiding

principles on making ecological progress and carrying out reform to this effect, develop a deep understanding of the tremendous significance of this reform, and strengthen their sense of responsibility, sense of purpose, and sense of urgency over its implementation. Local governments and departments need to do their utmost to put into effect the policy decisions and arrangements of the CPC Central Committee and the State Council and see to it that all objectives contained within this reform plan are carried out quickly. In accordance with the requirements set out in this plan, all government departments concerned should promptly draw up plans for implementing each item of the reform, delegate responsibility and set time frames, and through close cooperation and collaboration with others create a concerted reform effort.

53. Launching pilot initiatives and explorative projects

Both the central and local governments will play an active role. All local governments are encouraged, in line with the direction of reform set out in this plan, to proactively explore and move forward with the reform to promote ecological progress, treating their local conditions as their point of departure and the solving of serious ecological and environmental problems as their target. Reforms that require legal authorization should be handled in accordance with statutory procedures. Comprehensive pilot initiatives for achieving ecological progress being conducted independently by different government departments will be incorporated into national pilot initiatives and explorative projects and will receive guidance and encouragement from those authorities whose own functions put them in a position to provide such support.

54. Improving laws and regulations

Legislative support will be provided for the reform to promote ecological progress through the development of effective laws and regulations on property rights for natural resource assets, the development and protection of territorial space, national parks, spatial planning, seas, responses to climate change, protection of cropland quality, water conservation and groundwater management, grassland and wetland preservation, pollutant emission permits, and compensation for ecological and environmental damage.

55. Improving guidance on public communication

Publicity both in China and abroad on efforts to promote ecological progress and carry out the reform to this effect will be stepped up. This will require coordinated planning and accurate interpretations of each of the systems and the direction of reform—all designed to promote ecological progress. It should cultivate and popularize eco-culture, raise public awareness about ecological progress, and advocate a green life-style, thereby creating a positive social atmosphere in which efforts to promote eco-progress are viewed with respect, and which will help to promote ecological progress and the reform designed to bring about it.

56. Exercising stricter supervision over reform implementation

The office of the Central Leading Group for Comprehensively Deepening Reform and the leading group's Reform Taskforce for the Promotion of Economic Development and

Ecological Progress should strengthen its overall coordination, carry out follow-up analyses and supervisory inspections over the implementation of this plan, accurately interpret and promptly resolve any problems arising during its implementation, and promptly report any major issues to the CPC Central Committee and the State Council.

4. Opinions of the Central Committee of CPC and the State Council on Comprehensively Tightening Ecological and Environmental Protection and Firmly Fight in the Uphill Battle for Prevention and Control of Pollution

(Omitted, Chinese only)

5. National Major Marine Functional Zoning Plan

(Omitted, Chinese only)

6. Outline of National Land Planning (2016-2030)

(Omitted, Chinese only)

7. The 13th Five-Year Plan for the Protection of Ecology and Environment

(Omitted, Chinese only)

8. Several Opinions of the State Council on Promoting the Sustainable and Healthy Development of Marine Fishery

(Omitted, Chinese only)

9. Action Plan for Prevention and Control of Water Pollution

(Omitted, Chinese only)

10. Outline of the 13th Five-Year Plan for the National Economic and Social Development of the People's Republic of China

(Omitted, Chinese only)

11. Opinions of the General Office of the State Council on Improving the Compensation Mechanism for Ecological Protection

(Omitted, Chinese only)

12. Wetland Protection and Restoration Program

(Omitted, Chinese only)

13. Several Opinions on the Delineation and Observance of the Red Line of Ecological Protection

(Omitted, Chinese only)

Chapter I Overview

In the legal system of the Republic of Korea, the Constitution occupies the highest legal status. In order to reflect the constitutional concept, the laws are promulgated by the President through the resolution of the Congress. According to the constitutional concept and the legislative purpose of the laws and in order to effectively enforce the law, necessary matters are stipulated by the Presidential Decree, the Prime Minister's order, and the Departmental Order as the administrative legislation, thus forming the entire legislative system. According to the constitutional autonomy and legislative power, within the scope of the decree, the local self-governing body formulates autonomy regulations on local affairs as part of the entire national legal system.

Chapter II Legal Sources Relevant to Marine Pollution

1. Marine Environment Management Act

[Enforcement Date 26. Jul, 2017.] [Act No.14839, 26. Jul, 2017., Amendment by Other Act]

Article 1 (Purpose)

The purpose of this Act is to provide for matters necessary for the prevention, improvement, response, and recovery with regard to marine pollution, by managing sources that generate pollutants, such as vessels, marine facilities, and ocean spaces, and regulate discharge of marine pollutants such as oil and noxious liquid substances, thereby helping to protect the health and wealth of the people of the Republic of Korea.

Article 2 (Definitions)

The terms used in this Act shall be defined as follows: <Amended by Act No. 8379, Apr. 11, 2007; Act No. 8404, Apr. 27, 2007; Act No. 8788, Dec. 21, 2007; Act No. 8852, Feb. 29, 2008; Act No. 9773, Jun. 9, 2009; Act No. 9872, Dec. 29, 2009; Act No. 11597, Dec. 18, 2012; Act No. 11690, Mar. 23, 2013; Act No. 12300, Jan. 21, 2014; Act No. 14747, Mar. 21, 2017; Act No. 15012, Oct. 31, 2017>

1. The term "marine environment" means as defined in subparagraph 1 of Article 2 of the Act on Conservation and Utilization of the Marine Environment;
2. The term "marine pollution" means as defined in subparagraph 3 of Article 2 of the Act on Conservation and Utilization of the Marine Environment;
3. The term "discharge" means the draining or dumping of pollutants, etc. or the leakage or eruption of pollutants, etc.: Provided, That the draining, dumping, leakage or eruption of pollutants, etc. for academic purposes, such as conducting surveys and research to mitigate

or prevent, or eliminate marine pollution, shall be excluded;

4. The term "waste" means a substance which is useless in such form when discharged into the sea and which adversely affects or is feared to adversely affect the marine environment (excluding substances referred to in subparagraphs 5, 7, and 8);

5. The term "oil" means crude oil and petroleum products (excluding petroleum gas) provided for in the Petroleum and Alternative Fuel Business Act, liquid oil mixtures containing them (hereinafter referred to as "emulsion mixtures"), and waste oil;

6. The term "ballast water" means ballast water defined in subparagraph 2 of Article 2 of the Ballast Water Management Act;

7. The term "noxious liquid substance" means liquid substances (excluding oil) which adversely affect or are feared to adversely affect the marine environment and mixed liquid substances containing such substances, which are prescribed by Ordinance of the Ministry of Oceans and Fisheries;

8. The term "harmful substance in packaged form" means harmful substances transported by ship in packaged form, which are prescribed by Ordinance of the Ministry of Oceans and Fisheries as they adversely affect or are feared to adversely affect the marine environment when discharged into the sea;

9. The term "harmful anti-fouling paint" means paints used to restrict or prevent the attachment of organisms to ships, marine facilities, etc. (hereinafter referred to as "anti-fouling paints"), which are prescribed by Ordinance of the Ministry of Oceans and Fisheries as containing ingredients destroying organisms, such as organotin;

10. The term "persistent pollutant" means chemical substances prescribed by Ordinance of the Ministry of Oceans and Fisheries, which continuously cause acute or chronic toxicity or are carcinogenic over a long period when flowing into the sea and accumulated in organisms;

11. The term "pollutant" means wastes, oil, noxious liquid substances, or harmful substances in package form which adversely affect or are feared to adversely affect the marine environment when flowing or discharged into the sea;

12. The term "ozone layer-depleting substance" means substances defined in subparagraph 1 of Article 2 of the Act on the Control, etc. of Manufacture of Specific Substances for the Protection of the Ozone Layer;

13. The term "air pollutant" means ozone layer-depleting substances, volatile organic compounds, air pollutants defined in subparagraph 1 of Article 2 of the Clean Air Conservation Act, and carbon dioxide among greenhouse gases defined in subparagraph 3 of the same Article;

14. The term "sulphur oxide emission control sea area" means the sea areas prescribed by Ordinance of the Ministry of Oceans and Fisheries, which need measures to specially control the emission of sulphur oxides from ships in order to prevent air pollution and adverse effects on land and sea resulting therefrom;

15. The term "volatile organic compound" means oil and noxious liquid substances among hydrocarbons, which fall under subparagraph 10 of Article 2 of the Clean Air Conservation

Act;

16. The term "ship" means things (including those with an outboard motor) used or usable for navigation above or below water, and fixed or floating oil-prospecting ships, and platforms prescribed by Ordinance of the Ministry of Oceans and Fisheries;

17. The term "marine facility" means facilities or structures prescribed by Ordinance of the Ministry of Oceans and Fisheries, which are continuously installed or placed in, or thrown into sea areas (including harbors defined in subparagraph 1 of Article 2 of the Harbor Act; hereinafter the same shall apply) or between a sea area and land;

18. The term "bilge water" means emulsion mixtures stagnating at the bottom of a ship;

19. The term "port management authority" means the management authorities under Article 20 of the Harbor Act, fishery harbor management authorities under Article 35 of the Fishing Villages and Fishery Harbors Act, and port authorities under the Port Authority Act;

20. The term "sea area management authority" means sea area management authority as defined in subparagraph 8 of Article 2 of the Act on Conservation and Utilization of the Marine Environment;

21. The term "ship energy efficiency" means the amount of energy used by a ship in connection with freight transportation, which is shown as carbon dioxide generation ratio;

22. The term "ship energy efficiency design index" means an index showing the amount of carbon dioxide emitted by a ship in transporting one ton of cargo one nautical mile, which is calculated by the method prescribed and publicly notified by the Minister of Oceans and Fisheries.

Article 3 (Scope of Application)

(1) This Act shall apply to the management of the marine environment in the following sea areas, water zones, zones, ships, marine facilities, etc.: Provided, That the management of the marine environment (excluding inspections for research, academic, or policy-making purposes) and the prevention of marine pollution related to radioactive substances shall be governed by the Nuclear Safety Act: *<Amended by Act No. 10911, Jul. 25, 2011; Act No. 14516, Dec. 27, 2016; Act No. 14605, Mar. 21, 2017>*

1. Territorial sea provided for in the Territorial Sea and Contiguous Zone Act and sea areas prescribed by Presidential Decree;

2. Exclusive economic zones defined in Article 2 of the Act on the Exclusive Economic Zone and Continental Shelf;

3. Environmental management sea areas designated under Article 15;

4. Submarine mining areas designated pursuant to Article 3 of the Submarine Mineral Resources Development Act.

(2) This Act shall apply to the prevention of marine pollution caused by ships of the Republic of Korea defined in Article 2 of the Ship Act (hereinafter referred to as "Korean ships") outside the sea areas, water zones, and zones referred to in each subparagraph of paragraph (1).

(3) This Act shall apply where ships other than Korean ships (hereinafter referred to as "foreign ships") are sailing or anchored inside the sea areas, water zones and zones referred

to in each subparagraph of paragraph (1): Provided, That Articles 32, 49 through 54, 54-2, 56 through 58, 60, 112, and 113 shall not apply to foreign ships on international voyages. *<Amended by Act No. 11597, Dec. 18, 2012>*

(4) Except as otherwise expressly provided for in this Act, the sulphur content standards for fuel oil under Article 44 and the quality standards for fuel oil under Article 45 shall be governed by the Petroleum and Alternative Fuel Business Act and the Clean Air Conservation Act.

(5) Except as otherwise expressly provided for in this Act, the disposal of pollutants shall be governed by the Wastes Control Act, the Water Environment Conservation Act, the Sewerage Act, and the Act on the Management and Use of Livestock Excreta. *<Amended by Act No. 10803, Jun. 15, 2011; Act No. 14532, Jan. 17, 2017>*

(6) Except as otherwise expressly provided for in this Act, the permissible emission levels of air pollutants, including nitrogen oxides, generated by the diesel engines of ships, shall be governed by the Clean Air Conservation Act.

Article 4 (Relations with International Conventions)

Where the standards for the marine environment and marine pollution, which are determined by an international convention internationally in force, conflict with the matters provided for in this Act, the international convention shall prevail: Provided, That the same shall not apply to cases where the matters provided for in this Act contain higher standards than those in the international convention.

Articles 5 through 7 Deleted. *<by Act No. 14747, Mar. 21, 2017>*

Article 8 Deleted. *<by Act No. 14747, Mar. 21, 2017>*

Article 9 (Marine Environmental Measuring Network)

(1) In order to implement comprehensive inspection of marine environment pursuant to Article 18 (1) of the Act on Conservation and Utilization of the Marine Environment, the Minister of Oceans and Fisheries shall organize marine environmental measuring networks, as prescribed by Ordinance of the Ministry of Oceans and Fisheries, and measure the marine environment on a regular basis. *<Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013; Act No. 14747, Mar. 21, 2017>*

(2) Any Mayor/Do Governor may separately organize marine environmental measuring networks fit for the waters under his/her jurisdiction, referring to the marine environmental measuring networks organized by the Minister of Oceans and Fisheries pursuant to paragraph (1). In such cases, when the Mayor/Do Governor intends to organize marine environmental measuring networks in the waters under his/her jurisdiction or change any details thereof, he/she shall give prior notice thereof to the Minister of Oceans and Fisheries. *<Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013>*

Article 10 (Korean Standard Method of Examination for Marine Environment)

The Minister of Oceans and Fisheries shall determine and publicly notify the Korean standard method of examination for the marine environment to ensure accuracy and consistency in surveys and assessments with regard to the marine environment, such as

the organization, operation, etc. of marine environmental measuring networks under Article 9 (1). In such cases, if Korean Industrial Standards have been publicly notified under Article 12 (1) of the Industrial Standardization Act in connection with the Korean standard method of examination for the marine environment, the publicly notified Korean Industrial Standards shall prevail, except under special circumstances. <Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013; Act No. 13084, Jan. 28, 2015; Act No. 14747, Mar. 21, 2017>

Article 11 (Marine Environmental Information Networks)

(1) The Minister of Oceans and Fisheries shall build marine environmental information networks and provide information on the marine environment to citizens, as prescribed in Article 21 of the Act on Conservation and Utilization of the Marine Environment. <Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013; Act No. 14747, Mar. 21, 2017>

(2) If necessary to build marine environmental information networks under paragraph (1), the Minister of Oceans and Fisheries may request the heads of relevant administrative agencies to submit necessary data. In such cases, the heads of the relevant administrative agencies shall comply therewith, except under special circumstances. <Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013>

(3) Matters necessary for building, operating, and managing marine environmental information networks under paragraphs (1) and (2) and other matters shall be prescribed by Ordinance of the Ministry of Oceans and Fisheries. <Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013>

Article 12 (Accuracy Control for Marine Environmental Measuring and Analyzing Institutes)

(1) With respect to the institutes prescribed by Presidential Decree, which measure and analyze the state of the marine environment (hereinafter referred to as "measuring and analyzing institute") to conduct accuracy control for marine environmental data under Article 22 of the Act on Conservation and Utilization of the Marine Environment, the Minister of Oceans and Fisheries may take necessary measures (hereinafter referred to as "accuracy control"), including evaluation of their measuring and analyzing capabilities, provision of relevant educational programs, verification of measurement and analysis-related materials, etc., as prescribed by Ordinance of the Ministry of Oceans and Fisheries, to ensure accurate and reliable measurement and analysis of the marine environment. <Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013; Act No. 14747, Mar. 21, 2017>

(2) If deemed necessary upon accuracy control for a measuring and analyzing institute, the Minister of Oceans and Fisheries may order such institute to improve or supplement relevant equipment and devices or to take other necessary measures. <Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013>

Article 12-2 (Criteria for Accuracy Control)

(1) The Minister of Oceans and Fisheries shall determine and publicly notify criteria for accuracy control (hereinafter referred to as "accuracy control criteria") necessary with regard

to the criteria and methods for surveying marine environment, processing obtained data, managing information, etc.

(2) Details of and methods for the accuracy control criteria and other necessary matters shall be prescribed by Ordinance of the Ministry of Oceans and Fisheries.

Article 12-3 (Accuracy Control Plans)

(1) To perform surveys of marine environment that meet the accuracy control criteria, to process obtained data, and to manage information, institutions designated by Presidential Decree to conduct comprehensive surveys of the marine environment (hereinafter referred to as “survey institution”) shall prepare plans necessary for accuracy control and obtain approval from the Minister of Oceans and Fisheries.

(2) To disseminate accuracy control criteria, the Minister of Oceans and Fisheries may guide survey institutions designated by Presidential Decree in planning for accuracy control, acquiring required skills, etc.

(3) Matters regarding the criteria for preparing accuracy control plans, verification of and procedures for implementation of accuracy control plans, etc., shall be prescribed by Ordinance of the Ministry of Oceans and Fisheries.

Article 13 (Certification of Measuring and Analyzing Capabilities)

(1) The Minister of Oceans and Fisheries may certify the capabilities of a measuring and analyzing institute deemed in compliance with the measuring and analyzing standards prescribed by Ordinance of the Ministry of Oceans and Fisheries upon accuracy control. <Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013>

(2) The Minister of Oceans and Fisheries shall conduct regular accuracy control for measuring and analyzing institutes, the measuring and analyzing capabilities of which are certified under paragraph (1), every three years, and renew such certification accordingly: Provided, That where any changes are made to any details of the certified measuring and analyzing capabilities, which fall under the important matters prescribed by Ordinance of the Ministry of Oceans and Fisheries, he/she shall conduct accuracy control at any time and renew the certification of measuring and analyzing capabilities accordingly. <Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013>

(3) If a person whose measuring and analyzing capabilities have been certified falls under any of the following, the Minister of Oceans and Fisheries shall revoke his/her certification: <Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013>

1. If he/she has obtained the certification by fraud or other illegal means;
2. If he/she fails to comply with the measuring and analyzing standards under paragraph (1) upon accuracy control under paragraph (2);
3. Other cases in which the certification of measuring and analyzing capabilities is inappropriate and which fall under the grounds prescribed by Presidential Decree.

(4) Procedures for filing an application for the certification of measuring and analyzing capabilities under paragraphs (1) and (2), issuance of a certificate, and other necessary matters shall be prescribed by Ordinance of the Ministry of Oceans and Fisheries.

<Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013>

Article 14 Deleted. *<by Act No. 14747, Mar. 21, 2017>*

Article 15 (Designation and Management of Environmental Management Sea Areas)

(1) If deemed necessary to preserve and manage the marine environment, the Minister of Oceans and Fisheries may designate and manage environmental preservation sea areas and specially-managed sea areas (hereinafter referred to as "environmental management sea areas") as classified in the following. In such cases, he/she shall first consult with the heads of relevant administrative agencies: *<Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013; Act No. 14747, Mar. 21, 2017>*

1. Environmental preservation sea areas: Any of the following sea areas prescribed by Presidential Decree (including land which directly affects marine pollution):

(a) Sea areas designated as specific-use areas for protecting and fostering fishery resources, from among the natural environmental conservation areas provided for in subparagraph 4 of Article 6 of the National Land Planning and Utilization Act;

(b) Sea areas which have the well-preserved marine environment and ecosystems and require continuous preservation;

2. Specially-managed sea areas: Sea areas prescribed by Presidential Decree, in which it is impracticable to meet the marine environmental standards under Article 13 (1) of the Act on Conservation and Utilization of the Marine Environment or there are substantial or potential obstacles to preserving the marine environment and ecosystems (including land which directly affects marine pollution).

(2) Where the results of the measurement and examination of the state of the marine environment and sources of pollution in an environmental preservation sea area fail to meet the marine environmental standards under Article 13 (1) of the Act on Conservation and Utilization of the Marine Environment, and thus it is deemed likely to cause a serious damage to the health of citizens or the birth and breeding of living things, the Minister of Oceans and Fisheries may restrict the installation or modification of facilities prescribed by Presidential Decree within the environment preservation sea area in question. *<Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013; Act No. 14747, Mar. 21, 2017>*

(3) Where the results of the measurement and examination of the state of the marine environment and sources of pollution in a specially-managed sea area fail to meet the marine environmental standards under Article 13 (1) of the Act on Conservation and Utilization of the Marine Environment, and thus it is deemed likely to cause a serious damage to the health of citizens and the birth and breeding of living things, the Minister of Oceans and Fisheries may take the following measures: *<Amended by Act No. 8852, Feb. 29, 2008; Act No. 11690, Mar. 23, 2013; Act No. 14747, Mar. 21, 2017>*

1. Restricting the installation or modification of facilities in the specially-managed sea area;

2. Controlling the total quantity of pollutants discharged from places of business located in the specially-managed sea area.

(4) Facilities, the installation or modification of which is restricted pursuant to each

subparagraph of paragraph (3), details of restriction, scope of sea areas in which the total quantity of pollutants is controlled, items and method of control, and other necessary matters shall be prescribed by Presidential Decree.

Article 16 (Formulating, etc. Master Plans for Environmental Management Sea Areas)

(1) With respect to environmental management sea areas, the Minister of Oceans and Fisheries shall formulate a master plan for environmental management sea areas, including the following, every five years, and shall formulate and implement a management plan by sea area which aims at environmental conservation in a specific sea area after customizing the master plan for environmental management sea areas. In such cases, he/she shall first consult with the heads of relevant administrative agencies: <Amended by Act No. 8852, Feb. 29, 2008; Act No. 10803, Jun. 15, 2011; Act No. 11690, Mar. 23, 2013>

1. Matters concerning observation of the marine environment;
